The Weekly Lumberman — Published every Wednesday, contains reliable and up-to-date reports of market conditions and tendencies in the principal manufacturing districts and leading domestic and foreign wholesale markets. A weekly medium of information and communication between Canadian timber and lumber manufacturers and exporters and the purchasers of timber products at home and abroad.

The Monthly Lumberman— A 32-page journal, discussing fully and impartially subjects pertinent to the lumber and wood-working industries. Contains interviews with prominent members of the trade, character sketches and portraits of leading lumbermen, etc. Its special articles on technical and mechanical subjects are especially valuable.

THE LUMBER TRADE IN 1904.

The February number of the CANADA LUMBERMAN will contain the usual annual review of the lumber trade, for which the statistics are now being collected. Many manufacturers have supplied the information asked for in our circular letter, and we hope that those who have not responded will do so at once.

We shall also be glad to receive from any of our readers statistics as to production or shipments covering their district which would assist us to make our report as complete as possible.

CURRENT TRADE CONDITIONS.

ONTARIO.

Few lumber salesmen are on the road. Manufacturers and dealers are taking inventories and closing up the business for the past year. The movement of lumber, therefore, is comparatively light, although larger than at the corresponding time one year ago. Taken as a whole, the trade is in a very satisfactory condition. Stocks of the upper grades of white pine are fairly heavy, but this is offset to a large extent by the small stocks of the lower qualities. The demand for mill culls was brisk throughout the entire year, with the result that manufacturers are now almost completely sold out. There is general anticipation that the early spring will witness an active demand for white pine, and it is expected that in some grades there may be an advance. The average of prices will probably be higher than in 1904, but this will depend upon later developments. Red pine has declined considerably during the past twelve months and seems to be slow to recover.

The hardwood market is two-sided. Some dealers have contracted for large blocks of stock and believe that the tendency is distinctly upwards, whereas, on the other hand, there are ample stocks for nearby requirements, and most manufacturers are willing to accept orders at

current prices. It is known also that a few large consumers are fairly well stocked and will not be in the market for some time. As compared with one year ago, the supply of basswood is perhaps heavier than any other lumber.

QUEBEC AND NEW BRUNSWICK.

There have been few transactions in spruce lumber on which to base a prediction as to future prices. The Quebec shippers are not urging sales. Within the past month, however, conditions have improved and prices have advanced. Whether the improvement will be carried further will depend largely upon developments in the British market. There is little or no profit in manufacturing deals and selling them at current prices, and unless the return to the manufacturer shall be greater in the future, the production is likely to be much curtailed. There has been quite a recovery in clapboards, which declined from $6 to $8 per thousand feet during the past summer.

MANITOBA AND BRITISH COLUMBIA.

This is the dullest period of the year for the lumber trade of the West, the demand being confined almost exclusively to small lots of finishing stock. Dealers in the country districts are buying nothing worthy of note, and the next two or three weeks will be given up to maturing plans for the coming season. The outlook is uncertain. The consumption of lumber will probably be as great as during the past year, although building operations in Winnipeg may show some falling off. Prices should experience some recovery, but until conditions in British Columbia manufacturing circles improve, not much progress in that direction is likely to be made.

UNITED STATES.

The close of the year finds the lumber business of the United States in a healthy condition. No one is trying to urge sales and such orders as are being booked are largely for actual requirements, although some dealers are contracting for the new cut. Stocks of most kinds of lumber are moderate. It is estimated that there is only 90,000,000 feet of all kinds on the docks at Duluth, and of this amount less than 50,000,000 feet is unsold. No. 3 shop and better is bringing from $18 to $21 on dock at Duluth, No. 1 Common $19, and No. 2 Common $17, while No. 3 Common is strong at $15. In Chicago there is a scarcity of 2x12 dimension stock, on which the price has advanced from $18.75 to $20 within the past few weeks. The position of southern pine is very favorable. The curtailment of production has resulted in a short supply and a recovery in price. It is said that the price on car stuff has advanced from $4 to $6 a thousand, and yard stock from $1.50 to $3. The mills have plenty of orders for the new year and a further enhancement of values is looked for. The hemlock market is quiet but steady. Prices in the Siginaw Valley rule at $12 and $12.50 for piece stuff and $13 for boards. The movement of hardwoods is somewhat light, but the undertone of the market is firm. Quartered oak is still dragging, while plain oak sells as fast as it can be found, being in very light supply. Rock elm and birch are in some demand, with more enquiry for 2 inch than for the thinner sizes. Maple does not appear to be very strong, and estimates of 30,000,000 to 40,000,000 feet of dry stock carried over from last year have influenced sentiment somewhat. The maintenance of present prices of this lumber is about all that is expected.

It is some years since white pine lath have been so scarce and holders are able to get almost any price they ask. The recovery in the price of red cedar shingles does not seem to have held in all instances, but as the mills are still shut down, it is not easy to advance any good arguments in favor of lower prices.

GREAT BRITAIN.

Business in lumber is not expanding very rapidly, and despite the improvement which has taken place within the past month or six weeks, there is apparent on all sides a tendency towards conservatism. This may gradually pass away as the spring approaches, especially if the Russian-Japanese war should come to an early termination and money become easier. The tightness of money is doubtless exerting an influence upon the trade at the present time. There is much satisfaction in knowing that stocks of lumber on the British market are light and not likely to be greatly increased during the winter months. This condition should lay the foundation for a healthy demand as soon as new building operations are commenced. There seems little prospect of a decline in prices of white pine or spruce for future delivery, but it is still doubtful whether the increased prices which shippers are asking will be realized. As to the spruce situation the Timber Trades Journal says:—"In spruce the rise has been more rapid than we anticipated, and for a large steamer cargo from Miramichi, with about the usual large percentage of sevens and eights, shippers were recently asking £7 for the usual West Coast range. We think it would have been better if the ascent from about £6 2s. 6d. had been through more graduated stages, and had taken more time in the process. While the Liverpool market is more than amply stocked, and there are fears that consignments during the winter may be heavy, for which purpose the liner services would be available, in London values have been kept down by the low prices ruling for competing shipments of whitewood from Riga. In the Bristol Channel there are still considerable portions of the earlier and cheaper cargoes unsold, and the prices obtainable for spruce in the Midlands are so low that material advances must take place before a fair profit upon the prices shippers are now asking for cargoes can become apparent." Hardwoods are feeling the effects of a lack of demand from the cabinet trade and prices are no more than steady. Plain oak planks are in favor and early shipments will likely bring good prices.

STOCKS AND PRICES.

The Boston Last Company are buying large quantities of logs in the vicinity of Richmond, Que.

T. A. Burrows has purchased Shaw Bros. timber limit on the west end of the Riding Mountain, N. W. T.

The North-Eastern Railway Company, of Newcastle, England, have just placed an order for 500 loads of Quebec oak.

Alex. McBeath is shipping a considerable quantity of hardwood lumber from

C. McDonald is logging in the vicinity of Temperance Vale, N. B., for George Upham. He expects to take out about 3,000,000 feet.

Eddy Bros. & Company, of Blind River, Ont., have about 9,000,000 feet of lumber on hand out of a cut last season of 28,000,000 feet. They also manufactured 8,200,000 pieces of lath and have 2,250,000 pieces on hand.

Huff & Carter, of Edmonton, N. W. T., have secured a contract to supply the Canadian Northern Railway with 100,000 railway ties, to be delivered at Battleford during the coming summer. They have secured limits west of Edmonton on which they expect to secure the necessary timber.

E. H. Lemay, of Montreal, has contracted with McLachlin Bros., of Arnprior, Ont., for the white pine lumber to be cut by them during the coming season. Some of the lumber is intended for export to the United States and will be handled through W. M. Cromble & Company, of New York.

L. J. Tweedie, Acting Surveyor General, Fredericton, N. B., will receive tenders up to January 11th for a license to cut timber on two square miles of timber lands situated on the Miramichi Portage Road and Five-Mile Brook Branch of Cross Creek. The applicant is John Gibson, and the upset price $20 per square mile in addition to stumpage.

Roderick & Son; 33,000 onion crate shooks, 20,000 laths, 17,000 ft. spruce boards, plank and scantling, by G. & G. Flewwelling Mfg. Co. For Antigua—100,000 shingles, by L. G. Crosby, 25,000 shingles, by T. H. Estabrooks. Steamer Lake Michigan, for London, 145,648 ft. deals, 36,000 bdls. shooks, 268 bdls. pulp, 824 pcs. maple lumber. Steamer Sicilian, for Liverpool, 45,206 ft. spruce plank, 11,681 ft. spruce ends.

From Halifax, N.S.: Steamer Briardene, for British West Indies, 16,449 ft. hemlock lumber, value $165; 62,560 ft. spruce lumber, value $927; 16,000 ft. pine lumber, value $360, by Pickford & Black, agents. Steamer Manchester Importer, for Manchester, 310,606 ft. spruce deals, value $1,249, by Furness, Withy & Co., agents. Steamer Gulf of Ancud, for London, 10,994 ft. hemlock deals, value $990, by Furness, Withy & Co., agents. Steamer Sicily, for Liverpool, 318,192 ft. spruce deals, value $3,647; 77,339 ft. hemlock deals, value $773, by Furness, Withy & Co., agents.

BROOM HANDLES.

If an enterprising man with supplies of cheap Spruce, Basswood or Poplar care to put in several machines to work broom handles we can take his output. Write in first instance to Empire, care of CANADA LUMBERMAN.

THE BARBADOS MARKET.

Messrs. S. P. Musson, Son & Company's report of December 17th gives the following information regarding the Barbados market:

The fortnight under review has been barren of arrivals of white pine and spruce, in consequence of which the market shows a firmer tendency, and although there is a fair stock of second quality white pine in dealers' yards, merchantable is being enquired for and moderate arrivals of this quality would do fairly well. Spruce is in light stock, and one or two cargoes would meet with remunerative prices, as the crop season is now approaching, when there is a good demand for this class of lumber.

The steamer Dahome brought down 400 bundles of Cedar Laying Clear shingles, which were imported for a dealer, and the Blenheim from Gaspe is about due and brings a cargo of both Long and Laying, which will meet with a rather dull market, as in consequence of the drought there is not much demand, and although the stock of Long Cedar is not large it is sufficient for present requirements. Laying Cedar are still in full supply.

Shooks.—The steamer Dahome brought down 441 bundles one trip which had been previously sold to dealers, and stocks of all descriptions are sufficient, with a cargo now due from Portland to fill requirements.

Wood Hoops.—We understand that a cargo of French is due here early in the new year, which will meet with a rather dull market, as present stocks are about all that will be required, lotting rates remaining nominal at $20.50 for long and $18 for short.

SOUTHERN CYPRESS LUMBER SELLING COMPANY

New Orleans, La.

NEW BRUNSWICK LETTER.

(Correspondence of the CANADA LUMBERMAN.)

ST. JOHN, N.B., December 31st, 1904.—Since last writing very little of importance has taken place in the local lumber market. Shipments of all kinds have been light during the past month, particularly shipments by schooner to New England ports, but not more so than usual at this time of year. The lack of stimulus which always accompanies the holidays is very noticeable in both the American and English markets. Very little is being done by any of the local firms in either of these directions, either in selling or delivering.

While the quiet season lasts in the English market any change in price is improbable, as there is not enough demand to cause an advance and offerings are so light that the probabilities of a drop are practically void.

On account of these conditions any attempt to use the prevailing figures as an indication of what will prevail in the English markets in the near future would be ill-advised. Just what conditions will be predominant when the winter lethargy has been dispelled from this market it is not possible to positively state. A decidedly optimistic feeling is prevalent among the manufacturers and dealers in these parts. They are looking forward to next season, confident that it will show a great improvement over this season in prices and demand.

In regard to prices of English deals, it would be scarcely correct to say that there has been any general advance during the last month, but it is certain that a specification containing the usual percentages of widths and of an ordinary average length could not be bought, f.o.b. steamer St. John, less than $12.50 per M s.ft., two-thirds price for fourths and ends.

Shipments of English deals have been quite as heavy as is usual at this time of year. Although no cargo made up entirely of lumber has has gone forward during that time, there were several large parcels shipped per the winter port steamers, and as there will be practically none manufactured in these parts for the next three months, there is no doubt that, when the time comes to resume sawing, it will find the wharves entirely cleaned up.

Since last writing lath have shown a further decline. As mentioned in my letter of December 1st, lath had dropped, following heavy receipts in New York and vicinity, from $2.35 to $2.10 per M, f.o.b. St. John. A drop of from 10 cents to 15 cents has now occurred, and Provincial lath can be bought at St. John for $2.00 per M. Stocks are not at all heavy for this time of the year, there being probably from four and one-half to five millions of lath distributed about the different wharves in this vicinity. In view of the decline in price mentioned above, it is altogether probable that the much greater part of these will be wintered in the hope that they will command a better figure in the early spring.

WHITE PINE PRODUCTION AND STOCKS.

The white pine mills at Duluth, Minn., manufactured during 1904 approximately 285,000,000 feet of lumber, this being a falling off of 104,000,000 feet when compared with the production in 1903. Of the entire cut the stocks on dock at Duluth and Superior towards the close of December aggregated only 51,301,000 feet. The American Lumberman gives the following statistics of the production and stocks at the head of the lakes for the past eight years :

Year	*Total amount lumber manufactured*	*Total amount lumber on dock Dec. 1*	*Total amount unsold on dock Dec. 1*
1904....	285,000,000	96,000,000	51,000,000
1903....	389,000,000	105,000,000	48,000,000
1902....	443,000,000	119,000,000	59 000,000
1901....	426,000,000	139,000,000	41,000,000
1900....	416,000,000	168,000,000	126,000,000
1899....	426,000,000	120,000,000	37,000,000
1898....	324.000,000	120,000,000	73,000,000
1897....	290,000,000	129,000,000	109,000,000

THE LATH DEMAND.

White pine and norway lath are exhibiting exceptional strength in value. There is an absolute shortage of this item. At the head of the lakes this condition is especially noticeable and it is commanding full list prices at all other points. The Mississippi Valley Lumberman says the situation cannot be remedied, but is calculated to become intensified with the advance of the building season. The mills are short of this stock and they cannot increase their output within time to meet the requirements of the demand.

WEEKLY EDITION

The Lumberman Monthly Edition, 40 pages} $1.00 PER YEAR {The Lumberman Weekly Edition, every week.

THIS PAPER REACHES REGULARLY THE PRINCIPAL LUMBER MANUFACTURERS AND DEALERS THROUGHOUT CANADA, AND WHOLESALE BUYERS IN GREAT BRITAIN, THE UNITED STATES, AND OTHER FOREIGN MARKETS.

VOL. XI. TORONTO, MONTREAL AND WINNIPEG, JANUARY 11, 1905 No. 50

CANADA LUMBERMAN

PUBLISHED BY

The C. H. Mortimer Publishing Co'y of Toronto, Limited

Confederation Life Building - TORONTO.

Branch Offices:

38 ALLIANCE BUILDING, MONTREAL

720-721 UNION BANK BUILDING, WINNIPEG.

21 GREAT ST. HELEN'S, LONDON, E. C.

The Weekly Lumberman — Published every Wednesday, contains reliable and up-to-date reports of market conditions and tendencies in the principal manufacturing districts and leading domestic and foreign wholesale markets. A weekly medium of information and communication between Canadian timber and lumber manufacturers and exporters and the purchasers of timber products at home and abroad.

The Monthly Lumberman— A 32-page journal, discussing fully and impartially subjects pertinent to the lumber and wood-working industries. Contains interviews with prominent members of the trade, character sketches and portraits of leading lumbermen, etc. Its special articles on technical and mechanical subjects are especially valuable.

Lethbridge, N. W. T.

or H. B. GILMOUR, ESQ.,
Molson's Bank Building, Vancouver, B.C.

The Poulin Lumber Company, Limited, of Ottawa, has assigned, and the assets are to be sold.

THE LUMBER TRADE IN 1904.

The February number of the CANADA LUMBERMAN will contain the usual annual review of the lumber trade, for which the statistics are now being collected. Many manufacturers have supplied the information asked for in our circular letter, and we hope that those who have not responded will do so at once.

We shall also be glad to receive from any of our readers statistics as to production or shipments covering their district which would assist us to make our report as complete as possible.

CURRENT TRADE CONDITIONS.

ONTARIO.

Weather conditions do not permit of much activity in lumber circles, but inquiries are sufficient in number to encourage the hope that the spring will witness a revival in the demand. The feeling is distinctly optimistic, and at the present time there is scarcely a cloud on the lumber horizon. While some manufacturers are carrying considerably more lumber than one year ago, the bulk of it has been sold and is awaiting shipment. Other manufacturers claim that their stocks are fully 50 per cent. less than one year ago. Although there has been no general advance in prices, nor would such seem reasonable at this period, a few manufacturers who sell direct to the retail trade are asking an advance averaging $1 per thousand. No. 1 cuts and better is perhaps the weakest item in the white pine list.

Logging conditions are excellent. Hauling is making good progress and is likely to be completed earlier than usual. The cut in the Georgian Bay district is estimated at 75 per cent. of that of last year.

QUEBEC AND NEW BRUNSWICK.

The statistics of stocks of timber wintering at Quebec show that the continued advance in the price of waney pine has affected the export. The stock is 1,268,937 cubic feet, as compared with 406,038 cubic feet one year ago. The stock of square pine, on the other hand, is the lightest on record, being only 347,067 cubic feet. Notwithstanding the large stock of waney, the trade are not anticipating a decline in price, as the cost of production is very great. The result will probably be a marked reduction in the quantity manufactured during the present winter. Oak timber is also in greater supply, but elm shows a reduction of about 100,000 cubic feet. The lighter export of spruce deals is also responsible for a heavy wintering stock of that lumber.

The logging season has been favorable

in the Eastern Provinces and all manufacturers are likely to be able to bank the estimated quantity of logs, although the total cut will be much smaller than last year. There will be a reduction in cedar as well as spruce, as the manufacture of shingles has not been profitable of late. Extras are still selling for Boston delivery at $3.25, and Clears at $2.80, with a relatively better demand for the latter.

UNITED STATES.

The present seasonable dullness in the lumber trade is expected to give place to more activity in the near future. Buyers are already visiting the producing points for the purpose of contracting for the new stock and picking up any dry lumber that is still unsold. Rail shipments from the Lake Superior district are increasing and the present supply of white pine is likely to be shipped out before spring. Eastern wholesale dealers are anticipating another reduction in the quantity of pine lumber produced and are therefore fortifying themselves as far as possible against a possible shortage by keeping their yards well stocked. In low grade pine this is not possible, for the supply is very light. Chicago dealers report a scarcity of 12-inch boards and 12-inch dimension stock. The shortage of white pine piece stuff is being largely replaced by hemlock and southern pine and prices all round are very firm. The spruce situation is decidedly in favor of the manufacturers, some of whom are turning down orders. Yard dealers in Boston are offering $17 for 2x3 and 2x4 and $18 for 2x8. Of the hardwoods, oak and birch continue to lead. Plain oak is sold almost up to the saw, whereas quartered stock is accumulating.

The position of white pine lath is such that a sharp advance may take place at any time. Dealers who have any are not selling at present prices and it is the rule to offer a premium to secure stock.

GREAT BRITAIN.

The shipments of spruce deals by the regular liners have been smaller than anticipated. This has been beneficial to the British market and the improvement recently reported has been fully maintained. There is no indication thus far of next season's prices, but at the time of writing the prospects are more hopeful than they have been for some time. An increase in the consumption is reported. The decline in the price of cotton has had a stimulating effect throughout Lancashire and it is said that a number of new cotton mills are to be built this year. Stocks of Canadian pine and spruce have now reached the point where they make a favorable comparison. Taking the port of Glasgow as an example, it is found that the supply of Quebec first pine deals is nearly a third less than one year ago. Second pine is about half, thirds are only a little more than half, and fourths about a third less. There is also a considerable reduction in pine planks and boards. Spruce deals are 2,000,000 feet less, the present Glasgow stock being about 18,000,000 feet. The stock of red pine deals is slightly greater.

STOCKS AND PRICES.

J. H. Conn expects to take out 600,000 feet of logs this winter in the vicinity of Franktown, Ont.

C. J. Brown, City Clerk of Winnipeg, Man., is asking for tenders up to Tuesday, January 24th, for the supply of four carloads of tamarac piling.

The St. Anthony Lumber Company, of Whitney, Ont. manufactured 45,000,000 feet of lumber last season and have only about 3,000,000 feet on hand.

The Murphy Lumber Company, of Marksville, Ont. expect to cut about 3,000,000 feet of lumber during the coming summer. This will consist of hemlock, cedar and hardwoods.

G. D. Campbell, who has purchased the property of the Sissiboo Pulp & Paper Company at Weymouth, N. S., expects to take out 7,000,000 feet of logs this winter, which will be used for the manufacture of lumber and pulp.

The Northwest Lumber Company, of Ponoka, N. W. T., are carrying over 1,500,000 feet of logs from last season and will take out about a similar quantity this winter, thus giving them 3,000,000 feet to saw during the coming season.

The Edward Hines Lumber Company have 10,000,000 feet of logs in the water at Duluth, Minn., left over from last year, and have just sold the lumber to be cut from them for delivery next spring. No. 3 boards are worth $15 in the Duluth market.

The license for cutting timber on the eastern side of Nepisiquit, southeast of Gloucester Junction, N. B., a block of seven square miles, was sold by the Surveyor General last week to the Sumner Company, of Moncton, at $20 per mile, which was the upset price.

L. J. Tweedie, Acting Surveyor General, Fredericton, N. B., will, on January 18, sell a license to cut timber on a three mile timber berth on McCollum's Brook, for which the Alexander Gibson Railway & Manufacturing Company is the applicant.

PRICES OF CEDAR POSTS AND POLES.

CANADIAN LUMBER IN GLASGOW.

The annual timber circular of Edmiston & Mitchells furnishes the following particulars of the Glasgow market:

WHITE PINE LOGS.—The total import for 1904 amounts to 7,840 loads, of which 7,195 loads fall to be classed as waney boardwood and 645 loads square. Throughout the year it has been disheartening to find so languid a market for this once highly favored timber, but the further advance in prices demanded this year leaves no other alternative but to seek elsewhere for substitutes. No doubt this further advance was justified by the greatly increased value of standing white pine, but a point has now been reached affecting consumption to such an alarming extent that unless prices can be promptly reduced the days of Canadian white pine logs are numbered. It is pleasing to note, however, that the quality of the shipments which came forward from Quebec gave general satisfaction. The consumption shows a falling-off from last year of nearly 10 per cent., and is 22 per cent. short of 1902. We have now on hand to start the New Year a combined stock of waney and square timber of 8,614 loads, 81 per cent. of which is waney and made up largely of 2nd quality and short wood.

RED PINE LOGS.—By a reference to the annexed stock statistics ample proof will be given of the diminishing trade in red pine logs. For several years past the manufacturer of logs has much preferred to sell his timber for conversion into deals, the result being that only 38 loads found their way to this market. It is quite probable that owing to the unsatisfactory position of the red pine deal market, makers of timber may be tempted to make some this winter.

ELM LOGS.—The statistical figures are interesting, and the import for the year shows a falling off of 63 per cent. as compared with last year. Throughout the year first-class rock elm has been extremly scarce. There was little made or wintered at Quebec last year, and shippers had but little to offer, and what they had was at extremely high prices. It will be noticed that the consumption has been quite fair, and has removed quite a quantity of the soft elm from the market. The stock of 1200 loads of elm still with us consists chiefly of this latter wood, and there is really very little first-class rock of good average girth and length. It almost looks as if this class of timber was within measurable distance of becoming a thing of the past.

OAK LOGS.—We started the year with a heavy stock, not only in the Clyde but also in Quebec, and therefore had every prospect of our stock being further increased. Fortunately, the import was moderate, but our chief consumers—viz., the railway companies—have, owing to depressed trade and poor traffic returns, been doing all they can to economize, which greatly affects the consumption of oak.

BIRCH.—The import of logs from Montreal and Quebec amounts to about 1030 loads, which is rather less than half of last year, and from the lower ports about 500, against 2000 loads in 1903. With the demand always outpacing the supply, prices were firm throughout the year, and as stocks are exhausted early shipments will meet with an eager demand at, it is safe to say, full values.

The arrivals of planks amounted to 2468 loads (chiefly from Halifax), as compared with 3400 loads in 1903, and met with a fairly brisk demand at from £7 to £8 10s. per standard. The stock on hand is quite unusually low, and prospects for new arrivals are favorable.

ASH.—The import of logs from Canada is 370 loads, and from the States about 650 loads, which compared with 240 and 1530 loads respectively in 1903. As has been the case for some years past, the demand for Canadian ash has been very slow, partly owing to the dulness of the furniture trade, and partly because buyers find so much difficulty in securing good logs of nice colour. The demand for States ash has also been very languid as compared with the past few years, and prices can hardly have proved satisfactory to shippers. Though the stock on hand is small, there is nothing in the situation to encourage shipments.

QUEBEC DEALS AND BOARDS.—The import from the St. Lawrence has amounted to about 7500 standards pine and 10,000 standards spruce, being a decrease of 8000 standards on the previous year, and

New Orleans, La.

the smallest import since 1900. The consumption has also been on a moderate scale, totalling about 20,000 standards, as against 24,000 standards last year. Stocks of all qualities of pine goods are lower than they have been for some years, and spruce is about the same as last year. Prices, owing to the moderate imports, have kept fairly steady, and, with the exception of red pine, are firm at the close. Current values are as under:—Broad first pine deals, £32 to £34; 11-inch, £29 to £31; ends and non-dimensions, £22 to £24. Second pine deals, 11-inch and up, £17 to £19; ends and non-dimensions, £13 to £14 10s. Third pine deals, 11-inch and up, £11 to £14; ends and non-dimensions, £9 10s. to £10 10s. Red pine deals, 9 and 11-inch, £10 to £11; narrows, £7 to £8 10s. First pine sidings and strips, 9 to 10-inch, £23 to £14; 11 to 12-inch, £25 to £26; 13 to 14-inch, £27 to £28. Spruce deals, 9-inch and up, £8 to £8 10s.; 7 8-inch, £9 15s. to £7 10s.

N. B. PINE AND SPRUCE.—The import has amounted to about 27,800 standards, being practically the same as in the previous year. The consumption has been exceedingly good, being about 28,000 standards, as against 27,000 in 1903. Prices fell away considerably during the year, but, we think, have now reached their lowest, and may be expected to firm up again soon. Values are, 9-inch and up, £7 10s. to £8; 7-inch and 8-inch, £6 5s. to £7.

THE OTTAWA VALLEY.

(Correspondence of the CANADA LUMBERMAN.)

OTTAWA, January 4th, 1905. — While there has been as yet no appreciable effect on the market quotations, a more hopeful feeling pervades the Ottawa lumber offices as regards both the American and British markets, and it is expected that 1905 will see an early increase in business.

The long open season in the States worked an improvement in the shingle market, the continuance of building operations creating a brisk demand. Cedar shingles, XXXX, 18 inch, are quoted at $3.25, and this is the lowest figure. Other lines, however, show no change.

From the limits comes word of continued activity in log cutting operations. A recent thaw worked to the improvement of the roads, packing down the snow, and making an early start on log hauling possible. The fall was an ideal one for log cutting, and on nearly all the limits the work in this branch will be continued until the middle of this month.

While some of the firms have taken an "off" year and suspended operations, others are increasing their output of logs. Amongst the firms that are maintaining an increased number of camps are J. R. Booth, Shepard & Morse, Fraser & Company and McLachlin Bros. Mr. Booth is paying attention to the production of pulp wood as well as logs, a large supply of the former being required for his new pulp and paper mills. The fact that such firms as McLachlin Bros. and Shepard & Morse are increasing their log output is indicative of the fact that the future of the lumber market is not giving any cause for alarm.

Of the firms that are out of the business this year, only one, the Hull Lumber Company, manufactured logs. The others, Edward Moore, Robert Hurdman and R. H. Klock & Company, confined their attention to the manufacture of square and waney timber. The firms up the line, the Pembroke Lumber Company, and A. & P. White, are getting out their usual stocks of logs. On the Rouge and other Lower Ottawa streams no decrease is noticeable.

THE OUTLOOK FOR HEMLOCK.

The hemlock situation remains unchanged. There is a holiday quiet about the trade and new developments cannot be expected until the middle of January. The present condition is one of shortage at all milling points in the east. The trade has kept the stocks from accumulating and at no point is there a desirable assortment. The Michigan situation is not much better and the Wisconsin mills are not overburdened with available stock. The market is now free from offerings

and all holdings are in strong hands. The situation is therefore firm and an air of expectancy is felt which indicates that advances upon present prices are not improbable very soon after the first of the year.

The demand for hemlock boards is exceptionally strong. The items of number two and three boards are very scarce. The supply of uppers is better but the demand for them is active. Dimension is meeting with a steady demand, which is keeping a large volume of this item moving.

A strong feature of the market is the persistent inquiry for quotations upon large amounts. Some large orders are reported to have been placed, shipments upon which are to commence early in January. Everywhere on this market there is the atmosphere which presages coming events and present holders of stock are regarding them with strong hopes of increased margins within the next ninety days.—Mississippi Valley Lumberman.

George E. Bryan, lumber dealers, Innisfail, N. W. T., is anuounced to have assigned to G. W. West.

CANADA LUMBERMAN

WEEKLY EDITION

The Lumberman Monthly Edition, 40 pages} $1.00 PER YEAR {The Lumberman Weekly Edition, every week.

THIS PAPER REACHES REGULARLY THE PRINCIPAL LUMBER MANUFACTURERS AND DEALERS THROUGHOUT CANADA, AND WHOLESALE BUYERS IN GREAT BRITAIN, THE UNITED STATES, AND OTHER FOREIGN MARKETS.

VOL. XI. TORONTO, MONTREAL AND WINNIPEG, JANUARY 18, 1905 No. 51

CANADA LUMBERMAN

PUBLISHED BY

The G. H. Mortimer Publishing Co'y of Toronto, Limited

Confederation Life Building - TORONTO.

Branch Offices:

35 ALLIANCE BUILDING, MONTREAL

720-721 UNION BANK BUILDING, WINNIPEG.

31 GREAT ST. HELEN'S, LONDON, E. C.

The Weekly Lumberman — Published every Wednesday, contains reliable and up-to-date reports of market conditions and tendencies in the principal manufacturing districts and leading domestic and foreign wholesale markets. A weekly medium of information and communication between Canadian timber and lumber manufacturers and exporters and the purchasers of timber products at home and abroad.

The Monthly Lumberman— A 32-page journal, discussing fully and impartially subjects pertinent to the lumber and wood-working industries. Contains interviews with prominent members of the trade, character sketches and portraits of leading lumbermen, etc. Its special articles on technical and mechanical subjects are especially valuable.

FOR SALE — 150,000 FEET OF 1¼" AND 1½" Birch, 30,000 feet of one inch Basswood, 200 000 feet of Hemlock at $10 F. O. B., 2x6 to 2x12, 10 to 16 feet. Two cars of sidings, 50,000 feet of Pine 1", 1½" and 2". For particulars apply to the HARCOURT LUMBER CO., Harcourt, Ont.

SAW MILLS AND LIMITS FOR SALE BY the undersigned: A large lumber mill, capacity 115M per per day, and a long timber mill capacity 35 per day, all in fine condition; guaranteed ready for work; situated at Little Current, Georgian Bay. If not sold soon will be willing to contract for sawing. Also Timber Berth, Township Harrow, 36 miles, and Townships Thompson, Bright and Bright Additional, 47 sq miles. Terms of sale part cash, time for balance, 6%. For further particulars apply to J. & T. CONLON, Thorold, Ont.

CURRENT TRADE CONDITIONS.

ONTARIO.

Lumber conditions in Ontario are much the same as one week ago. Consumption is at the minimum, with no prospect of an improvement within the next month. There are some enquiries for pine lumber for future delivery, but the unwillingness of manufacturers to give concessions to effect sales is limiting the volume of orders which is being booked. It is believed that buyers will come into the market early, and when contracting for the new cut is once commenced there is likely to be considerable activity and a display of confidence which is not now visible. Ottawa advices this week are quite optimistic.

Another good building season in Toronto is almost assured, and dealers are anticipating even a larger consumption of lumber locally than in 1904. Given a satisfactory United States trade, which is altogether probable, there seems no reason to expect a decline in the price of either white pine or hardwood lumber. This remark may be applied with greater emphasis to shingles, for present prices are low and an advance of some proportions might easily be brought about.

QUEBEC AND NEW BRUNSWICK.

The demand for spruce lumber is not heavy, but the conditions are such that prices are easily maintained. The plans of the operators for a limited input of logs are being carried out and it is quite certain that there will be a reduction, as compared with a year ago, in Quebec, New Brunswick and Nova Scotia. British specifications will figure less prominently in the lumber production of the year and more attention will be given to the American market.

There has been a slight improvement in New Brunswick cedar shingles, although it has not been sufficiently pronounced to warrant a change in our quotations. It is understood that some Extras have been contracted for at $3.25 and Clears at $2.85, for Boston delivery.

UNITED STATES.

Under the influence of unfavorable weather, the lumber business in the United States has not expanded during the past week. Some dealers are picking up stock at what they consider satisfactory prices and there is a general feeling that the spring trade will open up earlier than usual and probably be larger than that of 1904. White pine is not meeting with as severe competition from southern pine as when the prices of the latter were considerably lower, and in such grades as are scarce an advance may take place in the near future. The committee on values of the Southern Lumber Manufacturers' Association advises the members that prices on finishing stock, flooring and ceiling can be advanced $1 to $1.50 a thousand. All rough finish and dressed and matched lumber is in short supply. Coarse inch lumber in white pine is reported to be exceptionally scarce at Chicago, with an active demand for No. 4 and No. 5. The former grade is reported to be selling at $15 for delivery in that city. The statistical position of hemlock in Michigan is considered sufficiently strong to warrant an advance of 50 cents, and many manufacturers have raised their prices accordingly. Stocks in hand are moderate. Hardwoods are firm, with activity confined to plain oak, white ash, soft and rock elm, maple and birch. There is plenty of basswood offering and so far there has been little improvement in the demand.

Some dealers have endeavored to acquire a supply of lath for the spring trade, but have met with little success. White pine lath is practically out of the market. There is an average supply of spruce lath, which is selling in the Boston market at $3.40 for 1⅝ inch and $3.10 to $3.15 for 1½ inch. Shingles are no more than holding than own. Some of the mills in Washington have advanced the price of red cedars five cents, but this is about the limit.

GREAT BRITAIN.

The publication of the figures showing the quantity of lumber on the public docks at the leading importing centres of Great Britain has exerted a beneficial influence upon the trade, as the comparison with last year is most favorable to holders of

lumber. At the close of the year the total stock of Baltic deals and Canadian white pine and spruce deals and boards is about 4,000,000 pieces less than one year ago, which is computed as equal to 60,000,000 feet. Although the shortage at other ports is not correspondingly large, it is sufficient to strengthen the belief in a firm market for some time to come. Whether prices will further advance will depend in large measure upon the course of consumption, but it seems reasonable to expect that any change in values will be towards a higher level. Spruce deals are showing considerable strength, the relatively low price having stimulated the consumption. Quebec square and waney pine is not moving actively, as owing to the high price substitutes are being purchased to a considerable extent. Elm and birch have appreciated in price and are statistically in a strong position.

STOCKS AND PRICES.

Pugsley Bros., of River Hebert, N.S., are operating in the woods this winter on a limited scale.

No. 1 white pine lath are selling at Calumet, Mich., at $3.50 a thousand, the highest price known in that district.

The Morgan Lumber Company, of Blind River, Ont., are announced to have sold their stock of norway lumber, amounting to upwards of 4,000,000 feet.

The Seaman-Kent Company, of Meaford, Ont., are supplying the hardwood flooring for the new departmental store of the T. Eaton Company in Winnipeg.

The total receipts of lumber by vessel at Bay City and Saginaw during the season of 1904 were 126,602,039 feet, also 23,581,600 pieces of lath and 5,403,139 pickets.

Over 20,000,000 feet of lumber was cut last year by the four companies operating at Prince Albert, N.W.T., and it is probable that the output of this year will be still larger.

Slack cooperage stock is quiet and some of the cooperage mills have shut down for the winter. First-class elm flour barrel staves are quoted by jobbers at Buffalo at $9 to $9.50, first-class basswood heading at 6½ to 7 cents, and coiled hoops at $9.25 to $9.75 for 6-foot.

A license to expire August 1st, 1905, for cutting timber on a two-mile timber berth on the Miramichi Portage Road and Five Mile Brook, Bea of Cross Creek, was sold at auction at the Crown Lands Office, Fredericton, N.B., last week. It was bid in by the applicant, John Gibson, of Fredericton, at the upset price of $20 per square mile.

The Inglewood Pulp Company some time ago purchased the timber limits of Knight Bros. in St. John, Queens, Kings, and Charlotte Counties, N.B. A large portion of this property was swept by fire and the standing timber partially destroyed. The Inglewood Company have therefore decided to cut the timber as quickly as possible and the present winter's cut will probably be in the neighborhood of 20,000,000 feet.

Messrs. Denny, Mott & Dickson, of London, Eng., say of oak : "Oak has been very much handicapped by competition with the cheaper American article, and whether the production of Quebec oak is small or large, the quality has too much fallen off of late years to enable it to justify its claim to fetch much higher prices than other descriptions of oak ; the outlook is, therefore, a poor one unless its cost at the shipping ports can be radically cut down."

Messrs. S. P. Musson, Son & Company review the Barbados lumber market as follows : "The schooner Lewanika to our neighbors brought a mixed cargo of white pine and spruce, of which they offered and sold 25,000 feet of merchantable and 70,000 feet of second quality white pine at $26.50 and $20.53 respectively, the spruce being in fulfilment of a contract made in September at $22.50 and $18.50 for shipping and second quality ; a small lot of 13,000 feet of spruce ex. Blenheim was sold at $17 round. As advised in our last, the market for second quality white pine is fairly well stocked, but merchantable description is inquired for and moderate shipments will do well. Spruce is not in heavy supply and one or two small cargoes would meet with a ready sale. The barque Blenheim from Paspebiac, Que., arrived during the fortnight with a cargo of shingles. The Long Gaspe was sold by our neighbors at $5.50 per thousand, while for a small lot of same to ourselves we obtained $5.67. For 500,000 Laying Cedar by same vessel the consignees obtained $2, at which price 850,000 by Lewanika were placed, and we also sold 100,000 ex. Ocamo at the same rate. One hundred and fifty thousand Clear Cedar Laying ex. Lewanika, not realizing consignees' ideas, were stored. Our market is now well supplied with all descriptions and we must look for lower values for next arrivals."

LUMBER AND SHINGLES AT TONAWANDA.

The quantity of lumber and shingles received at Tonawanda for each of the past thirty years is given as follows :

Year.	Lumber, feet.	Shingles, pieces.
1874	144,754,000	10,822,500
1875	155,384,805	13,088,509

THE OTTAWA VALLEY.

(Correspondence of the CANADA LUMBERMAN.)

Ottawa, Jan. 9th, 1904.—The outlook in the Ottawa lumber market is a decidedly hopeful one. Usually the contracts for future cuts of deals and other lumber for the British market are made in November, but on account of the unsettled state of the foreign market, this business was put off this year till February. Watson & Todd secured one lot of deals from the Robert Hurdman Estate and manufactured at Fraser & Company's new mill in November at a decline of 5 per cent. on prices reigning the year previous. It was only a small lot, however, and the big end of the business was postponed until February. Discussing the move, a leading local manufacturer said to-day that the English buyers will find next month that it would have paid them better to have followed the usual plan and made their contracts in November. Conditions have so changed, according to this authority, that the manufacturers will be justified in holding out for better prices next month. There is a good, healthy outlook and conditions are improving in both the American and British markets.

From another reliable quarter it was learned that one of the leading firms of the Ottawa Valley had closed out their next summer's cut of high grade white pine to an American concern at a dollar advance on the prices ruling a year back.

A Tonawanda lumber buyer, who was in Ottawa this week, said that stocks across the line were so low that heavy and early spring buying of Canadian white pine would have to be resorted to. The American dealers were apprehensive about the future of both the buying and selling ends of the business and only purchased in lots sufficiently large to satisfy immediate demands. They have no stocks of any size to meet future business, and will have to buy soon and in liberal quantities in order to be able to handle spring business. Here is to be found one of the chief reasons for the optimistic feeling in the Ottawa district.

According to general report, the cut of square timber this winter will amount to a million and a half cubic feet, as compared with two and a half million feet the year previous. The principal firms engaged in manufacturing square timber this season are Thomas Mackie, ex-M. P., Pembroke; Graham & Ferguson, Ferguson & McFadden, Munro & Coxford and Mason & Gordon, all of North Bay. J R. Booth is also cutting square timber on the Butt limit, while the other concerns mentioned are working in the Nipissing country on the limits purchased from the Ontario Government a year ago. In addition to the million and a half being manufactured there is about half a million cubic feet of square timber left over on the limits from last season. This belongs to Edward Moore, Ottawa, R. H Klock & Company, Fraser & Company and the Robert Hurdman Estate, none of which concerns are making square timber this season. The Hull Lumber Company and the Rideau Lumber Company are also out of this branch, and J. R. Booth is working on a reduced scale.

From the limits comes the report that log drawing is well advanced. While some of the firms are finishing up log making, others will continue it on through the winter. Natural conditions are satisfactory. The cost of log production should be less this season than in the two previous years. Wages are lower and the men are doing more and better work. Team hire is also an easier proposition, showing a decrease of twelve per cent. Provisions all round are easier, for while flour is higher than last year, pork is lower in price. The situation on the whole should show at least a slight reduction in the cost of log production, and there should be more money in the business for the manufacturer.

TIMBER LIMIT TRANSACTIONS.

W. A. Avery, of Detroit, Mich., reports the sale of 20,000,000 feet of standing white pine in Minnesota at $8 a thousand stumpage.

The McClure Lumber Company, of Detroit, Mich., advise us that they have purchased 5,000 acres of timber on the Black Warrior river, in Hale and Green counties, Alabama. The tract contains about one-half oak and the balance hickory, pine, gum and cypress. They have also purchased a site for a mill and have contracted for the building and installing of a band mill which will cut 30,000 feet of hardwood daily.

BRITISH COLUMBIA LETTER.

(Correspondence of the CANADA LUMBERMAN.)

VANCOUVER, B. C., JANUARY 9TH, 1905.—As far as prices are concerned things have proceeded quietly since the new schedule was issued by the British Columbia Lumber and Shingle Manufacturers' Association on the 20th ultimo. Every one is satisfied, with the exception perhaps of the consumer, and he has to be. The cuts which were made in the figures were directly in favor, and since the regular rates have been resumed, while the millman and contractor are better pleased, the consumer has to pay more for his lumber. The general reduction, though, operates in his favor. Discounts off the new list are small, only 5 per cent. being offered on large lots.

There seems to be no diminution in building. The year just closed was a busy one, and the value of permits issued in Vancouver totalled within a hundred or two of $2,000,000. Already this year many applications have been made, and extensive operations will be carried on in all parts of the city.

Foreign trade has seen something of the old time activity during the past week or two, when three departures were made, leaving two vessels loading at the Hastings mill. The Pallas left for Callao, the Lottie Bennett for Iquique, and the British ship Falklandbank for Greenock. The County of Dumfries is loading for London, and the German bank Osterbek for Callao.

The Sayward Company, of Victoria, shipped on one of the Kosmos liners last week the first consignment of lumber to Mexico. Some 200,000 feet were sent, and it is hoped that this is the beginning of a large trade. Business has not amounted to much between Mexico and British Columbia in regard to lumber, though ships have carried various kinds of timbers to Santa Rosalia, on the Lower Californian peninsula.

Americans are dealing largely in British Columbia timber, with the idea of holding it until prices are better, because of larger demand. They recognize that this province will be one of the last resorts for lumber on the continent, and some of the best timber is being taken up. In the interior among those from south of the border who hold extensive areas are the Mundy Lumber Company, of Bradford, Pa.; Otis Staples, of Stillwater; the McGoldrick syndicate, of Minneapolis; the Elk Lumber and Manufacturing Company, composed of Minnesota people, and others. Recently on the coast was the large purchase of the Atland syndicate, of Detroit, and as a direct result other Michigan people are now negotiating for tracts, larger than have ever before been disposed of in one deal. They are after 400,000 acres, but further than that details are not obtainable.

Loggers of the mainland coast have reorganized thei association, which has been allowed to lapse since the disastrous season of the fall of 1903. New officers appointed were: J. S. Emerson, president; H. Gilley, vice-president; W. J. Paterson, secretary-treasurer; committee, W. H. Higgins, Capt. Magnesen, D. Esson, C. T. Moore, H. Whitaker, Nels Moran and D. McKinnon. It is the attention to maintain a schedule of prices, and effect other objects of organization. At the meeting on Thursday last a protest was sent to the Government at Victoria against granting land to the Pacific Coast Pulp and Paper Company, on the ground that it was an attempt to secure timber for speculation cheaply, and that the timber was mostly fir and cedar, and not suitable for pulp purposes. A petition to have this license cancelled is now in circulation. The loggers also favored the placing of a duty on lumber entering Canada from the United States.

The Canadian Pacific Pulp and Paper Company has announced its intention to erect right away a saw mill of about 40,000 feet daily capacity, and a sulphite pulp plant which will turn out from 35 to 40 tons per day of the best quality. Shipments are expected to be made within a year.

The assets of the Poulin Lumber Company, of Ottawa, were to have been sold by the assignee on Monday last.

LUMBER AND SAW-MILL BUSINESS ON C. P. R. Main line. Mill in good running order. Daily sawing 20 to 25 M. feet. Timber convenient to mill. Address A.B.C., CANADA LUMBERMAN.

CURRENT TRADE CONDITIONS.

ONTARIO.

The developments of the past week have strengthened the belief that lumber prices will harden as the spring approaches. There have been a few important transactions and a substantial increase in the number of enquiries. The opinion is becoming more general that there will be considerable activity in lumber circles during the spring, and that, unless unexpected developments arise, the demand will be brisk. The production of white pine lumber cannot be as large as in 1904, for it will be governed by the input of logs this winter, which has been considerably curtailed. With a moderate demand for lumber there should be no difficulty in obtaining satisfactory prices, even if the British market should not absorb as much of our lumber as in other years. The higher grades of pine, which were somewhat neglected last year, are now showing a better tone. For 2-inch No. 2 cuts and better, for instance, $44 at the mill is being asked. United States buyers have been looking over the Ontario stocks and have purchased one or two large blocks. Hardwoods do not seem to be exhibiting as much strength as pine, although there is not much pressure to sell, the high cost of production being an incentive to manufacturers to persistently oppose any reduction in price.

The strength of the lath market is shown by the fact that some Georgian Bay manufacturers have disposed of their coming season's cut at $2.75 for No. 1 and $2.25 for No. 2 at the mill. Other transactions could be closed but for the unwillingness of manufacturers to accept these prices. They apparently believe

that the situation warrants $3 for No. 1 and $2.50 for No. 2, and have fixed their quotations accordingly. No. 1 Norway lath is being held at $2.65 and $2.75, and No. 2 at $2.15 to $2.25.

MANITOBA AND BRITISH COLUMBIA.

Since the first of the year a number of building permits have been taken out in Winnipeg, and indications point to another active season and a large consumption of lumber. There is not much activity at the present time, but dealers are getting their stocks in shape for the spring trade. The annual meeting of the Western Retail Lumbermen's Association in Winnipeg was the feature of the past week.

The outlook in British Columbia is a little brighter, two or three of the largest mills having resumed operations. Orders are more plentiful but prices are very low and there is little profit in either lumber or shingles.

The log market is showing unexpected activity and rumors of a corner are heard. It appears that a Vancouver dealer has been steadily increasing his log holdings, with the result that he is now said to control the market at a time when the demand is improving.

UNITED STATES.

The movement of lumber is not sufficient to influence prices to any extent, but there is every indication that there will be more activity in the near future. It is believed that there will be a large consumption of lumber for various purposes during the year, and as this fact is generally accepted dealers are keeping closely in touch with the conditions and will no doubt become buyers when there are indications of an advance. From Buffalo and Tonawanda comes the report that market prospects are decidedly better and that a scarcity in some of the barn and higher grades of pine is developing. The low grades are very firm, but have shown no change in price for some time. Conservative dealers are opposed to an advance unless it should be actually forced upon them by the manufacturers, as they fear that it might discourage building and bring about a decrease in the consumption. One thing is certain, namely, that if prices do not advance there will be no cutting in any of the grades, and consumers may feel certain that they can make no mistake in buying at present prices. The outlook is for a decreased production of pine and spruce lumber this year, but there will probably be an average quantity of hardwoods manufactured. An advance in the price of plain oak is expected. It is figured that it should sell around $50 before it will strike the proper relation with the quartered stock.

The statistics of the white pine lumber product of the States of Michigan, Wisconsin and Minnesota, which appear in this issue, show that there was a decrease of 600,000,000 feet in the cut of 1904 as compared with 1903. Notwithstanding this decrease, the stock at the mill is about 300,000,000 feet greater than one year ago.

GREAT BRITAIN.

The British lumber market is showing some hesitation and there is not likely to be much contracting for stock until the course of the general trade of the country can be more definitely determined. Last year the importers did not close contracts before April or May, which was later than usual, and a similar disposition to defer business is shown this year. As very little lumber is being received from Canada, and as stocks are light, the recent recovery in prices is easily maintained. There is not a large demand for pine deals, but considering the decline in the North of Europe lumber, they continue relatively firm. At the moment the possible effect of the disturbances in Russia is being freely discussed, but few are prepared to venture an opinion.

STOCKS AND PRICES.

George L. Burtis, of Thessalon, Ont., who cut upwards of 17,000,000 feet of lumber last season, has only 5,000,000 feet on hand. He also cut 4,300,000 pieces of lath.

The Edward Hines Lumber Company, of Chicago, are reported to have contracted for all the lumber to be cut this season by the Carney Lumber Company, of Massey, Ont.

Pitts & Charlton, of Toronto, have sold to an American firm all the lath to be manufactured by them at Victoria Harbor during the coming season. The price is understood to be $2.75 at the mill, and they expect to cut between three and four million pieces.

TO HOLDERS OF BIRCH LIMITS.

Can you cut birch into Squares, etc. We can also take birch cut on the sweep with a jigger or small band saw. Large quantities required. Write in first instance to "Finance," care CANADA LUMBERMAN.

NEW BRUNSWICK LETTER.

(Correspondence of the CANADA LUMBERMAN.)

ST. JOHN, N. B., Jan. 16th, 1905. — The stagnation usual at this time of year in lumber circles is very apparent just now in this vicinity. Shipping to the westward by water has entirely ceased and scores of vessels are tied up for the winter at this port. The only activity apparent is the shipping now and then of miscellaneous lots of deals by the winter port steamers.

In looking over the stocks on the different wharves one characteristic which is very prominent in most of them is the large quantity of spruce boards. The past season has been remarkable for lack of demand in this line in the American market, in which the much larger part, in fact nearly all of the spruce boards manufactured in New Brunswick are disposed of, whether products of this province or of Maine. Ten dollars per M. ft. for dutiable inch spruce boards has been during the last four or five years the standard price, which figure was subject to very little fluctuation, and when any change did occur it invariably meant a higher price. But during the past season a large part of the sales made were at prices lower than the figure named above. Shipments were much lighter than usual and the prices realized ranged from $9.50 to $9.75.

The total stocks of spruce boards now on the wharves at this port would probably sum up to 600,000 to 700,000 ft. Rarely is there more than one-half this amount and usually not more than one-third at this time of year.

It could scarcely be said that there has been any general change in prices during the last month in any line. There is so little being done in New Brunswick products in either the U. S. or Great Britain that the prices paid can scarcely be called indicative of what figures will govern in the early spring.

The most that can be said in regard to the English market is (to quote the opinion of several interested and reliable parties) that the general tone is better and the indications point to a resumption of business under a higher schedule of prices, but to any more than guess at those prices is impossible.

The American markets are veiled by the same uncertainty. Business in New Brunswick long and short lumber is very quiet. Arrivals have been very light during the last few weeks, but the demand is not at all pronounced.

Prices of shingles are the same as last quoted with little prospect of an immediate improvement. Laths are quiet and, after

the rapid falling off from $3.50 per M. on the dock in New York city, to $3.00, are plentiful at the latter figure.

Reports from logging operators on the headwaters of the St. John and its tributaries tell of a busy and satisfactory season to date. Conditions that tend to this end have been all that could be desired since the beginning of operations early last fall. Throughout the winter there has been just enough snow for yarding purposes and not enough to cause any inconvenience in other respects.

LUMBER PRODUCTION AND STOCKS.

The usual annual statistics relating to the lumber production of the states of Michigan, Wisconsin and Minnesota appear in the last issue of the American Lumberman. It is shown that there was a decrease of 600,000,000 feet in the white pine cut of 1904, which again emphasizes the fact that the pine production is declining. The total cut last year was 4,219,840,000 feet, the smallest since 1878. The largest cut was made in 1890, when the total was 8,597,623,000, or more than 100 per cent. greater than that of the past year. The figures for the past thirty-two years are as follows:

	Feet.
1904	4,219,840,000
1903	4,791,852,000
1902	5,294,395,000
1901	5,336,448,000
1900	5,485,261,000
1899	6,056,508,000
1898	6,155,300,000
1897	6,233,454,000
1896	5,725,763,035
1895	7,050,669,235
1894	6,821,516,412
1893	7,326,263,782
1892	8,594,222,802
1891	7,879,948,349
1890	8,597,623,000
1889	8,183,048,000
1888	8,254,291,000
1887	7,757,916,784
1886	7,425,368,443
1885	7,053,094,555
1884	7,935,033,054
1883	7,624,789,786
1882	7,552,150,744
1881	6,768,856,749
1880	5,651,295,006
1879	4,806,943,000
1878	3,629,472,759
1877	3,595,333,496
1876	3,879,046,000
1875	3,968,553,000
1874	3,751,306,000
1873	3,993,780,000

Notwithstanding the reduced cut last year, the quantity of lumber at the mills is 300,000,000 feet greater than at the corresponding time one year ago. The stocks on hand for the past twenty years were as follows:

	Feet.
1904	2,171,703,000
1903	1,964,552,000
1902	2,112,719,000
1901	2,388,256,000
1900	2,839,705,000
1899	2,728,721,000
1898	3,494,739,000
1897	3,915,558,000
1896	4,053,937,435
1895	4,180,360,700
1894	3,944,842,304
1893	3,646,469,071
1892	3,119,320,245
1891	3,338,700,221
1890	1,160,331,050
1889	1,038,751,000
1888	823,386,200
1887	2,986,912,445
1886	3,068,092,608
1885	3,237,899,116

The shingle output of Michigan, Wisconsin and Minnesota last year was 1,647,794,000, as compared with 2,342,202,000 in 1903, 2,685,757,000 in 1902, 2,471,627,000 in 1901, and 2,400,679,000 in 1900. The quantity on hand at the close of last year was 683,618,000, as compared with 667,072,000 in 1903, 397,815,000 in 1902, 355,545,000 in 1901 and 649,759,000 in 1900. The shingle product was largely cedar.

There was a slight decline in the output of lath, while stocks on hand show more than a corresponding decrease. The total of 1904 was 1,224,869,000 pieces, as against 1,379,494,000 pieces in 1903 and 1,467,017,000 pieces in 1902. The stock on hand was 354,317,000 pieces last year, 488,915,000 pieces in 1903, and 495,176,000 pieces in 1902.

The total cut of hemlock lumber last year was 1,290,511,000 feet, as compared with 1,334,444,000 feet in 1903 and 1,277,814,000 feet in 1902. The amount in stock shows that the demand for hemlock was relatively better than for pine, the remaining balance being 580,733,000 feet, while in 1903 it was 502,435,000 feet, and in 1902 441,634,000 feet.

The prduction of hardwoods showed an

expansion of over 200,000,000 feet, being 1,043,835,000 feet last year, 799,734,000 in 1903, and 730,315,000 in 1902. There was on hand at the close of the year 399,450,000 feet, as compared with 273,889,000 feet in 1903 and 125,551,000 feet in 1902.

FIRES.

The sash and door factory of Louis Caron at Nicolet, Que., was burned a few days ago, the loss being quite heavy.

The saw mill at Fredericton, N. B., belonging to the estate of R. A. Estey & Company, and being operated by the assignee, was destroyed by fire last week. The loss is about $12,000.

SHIPPING MATTERS.

A number of lumber charters are reported from the Maritime Provinces at private terms, including the following: Steamer Munin, St. John, N.B., to United Kingdon; schooner Margaret May Riley, Digby, N.S., to West India port; barque Ethel Clark, Bear River, N.S., to Cienfuegos; schooner Brooklyn, Digby, N.S., to Cienfuegos.

The barque Robert S. Besnard has been chartered to carry lumber from Tusket Wedge, N. S., to Buenos Ayres at $7.50.

New Orleans, La.

PINE AND SPRUCE DEALS IN LONDON.

Messrs. Foy, Morgan & Company, London, Eng., furnish a very complete review of the pine and spruce market in 1904, which should be of interest to Canadian manufacturers and shippers. It is given in part below:

PINE.—The heavy advance of some 10 per cent. paid for the 1904 production, which was the cause of so much astonishment when it was announced on this side, had the inevitable effect of greatly curtailing the import business in this country. The import of pine, as statistics show, is barely two-thirds of the previous year's importation. Shippers judged it expedient, notwithstanding the cost, to quote only 30s. advance on 1sts and 20s. advance on 2nd regulars, at which basis a certain amount of business was concluded, the market for 3rds and 4ths, quoted at £13 5s. and £10 15s. respectively, remaining purely nominal. Meanwhile during the spring the spot prices of 3rds and 4ths steadily receded, and although shippers sought business by offering to reduce prices by £1 per standard this concession for the most part proved ineffectual. The market continued in a most unsatisfactory condition throughout the summer, and as business in the States owing to the approach of the elections was somewhat disturbed, especially in the building trade, the anxiety of the shippers to realize became much more pronounced. By September c.i.f. prices of 3rd pine regulars had dropped to £11 10s., but even at this figure buyers still refused to operate and the importation was reduced to occasional consignments of 3rd and 4th qualities. The continually increasing prices asked for pine in recent years have reduced this trade to quite a retail business. It is remarkable that, notwithstanding the great reduction in the supply, prices of third quality and under should have weakened so seriously, which may be taken as a sign that the markets in the United Kingdom are to a large extent learning to dispense with pine deals. The market remains in a lifeless condition; 3rds and 4ths are scarcely enquired for, and although 1sts and 2nds are still commanding scarcity values, business is of the most retail description.

SPRUCE.—Here again Canadian shippers proved to be over-hasty in paying lumbermen prices which increased the cost some 10 per cent. on the previous year. The first efforts to sound the markets on this side convinced them that it would be useless to increase c.i.f. prices over those current in 1903. With the turn of the year, and owing to the weakness of Baltic whitewood, spot prices fell away considerably. Yet because the stocks were so small both on this side, and especially in the shipping ports, shippers resolutely held to their quotations for the first few months of the year. Business in Quebec goods actually opened about May, when the ideas of buyers and sellers found a common meeting point at a reduction of about 10s. on the opening quotations. With the re-opening of the navigation, and tempted by the exceptionally low freights quoted by the liners, shippers in the lower ports were induced to consign considerable parcels, which served to break the market here, and it was not long before cargo prices had dropped to £6 15s. The importation from Quebec on the other hand was a very light one. During the summer months from June to September lower port spruce monopolized the attention of the buyers, and spruce fell steadily during this period until the cargo rate was reduced to about £6 c.i.f. During the last quarter of the year lower port spruce steadily recovered and there was consequently more opening for Quebec stocks, fair lines of which were placed on the basis of £8 10s. c.i.f. for 3x9-inch 3rds. Freights were obtainable right up to the close of the season at abnormally low rates, 36s. 3d. being the maximum rate paid even for tramp steamers of November loading. Having regard to the heavy drop throughout the season in the values of Baltic white deals it is somewhat surprising that Quebec spruce should have held its own so long, the reduction from the highest point in 1903 being only some 15s. per standard.

RED PINE.—The brunt of the losses sustained in the Canadian trade has undoubtedly been borne by this department. Such a large proportion of this stock comes into direct competition with Baltic red deals, that the serious decline in the value of the latter has involved a nominal depreciation in red pine of some 20 per cent. of the cost. As a matter of fact, the bulk of the 1904 production has been allowed

to winter over in the expectation of a better deal market next spring. Persistent efforts were made during the season to induce business with the Cape, quotations falling during the summer down to even less than £8 f.o.b., against the price of £10 5s., which was readily paid last year. Very little business, however, resulted, notwithstanding the announcement of a preferential rebate of 20 per cent. on Canadian goods imported into the Cape, which fact, however, is bound to stimulate this trade ultimately at the expense of Swedish deals. The consignments have been limited in number, because the markets here at no time afforded the slightest hope of any but the most disastrous results from such course.

CANADIAN LUMBER SHIPMENTS.

From St. John, N.B.: Schooner Ellen Mitchell, for City Island, 260,153 ft. deals, 96,245 ft. boards. Steamer Lake Champlain, for Liverpool, 418,386 ft. deals, 38,440 ft. scantling, 6,679 ft. ends, 6,793 bdls. lumber, 25,840 ft. elm lumber, 2,600 cases shooks, 18,241 pcs. lumber, 2,000 ft. doors. CANADA LUMBERMAN
AND WOOD-WORKER
WEEKLY EDITION

The Lumberman Monthly Edition, 44 pages} $1.00 PER YEAR {The Lumberman Weekly Edition, every week.

THIS PAPER REACHES REGULARLY THE PRINCIPAL LUMBER MANUFACTURERS AND DEALERS THROUGHOUT CANADA, AND WHOLESALE BUYERS IN GREAT BRITAIN, THE UNITED STATES, AND OTHER FOREIGN MARKETS.

VOL. XIII. TORONTO, MONTREAL, WINNIPEG, FEBRUARY 1, 1905 No. 1

CANADA LUMBERMAN

PUBLISHED BY

The G. H. Mortimer Publishing Co'y of Toronto, Limited

Confederation Life Building - TORONTO.

Branch Offices:

38 ALLIANCE BUILDING, MONTREAL

720-721 UNION BANK BUILDING, WINNIPEG.

21 GREAT ST. HELEN'S, LONDON, E. C.

The Weekly Lumberman — Published every Wednesday, contains reliable and up-to-date reports of market conditions and tendencies in the principal manufacturing districts and leading domestic and foreign wholesale markets. A weekly medium of information and communication between Canadian timber and lumber manufacturers and exporters and the purchasers of timber products at home and abroad.

The Monthly Lumberman— A 32-page journal, discussing fully and impartially subjects pertinent to the lumber and wood-working industries. Contains interviews with prominent members of the trade, character sketches and portraits of leading lumbermen, etc. Its special articles on technical and mechanical subjects are especially valuable.

CURRENT TRADE CONDITIONS.

ONTARIO.

That the lumber market is gradually strengthening is plainly evident. The number of enquiries regarding the new cut which are being received by the manufacturers is very encouraging and an evidence that dealers are disposed to purchase stock. This is further empasized by one or two important contracts which have recently been closed. Business can be done whenever the manufacturer is willing to accept the prices of the early winter, but in some quarters advances have been made, causing buyers to look around in other directions in the hope of

finding lumber which has not been brought into line with the increase. Nevertheless, those who are asking higher prices believe that there is strong ground for their position and that the developments of the spring will be favorable to the holder of lumber. The report comes from Ottawa that despite the slight decrease in the cost of log production, the Ottawa Valley mill men will hold out for last season's prices. Hardwoods are firmly held and the buying movement shows some improvement. The supply of hardwoods, however, is likely to prove equal to the demand and no important change in price is anticipated in the near future. The developments in the lath market are being watched with considerable interest. A wholesale firm in Western Ontario have been heavy buyers of late and now control a considerable percentage of the available supply. The suggestion of a corner, however, is not considered seriously.

MANITOBA AND BRITISH COLUMBIA.

There is as yet very little activity in lumber circles throughout Western Canada, bnt many are confident that the present year will witness some recovery from the low prices which have prevailed. There is certain to be a large consumption of lumber, timber and ties in connection with railway extension and improvements undertaken by the Canadian Pacific and Canadian Northern Railway, and while building in Winnipeg may not be as active as during the past year, there is reason to believe that a large quantity of lumber will be required for that purpose. The present low price of lumber should stimulate consumption. The statement has been published that the Mountain Lumber Manufacturers' Association propose to establish retail yards throughout the Northwest, but we shall defer a discussion of this question until more definite information as to the intention of the manufacturers is to hand.

UNITED STATES.

Climatic conditions in the United States have been opposed to any increase in the movement of lumber and nothing more than a normal trade has been done. The demand from the country districts is light, but this is attributed largely to the difficulty of handling lumber at this season of the year. The demand from this quarter will make itself felt upon the first sign of spring and a heavy trade is anticipated. Inquiry is active and there are no weak spots in the white pine market. The increased stocks in Minnesota are confined chiefly to small mills in the interior and will be consumed without perceptible effect upon prices. Low grade boards have lost none of their recent strength, while the better quality of pine is exhibiting a stronger tone than for some months past. It is stated that mill culls sold in Duluth last week at $14 and scoots at $9.25. Spruce is maintaining its strength and some manufacturers have declared their intention of holding their stock at an advance of 50 cents per thousand. Hemlock was never in better position. Among the hardwoods, maple, birch and elm are selling freely, while basswood lags behind both in price and demand.

There has been a sharp advance in lath at Chicago, the current prices being $4 to $4.25 for No. 1 white pine and $3.50 to $3.75 for No. 1 mixed. Spruce lath have been but little affected by the strength in white pine, as they continue to sell in Boston at $3.40 for 1 5-8 inch and $3.15 for 1½ inch.

GREAT BRITAIN.

The year has opened with a much improved outlook for lumber in Great Britain. As we have previously stated, stocks at London and Liverpool are unusually light and the consumption is showing signs of being considerably larger than last year, the shipbuilding and other consuming industries being in a more prosperous condition. There are still some influences against any substantial improvement, but these, it is hoped, will be removed before the importing season has been reached. So far as can be learned, British importers have not yet contracted for their regular supply of Canadian pine and spruce, but we believe they are prepared to admit that more favorable terms could have been obtained in December than at the present time, for the improvement in the United States market has encouraged our manufacturers to hold out for firm prices for British specifications. The present tendency of prices on this side of the water is upward, and if British importers want our lumber they must be prepared to meet the American competition. It is understood that the railways in Great Britain are likely to consume a considerable quantity of oak this year, and the outlook is favorable for higher prices for that timber.

THE BARBADOS MARKET.

The following report of the Barbados lumber market is furnished by Messrs. S. P. Musson, Son & Company:

"The arrivals of lumber have been as follows: Schooner Laura C, from Liverpool, N. S., with 286,000 ft. white pine, principally second quality; E. A. Post, from Tusket Wedge, N. S., 184,000 ft. white pine, spruce and hemlock; Leah A. Whidden, from Halifax, N. S., 205,000 ft. white pine and hemlock. Of the above the Laura C, failing to obtain an offer, went on to Demerara. The white pine ex E. A. Post was sold at $25.76 merchantable, $19.56 second quality and shipping spruce at $22.26. The cargo of the Leah A. Whidden was sold at $24.50 merchantable, $18.50 second quality, and $19 for hemlock. The Briardene, from Halifax, also had 53,000 ft. spruce and hemlock, for which $22.08 was obtained for former and $19 for latter description. Our market is now heavily stocked with white pine, especially second quality, as late cargoes have consisted principally of this, and we were fortunate in placing a cargo to arrive shortly, which was represented as really good, and consisted of 145,000 ft. merchantable and 35,000 ft. second quality, at $26.00 and $21.00 respectively. There are reports of other vessels on the way here, and we fear that prices may decline somewhat. Spruce is not in heavy stock, but with cheap white pine in their yards, we expect dealers will not show much anxiety to buy. No arrivals of shingles to note, and it is reported that the schooners Calderwood and Utility bringing both long and laying cedar have been lost. Stocks of these, however, are ample to meet the demand, which is very slack. Some sawn Cypress ex. Adonis, which we reported in our last as having being imported for a dealer, were evidently rejected, as consigners offered them for sale, and accepted $3.25 for 4 x 18, and $4.50 for 6 x 18 and 6 x 24."

HARDWOOD PRICES AND STOCKS.

The annual meeting of the Hardwood Mauufacturers' Association of the United States was held at Nashville, Tenn., on Tuesday, January 24th, at which an official price list was adopted. The prices fixed are given in part below :

SOFT ELM.—1 in. log run, $20 ; 1¼ to 2 in., $20.

SOFT MAPLE.—1 in. log run, $18 ; 1¼ to 2 in., $20.

ASH.—No. 1 and 2, 1 in.; $40 ; 1¼ to 2 in., $43.50 ; 2½ in., $53 ; 3 in., $55 ; 4 in., $58. No. 1 common, 1 in. $27.50 ; 1¼ to 2 in., $29.50 ; 2½ in., $35 ; 3 in., $37 ; 4 in., $40. No. 2 common, 1 in., $18 ; 1¼ to 2 in., $20 ; 2½ to 4 in., $22.

PLAIN WHITE OAK.—No. 1 and 2, 1 in., $42.50 ; 1¼ and 1½ in., $44.50 ; 2 in., $45.50 ; 2½ in. $50 ; 3 in., $55 ; 4 in. $60. No. 1 Common, 1 in., $30 ; 1¼ and 1½ in., $32 ; 2 in., $33 ; 2½ in., $38 ; 3 in., $40 ; 4 in., $45. No. 2 Common, 1 in., $18 ; 1½ and 1¼, $20 ; 2 in. $22 ; 2½ in., $23 ; 3 in., $24 ; 4 in., $25. No. 3 Common, 1 in., $15 ; 1¼ and 1½ in., $16 ; 2 in., $18. Plain red oak to be same price as plain white oak.

QUARTERED WHITE OAK.—No. 1 and 2, ⅜ in., 6 to 9 in., $40 ; 1½ in., $47 ; ⅝ in., $55 ; ⅝ in. 12 in. and up, $85; ¾ in. 6 to 9 in., $62.50 ; 1 in., 6 to 9 in., $70 ; 1 in., 10 and 11 in., $85 ; 1 in. 12 to 14 in., $110 : 1 in. 15 in. and up, $160 ; 1¼ to 2 in., $73; 2½ in., $80 ; 3 in., $85 ; 4 in., $90. No 1 Common ⅜ in., 6 to 9 in., $25 ; ½ in., $30; ⅝ in., $35 ; ¾ in. 6 to 9 in., $40 ; 1 in., $45 ; 1¼ to 2 in., $48.

The statistics complied by the secretary showed stocks on hand January 1, 1905, of 436,261,000 feet, as compared with 359,322,000 feet on July 1, 1904. It may be explained, however, that a larger number of mills reported at this meeting and that the comparative statement of those who reported July 1, 1904, shows a decrease in the amount of stocks on hand of 30,000,000 feet, or 12½ per cent. The following table shows the quantity of each kind of lumber on hand :

	July 1, 1904	Jan. 1, 1905
Ash	6,985,000	7,728,000
Basswood	24,292,000	19,748,000
Beech	2,204,000	4,262,000
Birch	13,832,000	10,883,000
Butternut	238,000	257,000
Cherry	542,000	1,665,000
Chestnut	10,265,000	14,871,000
Cottonwood	24,220,000	33,320,000
Cypress	10,126,000	7,682,000
Rock Elm	3,394,000	1,930,000
Soft Elm	7,258,000	9,410,000
Gum	34,984,000	43,853,000
Hickory	1,263,000	1,619,000
Soft Maple	1,395,000	2,730,000
Hard Maple	22,003,000	34,029,000
Plain White Oak	24,915,000	48,315,000
Plain Red Oak	16,649,000	19,598,000
Qtd. White Oak.	17,016,000	37,148,000
Qtd. Red Oak	3,220,000	7,047,000
Poplar, Rough	115,066,000	115,553,000
Poplar, Worked	15,794,000	6,156,000
Pecan	47,000	60,000
Sycamore	899,000	3,984,000
Walnut	2,715,000	4,413,000
Totals	359,322,000	436,261,000

NEW BRUNSWICK LETTER.

(Correspondence of the CANADA LUMBERMAN.)

ST. JOHN, N.B., January 31st, 1905.—The lack of life in all branches of the lumber industry is still the predominant feature as regards this part of the country. The coming season is attracting the attention of the local lumbermen to a much greater extent than the small transactions of the present month.

The stocks of English deals on the local wharves are decreasing slowly but surely. Several shipments, ranging in quantity from 25 to 125 standards, have gone forward since January 1st by the liners which make this port their winter terminus. The sum-total of all holdings of English at this port would range from 7,500,000 sup. feet to 8,500,000 feet, the latter figure being the outside estimate. The much greater part, in fact practically all, of this quantity has been secured and is now held by local commission houses. It is probable that the bulk will not be put upon the market before the end of three months, and not then if the indications apparent at that time warrant the holding of it still longer.

As far as can be learned (and this quoting the best local authorities), the volume of business in the English market is so small that the prevalent prices could scarcely be named as general nor yet as indicative of what figures will prevail a month hence. But it is conceded on all sides that at the present moment all conditions tend to an improvement with the resumption of trade; the dealers on the other side of the water are carrying small stocks, the prospects point to an excellent business in the building line and shippers seem to be in no haste to put their goods upon the market.

In the United States the prospect for New Brunswick spruce deals seems particularly good. Here, too, stocks are very light and arrivals few and the indications point to a boom in building.

For boards and scantling the outlook in this direction is not so bright. Last season business in these lines was very dull, the demand deing at all times small when the supply is considered. At this stage there is no sign of improvement that could be called unmistakable. While the receipts from New Brunswick of this line of goods in the United States market have been very light during the last four months, prices have not rallied nor is it considered that there is any prospect of their doing so in the immediate future.

The price of spruce lath continues to fluctuate. Since last writing there has been an improvement of 25 cents per M. New Brunswick product lath are now quoted at $2.10 and American at $2.35 per M. f.o.b. St. John.

BRITISH COLUMBIA LETTER.

(Correspondence of the CANADA LUMBERMAN.)

VANCOUVER, B. C., January 23rd, 1905.—Prices of logs are very firm and an advance is looked for within the next month or two. It means that the corner attempted by Mr. J. S. Emerson has been sucessful. Several months ago when depression existed in the logging industry, Mr. Emerson quietly went to work and bought up as much of the available supply as was possible. The mills were closing down because of slow demand, and to make the usual repairs, and having logs on hand they did not augment their supply. Lately some of the mills have started again, and spring orders are beginning to come in, with the result that logs are wanted. The price goes as high as $7.50 at present, and will probably continue at top-notch figures until nearly June. It is expected there will be an increase of about $1 during the next 30 or 60 days, and another rise after that. Then the price will be the highest ever known in British Columbia.

There will be considerable disappointment if no duty is placed on lumber entering Canada from the United States, for in anticipation of this action of the Dominion Government, all the mills are preparing for a big cut during the coming summer. Particularly in the interior, large amounts of logs are being taken out, and the millmen there confidently hope that the limited Canadian market will be reserved for Canadians. Settlers in the Territories will get their lumber cheaper this year than ever before. The move anticipated a couple of months ago of the whole of the lumber manufacturers of this province withdrawing from the Western Retail Lumber Dealers' Associatoin, has been taken, and the western mills will establish depot yards in the Territories. Thus lumber will be sold to the consumer direct, and the profit of the middleman will be saved. If no duty is placed on lumber, there is no use denying that conditions will be serious. "If the Government does not grant protection, it may not be improbable that there will be a price war," a well known lumberman said, "for the retailers will be supplied by American mills, and the lumber manufacturers of Canada will have their own yards. Every effort, though, will be made to stave this off."

Mr. John Hendry, president of the B.C. Mills, Timber & Trading Company, wil leave to-day for Ottawa, in connecti on

with the duty matter, and will join the large deputation which will meet the Government on February 7th. Mr. Hendry is president of the B. C. Lumber & Shingle Manufacturers' Association, and also vice-president for British Columbia of the Canadian Manufacturers' Association, and will confer with the officials of the latter organization in Toronto before proceeding to Ottawa.

Japanese are buying up small shingle and lumber mills in this vicinity and also on Puget Sound, preparing for the demand which is expected to follow the development of the Orient after the war.

The British ship Nelson and the American schooner Wilbert L. Smith are loading lumber at the Hastings mill, the former for Europe, and the latter for Osaka, Japan.

CANADIAN LUMBER SHIPMENTS.

From St. John, N.B.: Steamer Montcalm, for Montreal and Bristol, 1,046 bdls. pulp board, 104,656 ft. deals, 1,113 ft. ends, 75,178 ft. birch deals, 99 ft. birch scantling, 4,288 ft. ends, 2,171 doors, 1,478 bdls. maple flooring. THIS PAPER REACHES REGULARLY THE PRINCIPAL LUMBER MANUFACTURERS AND DEALERS THROUGHOUT CANADA, AND WHOLESALE BUYERS IN GREAT BRITAIN, THE UNITED STATES, AND OTHER FOREIGN MARKETS.

VOL. XIII. TORONTO, MONTREAL, WINNIPEG, FEBRUARY 8, 1905 No. 2

CANADA LUMBERMAN

PUBLISHED BY

The G. H. Mortimer Publishing Co'y of Toronto, Limited

Confederation Life Building - TORONTO.

Branch Offices:
38 ALLIANCE BUILDING, MONTREAL
720-721 UNION BANK BUILDING, WINNIPEG.
21 GREAT ST. HELEN'S, LONDON, E. C.

The Weekly Lumberman — Published every Wednesday, contains reliable and up-to-date reports of market conditions and tendencies in the principal manufacturing districts and leading domestic and foreign wholesale markets. A weekly medium of information and communication between Canadian timber and lumber manufacturers and exporters and the purchasers of timber products at home and abroad.

The Monthly Lumberman— A 44-page journal, discussing fully and impartially subjects pertinent to the lumber and wood-working industries. Contains interviews with prominent members of the trade, character sketches and portraits of leading lumbermen, etc. Its special articles on technical and mechanical subjects are especially valuable.

FOR SALE

Large Tract of Timber

In Central Ontario

THE PROPERTY OF

THE CANADIAN LAND AND IMMIGRATION CO., OF HALIBURTON, (LIMITED).

This company has a large tract of well timbered land about 125 miles northeast of Toronto. There are large quantities of Cedar, Hemlock, Spruce, Balsam, Basswood, Cherry, Birch, Maple, also considerable Pine, Elm and Ash on this tract. It is well served by two railroads. The company are prepared to sell this timber in blocks ranging from 2,000 to 10,000 acres, or more if desired.

There are several good mill sites on the property. This would be a good opportunity for parties who are at present cut out and looking for a new location.

Maps and plans and further particulars can be had by applying to

W. H. LOCKHART GORDON,
Managing Director,
157 Bay Street, Toronto.

WANTED

Party with timber limits to form Company with a party who has a modern saw mill plant, capacity twenty million, on North Shore Georgian Bay. Address Box 193, CANADA LUMBERMAN, Toronto, Ont.

CURRENT TRADE CONDITIONS.

ONTARIO.

While the consumption of lumber is quiet, enquiries for future delivery are more numerous and the market continues very firm. Everybody is looking forward to an active spring trade, and as stocks carried by the retail dealers are not large, the buying movement may commence earlier than usual. It is probable that before the mills are put into operation for the season's work, the stock in the yards will have been largely sold out. The new cut is now engaging the attention of buyers, and the indications are that the manufacturers will realize prices quite as high as one year ago. Within the past two months all grades of white pine have been marked up, but the greatest advance has been in the upper grades which suffered a material decline last summer. Everything above No. 3 cuts and better has been advanced about $4 per thousand. For inch No. 1 cuts and better $47 at the mill is being asked, and for 1¼ to 2 in., $50. No. 3 cuts and better are held at $35 to $36. Inch dressing and better shorts are worth $24 at the mill, box and common shorts $14, log run siding $17, and 1 × 6 and 8 inch mill run $18. For 1 × 10 and 12 mill culls $14 is asked. In hemlock there has been an advance of from 50 cents to $1 per thousand, 2 × 6 to 12 inch, in 10 to 16 feet lengths, being held at $13 to $13.50. There has been no

change in hardwood prices. The furniture and implement factories are buying a little more liberally.

Lath prices have again advanced and manufacturers are now asking $3 as the minimum price for No. 1 white pine, with some mills holding out for $3.15. For No. 2 pine $2.40 to $2.50 is asked. Other kinds of lath have followed the course of white pine, 4-foot hemlock being now held at $2.50, and 32-inch at $1.25, as compared with $2.10 and 90 cents a few weeks ago.

MANITOBA AND BRITISH COLUMBIA.

The severe weather throughout Manitoba and the Territories has been against any expansion in the demand. The early spring, however, is likely to witness considerable activity and the balance of opinion seems to be in favor of some recovery in lumber prices. It is believed that the quantity of lumber imported from the United States will be smaller than last year even under the same conditions, as the market across the line has improved and manufacturers may not find it necessary to ship surplus stocks into Canada to as great an extent as last year. If a duty should be imposed conditions will be equalized and the position of the Canadian manufacturer greatly improved. Present indications point to a large consumption of lumber for building purposes in British Columbia, as many new buildings are projected in Vancouver, Victoria and New Westminster. Railway construction also promises to be on a larger scale than usual.

UNITED STATES.

The past week has been comparatively quiet in lumber circles, a cold wave over all the northern and eastern states having restricted the volume of business. Such orders as have been booked have served to strengthen the opinion, now quite generally held, that the improvement in the lumber business which occurred before the close of the year is likely to be permanent. The improved tone has not been confined to any particular class of lumber, but has been quite general in character. Southern pine was perhaps the first to show pronounced strength, the basis of which was the curtailment in production. This was followed by white pine and hemlock, and now the hardwoods have fallen into line.

While the supply of dry white pine lumber appears ample to meet the expected demand during the spring months, there is a comparatively light stock of some of the lower grades. Buffalo and Tonawanda report a scarcity of box and mill culls, with prices inclined to advance. At Saginaw and Bay City mill culls are selling as high as $16 and $17.

The famine in plain white oak has not been relieved. If there is an ample supply anywhere, it must be in the hands of persons who are holding for a still further advance. The demand, apparently, is greater than the supply. Quartered oak shows none of the activity of the plain variety. Of the cheaper hardwoods, birch is one of the quickest sellers and is commanding a fair price. Soft elm and maple are in fair request, and maple flooring is meeting with a good demand at the advanced price. Prices of Michigan hardwoods are about $20 for log run basswood and ash, $18 for birch and $14 for maple.

GREAT BRITAIN.

Almost every branch of the lumber business of Great Britain is showing some improvement. Heavy orders have been placed with ship-builders and the Lancashire textile trades are in a much better position than for some months past, factors which are almost certain to beneficially affect the timber trade. It does not appear that many importers have as yet contracted for their season's requirements, although a move in that direction has apparently been made. Baltic shippers have recently canvassed the leading importing centres and are said to have been successful in closing some contracts, the Hernösand mills having accepted £6 5s for 2½ x 6½ and 7 whitewood for next summer's shipments. The tendency is slightly upward and it is expected that contracts will soon be closed at an advance of from 5s to 10s per standard on this price. Reports recently received emphasize the improved position of spruce. The Manchester correspondent of the Timber News says: "Spruce deals are now much firmer, and very likely to still advance in price; 3 in. by 7 in. have gone up to a high figure during the past few days, and f.o.b. prices for an average are stiffening considerably. At the present time we believe there are a score of new cotton mills being built in Lancashire. This, of course, has helped to harden prices of spruce deals, as each mill swallows on an average 100 standards of 1½ in. by 7 in. flooring boards, besides a big quantity of 3 in. by 9 in., etc."

STOCKS AND PRICES.

J. Tomlinson, of Vancouver, B. C., has started a logging camp in the vicinity of Serge Narrows.

R. D. Little, of Amherstburg, Ont., is prepared to purchase 56 electric light poles for the town.

James McBurney & Company, of Callendar, Ont., are taking out this winter about 4,000,000 feet of saw logs.

W. J. Trenouth & Bro. have just put into operation a small mill on their limits near Powassan, Ont., to saw birch, basswood and elm.

J. Morrison, of Fredericton, N. B., has closed a contract with the trustees of the R. A. Estey property to saw a quantity of cedar logs.

M. D. Olds, of Cheboygan, Mich, is reported to have purchased 8,000,000 feet of white pine saw logs from Burton Bros., of Barrie, Ont.

The J. E. Murphy Lumber Company, of Marksville, Ont., expect to cut during the coming summer about 3,000,000 feet of hemlock, cedar and hardwood lumber.

A. O. Graydon, City Engineer of London, Ont., is asking for tenders up to Thursday, February 23rd, for supply of the lumber required by that city during the present year.

The following prices are being paid for logs in Michigan: Hemlock, $8 to $10; maple, $10 to $14; basswood, $10 to $16; birch, $8 to $13; ash, $10 to $15; oak, $10 to $20; pine, $15 to $20.

L. K. Jones, Secretary of the Department of Railways and Canals, Ottawa, is asking for tenders up to Saturday, March 4th, for the supply of Douglas fir timber required for the Rideau canal this year.

The Sumner Company, who lately purchased seven square miles of timber limits on the Nepisiguit river, in the vicinity of Gloucester Junction, N.B., have a number of men at work getting out saw logs and railway ties.

The Yale-Columbia Lumber Company, of Nakusp, B.C., are cutting about 2,000,000 feet of logs above Rock Creek, which will be driven to the company's mill at Cascade in the spring. About 1,500,000 feet are being cut for the same company about four miles below Midway, on the American side.

John Millen, of Alger, Smith & Company, Saginaw, Mich., recently sold 2,000,000 feet of timber at $22 on the

cars at a mill 40 miles above Mobile, to go to the Transvaal, South Africa, to be used in the gold mines. The pieces were all 60 and 70 feet long and were taken out of the yard stock, netting a profit of about $12 a thousand.

Reports from New Liskeard, Ont., show that logging operations in that district are well advanced. The cut in the Ottawa river country, from the Temiskaming district southwards, promises to be a little larger than was at first estimated. The cost of production will probably show a slight reduction as compared with last year.

M. P. McGrath, of Easton, Pennsylvania, is asking for tenders up to February 25th for supply of 400,000 cedar, tamarac and hemlock ties for use in the construction of a railway between Ottawa and Montreal. Deliveries will be accepted at Ottawa, Hawkesbury, Lachute, Ste. Agathe and Montreal, and the first delivery is to be made in May next.

The George McSweeney Company, of Moncton, N.B., who lately secured large timber areas at Canaan and Bishop's Land, are lumbering quite extensively this winter and expect to get out about 2,000,000 feet of logs, including spruce, hemlock, red and white birch and basswood. They will operate the Thurber & Smallwood mill at Canaan.

Only nine sawmills were operated on the Saginaw River in 1904, eight of them being located at the Bay City end of the river. The output was as follows: Pine, 21,732,734 feet; hemlock, 31,592,682 feet; hardwood, 42,455,028 feet; total, 95,780,444 feet. The output in 1903 was 97,140,000 feet and in 1902 it was 109,265,979. At the close of last year there was in the hands of manufacturers 1,042,225 feet of pine, 15,281,259 feet of hemlock and 19,006,448 feet of hardwood lumber, a total of 35,229,933 feet.

The quantity of lumber to be cut this season by the mills of the East Kootenay district, in British Columbia, is as follows: Wardrope Co., 5,000,000 feet; Fernie Lumber Co., 8,000,000 feet; Elk River Co., 8,000,000 feet; Crow's Nest Co., 10,000,000 feet; McInnes mill, 3,000,000 feet; Standard Co., 4,000,000 feet; Edolph mill, 4,000,000 feet; Cranbrook Co., 2,500,000 feet; East Kootenay Lumber Co., 8,000,000 feet; Robinson & McKenzie, 3,000,000 feet; King Lumber Co., 6,000,000 feet; North Star Lumber Co., 6,000,000 feet; Staples mill, 6,000,000 feet; Carruthers mill, 3,000,000 feet.

A. F. & D. Mackay, of Liverpool, England, held an auction sale of birch timber on Wednesday, January 25th, the prices realized showing a slight advance upon the last sale. The details follow: 20 in. and upwards, 2s.; 19/19½ in., 20½d.; 18½ in., 20d.; 18 in., 19¼d.; 17½ in., 18¾d.; 17 in., 18¾d.; 16½ in., 18¾d.; 16 in., 18½d., 15½ in., one lot, 17¾d.; 15½ in., another lot, 17½d.; 15 in., 16¾d.; 14½ in., 15¼d.; 14 in., 15¼d.; 13½ in. and under, 14¾d.; maple, 15½d.; beech, 16d.; ash and elm, 15½d. The new timber went in one lot at 18¼ for 14⅞ average foreign. The average for the floated was $13\frac{15}{16}$, and realized 17½d.

HARDWOODS IN NEW YORK.

The lumber trade of the Metropolitan District, according to the New York Lumber Trades Journal, can be safely reported as in good shape at the present writing, both as regards the amount of business being transacted as well as prospective business. It is of course a little early yet for the dealers to get a line on just exactly how much business will be forthcoming during the spring and summer, but suffice it to say that the movement of lumber in both wholesale and retail circles during the past fortnight has been well up to normal for this season of the year, with every indication of an improved and continuous activity from now until well through the summer. The holidays witnessed a lull in business which was but natural, and the inventory period being but just past, the dealers have hardly gotten into full swing again on new business. Hence while there is not a great deal of activity to be noted just at this time, the outlook is so excellent for a large business throughout the year, and the consensus of opinion being entirely in accord with that idea, everybody is feeling optimistic. Unless all signs fail, the volume of business this year in the district in practically all lines will be a record breaker. As regards the situation in the various stocks, we note the following:

From all that can be learned, the hardwood buyers throughout the district, particularly those who work up their lumber in various lines, have been buying but lightly since the early fall and not making purchases except for immediate wants, in the idea that prices were going off. In this connection the hardwood market has remained extremely firm, and many of the large users of hardwoods are reported to be in possession of only light stocks, and enquiries and orders have come out for considerable lumber during the past fortnight. The general belief is that there will be an active call for pretty much all of the hardwoods between now and spring. This change has been brought about primarily by the fact that buyers of hardwoods are awakening to a realization of existing conditions at manufacturing points where, according to reports rendered by returning buyers and wholesalers, there is but a small amount, comparatively speaking, of the better grades of hardwoods, practically all the stock on hand at mill points being the lower grades. Hence those buyers who must necessarily have stocks for their needs during the early spring months have come upon the market with very fair orders. That this condition is properly summed up is best evidenced by the fact that the holiday season usually sees the market a little off, but the last holiday period not only witnessed a firm market, but one which showed advances on several kinds of stock.

Plain oak has advanced during the past thirty days in the neighborhood of $3. Poplar has moved up on increased demand to $48 to $50 for inch 1s and 2s for the better class of cuts. Ash is exceedly strong, and dry lumber is scarce and is selling very close to plain oak in price. Chestnut has been in good call, and prices are generally quoted $1 above what they were sixty days ago for orders of any size. Birch, basswood and maple are holding their own both as regards demand and price.

F. Lavoie, saw mill, Lac Nantel, Que., is announced to have assigned.

The barque Strathern has been chartered to carry lumber from Boston to Buenos Ayres at $6.50.

A saw mill near Ravena, Ont., owned and operated by Albert McKean, was destroyed by fire last week. The loss is about $2,000.

It is estimated that the Edward Hines Lumber Company, of Chicago, will get out 200,000,000 feet of logs this winter in Ashland, Douglas and Bayfield counties, Wisconsin.

Spruce lath is selling in the Boston market at $3.40 for 1 5-8 inch and $3.15 to $3.20 for 1½ inch. Extra cedar shingles still range from $3.15 to $3.25, and clears from $2.65 to $2.75.

Kibbee & White, of Albany, N. Y., last week sold to the Edward Hines Lumber Company, of Chicago, the 1905 cut of the Dead River mill at Marquette, Mich. The stock which will probably aggregate 14,000,000 feet will be taken to Chicago.

ENQUIRY FOR HARDWOOD.

A correspondent at London, Eng., writes to the CANADA LUMBERMAN as follows: "Do you know of any Canadian manufacturers of "Orham' wood suitable for making bedroom furniture, to be dressed and cut to dimensions; also of birch boards one-half, five-eighth, and one and one-quarter inch, about sixteen inches broad, dressed and ready for use by manufacturers of chairs."

Persons in a position to supply such lumber and who may wish further particulars should send their address to the publishers of this journal.

SPRUCE IN ENGLAND.

It is somewhat early in the season, says the Timber Trades Journal, to phophesy what the prospects will be for the year 1905 in the spruce trade of the West Coast of England, but we think that the downward tendency which characterized the summer months of 1904 has received a check, and that everything tends to show a marked improvement in this market. Prices are ruling firmer, and to-day show a considerable advance. The shipment from St. John, N. B., and Halifax, N. S., by the winter liners up to the present time has been exceptionally light, and we have reason to believe that this same state will continue for the remainder of the winter season. This can only point in one direction to help holders of stocks to dispose of them at a better figure than they would if the imports were up to the normal quantity. Again the liners are demanding higher rates of freight, and we hear that in one instance a boat first half of January sailing from St. John, N. B. and Halifax, N. S., had about 800 to 1,000 standards of space to spare, but would not carry any deals whatever unless owners could get the rate of freight they demanded. We have not heard of agents having made any contracts on the West Coast for spring and summer shipments, as manufacturers are holding their stocks firm at enhanced prices, and shippers prefer to hold off until they can see more inducement to better prices. On the other hand, buyers seem to prefer to wait before making contracts, with the exception of special specifications to fill their present requirements. There has been practically no tonnage fixed to load f.o.w. from N. B. and N. S. ports, and one factor that must not be forgotten is that to-day steamers cannot be obtained at the same rates as this time last year.

FOR SALE

Large Tract of Timber

In Central Ontario

THE PROPERTY OF

THE CANADIAN LAND AND IMMIGRATION CO., OF HALIBURTON, (LIMITED).

This company has a large tract of well timbered land about 125 miles northeast of Toronto. There are large quantities of Cedar, Hemlock, Spruce, Balsam, Basswood, Cherry, Birch, Maple, also considerable Pine, Elm and Ash on this tract. It is well served by two railroads. The company are prepared to sell this timber in blocks ranging from 2,000 to 10,000 acres, or more if desired.

There are several good mill sites on the property. This would be a good opportunity for parties who are at present cut out and looking for a new location

Maps and plans and further particulars can be had by applying to

W. H. LOCKHART GORDON,
Managing Director,
157 Bay Street, Toronto.

PINE LUMBER COMPANY,
Pine, Ont. (near Cartier.)

THE LOCATORS.—W.B Herbert, General Manager. The largest and oldest exclusive Business Brokers in the West. Address 63 Merchants' Bank Building, Winnipeg.

Lumber and Coal.—This is an excellent proposition doing twenty thousand yearly, and can be bought on a cash payment of five thousand. Established 1893 Has exclusive agency for coal. Eighty-five miles from Winnipeg, population six hundred.

Lumber and Machinery.—Doing a turnover of sixty thousand yearly and making good profit, stock ten thousand, half cash, balance one year; this is a splendid business, most firmly and well established and is very worthy of attention. THE LOCATORS.

Lumber.—Small stock in the Territories, price one thousand, doing twenty-five thousand a year, clearing five thousand, this is your opportunity. THE LOCATORS.

Lumber.—Another yard cheap for cash, four hundred buys, doing seven thousand, clearing fifteen hundred, in good spot The Territories, you should enquire about this, it is a snap. THE LOCATORS

Lumber and Factory — Well located in the Territories, four hundred miles from Winnipeg, doing a hundred and twenty thousand a year, cleared last year over eight thousand dollars. Has stock of about eighteen thousand, and a plant of about the same value. Encumbrance eight thousand, twenty-five thousand cash buys outright, this gives the purchaser a clear profit to start on of over three thousand dollars. THE LOCATORS.

Write for our free book of "Business Opportunities," Address THE LOCATORS, 63 Merchants Bank Building, Winnipeg.

CURRENT TRADE CONDITIONS.

ONTARIO.

The weather of the past week has not been propitious for the movement of lumber. Manufacturers are booking some orders for early delivery, but on the whole trade is seasonably quiet. The feeling in regard to spring business is optimistic, based largely upon prospective building operations. The better grades of white pine are showing more strength and are going into the hands of dealers who believe that prices will be no lower and are disposed to take chances of an upward movement. The supply of hardwood lumber is considered ample for the spring requirements, but as the cut of logs this winter has not been heavy prices are likely to be maintained at their present basis. Predictions have been made of an advance in the price of maple. A large number of railway ties is being taken out this winter, the extent of railway construction work in sight having stimulated the production.

QUEBEC AND NEW BRUNSWICK.

The dullness which has characterized the lumber trade of the eastern provinces for some months has been intensified by cold weather and heavy storms. The snow is now so deep that it is almost impossible to handle lumber. In the meantime the outlook for spring trade is improving and manufacturers are looking forward to a further advance in prices as soon as there are any signs of activity. Stocks of spruce lumber in the Eastern States are not large and the demand from that quarter will likely be considerable. The expected advance in New Brunswick cedar shingles has not yet taken place, Extras still being obtainable at $3.20 on Boston rate of freight.

The statement of a prominent lumberman, published elsewhere in this issue, that the log production on the St. John river this winter will not be above 60,000,000 feet, will doubtless have a sustaining influence upon lumber prices. It is understood that the cut in Nova Scotia has also been curtailed.

UNITED STATES.

Conditions are believed to be gradually getting into shape for an active spring trade in all branches of industry. There has been a marked revival in the iron and steel industry, while the statistics for January show a remarkable increase in building as compared with the corresponding month of 1904. In twenty-seven of the leading cities, permits were taken out for the construction of 5,187 buildings, involving a total cost of $24,964,651, against

4,317 buildings, involving a total of $13,575,418 for the same month a year ago. This is an increase of 83 per cent. Activity in lumber during the past week has been confined largely to the cities, as country trade has been practically at a standstill. A stronger inquiry for shop and better white pine is reported from Buffalo and Tonawanda, while at Saginaw and Bay City there is also a better feeling in respect to the higher grades. There is about 250,000,000 feet of pine in the yards on the Saginaw river, which is a fair supply. The price list committee of the Mississippi Valley Lumbermen's Association are expected this week to advance the price of No. 1 boards, which have become scarce. The hardwood market is showing slightly stronger tendencies in respect to some items. Rock elm and soft elm have been well bought, and prices are a little firmer on account of the light supply. Maple is also steadier and maple flooring is selling quite freely. In Northern Wisconsin and the northern peninsula of Michigan the snow is so deep that logging has been slow and expensive and some operators have abandoned the work for the season. Hickory has recently advanced about $5 per thousand.

GREAT BRITAIN.

While there has been some improvement in the British lumber market during the past three months, buyers do not yet seem to have regained confidence, and very little business is being closed. It has been announced that the Swedish Saw-Mill Owners' Association will have 952,000,000 feet of lumber for first-open-water shipment, as compared with 964,000,000 feet one year ago. This small decrease is taken to mean that the policy of curtailment has not been effective and that about the usual quantity of Baltic lumber will find its way to the United Kingdom. Representatives of Baltic shippers who have canvassed the leading importing centres are reported to have met with but meagre success. As against these unfavorable conditions, it may be pointed out that the stock of lumber in the Surrey Commercial Docks, London, on January 31st last, shows a shortage of over 3,000,000 pieces as compared with one year ago. Canadian white pine, red pine and spruce, all show a considerable decrease, and with the exception of spruce battens, the whole of the sawn and planed lumber of regular sizes now in the docks is less in quantity than at the corresponding period of 1904. The demand in the London market is largely for batten and board sizes in preference to deals, which have not been so readily marketable as the narrow widths, which are considerably cheaper.

STOCKS AND PRICES.

The Pacific Coast Lumber Manufacturers' Association, at a meeting held at Seattle, Wash., on January 27th, advanced the price of fir and cedar lumber and lath.

Lumbering operations are being carried on quite extensively on the Sissiboo river, in Nova Scotia, this winter. It is estimated that the cut will be the largest on record.

The log market in British Columbia continues firm with an upward tendency. Continued rain has not only interfered greatly with logging operations in progress, but has also prevented many camps which were closed last fall from starting up again.

At the annual meeting of the Wisconsin Valley Lumbermen's Association held at Wausau on February 7th, the secretary reported that the volume of business handled during last year was most satisfactory, the total shipments being 503,024,000 feet, as compared with 511,795,000 feet in 1903.

The log cut this winter in Minnesota for the Canadian mills is being considerably curtailed. The Rat Portage Lumber Company have two camps on the Big Fork river and are putting in about 4,000,000 feet. The Keewatin Lumber Company are putting in 10,000,000 on the Big Fork. The Rainy River Lumber Company have several camps on the same river and expect to have about 20,000,000 feet of logs, although they are not putting in a full stock this winter.

The Merrill-Ring Lumber Company, of Duluth, Minn., recently sold 6,000,000 feet of No. 3 and better and the No. 4 and No. 5 boards out of 1,000,000 feet of logs, all at better prices than have been generally obtained until very recently. A remarkable sale made at Duluth lately was a lot of No. 5 boards, not of unusually good grade, at $9.25 a thousand. This is considered at least 75 cents above the market.

There was manufactured in the state of Michigan last year 1,669,547,749 feet of lumber, as against 1,945,373,031 feet in 1903 and 1,846,104,970 feet in 1902. The pine output last year aggregated 426,912,734 feet, as compared with 741,312,465 feet in 1903. The hardwood output was 618,938,333 feet, as against 475,453,066 feet in 1903. The quantity of hemlock manufactured was 623,695,682 feet, as compared with 728,607,500 in 1903. There were 1,055,543,250 shingles manufactured in Michigan last year, as compared with 1,380,165,000 in the previous year. The lath production was 189,716,950 pieces, compared with 373,142,500 pieces in 1903.

CONDITIONS IN LIVERPOOL.

Messrs. Farnworth & Jardine furnish the following particulars of the Liverpool lumber market: In the business of the past month there is little change to report but the slight improvement recorded in December has been fairly maintained. Imports have been on a moderate scale, the deliveries fair, and stocks on the whole are not too large, whilst some of the leading articles show a considerable reduction. Values are generally steady.

PINE TIMBER.—Of waney the import consists of about 6,000 feet by steamer, via St. John, N.B.; the demand continues very quiet, the deliveries have been small and stocks are ample; prices are steady.

SQUARE PINE.—Very slow demand; the stock is ample but prices are firm.

RED PINE.—The stock is very small, but there is very little demand, and only for a few special requirements.

OAK LOGS.—The demand is inactive, and the consumption has been unsatisfactory; stocks are sufficient, but values are fairly steady.

ELM.—There has been a fair enquiry for first class rock elm and values rule high; the stock is low. Ash is seldom enquired for.

PINE DEALS.—There has only been a nominal import, but the deliveries have been very disappointing, high prices checking consumption, and stocks are too large. Red pine deals are dull of sale and stocks are ample.

NEW BRUNSWICK AND NOVA SCOTIA SPRUCE AND PINE DEALS. — The import during the past month to Liverpool, etc., and Manchester Canal has been moderate, viz., about 2,070 standards, against 6,030 standards corresponding time last year. The consumption, which practically represents six weeks deliveries (on account of extra time required for the annual stock taking), has been satisfactory, and stocks, although still ample, are being reduced to a more moderate compass. It is most desirable that shipments during the next few months should be very small; values are unchanged.

BIRCH.—Logs from St. John, N. B.,

BRITISH COLUMBIA LETTER.

(Correspondence of the CANADA LUMBERMAN.)

VANCOUVER, B.C., February 5th, 1905. —There is a very appreciable increase in the price of logs, and Mr. J. S. Emerson is benefitting accordingly. They were $7.50 for the best, and now another dollar has been added. That is for cedar logs, for which there is an especial demand noticeable because of the stringency. Unless conditions are very favorable, another rise in price is looked for before a supply comes in.

Shingle prices are again down, and they are now cheaper than ever before. A month or so ago the B. C. Lumber and Shingle Manufacturers' Association, of this city, issued a new price list in which shingles were reduced from $2.50 to $1.90, and another decrease has now gone into effect. Last week they were brought down to $1.50 for local trade, and $2 for the Territories.

"While we might adopt the recourse of opening lumber depot yards in the Northwest," a prominent lumberman said to your correspondent, "we have not decided upon that course, and only would do so as a means of self-preservation. To open such yards means practically to go into the retail business, and that would necessitate a very large capital, which just at this stringency especially the millmen do not happen to have handy."

Balance sheets for 1904 do not show a very encouraging state of affairs among the mills, and every effort is being made to retrieve losses. Mr. A. C. Flumerfelt, who has large mining interests in the interior, and who is president of the International Coal and Coke Company, operating measures at Coleman, Alberta, has taken permanent quarters in Vancouver and will pay direct attention to the affairs of the Hastings Shingle Manufacturing Company, in which he is largely interested.

Millmen generally are preparing for a busy season, in anticipation of the duty being granted this year by the Dominion Government. "If it is not given this year," was the remark of the manager of one of the large concerns in Vancouver this morning, "then I would not like to prophesy what will happen." Trade on the whole is not of the best. Local business continues fair, and there is a little doing in the export. It is, however, an improvement on last fall, and should be at this time of year. A further improvement is looked for if conditions are favorable.

News has arrived of the death of Mr. W. P. Sayward, the pioneer lumberman of the province, which took place at San Francisco last week. He came north at the time of the rush to the Cariboo gold fields and built a mill near Victoria in 1858. It has been running ever since, and is now conducted by his son, Mr. J. A. Sayward, who was at his father's bedside.

Lumber manufacturers are still talking of a mutual insurance as a relief from the high rates charged by the regular insurance companies. There is a rumor that action is to be taken very soon.

Mr. Robert Weir, of the Weir Lumber Company, Orillia, is making his first trip to the west, and is visiting his cousin, T. W. Kerr, of Ladner.

Messrs. J. E. Taylor and A. L. Clarke, of Texas, interested in the Vancouver Lumber Company, of which Mr. J. D. Moody, another Texan, is manager, are in the city in connection with the doubling of their capacity. This will entail an expenditure of $150,000. The mill was bought last summer.

Mr. H. A. Wilson, of Stillwater, Minn., was here last week looking over possible sites, and investigating local conditions. He is said to represent capital of $400,000.

ST. JOHN RIVER LOG PRODUCTION.

Mr. William H. Murray, a prominent lumberman of St. John, N. B., in a recent interview, gave some particulars concerning logging operations on the St. John river this winter.

The cost of bringing out logs, he says, has been a little lower than usual. Owing to the fact that the cut was greatly reduced, fewer men were required, and the contractors were thus able to secure all the help they wanted at lower wages than in the past.

Last year 138,000,000 feet of St. John river logs were actually rafted and delivered to the mills, and another 30,000,000 feet are still in the booms, so that the total output for the past season was 168,000,000 feet, of which almost 40,000,000 feet were old logs which had been hung up, and the actual cut 128,000,000 feet.

This season the cut is certainly not over 60,000,000 feet. There are in the booms 30,000,000 feet left from last year and another 18,000,000 will come down, having been hung up. Mr. Murray thus makes the total output at between 105,000,000 and 110,000,000 feet, or not more than two-thirds of last year's production, while the actual cut of new logs will be less than half of last year's.

Fewer American logs than usual, proportionately, have been cut. Dunn Bros.' mill at St. John, it is stated, may not run during the coming season. Warner is sawing more Canadian than American logs, and the same is true of the two Miller mills. Mr. Murray and Cushings are about the only large operators in American logs and they are not going in very heavily.

John A. Morrison, of Fredericton, is bringing out a million of cedar, but this is the only item out of the ordinary in the cut.

Steamer St. Helens, for Santa Cruz, 227,268 ft. spruce boards, 223,143 ft. scantling, 218,300 ft. laths, 11,525 pickets, 159,941 ft. pine boards, 41,205 ft. plank. Steamer Wyandotte, for Cape Town, 8,220 pcs. lumber.

TIMBER LIMIT TRANSACTIONS.

The Shepard & Morse Lumber Company, of Ottawa, are announced to have purchased from the Bronson Company of that city three timber berths on the Montreal river, in the Temiskaming district, containing 105 square miles. The berths are said to be heavily timbered with white pine, and the purchase price is given as $250,000. The limit is practically the last of the Bronson holdings in the Upper Ottawa country, although they still own a large limit on the Quinze river, which is being held for pulp wood.

HELP!

Do you want to engage a mill superintendent, yard foreman, shipping clerk, sawyer or filer? An advertisement in the "Wanted and For Sale" Department of this paper will supply your wants, and at small cost.

BUSINESS NOTES.

A demand of assignment is reported to have been made upon P. S. Hardy, general store and saw mill, Chambly Canton, Que.

The creditors of the Wetaskiwin Sash & Door Company, Wetaskiwin, N.W.T., are requested to file claims with W. Forbes at that place before March 15th.

H. W. Lightburne has commenced business in Liverpool, Eng., on his own account as spruce broker. Under the style of H. W. Lightburne & Company, he will act as agent for John E. Moore & Company, of St. John, N.B.

CURRENT TRADE CONDITIONS.

ONTARIO.

Current trade in lumber shows no material change from last week, business being about the average for this time of the year. Several of the Toronto dealers report that they are doing a fair trade and that the consumption of lumber for building purposes has been considerable even during the winter months. Country trade, however, is light, and shipments have been greatly retarded by the snow blockades. Prices are holding firm and no break is anticipated in the near future, as stocks are not large and it will be several months yet before the new cut is in shipping condition. The buying movement in the Ottawa Valley has apparently commenced, as within the past week several important transactions have been closed. While the actual prices have not been made public, it seems to be the opinion of the trade that the manufacturers have not considered any offers below the prices obtained one year ago. There is some speculation as to the probable course of hemlock prices. The production during the coming season is likely to be quite large, which may operate against an advance which might easily be engineered under more favorable conditions. Prices in Toronto are about $15, with an increase of $2 for lengths above 18 feet.

MANITOBA AND BRITISH COLUMBIA.

The lumber business in Winnipeg is getting active and prices are stiffening, but it is improbable that there will be much change before spring. There is still considerable irregularity, however, some dealers quoting contractors 15 per cent. off last year's prices, while a few are said to be giving a still greater discount. White pine lath has advanced and is now selling at $5 50 for No. 1 in small lots, and at $5 for No. 2. The retail dealers have also increased the price of B. C. red cedar shingles, a few

dealers asking as much as $4 for the best grade.

UNITED STATES.

Owing to the difficulty of filling orders on acconnt of freight blockades and snowstorms, dealers have not been pushing out actively for business, and consequently sales have, if anything, fallen off in volume. The most influential market factor has been the publication of the report of the secretary of the Mississippi Valley Lumbermen's Association. Contrary to general expectations, this report shows that the stock of white pine lumber on hand is considerably less than one year ago. The total stock on hand on January 1 of this year, as shown by the combined inventories of eighty - three manufacturers, is 1,361,406,206 feet, as compared with 1,504,465,890 feet reported by eighty-nine manufacturers last year. This is a decrease of 143,059,684 feet in the Mississippi and Wisconsin Valley territories. Shingles on hand show an increase of 14,000,000, and lath about 6,000,000 pieces. While less piece stuff was manufactured by the Mississippi Valley lumbermen during the year, the inventories show an increased stock, indicating the competition with hemlock and yellow pine dimension lumber. The largest increase in any item of inch lumber is No. 3 boards, of which there is 7 per cent. more on hand than one year ago.

The new price list adopted by the Mississippi Valley Lumbermen's Association makes an advance of $1.50 on C and better Norway flooring and finish, and 50 cents on Norway siding and certain sizes of fencing. No. 1 white pine lath is fixed at $3.75 at the mill, mixed at $3.25 and No. 2 at $2.75.

Business in hardwoods has shown a slight improvement in the cities where quick delivery has been possible. Prices are strong in nearly all instances, with oak leading.

GREAT BRITAIN.

The improvement in the British market which begun towards the close of last year has been no more than sustained, and in some quarters dissatisfaction is expressed with the developments of the past two weeks. The building trade is reviving slowly, and importers still evince a desire to proceed very cautiously. There is, undoubtedly, a hopeful tone throughout the trade, but there is also a disposition to defer the placing of orders until the season is more advanced. The demand for 9 and 11 inch deals is quiet, as scarcely any shipments are being made to South Africa. The position of battens and scantling is considerably stronger and the consumption more active. Canadian pine and spruce lumber appears to be largely in strong hands. A Liverpool report states that the spruce market has still an upward tendency, and that some small shipments by the liners of the ordinary large proportion of 3×7 and 3×8 have changed hands upon arrival. Spruce has also sold well at the recent public sales, a quantity of 3×11 inch 1st, 2nd and 3rd quality from West Bay, N.S., bringing £8 per standard of 1,980 feet. Birch timber has also changed hands at a slight advance.

STOCKS AND PRICES.

Tenders are invited up to Monday, March 6th, for lumber required by the Waterworks Department of the City of London, Ont.

The contract for the supply of lumber required by the Board of Works of the city of Hamilton, Ont, has been awarded to W. J. McAllister at $20.15 per thousand feet.

The Wilmer Lumber Company, of Wilmer, B.C., expect to take out a large quantity of railway ties this year. The ties will be towed in booms to the mouth of the Columbia river and floated down to Golden.

P. G. Keyes, Secretary of the Department of the Interior, Ottawa, will receive tenders up to Thursday, March 9th, for a permit to cut timber on Berth No. 1,188, comprising the north half of the northwest quarter of Section 3, Township 18, Range 10, Province of Manitoba.

A. F. & D. Mackay, Liverpool, Eng., held an auction sale of birch timber on February 8th. The result follows: 18 in. and upwards, 21d; 17½ in., 19¾d; 17 in., 19½d; 16½ in., 19¼d; 16 in., 18¾d; 15½ in., 17¾d; 15 in., 17¼d; 15 in., 17d; 14½ in., 16¼d; 14 in., 15½d; 13½ in. and under, 14½d; maple, ash, &c., 16d. The result is a shade better—about ¼d. per foot—than the previous auction.

Calder, Henderson & Livingston held a public sale of pine and spruce deals at Glasgow, Scotland, on February 8th, when the following prices were realized:

				Ft.	In.	C. Ft.
1st	Quebec	Pine	Deals	12/16	9/24 x 2½	4/3½
2nd	"	"	"	12/16	12/24 x 3	2/11
"	"	"	"	10/16	7/10 x 3	1/7
"	"	"	"	10/16	11 x 3	1/10
3rd	"	"	"	16	7/10 x 3	½
4th	Bathurst		"	10/20	10/21 x 3	1/1½
"	"		"	10/18	15 x 3	1/0½
St.	John	Spruce	Deals	15/28	9 x 3	1/0¾
"	"	"	"	10/14	9 x 3	1/0¾
"	"	"	"	17/26	8 x 3	11¾d
"	"	"	"	16	8 x 3	11½d
"	"	"	"	11/15	8 x 3	11d
"	"	"	"	10/25	7 x 2½	11½d

The quantity of pine lumber held by manufacturers and wholesalers in the Mississippi Valley, St. Croix Valley, Chippawa Valley and Northern Minnesota districts on January 1, 1905, was 1,059,457,075 feet, of which 625,508,647 feet was inch lumber and 433,949,608 feet dimension lumber. The quantity on hand on January 1, 1904, was 1,177,397,908 feet, of which 757,987,775 feet was inch lumber and 419,410,133 ft. dimension lumber. It will be seen that the percentage of dimension lumber on hand this spring is considerably larger than one year ago.

Concerning Miramichi lumbering operations this year, it is learned that the Wm. Richards Company will cut 10,000,000 ft. a considerable reduction compared with former seasons. On the South-west Miramichi 25,000,000 feet are looked for to come through the booms, while on the northwest about 18,500,000 feet will come out, 5,000,000 feet being old logs. At the lower end of the Miramichi the cut is estimated as follows: J. B. Snowball, 15,000,000 feet; Tracadie Lumber Company, 7,000,000 feet; Thomas Gill, 3,000,000 feet; John Maloney, 3,000,000 feet. Burtt & Jones will cut 3,000,000 feet on the Keswick. Their mill at Burtt's Corner resumed work last week.

The following charters are reported: Steamer Sellacia, Hopewell Cape, N.B., to w.c. England, discharge at two ports, deals, 35s; steamer, Bathurst, N.B., to w.c. England or e.c. Ireland, 800 standards deals, 39s, first-open-water; steamer, Halifax, N.S., to w. c. England, deals, 39s 9d.

THE OTTAWA VALLEY.

(Correspondence of the CANADA LUMBERMAN.)

OTTAWA, February 12th, 1905. — The turn in the tide has been reached, and as has been predicted in this quarter for months past, lumber in the Ottawa district has become much firmer. The outlook is bright. Formerly the Ottawa district operators were wont to consider the United States and British markets apart from and above the Canadian or home market. This year, however, the local consumption promises to exceed all records and make it a matter of much greater importance. The prospects in the United States quarter are good, and the British market is looking much better.

Usually the sales for the following summer's cutting, especially for the British market, are made in November and December, but the business was put off till this month this season. While actual figures are not obtainable, it is known, on indisputable authority, that the prices on which contracts are being made are equal to last year's ruling, and in one instance an advance of a dollar a thousand is claimed.

Gilmour & Hughson, of Hull, have again sold their coming cut to Skillings, Whitney and Barnes, of Ogdensburg. The same firm, it is understood, has also secured one half of the cut of the St. Anthony Lumber Company's mill at Whitney, of next summer's sawing. E. H. Lemay, of Montreal, has also secured the cut at McLachlin Bros. mill, Arnprior. Other deals for the American and British market are under way, and mill men are in every instance holding for their old prices.

Discussing the future of the market, one of the leading manufacturers said, "Everything warrants a continuance of good times in Ottawa lumber circles. To-day there is less lumber unsold at the mills than at any time on record. This in itself insures good times."

Stocks in the American yards are short, and the Ottawa men, as has been said, are also figuring on a big Canadian consumption, so that lumber values can be reckoned on to advance.

The feature of the local lumber field was the purchase made this week by the Shepard & Morse Company of one of the Bronson limits, the last in fact in the Ottawa district. The limit, which is situated on the Montreal river, Temiskaming country, is 105 miles in extent, and covers three berths. The price paid is in the neighborhood of $250,000. The limits are said to contain 180,000,000 feet of standing pine, and the estimate placed on it is $3 per thousand. This is considered one of the very best limits procurable, as it has not been cut over or affected by fire.

THE BARBADOS MARKET.

Messrs. S. P. Musson, Son & Company report as follows under date of January 28th:

"The only arrival during the fortnight is the barkentine "Ich Dien" from Liverpool, N. S., with the cargo of white pine which, as mentioned in our last, we had sold to arrive at $26.50 for merchantable and $21.50 for second quality. Our market for this kind of lumber, although lightly stocked with merchantable, is fully supplied with second quality, and there are some further cargoes reported on the way. Spruce is being enquired for, and although cheap second quality white pine takes its place to some extent, yet we think that next arrivals should realize fair prices. Owing to the loss of the two vessels reported in our last, the market for shingles has somewhat improved, and although there has not been much enquiry for either Long or Laying Cedar, yet we think that next arrivals of both descriptions will meet with a ready sale at remunerative prices. The schooner "Margaret M. Riley" arrived this morning from Annapolis, N.S., with 320,000 feet of spruce, white pine and hemlock—portion of cargo to selves, balance to neighbors."

Manufacturers wishing to engage lumber salesmen, inspectors, bookkeepers, or shipping clerks, or men for the responsible positions in their mills, should advertise their wants in the CANADA LUMBERMAN Weekly Edition. Results are always satisfactory.

New Orleans, La.

NEW BRUNSWICK LETTER.

(Correspondence of the CANADA LUMBERMAN.)

ST. JOHN, N.B., February 17th, 1905.—There is little doing as yet in lumber circles in this vicinity. Shipments of English deals have been fairly heavy during the present month for this time of year, but not large enough to be called important. These shipments by the liners, while usually small, have been frequent all through the winter, and the result is beginning to show in a shrinkage of the stocks on the different wharves, two or three of which are already practically cleaned up so far as English deals are concerned. Others again have shipped very little, but, taken on the whole, the complete holdings in this line by the local dealers and manufacturers would probably not aggregate more than 6,000,000 sup. feet, certainly not more than 6,500,000 feet. Of the shipments being made by the liners, most of them will in all probability go on the market; the exceptions, which are small, being the tail-ends of 1904 contracts.

Local dealers are very optimistic in regard to the immediate future in the markets of the United Kingdom, but so far their expectations have borne little fruit as far as actually selling at more favourable figures is concerned. It is simply a waiting game with the indications all pointing to a substantial and sudden rise in prices. It is an established fact that the stocks of Canadian woods in the important trade centres of Great Britain aggregate just a trifle more than half of what was available last year at this time, and with the local stocks only normal and no prospects of sawing any for two months yet, the local manufacturers are not at all anxious to tie themselves up in any way by contracts or by selling in advance any of next season's cut, preferring to wait in the face of an almost certain improvement in conditions.

But these indications and forecasts of better things have had their effect; a purchaser would find a substantial difference in buying English deals in this city to-day from what would have been the case in doing the same thing two months ago. A lack of eagerness to sell would be very apparent, also the necessity to pay higher prices, this regardless of the fact that no definite advance has taken place in the English markets.

It is improbable that any quotation on spruce English deals could be obtained less than $13.25 per M. sup. ft. (2/3 price for fourths and ends) f.o.b. steamer St. John, on a specification containing say 50 per cent. 7's and 8's, 40 per cent. 9's and 10 per cent. 11's.

The assets of the A. D. McRae Lumber Company, Hosmer, B.C., have been sold to A. Black.

MINNESOTA AND WISCONSIN STOCKS.

The secretary of the Mississipi Valley Lumbermen's Association has compiled the following sumuary of stocks on hand in the Minnesota and Wisconsin valleys:

LUMBER.

	1905	1904
Mississippi Valley....	1,115,081,154	1,221,897,908
Wisconsin Valley.....	246,325,052	282,567,982
Total.....	1,361,406,206	1,504,465,890

SHINGLES.

	1905	1904
Mississippi Valley....	218,817,400	181,244,250
Wisconsin Valley.....	19,217,000	32,854,700
Total.....	238,034,400	224,098,950

LATH.

	1905	1904
Mississippi Valley....	159,812,740	125,903,825
Wisconsin Valley.....	36,487,300	65,069 400
Total.....	196,300,040	190,970,025

Concerning the production the Secretary says: "In the white pine producing territory as a whole, including those districts outside of this association, the total production during 1904 was approximately 4,500,000,000 feet, as compared with 4,800,000,000 feet in 1903. In 1890 the total production of Northern pine in Minnesota, Wisconsin and Michigan was 8½ billion feet. Since that time there has been a steady decline. Where the production in the territory east of Chicago in 1890 was over two billions of feet, the cut last year was about 100 millions. The decline in our own territory took place principally among the mills on the Mississippi river south of Minneapolis, in Minneapolis and in the Duluth district. Northern Minnesota showed an increase."

TIMBER LIMIT TRANSACTIONS.

The Ottawa Lumber Company, of Ottawa, are reported to have purchased from J. P. Logue & Company a timber limit comprising upwards of thirty square miles situated on the Ottawa river a short distance above Lake Temiskaming. The limit contains a large quantity of virgin timber of excellent quality.

The lumber property of Trites & Wood at Elkmouth, B. C., has been acquired by Ross Bros. & Company, of Whitemouth, Man. The deal includes the mill and timber limits purchased by Trites & Wood from the Hayes Lumber Company. Ross Bros. have already started to cut logs and it is their intention to carry on active operations during the coming summer.

The saw mill of Napoleon Gignac at St. Roch's, Quebec, was burned a few days ago.

The saw mill of T. W. Flett at Nelson, N. B., was destroyed by fire last week, together with a quantity of boxes. The loss is about $18,000, about one-third of which is covered by insurance.

CEDAR FOR SALE

10,000 PIECES ROUND CEDAR, 8-16 AND 25 feet long, on the Vermillion river. Can be delivered at Spanish boom. Also Cedar, Pine and Spruce lumber for sale here at Larchwood on C. P. R. JAMES MCCREARY.

CURRENT TRADE CONDITIONS.

ONTARIO.

There is plainly evident a disposition to buy lumber to meet near-by requirements. The hope of a decline in prices has, it appears, been abandoned, and consumers are now willing to consider quotations which two months ago were quickly turned down. The business community generally are looking forward to a year of prosperity in all branches of industry, and under such conditions lumber prices are certain to be sustained. Overproduction could easily bring about a reaction in values, but nothing approaching overproduction has occurred; in fact, operations in the woods this winter have been unusually light, due to conditions previously mentioned.

Considerable lumber is changing hands. Dealers report orders on their books to keep them busy for some time, and more business would doubtless be placed but for the uncertainty of delivery owing to snow blockades. Disputes with the railways are numerous, and as these often involve increased charges, the buyer of lumber prefers to wait until conditions are more favorable for getting his stock when wanted.

The first sale of square pine this season has been recorded, J. Burstall & Company, of Quebec, securing the Madawaska production by J. R. Booth. The price is said to correspond closely to last year's figures.

QUEBEC AND NEW BRUNSWICK.

The lumber trade of the Eastern Provinces is at a very low ebb, due to the stormy weather which has been experienced. The railroads have been completely tied up, making shipments by rail an impossibility. The deep snow has also interfered with logging operations, which have been abandoned in some districts. These conditions, while exerting a temporary unfavorable effect upon the market, will mean increased activity in the spring. All indications point in the direction of higher prices for both British and United States specifications. New Brunswick cedar shingles are exception-

ally quiet and sales of Extras continue to be made at $3.20 for Boston delivery. Lath are in relatively strong demand.

UNITED STATES.

All the lumber producing districts of the United States have now fallen into line with the stronger tone. The Pacific Coast situation has been improved by the advance put into effect by the Pacific Coast Lumber Manufacturers' Association, and while the advance will not average above 50 cents a thousand, it is decidedly reassuring as showing the changed attitude of the trade. Southern pine is very strong. Conditions for logging throughout the yellow pine states were unfavorable during January and February, and the mills will not have a large stock of logs, so that prices are likely to continue firm throughout the season. The strength of yellow pine is aiding the sale of white pine, which is moving in moderate volume. The largest single transaction so far this season took place last week at Duluth. Manufacturers are asking higher prices on low grade stock, the supply of which is none too plentiful.

The improvement in the hardwood trade has been maintained. In Michigan prices are about $15 for maple, $18 for birch and $20 for basswood at the mill. The hardwood production of Michigan last year showed a considerable expansion, and the fact that prices did not decline to any extent is doubtless due to an increased consumption. The supply of ash appears to be getting smaller, inch being in good demand. Birch is quite active and is being purchased in large blocks by consuming industries.

During the past two weeks there has been some accumulation of white pine lath, but up to the present prices have not weakened. Shingles are reported to be a little firmer, although prices are irregular and no general advance has taken place.

GREAT BRITAIN.

While conditions in Great Britain are undoubtedly on the mend, the timber trade does not appear to have realized the full benefit of the general improvement in other branches of industry. The demand is still a little slow. A revival in the building trade would greatly strengthen the situation and induce more ready buying of lumber. Representatives of Canadian shippers are now in England, but have not been able, so far as can be learned, to close many contracts. On the other hand, however, the market is firm, and merchants holding either pine or spruce deals are disposed to wait for a further recovery in the market before disposing of them. At Liverpool there is a scarcity of 3×7 inch, which size is used in large quantities for new cotton mills. The price now asked is £7 a standard, whereas two months ago dealers were willing to accept £6 5s. The large reduction in spruce stocks generally has encouraged the dealers to endeavor to recoup some of the losses of last year. A small stock of spruce containing 70 per cent. narrows, and the balance 9 inch and up, was recently sold at £6 17s. 6d. c.i.f. Liverpool. For pine higher prices are also being asked. Cox, Long & Company, of London, recently issued a stock sheet quoting some first quality pine, running up to 4 by 33 in., at £48 per standard.

STOCKS AND PRICES.

R. Lockhart, of Gash Point, Ont., has already cut over two million feet of logs this winter.

S. O. Fisher, of Bay City, has sold ten million feet of lumber cut at Blind River, Ont., to Buffalo and Toledo parties.

The British Columbia Electric Railway Company are taking tenders for the supply of eight thousand fir ties.

The Inglewood Pulp & Paper Company, of Musquash, N.B., have eleven camps in operation this winter and expect to get out about 15,000,000 feet of logs.

R. R. Dobell & Company, of Quebec and London, have secured the Admiralty contract for the supply of Canadian timber and deals during 1905. This contract amounts to approximately $175,000 in value.

It is estimated that the Gibson Railway & Manufacturing Company, of Marysville, N.B., will cut 20,000,000 feet of logs this winter. At present there is four feet of snow on the Nashwaak headwaters.

The largest sale of the year of lumber to be cut in the Lake Superior district during the coming season was made last week by the Tower Lumber Company. The transfer consists of 35,000,000 feet, 90 per cent. of which is norway.

The Spanish River Lumber Company are not logging on the Georgian Bay this winter. They had about five million feet of logs held over from last year, which will be manufactured at the Spanish River mill of the Huron Lumber Company.

The Crown Lands Department of New Brunswick are asking for tenders up to Wednesday, March 8th, for a license to cut timber on two square miles on the Magaguadavic river at Brockway, for which Robert Vail is the applicant. The upset price is $20 per square mile.

Statements issued by the secretaries of the Mississippi and Wisconsin Valley Lumbermen's Associations show that during January of this year the shipments of white pine lumber were 105,000,000 feet, as compared with 79,000,000 feet for the corresponding month in 1904.

It is reported that the Victoria Lumber & Manufacturing Company, of Chemainus, B.C., have secured contracts for supplying thirty million feet of lumber to points in the Northwest Territories during the present year. The Chemainus mills have on hand a large number of logs, and, with their foreign trade, will be kept busy this season.

The following prices were realized at an auction sale held by Foy, Morgan & Company, London, England, on February 15th: Pine—12-16 ft. 2×15-22 in. 1st quality dry, £27 15s. per standard of 1,980 ft.; 12-18 ft. 3×9 in. second quality red., £11. Spruce — 12 ft. 3×8 in. unassorted, £8; 12 ft. 3×7 in., £7 15s.; 14-17 ft. 3×7 in., £7 15s.; 9-11 ft. 3×7 in., £7 10s. Elm Timber—15¼×18¾ in., 31 to 35 ft., 64s. per load of 50 cubic ft.; 15½×21¼ in., 31 to 34 ft., 64s.; 15¼×18½

in., 30 to 33 ft., 67s.; 15¼ × 25¾ in., 25 to 30 tt., 67s.; 15½ × 19¼ in., 26 to 28 ft., 65s.

The Pacific Coast Lumber Manufacturers' Association decided at their last regular meeting to make a general advance in prices. No. 1 and No. 2 5-8 fir ceiling and No. 1 and No. 2 fir drop siding were advanced $1 per 1,000 feet and all 6-inch fir ceiling was made $1 higher than 4-inch. Lath was advanced 25 cents per 1,000 and advances were made in 1×4 and 1×6 common boards and fencing, shiplap, fir joists and scantlings and timbers, s i s i e, and cedar siding. Many of the items in the list were not changed. With the exception of lath, which were advanced 25 cents per 1,000 pieces, the changes were an advance of from 50 cents to $1 per 1,000 feet, so that on the whole there was an aggregate advance of about 50 cents.

COOPERAGE STOCK PRICES.

Barrel and Box, of Louisville, Ky., quotes the following prices on cooperage stock f.o.b. Buffalo in car load lots:

SLACK STOCK.

Staves— No. 1 elm flour barrel, $9.50 to $10.00; No. 2 elm barrel, $7.50 to $8.00; mill run fruit barrel, $8.00 to $8.50; mill run hardwood staves, $7.50 to $8 00. Heading —No. 1 basswood, 6¼c to 6½c; No. 2 basswood, 4¾c to 5¼c; mill run hardwood, 5½c to 6c. Hoops—Elm, 6-ft., $9.00 to $9.50; elm, 5½-ft., $8.50 to $9.00; hickory, shaved, $6.25 to $6.75.

TIGHT STOCK.

Staves—Pork, $26.50; whiskey, 34 or 35 × ⅞, $64.00; whiskey, 34 × ¾, $54.00; oils, $34.00; sawed wine, 34 × ¾, $51. Heading—Pork, 17c to 19c; beer, halves, 32c; beer, quarters, 22c] Hoops—Tierce, $13.00 to $14.00; pork, $10.00 to $11.00.

HARDWOODS.

Of the hardwood market the Mississippi Valley Lumberman says:

"The actual movement of hardwood has been practically at a standstill during the past week. Snow blockades have seriously interfered with the car supply and considerable stock which was in transit has been delayed many days beyond all calculations. A temporary lull has come over the market, and while ordinarily there is nothing brisk at this time of the year, the conditions have been aggravated by the widespread storms and cold. The factory demand is still the lite of this market. It has been steady in volume since the first of the year and shows a decided tendency to increase with the year. Demand for all factory products has been steadily growing and factories have been meeting this with more extended operations. Their stocks were low at the opening of the year and this has compelled them to purchase somewhat more briskly in the market. The country yard trade shows some life. Orders for mixed cars with the usual proportion of hardwood items are becoming more frequent. The snow storms have interfered with shipments but the orders continue to come and every indication, at present, points to an early spring demand from the country. Flooring is in good demand in the cities and considerable of this stock is moving. Prices are holding closely to the list on flooring and there are no surplus stocks seeking purchasers. The oaks are in steady demand but the supply seems to be better than it was a year ago and during the earlier part of last summer. Basswood is stronger than it has been for many months and during the last week some good sales of this lumber were reported at prices considerably higher than a year ago."

The mill of the McRae Lumber Company at Hosmer, B.C., has been sold by the Sheriff to F. J. Watson, who is understood to be acting for a client. The price was $7,700, although the mill complete cost in the neighborhood of $15,000.

L. M. Shepard, doing a wholesale lumber business in Boston under the style of Shepard, Farmer & Company, is announced to have filed a voluntary petition in bankruptcy. His schedule shows liabilities of $156,604, of which $79,403 is unsecured and distributed among about 125 creditors. Mr. Shepard was formerly a member of the Shepard & Morse Lumber Company, but withdrew from that company to engage in business with William T. Farmer, formerly of the Wood-Barker Company. Mr. Farmer died not long after the partnership was formed.

BRITISH COLUMBIA LETTER.

(Correspondence of the CANADA LUMBERMAN.)

VANCOUVER, B. C., February 19th, 1905.—Conditions generally are improving, and mills are cutting with the prospect of a good trade this spring. One thing that will help restore the market in the Territories is the action of the Pacific Coast Manufacturer's Association, the members of which are in the neighboring states, in increasing the price to the extent of about 50 cents all along the line. No. 1 and No. 2 5-8 fir ceiling and No. 1 and No. 2 fir drop siding were increased $1 a thousand, and all six inch fir ceiling was advanced $1 a thousand higher than the four inch. Lath went up 25 cents. per M, and advances were made in 1 × 4 and 1 × 6 common boards and fencing, shiplap, fir joists and scantlings and timbers and cedar siding. These increases had been expected for some time, but will not affect the millmen on this side of the line. Naturally, if higher prices are charged for American lumber there should be more of a chance in the Northwest for the Canadian article.

Logs are still going up, and the top notch figure of $9 is beginning to be quoted. With the opening of the spring trade the demand is increasing, and a large number of camps are being re-opened and new ones started up.

It is reported on pretty good authority that the Chemainus mills have secured contracts for the supplying of 30,000,000 feet of lumber to points in the Territories during this season. Shipment is facilitated by the bringing of loaded cars from Vancouver island on barges.

General regret is felt among the lumbermen in the west because of the untimely death of Mr. W. R. Beatty as a result of injuries sustained in the fire which destroyed the boarding house of the Arrowhead Lumber Company on the 6th instant. The fire was caused by a dog upsetting a lamp. Mr. Beatty had only returned from the east the evening previous. R. Taggart, a saw filer in the employ of the company, was burned to death in the same fire.

Another fire took place on the 11th instant, when the dry kilns of the E. H. Heaps Company, at their No. 2 mill at Ruskin, were burned. The destruction was total, the loss being between $8,000 and $9,000, with insurance.

Several cargoes of lumber are being shipped to Japan, some having already gone from this port, while others are loading. The German ship Neck arrived in port last week from Eagle Harbor to take on lumber for Yokohama. She is the largest which has loaded here for some months.

Americans are steadily becoming more largely interested in timber in this province. The deal which has been pending for some months has been consummated and capitalists from the state of Washington have acquired large limits on Vancouver island, the principal portion of which are E. & N. railway lands. The price paid was in the neighborhood of $250,000. Another company is to take 26,000,000 feet of timber off a reserve on the Campbell river, and Dan McLeod left here a few days ago to start operations.

Large timber limits are owned in this province by Thomas Merrill, Aaron P. Bliss and Clark L. Ring, of Saginaw, Mich.; Thomas D. Merrill, of Duluth; and Richard D. Merrill, of Seattle, but no mills will be erected here until the Government gives assurance that further taxes will not be levied. These men are establishing a large industry in Washington, but it is stated export cannot be made from their limits in British Columbia.

THE BARBADOS MARKET.

Under date of February 11th, Messrs. S. P. Musson, Son & Company, report as follows:

"The schooner Kestrel, from Lunenburg, N.S., to ourselves, with a mixed cargo of white pine, is the only arrival we have to note, but she proceeded to Trinidad on the strength of a better offer for her cargo than we elicited here. The deck load of the Margaret M. Riley's cargo, to which we alluded in our last, was placed by us at $26.30 for merchantable and $18.60 for second quality white pine, and $22.10 for shipping and $16.10 for second quality spruce, while our neighbors inform us that they obtained similar prices for her inboard cargo. Our market for white pine is rather heavily stocked, and while shipping spruce is in light stock and would probably bring late rates, second quality is not wanted, recent arrivals having principally consisted of this description. No arrivals of shingles to report, and stocks are being gradually reduced. Next arrivals of both Long Gaspe and Laying cedar should meet with a ready sale at remunerative prices."

SHIPPING MATTERS.

The following charters are reported: Steamer Pontiac, St. John, N.B., to w.c. England, two trips, deals, 35s.; a steamer of 1,800 standards, West Bay, N.S., to w.c. England or e.c. Ireland deals, 36s. 3d., half birch.

A number of lumber charters are reported from British Columbia. Current rates are as follows: To Sydney, 28s. 9d. to 30s.; Melbourne or Adelaide, 30s. to 32s. 6d.; Port Pirie, 30s. to 32s. 6d.; Fremantle, 37s. to 40s.; Shanghai, 33s. 9d. to 35s.; Taku, 35s. to 37s. 6d.; West Coast S.A., 33s. 9d. to 35s.; South Africa, 47s. 6d. to 50s.; U.K. or Continent, 50s. to 52s. 6d.

TIMBER LIMIT TRANSACTIONS.

A large area of timber lands on Vancouver Island, B.C., is reported to have recently been purchased by parties acting for the St. Paul Lumber Company, of Tacoma, Wash. The major portion of the lands in question was the property of the Esquimalt & Nainamo Railway Company—some situated on the west coast and in the northern interior of the Island. The deal has been pending for some months.

Tug Christian, S. J., (American)—Engine High Pressure 19" x 20". Fire Box Boiler 6½' x 12'.

For further information address HACKETT TUG LINE, Amherstburg, Ont.

The saw mill of Button & Thompson at Terranova, Ont., was destroyed by fire last week. The loss is quite heavy, as the insurance was only $1,500.

Complaints have been made to the Railway Commission that the C. P. R. have not accepted the commissioners' order directing them to reduce their rates on cedar lumber in British Columbia. The board have therefore notified the C. P. R. authorities of this allegation, in order to allow the latter an opportunity to explain their course in the matter.

CURRENT TRADE CONDITIONS.

ONTARIO.

Indications point to an active building season in Toronto, as in addition to a large amount of warehouse and factory construction there promises to be an increase in house building. The prospect of such work has already influenced the lumber market, which is showing signs of early activity. Both orders and enquiries are on the increase and a few firms are quite busy. The conditions throughout the province are somewhat similar, although in Northern Ontario trade is yet backward.

There have been no significant changes in prices. Perhaps the most strength is shown by pine culls, which are very scarce. Wide culls are held at $14 at the mills, while the average widths are worth from $13 to $13.50. Dead cull sidings are quoted at $10. Common lumber is selling in some quantities. Of the hardwoods, there has been a little better call for basswood, and as high as $23 has been asked for mill run.

Lath have advanced to the point where they are believed to be nearing the top notch. Dealers are asking $3.60 to $3.70 for No. 1 for Toronto delivery, but the high price does not seem to have brought large offerings. There is little doing in shingles. The British Columbia variety are still held at $2.60, notwithstanding that a few sales were recently made as low as $2.50.

QUEBEC AND NEW BRUNSWICK.

Contracts have already been signed for the construction of nearly 200 new houses in Montreal during the coming season and there is every indication of unusual activity in building operations. This will in turn create a large demand for lumber. Dealers are now stocking up in anticipation of this demand and prices are comparatively firm. It is yet too early to predict the trend of the export trade, but in conservative circles an increase upon last year's business is anticipated. The situation in New Brunswick is defined by our St. John correspondent. Quietness prevails, but the market is strong. Cedar shingles are exhibiting more life and a few sales have recently been made at $3.25 for Extras on Boston rate of freight.

UNITED STATES.

Lumber conditions in the United States are satisfactory in almost every respect. The movement during the past week, when more favorable weather has prevailed, has been considerably heavier, one of the features being an increased call for railroad stock. Southern pine continues to show exceptional strength. In some districts there has been put into effect an advance in prices amounting to $2 a thousand on dressed and matched stuff and $3 on finishing lumber, while piece stuff and No. 1 boards have been raised 25 to 50 cents a thousand. It is not certain that these advances will be fully maintained, but they at least indicate the trend of the market. White pine prices are unchanged, but the spring season opens with a light supply of box and cull lumber and it would not be surprising if the conditions should bring about an advance before the new cut is in shipping condition. Culls are selling in the Saginaw Valley at $15 a thousand. The log input of the northern pine district is estimated at 80 per cent. of last year's production.

The position of hardwoods has not weakened in the least. A Chicago firm recently closed a contract for a large block of stock which comprised among other items four million feet of rock and soft elm. This transaction is regarded as strong evidence that buyers do not anticipate a break in prices. Consumption is steadily increasing, plain oak being the leader. Some manufacturers claim that they are receiving for this lumber an advance of $5 a thousand over the quotations which ruled but a short time ago. Quartered oak is also moving more freely. Birch and maple are quite active, and ash and elm would be moving in larger volume but for the inadequate supply in some of the eastern markets.

GREAT BRITAIN.

According to the latest reports from Great Britain, importers have as yet bought only small quantities of Canadian pine and spruce deals. There appears to be some fear of consignment cargoes, and for this reason importers are showing a disposition to postpone the placing of orders as long as possible. It is probable that the month of April will witness considerable activity in buying. The conditions, however, are favorable, as stocks are very light. Small lots of spruce by the liners have been sold in Liverpool at £7 per standard. The low price of Riga whitewood, which was dealt in heavily last season, is detrimental to spruce values. Good second quality Riga deals and planks are offered at lower prices than third quality spruce, and until the prices of the former are advanced there is not likely to be much further improvement in spruce.

STOCKS AND PRICES.

R. & T. Ritchie, of Aylmer, Que., have recently shipped over two million feet of lumber.

Tenders are invited up to March 9th for the supply of deals and other lumber required by the city of Quebec.

The W. J. Pulling Lumber Company, of Windsor, Ont., are shipping a considerable quantity of pine deals to Glasgow, Scotland.

The Dickson Company, of Peterboro, Ont., have cut about 14,000,000 feet of logs this winter, which is a slight increase over last year's operations.

The Montreal Harbor Commissioners are inviting tenders, through their Secretary, David Seath, up to Tuesday, 14th inst., for the annual supply of timber.

The William Richards Company, of Campbellton, N.B., expect to get out ten million feet of logs this winter, which is considerably below their average cut.

The cut of logs this winter by J. R. Booth's mill at Ottawa will, it is estimated, be about 10,000,000 feet less than last year. The logs for winter sawing are brought down by rail.

Tenders are invited up to Tuesday, April 4th, for the supply of from 1,500,000 to 3,000,000 feet of lumber required by

the city of Winnipeg for the next fiscal year. Specifications may be obtained at the office of H. N. Ruttan, City Engineer, and tenders are to be addressed to C. J. Brown, City Clerk.

Mershon, Schuette, Parker & Company, of Saginaw, Mich., last year shipped 35,000,000 feet of lumber from Ontario to to the Saginaw river, and it is estimated that their shipments this season will not be above 25,000,000 feet.

Several shingle manufacturers of Washington are talking of shutting down their mills until prices shall strengthen. A steady decline has been noticeable during the past two weeks, which reduced Stars to $1.32 and Clears to $1.50. Cedar shingle logs are selling at from $7.75 to $8.

The Steamer County of Dumfries sailed from Vancouver, B.C., last week consigned to London, England. The vessel was loaded at the Hastings mill and carried 1,304,652 feet. The Haddon Hall is loading at the Hastings mill for Callao, and the Imveramsey at Chemainus for Australia.

The great depth of snow in some parts of New Brunswick is seriously interfering with logging operations. It is estimated that the cut on the Miramichi river will be about 60,000,000 feet. On the North-west branch about 13,500,000 feet will come out, divided as follows: Ritchie, 7,000,000 feet; Sinclair, 3,000,000; Lynch, 2,000,000; Burchill, 1,500,000. There was 5,000,000 feet hung up last year on the North-West branch. On the South-west branch it is figured that 25,000,000 feet will be taken out. At the lower end of the Miramichi the several operators will cut about 31,000,000 feet, divided as follows: J. B. Snowball Company, 18,000,000 feet; Tracadie Lumber Company, 7,000,000; Thomas Gill, 3,000,000; John Maloney, 3,000,000.

TIMBER LIMIT TRANSACTIONS.

The Chippewa Lumber and Boom Company, of Chippewa Falls, Wis., recently sold to the Yawkey & Bissell Lumber Company a timber tract on the line of the Chicago, Milwaukee and St. Paul Railway, in Wisconsin. The tract is estimated to contain 200,000,000 feet of pine and the consideration was $1,500,000.

Gillies Bros., of Braeside, Ont., have purchased a timber limit of 100 square miles, situated on the Montreal river, from J. R. Booth and the Lumsden Estate, of Ottawa, who were joint owners. The limit is chiefly pine and the price paid is understood to have been in the neighborhood of $400,000. Mr. Booth held the title to one-third of the limit.

CONDITIONS IN BUFFALO.

There is any amount of enthusiasm in regard to the demand for lumber eastward, though the late bad weather has shut off the home demand, and it has tied up the car service till there was almost a stoppage of loading for a while, as the weather was severe and the cars staid in town if they were loaded. Still, when an order comes in it is the prompt dealer's custom to fill it if he can and then trust in Providence and the railroads to do the rest. It is to be feared that the roads are so terribly handicapped with loaded freight that they are not going to be in condition for prompt business in a long time, for as a rule there is more of all sorts of freight to be moved now than there has been for years.

The white pine trade is quite as much disturbed now as it has been for some time over the late advance asked for lumber at the mills. Dealers who have been West come home with reports of advances that this market could not in any way stand. One dealer reports an offer of 4,000,000 feet at an advance of $2 over what he has been paying, and he came home and left it. If the West or any other section wants to pay these prices, let it go ahead and pay them. Possibly this section will get left if it waits for the producer to come down, but if it cannot sell the lumber at a profit the wise thing to do is to let someone else have it. It is agreed that box lumber must go higher and stay there, but the upper grades have not been active and strong enough to warrant any material advance in price.

As to hardwoods, there is the same indication of active demand as soon as the weather is better, and the movement now is quite as good as the season will warrant, so that the feeling is very confident everywhere, so far as the sales end of the trade is concerned. As to production, however, the reports are not very favorable to heavy stocks. This market has made a big effort of late, and has considerably more lumber in yard here than for some time, so the reports of bad weather from the southwest, the very thing that so cut down the stocks three or four years ago, are not at all pleasing. Prices will not be any less firm on that account though.— Lumber Trade Journal.

The following charters are reported: Barque Theodore, Tangier, N. S., to w. c. England, deals, 38s 9d; barque Charles E. Lefurgey, Bay Chaleur to w. c. England, deals, 38s 9d; two steamers, Hopewell Cape, N. B., to w. c. England, 36s 3d, May.

NEW BRUNSWICK LETTER.

(Correspondence of the CANADA LUMBERMAN.)

ST. JOHN, N.B., March 3rd, 1905.—Lumber business of all kinds is quiet in this direction. In some cases small gangs of men are at work on repairs at the mills, but little sawing will be done before the twentieth of April.

In the woods at the head of the river operations continue with much briskness. There is at present from two to three feet of snow, which is about the usual, and the operators expect to fill their contracts without difficulty. But in the lower counties the snowfall has been so extremely heavy that many operators have been compelled to cease and to discharge their crews. While the local manufacturers and most of the larger ones along the river obtai the bulk of their logs from the extrem up-river districts and the curtailment of the crop in the lower counties does not affect them greatly, it will mean a limited sawing season for many of the smaller plants and will also mean that those who are depending upon local offerings for any part of their season's consumption will be obliged to pay a higher price than was the case last year when spruce logs delivered at St. John netted from $8.50 to $9.50 per M, according to the percentage of battens.

Little is being done in shipping circles as yet, but a large number of schooners are preparing to leave their winter quarters and their owners are looking for charters to U.S. ports.

Two large sailers loaded with deals sailed yesterday and these have been the most important sailings to the westward during the last two months. These cargoes are bound for New York, consigned for sale.

Business in the United States has been unusually dull and as yet there is little to be said in regard to the trade beyond the fact that indications point to a brisk demand as soon as the weather warrants a resumption of building operations. The unusually rigorous winter has caused practically a stand-still in all kinds of building, but on the other hand receipts have been infinitesimal and prices have not suffered. Stocks on the other end are reported to be much lighter than is usually the average at this time of year, and in this city and vicinity the same fact applies; not more than 1,250,000 to 1,500,000 s. ft. of American deals being available at present writing. The owners of these seem to be in no hurry to ship or sell and a purchaser would not be able to get any lower quotation than, f.o.b. St. John: All 10 and 12 inch, $17.00 to $18.00 per M. s. ft.; 9 inch, $16.00 to $16.50 per M. s. ft.; narrows, $14.00 to $14.50 per M. s. ft.

Charters to New York are plentiful at $3.00 per M on long lumber.

CANADIAN LUMBER SHIPMENTS.

THE OUTLOOK.

Under the above heading the American Lumberman offers the following comment on the lumber situation :

As a whole the lumbermen of the country are well pleased with the outlook for trade during the remainder of the year. Stocks, notably those held by southern pine and hardwood producers, are below the average. In only one—the white pine section of the north—was there any considerable accumulation and winter sales have absorbed a large amount of this surplus. Consumers, as a rule, limited their purchases last year, buying for immediate requirements only and not as is generally the case systematically adding to their stock. As a result of this policy the amounts they now have are probably below those which are usually kept on hand and with the increased call for all kinds of merchandise incident to the better times undoubtedly will be a firm, consistent inquiry for lumber supplies on the part of the lumber consuming factories of the country. The prospects for building are excellent. Money is cheap and from every district come optimistic reports of the contemplated amount of building to be done.

The price level during 1905 will be higher than that of 1904 and this improvement should enable those sections where operations were not conducted satisfactorily last year to retrieve their fortunes and bring about a better state of affairs.

No disposition to boom things is being shown, for which the country may be thankful. Those interested in the various branches of industry are going quietly along to improve their facilities for manufacture and their products as well, and it is this quiet determination on their part that is giving to the business the prosperous aspect which it now presents.

It is much too early yet to say anything in regard to the prospective crops except that the heavy snows have protected the wheat belt of the northwest from the severe cold weather and should be instrumental in giving wheat a good start. If those in charge of the industries of the country continue to maintain their equilibrium and to prefer permanency of operation to mushroom growth there is no adequate reason why the prosperity of the country should not continue for many years.

Tug Home Rule—Engine High Pressure 22 ½" x 24". Fire Box Boiler 8' x 14.

Tug Christian, S. J.. (American)—Engine High Pressure 19" x 20". Fire Box Boiler 6½' x 12'.

For further information address HACKETT TUG LINE, Amherstburg, Ont.

An offer of 30 cents on the dollar has been made for the assets of Shepard, Farmer & Company, Boston, Mass.

The J. R. & S. P. Kay Box Company, Rochester, N. Y., are announced to be in difficulty. A number of Tonawanda concerns are interested and one of them has offered to take over the business of the company and pay the other creditors 50 cents on the dollar.

CURRENT TRADE CONDITIONS.

ONTARIO.

The past week has been favorable for outdoor operations in Ontario and the lumber trade has benefitted thereby. Activity is more general and an increase in country orders is reported. The Ottawa mills are experiencing a demand larger than usual at this season of the year and have marked up prices in some instances. Good strips are about $2 per thousand higher than at the beginning of the year.

The position of hemlock is exceptionally strong. The stock in first hands is unusually light and wholesale dealers are finding it impossible to purchase any large blocks at a price which will permit them to turn the lumber over at a profit. Some dealers have been adding to their stocks for some months and are now in a splendid position to take advantage of the advance which is expected to take place before the new stock is in shipping condition. Hardwoods are just holding their own, but the demand is a little more active. Birch probably represents the largest volume of business, but there has also been some improvement in the demand for basswood.

MANITOBA AND BRITISH COLUMBIA.

The number of building permits already issued this year by the Building Inspector of Winnipeg is indicative of another very active season and a heavy consumption of lumber. The dealers are now getting quite busy and are booking some good-sized orders. The country trade has not yet commenced to move. B. C. shingles of No. 1 grade are being laid down in Winnipeg at about $2.10; and these are still carrying large stocks of both lumber and shingles. Where a buyer will take a large block of stock very favorable prices can be obtained.

UNITED STATES.

We are advised that, by reason of deep snow and the early break-up of winter, the log input of the Northern States has been curtailed 25 per cent., which will reduce the cut of both pine and hardwood. This is already having a strengthening influence upon prices. The eastern markets all report a good demand for white pine, and especially for the coarser grades. Our Bay City and Saginaw list this week shows an advance in all No. 3 barn boards, which now range from $17 for 1x4 to $21.50 for 12-inch. The spruce market continues strong and it is predicted that prices for the new cut will open at an advance averaging at least 50 cents above last year's opening figures. Hemlock is a little irregular. The recent advance in Chicago of 50 cents on all items excepting 3 inch plank, timber and No. 1 and No. 2 strips is being maintained, while from Tonawanda comes the report of a shading of quotations, stock having been offered during the past week at 75 cents below the base price of $16.50. In Boston hemlock is strong, Pennsylvania No. 2 bringing $16.50 and No. 1 boards $19 to $20.

The supply of dry hardwoods is gradually decreasing, thus giving a strong tone to the market. Dry plain oak is still very scarce. In northern woods the most active is birch, which is selling freely. Soft elm is in promising condition.

GREAT BRITAIN.

The recent reduction in the Bank of England rate is looked upon as a favorable factor, as it would seem to indicate cheap money for the business requirements of the country for some time to come. The developments in connection with the Japanese-Russian war have also been of a significant character as indicating the near approach of peace, although opinions on this point are somewhat at variance. Coupled with the activity in the shipbuilding industry, these favorable influences have helped the lumber market, Liverpool and Glasgow. The stocks of lumber are small and would soon be wiped out by an active consumption, but the feeling of conservatism is too strong to expect more than a very slight improvement during the next two months. The Canadian shippers have not met with great success in closing contracts, but they are showing no disposition to reduce their asking prices and the prospective buyer would seem to have little to gain by deferring the purchase of lumber until later in the season, when prices are more likely to be higher than lower.

STOCKS AND PRICES.

The Moyie Lumber & Milling Company, Moyie, B. C., are offering for sale their stock of lumber at a low price to a party who will take the entire block.

The Woodstock Lumber & Manufacturing Company, of Woodstock, Ont., have again contracted for the entire season's cut of the mill of Thomas Darling & Sons, Wisa Wasa, Ont.

Detroit dealers have advanced the price of lath, which are now quoted as follows: No. 1 white pine, $4.50; No. 1 Norway, $4; No. 1 hemlock, $4, these prices being an advance of 50 cts. Maple flooring has advanced $3.

The Woodstock Lumber & Manufacturing Company have secured a large stock of logs of good quality to be cut at their mill at Woodstock, Ont., this season, consisting of oak, elm, maple, basswood, birch and beech.

The demand for cooperage stock is quiet. At Buffalo prices are down to 40 cents for flour barrels. Jobbers quote the following reduced prices: First-class dry elm flour barrel staves, $9 to $9.50; first-class basswood heading, 6½ to 7 cents; 6 foot coiled hoops, $9.25 to $.9.75.

The St. John River Log Driving Company, Fredericton, N. B., will receive tenders up to noon of April 4th for the driving of logs between Grand Falls and Fredericton. The rate per thousand feet from Grand Falls to the boom limits is to be 20 cents, the tenderers to state the amount they will be willing to pay for the

P. G. Keyes, Secretary Department of the Interior, Ottawa, will receive tenders up to Wednesday, April 5th, for a license to cut timber on Berth No. 1,212, com-

THE OTTAWA VALLEY.

(Correspondence of the CANADA LUMBERMAN.)

OTTAWA, March 13th, 1905.—A glance at the market quotations on Ottawa lumber bears out tho statement that the tendency is towards improvement. Advances are reported in some lines, while in others the maximum figure prevails and the minimum quoted for some weeks past will not now be considered.

Despite the car shortage the railways report a big movement of lumber to the States and the manufacturing centers of Western Ontario. It is mostly all lower grade stuff that is going to the west end of the province, and the call promises to continue.

American lumbermen in Ottawa last week reported everything as looking roseate, indications pointing to a big building season. With steel and iron firm, lumber is bound to hold good, being the third in the trio of most important actors in industrial activity.

On account of the divergence in grading, it is difficult to get a line on hardwoods, but the following about meets the situation: Elm, $20 to $22 per M; Basswood and Ash, $22 to $25; Birch, $18 to $20. As yet no sales of consequence of next summer's stock have been made for the English market. Manufacturers are holding out for last year's price, and some are said to be asking a five per cent advance. This the English buyers are not inclined to give. However, it is improbable that they will be able to get any better terms, in view of the bright future of the American and Canadian markets. Reports from the limits show that the work of laying the logs at the streams is progressing favorably and that the prospects are good for getting out the entire cut. Natural conditions on the whole were good, although an excess of snow was complained of in some camps.

THE GLASGOW MARKET.

Messrs. Edmiston & Mitchells' monthly timber circular furnishes the following particulars of the Glasgow market:

WHITE PINE.—The import since the beginning of the year consists of about 200 loads. Enquiries have been few, and the little business passing has been chiefly in the cheaper qualities. Stocks are moderate but ample. Prices are steady.

OAK.—There has been rather a better general demand during the mouth, chiefly in large squares, and several small lines have been placed at fair prices. The stock is still heavy, both in Quebec and Southern States wood.

ELM.—Enquiries during the month have been numerous for first class rock, and the stock of this class is now very low. Prices have firmed up considerably. Stock of soft elm is now moderate and is moving off freely.

QUEBEC BIRCH.—There have been three shipments, consisting in all of about 400 logs, which came via St. John and Portland, and were, in every case, disposed of from the ship's side at satisfactory prices. The prices made were at from 1s. 10d. c.i.f. for 15-inch, up to 2s. c.i.f. for 16-inch. Only a trifling business has been done for summer delivery, buyers fearing that the existing high prices will encourage exports and so over-supply the market, with a consequent weakening of values.

NEW BRUNSWICK BIRCH.—A number of shipments of St. John birch logs have come to hand, and have been disposed of from the ship's side at 18d. per foot for 14-inch average. In planks, several sales are reported, Bathurst having been done at £8 5s and St. John at £7 15c. c.i.f., these being for spring delivery. No business has so far been done for summer delivery.

ASH.—There is nothing new to report, the stock of Quebec wood on hand being only trifling, and there is very little enquiry for it. Of States Ash logs, there are several hundred logs in store and very little outlet for them.

DEALS, &C.—Business has been rather more active since the beginning of the year, and stocks of all kinds are being rapidly moved off. The import both of pine and spruce has been of a restricted character, and has been sold "ex quay." Stocks of First and Second Pine, 7 to 10 inch by 3-inch, and sidings are practically exhausted. Prices are firm. Current values are as under:—Broad First Pine Deals, £32 to £34; 11-inch, £29 to £31; Ends and Non-Dimensions, £22 to £24. Second Pine Deals—11-inch and up, £17 to £19; Ends and Non-Dimensions, £13 to £14 10s. Third Pine Deals—11-inch and up, £11 to £14; Ends and Non-Dimensions, £9 10s. to £10 10s. Red Pine Deals—9 and 11 inch, £10 to £11; Narrows, £7 to £8 10s. First Pine Sidings and Strips—9 to 10 inch, £23 to £24; 11 to 12½ inch, £25 to [£26; 13 to 14 inch, £27 to £28.

SPRUCE DEALS.—9-inch and up, £8 to £8 10s.; 7 and 8 inch, £6 15s. to £7 10s.

NEW BRUNSWICK PINE AND SPRUCE.—9-inch and up, £7 10s. to £8; 7 and 8 inch, £6 5s. to £7.

J. S. FINDLAY,

OWEN SOUND, ONT.

BRITISH COLUMBIA LETTER.

Correspondence of the CANADA LUMBERMAN.)

VANCOUVER, B.C., March 5th, 1905.—Prospects for the spring are bright. No changes in prices in lumber are reported, but the general indication is that they will be firm all season. Figures on logs are very stiff, and will likely remain so until the camps now reopening and starting can get in more supply. Nine dollars is the highest price for logs, which is a record. Mill stocks are not long yet, but cutting is actively going on, and all the plants are in operation. Altogether, the feeling is much better than a few months ago, and those engaged in the industry are beginning to take heart. Manufacturers are confident that the duty against the importation of American lumber will be granted this session, which will ensure the home market to them. A prominent millman stated the other day it would not mean an increase in price to the settler, but would tend to cause a decrease.

The export trade so far this year has been very good, a marked improvement over the last few months of 1904. Since the first of January eight vessels have either loaded at the Hastings mill or at the wharves, the cargoes being mostly for the United Kingdom or Japan, with two for South America. The County of Dumfries, which got away a week ago, had on board 90,000 feet more than she carried when here eighteen months ago. This is due to careful stowing. The German ship Neck, recently arrived, is the largest carrier which has been here for several months.

The largest transaction of its kind for this part of the province is the contract for thirty million feet of lumber awarded to the Victoria Lumber and Manufacturing Company at Ch emainus by the Canadian Pacific Railway. The Railway Company takes cars by barge to Vancouver island, and the lumber will give return freight.

Local conditions are to be good again this year. In 1904 a great amount of building was done in Vancouver, and from the figures of the Building Inspector for the city it looks as if the industrial activity will continue. Permits for February amounted to $190,000.

In the Interior, the mills of the Kamloops Lumber Company and the Elk Lumber and Manufacturing Company, the latter at Fernie, are about ready for operations, and a new mill is talked of for Arrowhead. There will be few idle concerns this summer, and if prospects turn out as they look at present the sheriff will not be as busy next fall as he was last.

Railway building in the Kootenay and the Territories is causing a good demand for ties and camps are in operation all through the eastern portion of the province and near Edmonton. Capt. F. Armstrong has taken over the portable mill of the Wilmer Lumber Company and has installed it on Johnston creek, where he will operate a camp all the year round to take out 300,000 ties during the next five years.

Mr. H. B. Gilmour, who places considerable Waterous machinery, has just returned from a trip to the eastern part of the province, and gives a very favorable report of conditions. Millmen are to endeavor to make up for the results of the depression of last summer, and are lacking no effort in getting after what business there is.

Loggers are interviewing the Legislature, now in session, for a removal of the export duty. This was refused a few months ago, and it is very probable the Government will not take action this time.

Another indication of activity is the rush of orders received by the Burton Saw Works of this city, and a nnmber of expert mechanics have been added to the staff.

The Hedley Lumber Company are finding trade good and are taking out a large quantity of logs for the season's cut. The market there is local.

The development of the lower Okanagan district is booming the country around Penticton, and bu lding operations keep the supply of lumber scarce.

Messrs. E. H. Heaps & Company, have started the reconstruction of the dry kilns of the mill at Ruskin, which were burned three weeks ago.

CURRENT TRADE CONDITIONS.

ONTARIO.

There is a heavier movement of all classes of lumber from the dealer to the consumer, the approach of the building season being responsible for increased activity. Neither dealers nor manufacturers make any complaint regarding the volume of business, while the outlook for the future seems to be quite promising. This does not mean that prices of lumber will advance, but rather that the supply will be absorbed at reasonable figures if no unforeseen developments should arise to curtail the demand. Given two or three weeks of favorable weather, there will doubtless be a noticeable increase in the domestic consumption. The building movement will soon be under way, and in Toronto it promises to be equal to last year. Railroad construction will also be a considerable factor and provide an outlet for large quantities of ties and other timber.

Some difficulty is being experienced in executing orders owing to the scarcity of hemlock and low grade pine. The holder of lumber of this class is in a position to make almost his own prices. The supply of dry hemlock has passed into the hands of a few dealers.

QUEBEC AND NEW BRUNSWICK.

Eastern lumbermen generally are looking forward to a more prosperous season than last year, although the volume of business already booked is by no means large. There promises to be a good demand for lumber in Montreal, where a number of large buildings are about to be commenced. Quebec shippers are holding prices firmly, in the belief that all the lumber manufactured will find a market.

On account of the depth of the snow, many operators in New Brunswick and Nova Scotia discontinued work in the woods earlier than usual and the cut is certain to figure out much smaller than one year ago. There has been a slight improvement in New Brunswick cedar shingles, although small lots of Extras are still being purchased at $3.20 for Boston delivery. Clears are now in good demand and by no means in heavy supply.

MANITOBA AND BRITISH COLUMBIA.

Activity in lumber circles throughout Manitoba and the Territories has been more marked during the past week and dealers report a considerable increase in the number of enquiries for lumber. The building season in Winnipeg is opening up very favorably and in many of the towns throughout the Northwest works of construction are proposed which will consume a vast quantity of lumber. Some of the shrewdest dealers are placing orders at current prices, believing that the prospective demand will bring about an advance in both lumber and shingles in the near future. The British Columbia shingle manufacturers are now said to be formulating a plan with a view to obtaining more remunerative prices for their product.

Owing to a scarcity of logs on the British Columbia market, one or two manufacturers are reported to have purchased a considerable quantity in Washington. One boom of 1,500,000 feet will, according to report, be towed from Puget Sound to Burrard Inlet, to be cut by the Canadian Pacific Lumber Company's mill at Port Moody. During the past winter logging was not carried on to any great extent along the British Columbia coast to the north of Vancouver, principally because last fall the market for logs was glutted and prices were forced down so that there was no profit in the business. The mills worked off their supply of logs and now there is practically no British Columbia timber in the water except that cut by the mills on their own account.

UNITED STATES.

The lumber market of the United States continues to exhibit strength and increased activity. Stocks at the mills are not unusually large and it is said that the new cut of pine is largely contracted for, the reported shortage in the log production having induced dealers to contract somewhat liberally. At Buffalo and Tonawanda No.

4 and 5 boards are very scarce and the price of those grades which replace them to a certain extent have advanced. The prices asked at the mills for the lower grades show a wide range, as some manufacturers have sufficient confidence in the future to advance their quotations very materially. In the Saginaw valley mill culls are quoted at $15.50 to $16.50 and the supply is light. Hardwoods show no indications of weaking on account of the near approach of the sawing season. Plain oak is being produced in large quantities but the supply is readily absorbed. Quartered oak has been curtailed in production, which is having a strengthening influence on values. Birch and rock and soft elm are moving quite liberally. The shingle market is quiet. The average quotation for 18-inch cedar shingles at Saginaw is $4.25.

GREAT BRITAIN.

While it is probably true that the volume of busines which has been closed with the British importers has not been large, it is quite evident that the trade generally regard the situation as greatly improved. The few who have placed orders with Canadian shippers are in a happy mood, for it is almost certain that prices of both pine and spruce will show an upward tendency during the next few months. All the spruce which has arrived recently has been promptly taken and there is a growing inquiry for early cargoes. Good stocks of a fair specification can be readily sold at from £7 5s to £7 7s 6d per standard c.i.f. London or Liverpool, and it is probable that £7 10s to £7 15s will be about the ruling prices this spring. Recent public sales have reflected the improvement, several lots of 3x9 inch second quality, 12 to 14 feet in length, bringing £9 10s, while 3rd quality has met with a ready sale at £9. It is expected that there will be heavy imports of spruce into Ireland this year, and a larger consumption of Quebec waney and square pine is also anticipated. In hardwoods, a few sales of birch and elm timber are reported. Birch planks are in light stock and likely to advance in the near future. There is a very quiet market for oak.

STOCKS AND PRICES.

The McClure Lumber Company, of Detroit, Mich., have purchased between 50,000,000 and 60,000,000 ofit. hardwood timber in Alabama.

Tenders for the supply of timber for the Board of Works of the city of Ottawa, Ont., will be received by James Davidson up to March 29th.

The Newfoundland Timber Estates, of St. John, Nfld., expect to cut 35,000,000 feet of lumber this season. The New Land Lumber Company will cut 10,000,000 feet and the Exploits Lumber Company about 7,000,000.

The Madawaska Log Driving Company have awarded the contract for log driving to Grand Falls to E. W. & L. W. Pond, who handled the drives last year. It is estimated that about 60,000,000 feet of logs will be brought over the falls this season—slightly less than last year.

The annual meeting of the St. John River Log Driving Company will be held at Fredericton, N. B., on April 5th, when the contract for driving the logs put into the St. John and Aroostook rivers to the limits of the Fredericton Boom Company will be awarded.

W. H. Murray, of St. John, who recently returned from a trip up the St. John river, states that the season's cut on that river and tributaries will not exceed 80,000,000 feet, or about 60,000,000 feet less than last year. The operators have finished hauling and are making preparations for stream driving.

J. S. FINDLAY,

OWEN SOUND, ONT.

NEW BRUNSWICK LETTER.

ST. JOHN, N.B., March 16th, 1905.—There has been considerable activity in shipments from this port to the United States during the last fortnight, which shipments consisted almost entirely of deals and lath. There is practically nothing doing in the manufacturing line as yet and the outlook now promises that the mills will begin the sawing season with wharves entirely clear of all kinds of long and short lumber, barring probably some lots of merchantable inch boards, which have been very slow during the last six months and for which there does not seem to be any promise of a demand that could be called brisk. Beyond the depression in this line all indications are very encouraging. While the immediate future does not look so bright for cedar shingles as was the case last year at this time, the manufacturers seem quite confident that when building operations have got fairly under way in the Eastern States, the present lack of stimulus will be speedily replaced by more favourable conditions.

Stocks in this line are not at all heavy for this time of year; from three and one-half millions to four millions would cover the amount easily and it is hoped that most of these will be disposed of before another month has passed and in ample time so that the regeneration of manufacturing will not cause any overplus of stock.

At least one-half of the amount mentiened above is made up of the lower grades, for which, during the whole of last year, there was a brisk local trade, and the dealers are now depending upon a resumption of this business to work off their No. 1's and 2nd Clears.

The following prices for non-dutiable would be quoted to an inquirer at this date: Extras, $2.80; Clears, $2.35; 2nd Clears, $1.85; No. 1's, 90 cents, all f.o.b. St. John.

Dutiable Extras are worth $2.50 and Clears $2.05. No lower grades of dutiable shingles are offering for export.

Freight rates to Boston on shingles are quoted at 25 cents per M, with the probability that the prevalent rate will be 22½ cents in the near future.

Stocks of lath have been materially reduced during the past fortnight, the much greater part of the shipments being consigned for sale. Stocks in this line also promise to be completely cleaned up in the next month; from 2,750,000 to 3,000,000 would be certain to cover all the available in this line at present writing.

The price of lath has, during the last fortnight, taken a jump of 25 cents per M, and dutiable slab lath (of which the much greater part of the holdings are made up) could not be bought today at this port less than $2.25 por M. f. o. b. schooner.

Freight rates to New York on lath are quoted freely at 60 cents per M.

LONDON STOCKS AND CONDITIONS.

According to Churchill & Sim, the demand for pine deals in London during February has been very small, and prices have dragged along just under the January rates. For spruce there has been no change in London so far, prices having been kept steady by competition with Riga and Galatz whitewood. There has, however, been some excitement among the lower port shippers, in consequence of the abnormal severity of the winter in New Brunswick and Nova Scotia, which has not only hindered the transportation to the shipping ports of the supplies of spruce, birch, &c., cut for early shipment, but has also prevented the work in the forests on the production for shipment later in the season, so that contracts already made cannot be carried ont, and shippers are nervous about contracting again ahead.

There is no change to report in the prices of oak or white pine timber in London, while for birch, elm, and ash prices have been a point or two down in February. For birch, at any rate, there is likely to be a prompt and sharp reaction.

THE WHITE PINE OUTPUT.

The abrupt ending of the logging season in many portions of the northern pine woods will have a decided effect on the output of white pine lumber during the coming season. Owing to a definite decision the cut of logs during the logging season of 1903-04 was much below that of the previous years, and the output of lumber last year was correspondingly smaller. The sawing season at most of the mills ended last fall some time before the weather conditions made it necessary, because of the short supply of available material. It was the intention of the mill men last fall to get out no larger a supply of logs than they did the previous winter, and for that reason operations were planned accordingly. Nature has made it shorter than was intended, and the supply of logs for sawing during the coming season will be fully twenty per cent less than intended. The mills along the Mississippi river will be especially short of supplies, for the number of logs carried over was smaller than in previous years. This supply has been dwindling for several years. Time was when nearly a complete season's stock was left in the streams at the end of the sawing season. At the end of last year's work at the mills, the total supply in the river was only about 187 million feet.

While logging is still going on in the extreme northern sections, the more southerly camps have been forced out of business, and many logs remain on the sticks in the woods, whence they can only be gotten out with great expense and difficulty, or where they must be left until the snows of next winter come. The indications are now that the sawing season will open early. Under the influence of high temperature and the action of the rising water in the streams, the ice is becoming soft and may commence to break up almost any day. An early start for the mills means an early shutdown in the fall because of the light supply of logs. The white pine market does not need this strengthening influence, but if anything were needed to give stability to the market it could be found in the present outlook for a log supply.—Mississippi Valley Lumberman.

The steamer Nedenaes will load deals at Sherbrooke, N. S., for west coast of England.

FOR SALE.

Large Tract of Timber

in Central Ontario

THE PROPERTY OF

The Canadian Land and Immigration Company of Haliburton, (Limited.)

This company has a large tract of well timbered land about 125 miles north-east of Toronto. There are large quantities of Cedar, Hemlock, Spruce, Balsam, Basswood, Cherrybirch, Maple, also considerable Pine Elm and Ash on this tract. It is well served by two railroads one of which is about to be extended through the centre of the property. The Company are prepared to sell this timber in blocks ranging from 2,000 to 10,000 acres, or more if desired.

There are several good mill sites on the property. This would be a good opportunity for parties who are at present cut out and looking for a new location.

Maps and plans and further particulars can be had by applying to

W. H. LOCKHART GORDON,
Managing Director,
157 Bay Street, Toronto.

N.B.—Several parties have lately made considerable money by purchasing blocks of this timber and selling over again at an advanced price.

WANTED, 300,000 FEET WINTER CUT Basswood, Common and Better in quality, 1 1/16" thick when dry. Address Box 189, care of CANADA LUMBERMAN.

WANTED — TEN THOUSAND CORDS Hard and Soft Wood; also same quantity of Slabs. SIMCOE WOOD AND LUMBER CO., 52 Yonge Street Arcade, Toronto.

FOR SALE—A FEW CARS OF SOFT ELM, a few cars of soft maple and a car of hard maple. Could cut to order. Apply Box No. 201, CANADA LUMBERMAN, Toronto, Ont.

HAVE YOU ANY STOCK WHICH YOU wish to sell? If so, make the fact known to probable buyers by placing an advertisement in the Wanted and For Sale Department. Address, CANADA LUMBERMAN, Toronto.

WANTED—300,000 FEET BOARD MEASURE 3½" x 4½"x10 or 20 feet long, small knotted red pine, free from wane. Kindly give price f. o. b. Montreal, immediate shipment. Address WILLIAM SMITH, 393 St. Antoine St., Montreal, Quebec.

"LOOK AT THIS"

FOR SALE—TWO GOOD WATER WHEELS, 40" and 48", also three run of stone, Smutter, elevators, etc., etc., for two hundred dollars F. O. B. cars here if taken this month. Box 4, Bothwell, Ont.

PULP MILL FOR SALE

The City of Saint John Offers for Sale That Valuable Property Known as the Saint John Sulphite Pulp Mill.

The mill has a capacity of 180 tons per week; was built of brick in the year 1898, according to all the requirements of the Factory Insurance Companies of Providence (R.I.), and is fitted with turbine water wheels, developing 600 H. P., and an auxiliary steam plant of 300 H. P.

It contains two steel digesters 14 × 45 feet, built by the Portland Company, Acid Department Milk of lime system, of abundant capacity. Paper machine contains 21 Drying Cylinders, 100 inches by 4 feet.

The situation is at the mouth of Mispec River, a stream ten miles in length, and is distant about seven miles by sea from the City of St. John. Barges carrying 700 tons of coal discharge at the mill. Schooners have frequently been loaded with pulp at the mill, whence they departed to New York.

Sealed proposals, endorsed "Tender for Pulp Mill," will be received by H. E. Wardroper, Esq., Common Clerk, at his office, City Hall, Saint John, N B., up to 12 o'clock, noon, of Wednesday, the 26th day of April, 1905.

W. W. WHITE, Mayor,
Chairman Board of Water and Sewerage.

FOR SALE.—CEDAR POSTS AND CEDAR telegraph poles, in car lots. Apply, JNO. BLANCHET, North Bay, Ont.

FOR SAW MILL AND TIMBER LIMITS throughout Western Canada write the LOCATORS, Winnipeg, Manitoba.

SELLING AGENTS FOR B.C. SHINGLES.

Just as we go to press, it is learned that the Coast shingle manufacturers of British Columbia, at a meeting held a few days ago, appointed the Union Lumber Company and the Export Lumber and Shingle Company as their selling agents, sales to be apportioned. They also adopted the price list issued in March, 1904, less fifteen cents off number ones and five cents off number twos.

CURRENT TRADE CONDITIONS.

ONTARIO.

Manufacturers and dealers alike agree that there are no signs of depression in the lumber trade. On the other hand, the outlook for business is good, and in Toronto the season promises to be one of unusual activity. Every week permits are being issued for buildings representing a large expenditure, and, barring labor troubles, which do not now seem probable, this is likely to continue throughout the summer season. The manufacturing industries which consume lumber are also working to full capacity and general prosperity prevails.

A few large transactions in lumber have recently taken place which indicate confidence in present prices. It is the exception rather than the rule to meet a person who is disposed to predict lower values, and any movement in that direction must therefore lack the assistance of public sentiment. It would be unwise, perhaps, to advise the indiscriminate purchase of lumber at current prices, but the picking up of marketable stocks at favorable opportunities would seem to be a wise policy, as a firm lumber market for the next few months is altogether probable. There are many advocates of higher prices for hemlock, but until more definite information as to the log production of the past winter is obtainable, prediction is hazardous. There is but a small quantity of dry stock in first hands, and dealers have found it necessary to buy from each other to some extent in order to fill orders.

So far as can be estimated there has been a slight falling off recently in imports of yellow pine. This is believed to be due to the advanced prices adopted by the Southern Lumber Manufacturers' Association, making it more difficult to realize a margin on Canadian shipments.

QUEBEC AND NEW BRUNSWICK.

While the lumber trade in the Eastern Provinces is still quiet, the opinion is quite generally held that the season will be fairly prosperous. The manufacturers are receiving numerous inquiries for lumber for shipment to the Eastern States, which trade is likely to be greater than last year, when the Presidential election induced a disposition towards conservatism. The smaller production of logs and the improvement which has already taken place in the British market are factors favorable to an advance in lumber prices. New Brunswick cedar shingles are exhibiting considerable strength and for the first time in many months sales of extras have been made for Boston delivery at $3.35. Competition with red cedars is quite keen, and were it not for this fact it is believed that prices would soon advance 10 to 20 cents. The outlook, however, is more encouraging than for a long time.

UNITED STATES.

Reports from the different districts more uniformly favorable than at any previous time this year. Since the mild weather set in, the movement of lumber has steadily increased, until the volume now is in excess of that of one year ago, with indications of a further expansion in the near future. White pine, yellow pine, spruce and hardwoods are all showing renewed life, and conditions at the present seem to favor the holder of stocks. There has been an improvement in general industrial conditions and the outlook is for an active building season, circumstances which should have a strengthening effect upon the lumber market. The Southern pine mills are operating to their full capacity to meet the orders, and the output in any instances is sold far in advance. There is a steady demand for all kinds of hardwoods, whereas the supply of elm, ash and oak is none too great. Maple and basswood are to be had in larger quantities.

Prices show no particular change from last week. Mill culls are a little higher at Buffalo and Tonawanda, the scarcity of this grade making it an easy matter for dealers to advance prices. Pine uppers continue to maintain the improvement previously noted.

Although the Pacific Coast mills have endeavored to adopt a uniform list on red cedar shingles, prices are still uncertain. Clears are showing an improved tone. New Brunswick cedar shingles are firmer, extras selling for Boston delivery at $3.30.

GREAT BRITAIN.

There has not been much improvement in the demand for lumber in Great Britain, but there is no doubt that a more hopeful feeling exists. The tendency of prices is to harden, as stocks on hand are held at considerably lower figures than new supplies can be bought for. Representatives of shippers have closed some business, but a few of the largest buyers are holding off in the hope that they may yet be given some concessions. The statistical position of Canadian lumber is very strong. Stocks of first and second quality white pine on the East Coast of England are practically exhausted. There is a very satisfactory demand for spruce deals and flooring, this trade being benefitted by the improvement in the cotton industry. The Liverpool correspondent of Timber says: "That there will be an improved consumption for 7in. by 3 in. spruce goes without saying, and as this size forms such a great proportion of every cargo, it behooves sellers to consider whether it be wise for them to go on disposing of them at about cost price or something less. This is what happened all last year, and with what result? The idea was to restore the balance by adding an extra price to the 9 by 3 in. The result has proved to be that the bulk of the present holdings remain in 9 by 3 in., so that the desired return is still on paper, and may possibly be never realized. Would it not have been better in every way to have reduced quotations for the 9 by 3 in. and increased those for the 7 by 3 in.? This would have brought them nearer together and held out a more solid inducement for consumers to have taken more of the wider widths."

NEW BRUNSWICK CEDAR SHINGLES.

Stocks of cedar shingles left in manufacturers' hands at the beginning of the winter were small and the winter m production has been less than normal, as prevailing prices did not show much, if any, margin of profit. Orders accepted during the last month will virtually clean up all Extras, Clears and 2nd Clears left in Eastern Canada. The winter mills are now closing down and the summer mills cannot start before the middle of May, as th y have to wait for their logs to come down. Many of the operators have already booked orders at advanced figures for May shipment. The market is, therefore, now nearly bare, very few shingles can be cut before May 15th, and a portion of the May output is already sold. This constitutes an extremely strong situation and is sure to be emphasized as soon as the New England retailers shake off their winter lethargy and start in to replenish their now rapidly dwindling stocks. Trade prospects in the Eastern States are better than for many years, and unless abor troubles or some entirely unforeseen business calamities intervene, consumption will be very large throughout the entire building season. One large producer of shingles is building two additional mills, but the operators in general have taken out no more logs than last year and in some sections the cut will be slightly curtailed. Present indications would show that the spring demand will not be satisfied before mid-summer and in the meantime prices will rule very firm. It is a little early as yet for the placing of any large amount of business, but we believe shingles will be much sought for and orders very plentiful within three or four week. Orders for immediate shipment are very hard to place right now. Standard brands are quoted for May delivery as follows, f.o.b. Boston points: Extras, $3.35 to $3.40; Clears, $2.90 to $3.00; 2nd Clears, $2.35 to $2.40; Clear Whites, $2.25 to $2.30. The scattered remnants of the small winter mill cut are being offered at 5 to 10 cents less, but there are very few left unsold. Clears are in least supply and best demand and are comparatively stiff, although the entire list is now strong. It will probably be the part of wisdom for the manufacturers to refrain from taking advance orders this spring at anything less than full market quotations.

STOCKS AND PRICES.

S. E. O'Brien, Secretary of the Ottawa Improvement Commission, Ottawa, will receive tenders up to April 11th for the supply of timber required by the Commission during the current year.

J. J. Hale, of Woodstock, N.B., states that the logging operations at the head of the Tobique river the past winter amounted to only about half those of last season.

White, Rider & Frost, of Tonawanda, N.Y., are reported to have puchased about 35,000,000 feet of lumber to be shipped to their yard at Tonawanda Island upon the opening of navigation. DeLaplante & McBurney have also secured a considerable quantity of pine lumber to go to Tonawanda this spring.

Twelve hundred pieces of rock elm square timber were taken out by William Clement near Traverse City, Mich., during the past winter for shipment to Quebec.

Have also for sale a few cars of Poles from 25 to 50 ft.

Correspondence Solicited.

J. S. FINDLAY,

OWEN SOUND, ONT.

and thence to Liverpool. The timber ranges from 25 to 65 feet long and averages 14 inches square. Thomas Denton, of Saginaw, is getting out about 50,000 cubic feet of elm and oak, also for the Quebec market.

The annual meeting of the Southwest Miramichi Log Driving Company was held at Fredericton, N.B., on March 21st. After the meeting Mr. Lynch, one of the contractors for the upper corporation drive, stated that the amount of logs to come through the booms this year would be between 20,000,000 and 25,000,000, as compared with 65,000,000 last year. Mr. Welch has given out the following estimates of the new and old logs to be driven on the Southwest Miramichi :

T. Lynch	7,000,000
M. Welch	6,000,000
Richards Co.	8,000,000
Hutchinson	1,500,000
Jas. Fairley	300,000
W. R. McCluskey	600,000
Parties on Cains river	5,000,000
Parties on Renous river	12,000,000
Total	49,400,000

The Cook & Bros. Lumber Company, of Toronto, have just sold nearly 34,000,000 feet of lumber to the Herman H. Hettler Lumber Company, of Chicago. The transaction includes all the dry lumber that is unsold now on the docks at Spragge, Ont., estimated at between 3,000,000 and 4,000,000 feet, and the lumber to be sawn this year, estimated at 26,000,000 feet of white pine and 4,000,000 feet of norway. The consideration is announced to have been between $600,000 and $700,000.

THE EASTERN LUMBER MARKET.

The Boston correspondent of the Lumberman's Review refers to the lumber market as follows :

Spruce has been very firm and brings full figures for both large and small lots. All of the Eastern mills have been booking orders freely, and in several cases important shippers are sold well toward the middle of the year for everything they can produce, and the market has toned up wonderfully and is to-day very firmly fixed upon a basis of $19.00 for timber under 9" and $21.00 for all stock running 9" and over. It is generally understood now that lumbermen in the North and East have caught every log possible during the past winter and will have a full supply with which to meet this season's demand. The English market for spruce has been toning up steadily and it is now believed that the Eastern Provinces will have scarcely a normal amount of spruce to send over the line to the New England and New York markets. The lath market is also very firm on a basis of $3.40 for the 1⅜" size and $3.25 for the 1½", and there is a great scarcity of lath at all points. The writer, while in the office of one of our largest retailers, learned that he had orders on his books for lath which would not only take all he had in the yard, but all he had bought and that he had bought every lath offered within the last three months and actually sent out inquiries in an effort to locate supplies for his spring trade. Eastern cedar shingles are just about steady on a basis of $3.25 for extras and $2.85 to $2.95 for clears, with the latter grade in strong demand and well sold up. There is a fair supply of extras on hand at present, but an early Spring opening will favor a strong shingle market as soon as the full force of the demand develops.

Hemlock is very firm, though the demand during the past month has been moderate. Stocks are light at all points, and with the selling price very firm on a basis of $16.00, the outlook for a steady market is regarded as exceptionally good.

The hardwoods show little change during the month. Plain oak, either red or white, is about the strongest item on the list, though mahogany has come to the front again and is finding ready sale at full prices. Quartered oak, which has been a trifle druggy during the past six or eight months, is showing somewhat more tone, with most quotations for 1" 1s and 2s ranging from $76.00 to $80.00. In other respects the market is unchanged.

THE OUTLOOK FOR HARDWOODS.

The conclusion of the American Lumberman is that the outlook for hardwoods is very promising, as in the last issue we find the following remarks : Needs of consumers are sufficient to absorb practically all the hardwood lumber that can be produced and at this time, owing to the stimulated demand from all quarters, a prospective call for hardwood stocks in excess of the amount available for immediate use is to be anticipated. As will be remembered by those who keep in touch with this department of the lumber industry, stocks at the end of 1904 were relatively lighter than at the corresponding time in 1903. This condition was not only true with respect to manufacturers of hardwoods but with the consumer also. Evidently consumers thought to impose the burden of carrying stocks through the winter months on the manufacturer, with the apparent expectation of buying stocks at the beginning of this year at about the same price they would have paid in the summer and fall of 1904. Their expectations are doomed never to be realized. Light stocks and unfavorable conditions for operating throughout the hardwood producing territory especially have created a shortage in the supply which will not be made good at a very early date. Many of the larger manufacturers with a better appreciation of the situation than have some of the consumers who are imbued with the idea that supplies will be forthcoming indefinitely, took a chance on the outcome a few months ago, and while they could have sold quarter sawed oak, for instance, at from $65 to $68 last fall, they held for higher prices which they today are securing. Not only have they been able to demand and receive the price for which they were willing to part with their stock eight months ago, but in addition a reasonable advance.

Evidently consumers have concluded to charge up to experience the difference between prices they are now paying for their stock and those at which it could have been secured last fall and are laying in supplies for future requirements. At least the consistent buying by the large users, which is general with the possible exception of the furniture factory districts, lends color to the belief that the consumer is out for all the hardwood stock he can get provided prices are within reach of his bank account. It is scarcely possible that hardwood values will dip below their present level during the remainder of the year and the shortage throughout the country may result in an agreeable manner to the producer who has the material to market.

FOR SALE.

Large Tract of Timber

in Central Ontario

THE PROPERTY OF

The Canadian Land and Immigration Company of Haliburton, (Limited.)

This company has a large tract of well timbered land about 125 miles north-east of Toronto. There are large quantities of Cedar, Hemlock, Spruce, Balsam, Basswood, Cherrybirch, Maple, also considerable Pine, Elm and Ash on this tract. It is well served by two railroads, one of which is about to be extended through the centre of the property. The Company are prepared to sell this timber in blocks ranging from 2,000 to 10,000 acres, or more if desired.

There are several good mill sites on the property. This would be a good opportunity for parties who are at present cut out and looking for a new location.

Maps and plans and further particulars can be had by applying to

W. H. LOCKHART GORDON,
Managing Director,
157 Bay Street, Toronto.

N.B.—Several parties have lately made considerable money by purchasing blocks of this timber and selling over again at an advanced price.

WANTED, 300,000 FEET WINTER CUT Basswood, Common and Better in quality, 1 1/16" thick when dry. Address Box 189, care of CANADA LUMBERMAN.

WANTED—2 TO 5 MILLION PINE LOGS, delivered in the Georgian Bay. State price and number of logs to the M. Apply Box 205, CANADA LUMBERMAN, Toronto, Ont.

WANTED — TEN THOUSAND CORDS Hard and Soft Wood; also same quantity of Slabs. SIMCOE WOOD AND LUMBER CO., 52 Yonge Street Arcade, Toronto.

HAVE YOU ANY STOCK WHICH YOU wish to sell? If so, make the fact known to probable buyers by placing an advertisement in the Wanted and For Sale Department. Address, CANADA LUMBERMAN, Toronto.

BAND FILER WANTS POSITION. — A1 man, capable of handling sawmill, sober and industrious, 11 years experience, best of references. Address, "Electrician," CANADA LUMBERMAN, Toronto, Ont.

WANTED—300,000 FEET BOARD MEASURE 3½" x 4½" x 10 or 20 feet long, small knotted red pine, free from wane. Kindly give price f. o. b. Montreal, immediate shipment. Address WILLIAM SMITH, 393 St. Antoine St., Montreal, Quebec.

FOR SALE.

100 M. FT. INCH DRY BASSWOOD. Write Box 58, Smith's Falls, Ont.

"LOOK AT THIS"

FOR SALE—TWO GOOD WATER WHEELS, 40" and 48", also three run of stone, Smutter, elevators, etc., etc., for two hundred dollars F. O. B. cars here if taken this month. Box 4, Bothwell, Ont.

FOR SALE.

THE CUT OF 300 M. FEET OF BIRCH, 90 M. basswood, 50 M. soft elm, 25 M. black ash and 25 M. beech and hard maple. This is a well selected stock of No. 1 logs. Can be all cut to order. Address Box 204, CANADA LUMBERMAN, Toronto, Ont.

WANTED.

A THOROUGHLY CAPABLE ALL-ROUND Man to take full charge of a planing mill in Manitoba. Must be able to draw plans, estimate on all kinds of factory work; able to handle men and must be strictly sober. Position at once. Give references, and state age, experience and salary wanted. Apply Box 208, CANADA LUMBERMAN, Toronto, Ont.

FOR SALE.

397,000 feet 2" x 4" and up, Norway Lumber, Log Run.
86,000 feet 1" x 4" and up, Norway Lumber, Log Run.
43,000 feet Mill Culls, etc.

Also the product of two million feet good white pine logs to be cut next summer. Correspondence solicited.

PINE LUMBER COMPANY,
Pine, Ont. (near Cartier.)

PULP MILL FOR SALE

The City of Saint John Offers for Sale That Valuable Property Known as the Saint John Sulphite Pulp Mill.

The mill has a capacity of 180 tons per week; was built of brick in the year 1898, according to all the requirements of the Factory Insurance Companies of Providence (R.I.), and is fitted with turbine water wheels, developing 600 H. P., and an auxiliary steam plant of 300 H. P.

It contains two steel digesters 14 × 45 feet, built by the Portland Company, Acid Department Milk of lime system, of abundant capacity. Paper machine contains 21 Drying Cylinders, 100 inches by 4 feet.

The situation is at the mouth of Mispec River, a stream ten miles in length, and is distant about seven miles by sea from the City of St. John. Barges carrying 700 tons of coal discharge at the mill. Schooners have frequently been loaded with pulp at the mill, whence they departed to New York.

Sealed proposals, endorsed "Tender for Pulp Mill," will be received by H. E. Wardroper, Esq., Common Clerk, at his office, City Hall, Saint John, N.B., up to 12 o'clock, noon, of Wednesday, the 26th day of April, 1905.

W. W. WHITE, Mayor,
Chairman Board of Water and Sewerage.

CURRENT TRADE CONDITIONS.

ONTARIO.

Weather conditions could not be more favorable for the lumber trade. Building operations are active and in many cities promise to be considerably greater than last year. During the past three months the building permits granted in the city of Toronto represented an approximate value of $1,186,768, as compared with $477,675 for the corresponding period in 1904. During the month of March permits for buildings were issued in Hamilton to the value of nearly $300,000, and in London and other cities and towns in Western Ontario there is a corresponding measure of activity. Under such conditions there is certain to be a large consumption of lumber and strong market. Reports from the Ottawa Valley are equally favorable, and prices of both pine and hardwoods continue firm. The decline in the price of basswood which occurred during the winter months has resulted in an increased consumption, and the market is now firm on the basis of $23 to $25 for mill run f.o.b. cars Toronto.

The feature of the past week has been an advance in British Columbia shingles. For Ontario delivery prices are now marked up about 30 cents, and it is believed that the condition of the shingle industry is such that these prices can be maintained.

BRITISH COLUMBIA SHINGLES.

There is a better feeling in respect to the outlook for B.C. shingles. The experiences of the past year have shown manufacturers the utter futility of endeavoring to keep prices up in the face of an abnormal supply, and the movement which has now beencommenced to regulate the production and obtain a fair price is likely to be more earnestly and universally supported than any previous plan. A few manufacturers have already sold their output for some months in advance, and it is expected that there will be no difficulty in maintaining the new price list.

UNITED STATES.

There have been no unfavorable developments during the past week to impair the strong tone of the lumber market. The demand is good and prices in many instances are showing a hardening tendency. The shortage in the log production, on account of the early break-up of winter, is not likely to prove quite as great as was anticipated a few weeks ago and most of the mills will have a fair supply of logs for the season's work. In the Saginaw Valley there is a strong demand for material for conversion into box shooks, and mill culls have been sold as high as $16.50. Fine common is also strong in that market. Buffalo and Tonawanda dealers are doing a satisfactory trade and predictions are made of higher prices for white pine. At the monthly meeting of the White Pine Association held on March 21st, it was stated that the shading of prices was over and an agreement was reached to sell nothing below the full list price.

Activity in hardwoods is more marked than at any previous time this spring. Dealers are refusing orders for plain oak, which is particularly scarce in inch and 1¼ inch. Elm and birch come next in order in respect to demand, followed by maple. Basswood is selling much more freely than in the winter, but prices are still a little weak in comparison with the market of a year or more ago.

All kinds of shingles are in better demand. White pines are being sold in Buffalo and Tonawanda at 25 cents below red cedars. Lath prices are stiff.

GREAT BRITAIN.

There is no doubt that the prospects for the lumber trade in Great Britain are steadily improving. To the fine weather is due in part a heavier consumption, and this is expected to continue. In view of the low condition of stocks, the result has been to bring about an advance in the price of such lumber as is now on hand. Dealers are disposed to purchase at present values and are also considering offers of Canadian lumber which a few months ago would have been regarded as exorbitant. At the recent auction sales the bidding has been more lively and slightly higher prices have been realized. Several lots of Canadian pine were recently sold under the hammer at Liverpool, bringing £12 per standard for 3 × 11 in. 3rd quality and £19 for 2nd quality, 14 to 16 feet. Spruce deals are still advancing. Whereas six weeks ago the highest price obtainable for a specification containing 70 per cent. narrows, balance 9 in. and up, was £6 17s. 6d. c.i.f., parcels are now changing hands at an advance of fully 12s. 6d. on these prices. Brokers are obtaining £7 5s. for 3 × 7, £7 17s. 6d. for 3 × 9, and £8 17s. 6d. for 3 × 11, with a prospect of a further rise during the present month. As shippers are not unduly pressing sales, the outlook is much brighter than it has been for some time.

STOCKS AND PRICES.

The Dominion Lumber Company cut during the past winter about 8,000,000 feet of logs on their Labrador limits.

The tug Mary C recently arrived at Vancouver, B.C., with a boom of American spruce logs for the Pacific Coast Lumber Company.

It is estimated that the quantity of logs to be driven down the Kennebec river, in Maine, this year will be 25,000,000 feet less than last year.

The Ottawa Lumber Company have secured the contract for the annual supply of lumber required by the Board of Works of the City of Ottawa, their price being $9,307.50.

The Toronto Junction Lumber Company have secured the contract for supply of lumber for the town of Toronto Junction, Ont., their price being $19 per thousand feet for pine and $18.50 for cedar.

A dispatch from Dauphin, Man., states that Theo. Young, forest ranger, has seized 10,000,000 feet of lumber cut in the Swan River district by portable mills. The timber was taken off lands on which the Government allows no timber to be cut.

The Huron Lumber Company, Spanish River, Ont., expect to have 18,000,000 feet of logs to cut this season. The Moulthrop Lumber Company, John's Island, have secured about 20,000,000 feet, and Eddy Bros. & Company, at Blind River, Ont., will probably have 15,000,000 feet. The Cleveland-Sarnia Saw Mills Company have put in 20,000,000 feet.

The steamer Briardene sailed from Halifax, N. S., last week, for Liverpool, with 1,584,988 feet of spruce deals and 15,226 feet of birch timber.

THE BARBADOS MARKET.

The only arrival since our last report, say S. P. Musson, Son & Company under date of March 11th, is the schooner "Bravo", from Halifax, with 125,000 ft. white pine, which was sold at $26.10 for merchantable, and $18.50 second quality. Our market is well supplied with this description of lumber, especially in second quality, of which there is a rather heavy stock, and dealers are not prepared to increase their holdings except at much lower prices. Spruce on the contrary is wanted, stocks of merchantable being almost nil, and a couple of cargoes would do well. We have nothing further to report about shingles, as with the usual light demand at this time of the year, dealers have not reduced their holdings very much, but we think that in the next month or two a better feeling will set in, when moderate shipments of both Long Gaspe and Cedar Laying would meet with a ready sale at remunerative prices.

BRITISH COLUMBIA LETTER.

(Correspondence of the CANADA LUMBERMAN.)

VANCOUVER, B.C., March 27th, 1905.—This is the season of the year when the lumber trade is good if it is good at all, and the present demand and the anticipated trade of the coming summer is keeping the mills busy. The depression of last year was severely felt, and the effect is still apparent. In Vancouver some of the large concerns had to dip into capital account, and financial stringency is still reported in more than one instance. If the duty is imposed, as asked for, everything will turn out all right, but if not the competition may drive a few more to the wall. In Vancouver city the resumption of operations by the mills has brought back good times. January and February were two of the worst months in local business and money circles for a long time, but with the starting of the mills prosperity is fair.

Stocks are beginning to pile up in the yards, but local trade and outside demand are preventing them from becoming too heavy. Prices continue firm in all lines, no deviations being yet reported from the price list inaugurated three months ago. This will be the largest year of building in this city and the mills will benefit accordingly.

The latest in connection with the old Ross-McLaren mills at New Westminster is that Mr. L. David, the manager, has returned from San Francisco, having completed all arrangements for the re-opening. Sixty-five experienced hands are to be brought in, and special attention is to be paid to export trade. Heretofore, the shipment of lumber to foreign ports has been done by the British Columbia Mills, Timber & Trading Company on the mainland and principally the Chemainus mill on the island.

The Pacific Coast Lumber Company is developing a boat building industry in connection with its operations. Last week what will be the largest tug in B. C. waters was launched, and construction has commenced on the hull of a dredge which is to operate in the Yukon and will be shipped in "knocked down." The building of scows and boats is brisk in the yards of A. Wallace, adjoining the mills of Messrs. Robertson & Hackett, who supply the large quantity of lumber necessary.

Mr. S. H. Bowman has organized the Bowman Lumber Company, which purchased the interests of the Empire Lumber Company at Revelstoke and Comaplix. Apart from the business transfer, it is not improbable that the methods carried on successfully by Mr. Bowman in the States may be introduced here. The Company has about 60 retail yards and offices in different parts of the country south of the line, and handle their own lumber from the ownership of the limits to the distribution of the lumber to the consumer. Lumbermen in the eastern portion of the province, particularly, are discussing the establishment of retail yards in the Territories, and Mr. Bowman may put his experience into practical operation.

The action of the Elk Lumber & Manufacturing Company, of Fernie, will be watched with interest by other lumber companies in the west. It has entered suit against Mr. Stewart, contractor for the Great Northern railway, for damages done to their property last June by the big forest fire. The case will come up at the spring assizes in Nelson.

The assets of P. S. Hardy, general store and saw mill, Chambly Canton, Que., have been sold.

FIRES.

The saw mill of R. Horwood at Speedside, Ont., was burned last week.

The saw mill of W. W. Shaw at Hartland, N. B., was burned recently; loss $4,000, insurance $2,600.

The saw mill of Emilien Lupien, of Wickham Station, Que., was destroyed by fire last week, the loss being about $4,000.

Leonidas Villeneuve, lumber dealer, Montreal, has registered his business.

J. S. FINDLAY,

OWEN SOUND, ONT.

WESTERN CANADA LUMBER CONDITIONS.

A representative of the CANADA LUMBERMAN recently interviewed Mr. W. P. Dutton, of the Red Deer Lumber Company, Winnipeg, in regard to lumber conditions in Western Canada. He said: "I believe that the coming year is going to be a prosperous one among lumber manufacturers and retailers throughout Manitoba and the North-West Territories. Market conditions south of the line are getting in much better shape than they have been for quite a while. Pine prices are stiffening and the curtailing of the output by the southern and western mills is beginning to have its effect. This means that the manufacturers in the United States are going to find a ready market for their product, at such prices that it will not be necessary for them to ship into Canada in order to protect their own market. It is common knowledge that these mills have sold lumber in Canada at lower prices than they were willing to sell in their own country, in order to not demoralize their market. This has been a hardship to lumber manufacturers on this side of the line.

"The Red Deer Lumber Company had no trouble in disposing of practically the entire cut of the season of 1904. We have been obliged to take our travellers off the road until we can get caught up with our orders and see what we have left in our stock after orders now in have been filled. We look for a brisk spring trade, since country stocks are low with the exception of some of the line yard companies. We are preparing to saw between twenty-five and thirty million during the coming summer. The new extensions on the Canadian Northern and the Canadian Pacific Railroads are opening up some magnificent farming lands, all of which require a certain amount of lumber as the new settlers come in. These extensions are well located so far as our company is concerned and as the demand increases in this new country, we expect a steadier market with better prices."

Mr. Dutton expressed himself as being sanguine that something would be done by the Government towards the relief of those lumber manufacturers who are not located near their market, and said, "I think that any system by which the American manufacturer can be kept from ruining the Canadian market while he is protecting his own, will be acceptable to lumber manufacturers on this side of the line. I believe that the Canadian manufacturer can make lumber as cheaply as the American. The objection to allowing American lumber to come free into this country lies in the fact that the American manufacturer can make money in selling his high grade stock, while, at the same time, he is sacrificing his low grade stock in order to get rid of it. The Canadian manufacturer who is not fortunate enough to manufacture any high grades is obliged to sell low and middle grade stocks exclusively. If these grades are being sacrificed in his market by the American manufacturer, it stands to reason that when conditions get bad enough the Canadian manufacturer is going to be ruined. I have heard men say that if the Canadian cannot manufacture as cheaply as the American, he better go out of business, but such expression of opinion only shows a man's ignorance of the true conditions.

"The number of offers which we have had of British Columbia timber and mills go to show the desperate condition in which the British Columbia manufacturer is placed. There are a great many mills on the coast and in the mountain district the proprietors of which have bought timber cheap and who are manufacturing as cheaply as could be expected, but who have nevertheless been ruined by American competition, in the past two or three years. These men have become discouraged or their mills have gone into the hands of assignees, and they not only need the protection which they have asked of the Government but they further have a right to expect such protection."

The men who control the Red Deer Lumber Company are also putting up a plant at Fernie, B. C., where they expect to turn out thirty to forty millions a year.

When our correspondent suggested that the erection of this mill might indicate to some people that his utterances and actions were not consistent, Mr. Dutton replied: "The fact that we are erecting this large mill in British Colombia goes to prove that what I have said is correct. A couple of years ago, we bought four to five million feet of timber near Fernie. With this timber, we purchased a mill which had a capacity of thirty to thirty-five thousand feet in ten hours, expecting for the time being to manufacture with this mill only. After a year's operation, we found that, manage things as well as we could, the mill would make us no money. The mill was as good as the average mill of the same capacity, but market conditions were such that the stuff which was turned out could not be sold for enough to pay us to run it. We were

therefore placed in a position where we were obliged to manufacture more cheaply and turn out more lumber or else shut down our mill and hold our timber until market conditions became better. We took the former alternative and now expect to have a plant which will turn out enough lumber and at a cost which will give us the profit which we had reason to expect.

"In the United States, wherethelumberman is protected from outside competition and where he is closely associated with other manufacturers, a mill the size of our first mill could have made money, but up here he receives no protection from the Government and has no association which controls prices, and is therefore placed in a very unenviable position when markets on the other side begin to sag and the American begins to dump his lumber into the Canadian market."

TIMBER LIMIT TRANSACTIONS.

S. S. Harrison and W. H. Miller, of Campbellton, N.B., have purchased from McKenzie & Flett and William Richards & Company 18½ miles of timber limits on Clarke's Brook, Bonaventure County, Que., together with a mill at Champion's Siding. The price was about $7,000.

At Liverpool, N.S., a few days ago, there was sold by the sheriff, under mortgage foreclosure proceedings, forty-five thousand acres of timber lands in Shelburne and Queens counties known as the Jordan River tract, lately the property of the United Lumber Company. The sale included besides the land, the mills, stores, offices and houses at Jordan River, with all river and booming privileges. After some spirited bidding the property was sold to G. W. Henderson, wholesale lumber merchant, of Halifax. Mr. Henderson has made arrangements to operate the property on a large scale. The price paid was $38,750.

McLean Bros. have been incorporated at North Tonawanda, N. Y., with a capital stock of $250,000, to deal in lumber, etc. The directors are Hugh McLean, Donald McLean and Morris N. Bingham, of North Tonawanda, and Donald McLean, of Philadelphia.

FOR SALE.

Large Tract of Timber

in Central Ontario

THE PROPERTY OF

The Canadian Land and Immigration Company of Haliburton, (Limited.)

This company has a large tract of well timbered land about 125 miles north-east of Toronto. There are large quantities of Cedar, Hemlock, Spruce, Balsam, Basswood, Cherrybirch, Maple, also considerable Pine, Elm and Ash on this tract. It is well served by two railroads, one of which is about to be extended through the centre of the property. The Company are prepared to sell this timber in blocks ranging from 2,000 to 10,000 acres, or more if desired.

There are several good mill sites on the property. This would be a good opportunity for parties who are at present cut out and looking for a new location.

Maps and plans and further particulars can be had by applying to

W. H. LOCKHART GORDON,
Managing Director,
157 Bay Street, Toronto.

N.B.—Several parties have lately made considerable money by purchasing blocks of this timber and selling over again at an advanced price.

FOR SALE—ONE BOSS AND ONE CLIPPER Shingle Machine. Apply HUNTSVILLE LUMBER CO., LTD., Huntsville.

WANTED, 300,000 FEET WINTER CUT Basswood, Common and Better in quality, 1 1/16" thick when dry. Address Box 189, care of CANADA LUMBERMAN.

WANTED—2 TO 5 MILLION PINE LOGS, delivered in the Georgian Bay. State price and number of logs to the M. Apply Box 205, CANADA LUMBERMAN, Toronto, Ont.

WANTED — TEN THOUSAND CORDS Hard and Soft Wood; also same quantity of Slabs. SIMCOE WOOD AND LUMBER CO., 52 Yonge Street Arcade, Toronto.

HAVE YOU ANY STOCK WHICH YOU wish to sell? If so, make the fact known to probable buyers by placing an advertisement in the Wanted and For Sale Department. Address, CANADA LUMBERMAN, Toronto.

BAND FILER WANTS POSITION. — A1 man, capable of handling sawmill, sober and industrious, 11 years experience, best of references. Address, "Electrician," CANADA LUMBERMAN, Toronto, Ont.

FOR SALE.

100 M. FT. INCH DRY BASSWOOD. Write Box 58, Smith's Falls, Ont.

FOR SALE

40M ft. Hard Maple, now in the log. Could cut to order.

7M of 1¼" Beech.

A mixed car of 1" Elm, Basswood and Butternut. Apply to W. SWAN, Bright, Ont.

PULP MILL FOR SALE

The City of Saint John Offers for Sale That Valuable Property Known as the Saint John Sulphite Pulp Mill.

The mill has a capacity of 180 tons per week; was built of brick in the year 1898, according to all the requirements of the Factory Insurance Companies of Providence (R.I.), and is fitted with turbine water wheels, developing 600 H. P., and an auxiliary steam plant of 300 H. P.

It contains two steel digesters 14 × 45 feet, built by the Portland Company, Acid Department Milk of lime system, of abundant capacity. Paper machine contains 21 Drying Cylinders, 100 inches by 4 feet.

The situation is at the mouth of Mispec River, a stream ten miles in length, and is distant about seven miles by sea from the City of St. John. Barges carrying 700 tons of coal discharge at the mill. Schooners have frequently been loaded with pulp at the mill, whence they departed to New York.

Sealed proposals, endorsed "Tender for Pulp Mill," will be received by H. E. Wardroper Esq., Common Clerk, at his office, City Hall, Saint John, N.B., up to 12 o'clock, noon, of Wednesday, the 26th day of April, 1905.

W. W. WHITE, Mayor,
Chairman Board of Water and Sewerage.

MUST BE SOLD

10,000,000 ft. Good Sawlog Timber, 75 H. P. Mill, good site, water and rail facilities, timber very convenient, $20,000. Address Box 70, Thessalon, Ont.

FIVE HUNDRED ACRES TIMBERED Land deeded, covered with 700,000 to 1,000,000 Birch, 200,000 Hemlock, besides other timber. Three miles from railroad siding. Snap for a small mill man. Write first to Box 209, CANADA LUMBERMAN, Toronto, Ont.

FOR SALE

SPLENDID PORTABLE MILL SITE, BARN, Two Houses and Mill Frame, and 100 acres Deeded Land, covered with Birch and other Timber. Any quantity of birch logs can be bought in locality. Small mill men do not overlook this. Write first to Box 210, CANADA LUMBERMAN, Toronto, Ont.

CURRENT TRADE CONDITIONS.

ONTARIO.

The trade in lumber continues to expand with the advance of favorable spring weather. Navigation on the upper lakes is now open and water mills are actively shipping out lumber to provide piling ground for the new cut. Those manufacturers who carried over logs from last season are starting their mills, while others who are obliged to wait for the drives will not be able to resume operations for a month or more. During the past week there has been more evidence of a disposition on the part of manufacturers to meet the buyers' ideas with a view to closing transactions and reducing the quantity of stock in mill yards. The tone of the market, however, is still firm, and while small price reductions are being made in some grades, these are offset by advances in others. The strongest grade in white pine is mill culls, which are held at $13 to $14 at the mills. For 10-inch and wider dead culls $11 is being asked. These prices are strong evidence of the comparative scarcity of low grade pine. Ten inch box and common is worth $17.50 at the mill, and 12-inch $18.50. Hemlock continues exceptionally strong and the few manufacturers who have any quantity of 12-inch for sale are asking $14.

Hardwoods are moving in moderate volume. Dealers are not buying as liberally as might be expected at this season of the year, but on the other hand manufacturers are not forcing stock upon the market. In Eastern Ontario the stock of hardwood logs is larger than for many years, and in the West the supply will probably be found to be sufficient to meet the market requirements. A decline in prices of hardwood lumber is improbable, as logs have been costly and the margin of profit is not large.

QUEBEC AND NEW BRUNSWICK.

The lumber market of Eastern Canada ia quiet and steady. There has lately been a larger movement in Montreal, where building operations are getting quite active, with prospects of a very busy season. Ottawa waney pine is a little easier, as will be seen by reference to our quotations, while elm timber is firmer. Spruce prices are showing strength, and in view of the light production of logs, are likely to further advance before many weeks. The estimated cut on the St. John river the past winter is 100,000,000 feet, as compared with 170,000,000 feet last year. The quantity to be driven on the Restigouche is placed at 45,000,000 feet, against 65,000,000 feet last year, while the Tobique cut at 18,000,000 feet shows a falling off of 13,000,000 feet. This is a total reduction of over 100,000,000 feet exclusive of the Miramichi figures, which will doubtless show a decline.

New Brunswick cedar shingles are selling quite freely at $3.35 for extras, Boston delivery.

UNITED STATES.

The changes in the lumber market during the past week have been in the direction of improvement. Many grades of pine are stronger, consequently a revision of our price list has been made. Four inch uppers have been marked up to $90 at Buffalo and Tonawanda, and 4-inch selects to $85, each representing an advance of $5 as compared with previous quotation. No. 1 barn boards have been advanced one dollar at Saginaw, and A and B strips are raised $2. These grades have been selling at the higher prices for some time past, but a few dealers, who have now fallen into line, were accepting orders at the old figures. Navigation on the upper lakes now being open, lumber is commencing to move by cargo. The tone of the spruce market is very firm and higher prices are predicted in the near future. The consumption of hardwoods is large and the trade prosperous. Basswood is the only lumber that is responsible for any disappointment, and considering the extent of the decline in price, it does not improve as was generally expected. Elm and ash are scarce in many districts, and both are in good demand. Maple is a little higher at Saginaw, with maple flooring up about $2. Birch continues to be a good seller.

GREAT BRITAIN.

The tendency of the British lumber market is doubtless to improve, but the report which has gained currency, and which seems to have some foundation, that a Manchester importing firm is in difficulties, has caused a feeling of uneasiness in some quarters. Apparently, the effects of last year's unprofitable business are still felt quite keenly by those who were unfortunate enough to buy heavily before the drop came. The deal market is not yet all that could be desired, as the South African demand is developing very slowly, but in other respects conditions are healthy. There has been an increased call for narrow widths, which sell more readily than 11 inch. A Liverpool report says of spruce: "Spruce is still very firm, and the small parcels that come forward by the liners are being sold at high figures. Ordinary specifications with the usual 60 to 70 per cent. of

7in. and 8in. have been sold at £7 12s. 6d. c.i.f. At this price contracts have been made to arrive when the regular season sets in. Some stocks on the Miramichi side have already been sold out for this season's shipment. The position looks strong for the future, for as the regular Summer business is opened, freights are sure to go higher than the rates now ruling." Hemlock deals are in more active demand consequent on the improvement in spruce.

STOCKS AND PRICES.

An extensive sale of timber limits is being held at Fredericton to-day by the New Brunswick Government.

The Scott Lumber Company, of Fredericton, N. B., expect to have 20,000,000 feet of logs to supply their Victoria mills this season.

Lombard & Rittenhouse, of Cheboygan, Mich., have bought 400,000 cedar ties in the upper peninsula of Michigan and Canada this year.

The Edward Hines Lumber Company, of Chicago, which logged 125,000,000 feet in Wisconsin during the past season, put in less than 90,000,000 feet this winter.

A. McBeath, of Kippen, Ont., has secured about half a million feet of hardwood logs for this season's operations. They consist principally of soft and rock elm and basswood, most of which were bought at about last year's prices. Mr. McBeath reports that the mill yards in that part of the province are well stocked with logs.

Hollister, Amos & Company, of Oshkosh, Wis., were the successful bidders for the purchase of Menominee Indian logs sold at Washington April 3. They secured 20,000,000 feet of pine, hemlock and other timber for $331,000. The average is over $15 a thousand feet, whereas twelve years ago the price realized was less than $6. Last year it was $12.84.

THE BARBADOS MARKET.

Under date of March 25, Messrs. S. P. Musson, Son & Company review the market as follows :

The only arrival during the fortnight is the Schooner "Marguerite," from Meteghan, N.S., to ourselves, with 40,000 feet of white pine and 60,000 feet of spruce, which we sold at $26.30 and $18.80 for merchantable and second quality white pine, and $22.70 and $16.85 for shipping and secend quality spruce, while a small lot of spruce plank and scantling in same cargo brought $22.70 and $16.07 respectively. Our market for white pine is still well supplied, but further arrivals in spruce, which is scarce, would do well.

"The position of the shingle market remains as last advised, and with no arrivals of either Long Gaspé or Cedar Laying, dealers are gradually reducing their holdings, which somewhat improves the prospect for next arrivals.

"Since writing the above the Schooner "Basutoland" has arrived from St. John, N.B., with 244,000 feet of white pine and spruce, which was sold at $26.10 for merchantable, $18.10 for second quality white pine ; $22.30 for shipping, and $16.20 for second quality spruce."

DEMAND FOR NARROW SPRUCE.

While 7in. and 8in. in a spruce cargo was looked upon more or less as a drug, to get rid of which it was necessary to sell these sizes practically below cost and to realize such profits as were practicable upon other sizes, their relative cheapness has resulted, says the Timber Trades Journal, in the development of a demand for these sizes, which has ensured for them to-day a regular if not brisk demand. As 55 to 60 per cent. of an average spruce cargo from St. John now consists of 7in. and 8in., it is obvious that the seller, if he is to realize anything out of the spruce trade at all, must make these widths carry a little more profit. Concurrently with the growth in the use of these widths, there appears to be some falling off in the call for 9in., and wider and where 11in. was once a plum, the percentage of which was carefully inserted in the contracts, and delivery rigidly insisted upon, now this size is inclined to hang fire, and has declined relatively in value. We hear that £7 10s. has been refused this week by shippers for a 1,000 standards prompt cargo of Miramichi spruce, close on three-fourths of the cargo consisting of 7in. and 8in. If a cargo of this kind was costed out on something like the relative differences in the value formerly existing between the different sizes, it would be seen that spruce has appreciated in value to an extent which is not at all represented by the mere difference in c.i.f. quotations.

OWEN SOUND, ONT.

NEW BRUNSWICK LETTER.

(Correspondence of the CANADA LUMBERMAN.)

ST. JOHN, N.B., April 4th, 1905.—An important feature in lumber selling in this section was the sale and shipment of several lots of 1 inch merchantable spruce boards which went to the United Kingdom. The demand in this line in that direction has developed during the last few weeks in a way that is veryencouraging to those who have Provincial spruce boards in stock, which is the case with practically every manufacturer in the city, as mentioned in previous letters. The sales mentioned total well up to 600,000 s. ft. and were made at figures which will leave from $10.00 to $10.25 per M s. ft. on the wharf at St. John. The quantity spoken of above cleans up the much greater part of the holdings in this line.

In other lines the outlook for N.B. wood products in the U.K. is very encouraging and the feeling among the local dealers is proportionately optimistic. According to all information obtainable, there seems to be a tendency among the dealers in the U.K. to refrain from buying or contracting as long as possible rather than resume business upon a schedule at higher prices, a circumstance which is quite usual and natural after a period of depression and low prices. On the other hand, the manufacturers and dealers on this side show their confidence in the future by their willingness to wait rather than tie themselves up by selling any important quantity or by contracting at even better figures than prevailed at the beginning of the winter slackness. In the meantime the volume of business actually being transacted is small, apparently only sufficient purchases being made to fill orders for immediately delivery.

The quantity of English deals available for immediate shipment could scarcely be called important, 700,000 to 800,000 s. ft. would cover the amount, which is divided among half a dozen concerns. With the beginning of the manufacturing season, which will be in full swing by May 1st, this quantity will be rapidly augmented, but it will be five or six weeks later before any one manufacturer has any important quantity to offer.

The lowest quotation available on English spruce deals at this date, f.o.b. St. John, would be $12.75 to $13.25per M.s.ft., (⅔ price for Fourths and Ends,) on a specification like or equal to the following: 50% 7's and 8's; 40% 9's; 10% wides.

No cargoes made up entirely of lumber have been shipped from this port to the U.K. since December last, but freight rates are quoted until June 1st at 35s per standard to the West Coast.

Since last writing the price of cedar shingles have advanced from 10 to 15 cents per M all round. Quotations are being given to-day in this line as follows, f.o.b. St. John:—

Non-dutiable—Extras, $2.95; Clears, $2.45; 2nd Clears, $190; No. 1's, $0.90. Dutiable—Extras, $2.65; Clears, $2.15.

Laths have shown a further advance and none are obtainable at this date less than the following figures, f.o.b. St. John: Dutiable, $2.60; non-dutiable, $2.85.

MEETINGS OF LOG DRIVING COMPANIES.

The twentieth annual meeting of the St. John Log Driving Company was held at Fredericton, N.B., on April 5th, when the following directors were elected: A. H. F. Randolph, John E. Moore, N. H. Murchie, Henry Hilyard and Donald Fraser, jr., with J. Fraser Gregory secretary-treasurer. At a subsequent meeting the directors re-elected John E. Moore as president.

Two tenders in writing were made for the corporatiom driving, one from Robert Aitken at 21 cents per thousand, the other from George Moore at 20 cents per thousand. John A. Morrison also made a verbal proposition to do the work at 24 cents per thousand, to include lumber now in booms. The contract was awarded to Mr. Moore. The stipulations were that the tenderer must name bondsmen who are ready to enter into a bond with him for the sum of $10,000 for the due performance of the contract.

The limits of the drive are from Grand Falls to the upper limits of the Fredericton Boom Company and include the St. John River and Aroostook River lumber. The drive this year will be made up of about 100,000,000 feet, while last year it amounted to 170,000,000 feet. It was decided to give a bonus of 2½ per cent.to the contractor on the amount driven to the booms.

The annual meeting of the Tobique Log Driving Company was also held at Fredericton on the 5th inst. The contract for driving the logs for three years was given to Archie Fraser. The quantity of lumber to be driven on the Tobique and tributaries this season was estimated at 18,000,000 feet, against 31,000,000 last year.

The following were elected directors: Senator Baird, N. H. Murchie, Henry Hilyard, R. A. Estey and Donald Fraser, jr. Senator Baird was elected president, and J. C. Hartley, secretary-treasurer.

PULP MILL FOR SALE

The City of Saint John Offers for Sale That Valuable Property Known as the Saint John Sulphite Pulp Mill.

The mill has a capacity of 180 tons per week; was built of brick in the year 1898, according to all the requirements of the Factory Insurance Companies of Providence (R.I.), and is fitted with turbine water wheels, developing 600 H. P., and an auxiliary steam plant of 300 H. P.

It contains two steel digesters 14 × 45 feet, built by the Portland Company, Acid Department Milk of lime system, of abundant capacity. Paper machine contains 21 Drying Cylinders, 100 inches by 4 feet.

The situation is at the mouth of Mispec River, a stream ten miles in length, and is distant about seven miles by sea from the City of St. John. Barges carrying 700 tons of coal discharge at the mill. Schooners have frequently been loaded with pulp at the mill, whence they departed to New York.

Sealed proposals, endorsed "Tender for Pulp Mill," will be received by H. E. Wardroper Esq., Common Clerk, at his office, City Hall, Saint John, N B., up to 12 o'clock, noon, of Wednesday, the 26th day of April, 1905.

W. W. WHITE, Mayor,
Chairman Board of Water and Sewerage.

Address reply to "Staves and Hoops," care of CANADA LUMBERMAN, Toronto, Ont., for full information of property.

CURRENT TRADE CONDITIONS.

ONTARIO.

The phenomenal increase in building operations in Toronto this spring is responsible for a very firm and active lumber market. Never in the history of the city have the permits for a corresponding period exceeded those of the past three months. Retail dealers are in consequence finding their stocks inadequate to meet the demands upon them, and replenishment has become necessary to a greater extent than was anticipated earlier in the year. Building activity, however, is not confined to Toronto,as throughout the entire province the conditions in this respect are about all that could be desired. The consumption of lumber is large, and he domestic trade this year promises to exceed that of any previous season. When the relative high price of lumber is considered, this must be regarded as strong evidence of very satisfactory commercial conditions.

Lumber prices are unchanged from last week. The strongest item in pine is mill culls, for which manufacturers are now asking $14 for No. 1, with a dollar added for ten and twelve inch. The upper grades are holding their own, influenced by some recent purchases for export to Great Britain.

White pine shingles are still inactive, and unless prices improve the production will be curtailed. The B. C. product is being quoted at the advanced prices given on another page. Lath is quite strong, No. 1 white pine being held at $3.25 at the mill, and No. 1 norway at $2.90 to $3.

MANITOBA AND BRITISH COLUMBIA.

The lumber business of Western Canada is becoming quite active. The demand is increasing and the trade are expecting a season much more satisfactory than last year. Lumber is still low in price and dealers are disposed to consider the present an opportune time to acquire stocks. A deal recently made in the South-east Kootenay is an evidence of this disposition. The Moyie Lumber & Milling Company sold to J. C. Graham, of Winnipeg, 1,800,000 feet of lumber, including all the stock in their yards. It is believed that prices will advance in the near future. The schedule on shingles recently adopted by the British Columbia Lumber & Shingle Manufacturers' Association is now in force, the prices being $2.50 for XXX for Manitoba delivery and $2.90 for points further east.

UNITED STATES.

Nothing has occurred during the past week to curtail the strength and activity of the lumber market across the line. The large gain in building operations in the leading centers of population, as compared with the corresponding time one year ago, is an indication of national prosperity, and no branch of industry is likely to be more benefited than lumber. Consumers are buying quite liberally and dealers are replenishing their stocks as fast as possible in anticipation of a heavy demand. Prices are strong all along the line. Buffalo and Tonawanda dealers are considering an advance on some of the lower grades of white pine, which are getting scarce. Box and lower are almost out of the market. The Eastern demand is said to be stronger than it has been for years. Prices of Pennsylvania hemlock have been advanced 50 and 75 cents a thousand. Spruce is also very firm and a Boston reports states that the demand for many sizes is greater than the supply.

The feature of the hardwood trade has been the adoption of a new list by the Wisconsin Hardwood Lumbermen's Association. First and second red oak was advanced $5,No. 1 common $3, and No. 2 common $2. First and second birch, 1 to 2½ inch, was advanced $1, also first and second ash in all sizes and first and second soft and rock elm in 1¼ inch and thicker. On the other hand, No. 3 common ash was reduced $2, and birch and basswood $1.

Lath prices are still very strong. For Chicago delivery No. 1 white pine is quoted at $4 and No. 2 at $3.25. No. 1 hemlock brings $3.25.

GREA BRITAIN.

The stock of spruce deals at Liverpool and Manchester on March 31st last was only 15,000 standards, or about 30,000,000 feet, whereas last year it was double that quantity. The statistical position of spruce is therefore very favorable and warrants the prediction made by Messrs. Smith & Tyrer that prices will go higher. The stock delivered by the liners from St. John and Halifax is being sold upon a basis of £7 12s 6d per standard c.i.f. Liverpool. The specifications have contained but a small quantity of 3×11 inch, for which high figures are being asked by retailers. The white pine market, while firm, does not exhibit as much strengh as spruce, and shippers have not been successful in closing contracts at altogether satisfactory prices. Nevertheless, the stock of pine deals is very much under what it was at this time last year, and as shipments are certain to be light, holders are not likely to exhibit much disposition to force stock upon the market. There is a very liberal demand for birch logs. Sales are being made on a basis of 1s 4d per cubic foot string measure for 14 inch average. Birch planks are also meeting with a fair inquiry at higher prices.

STOCKS AND PRICES.

L. O. David, City Clerk of Montreal, is asking for tenders up to noon of 20th inst. for the supply of lumber required by the Road Department.

The Great Northern Lumber Company, of Scotstown, Que., are understood to have made arrangements for shipping a large quantity of lumber to England this season.

Lumbering promises to be quite active in the vicinity of Owen Sound, Ont., this season. William Pedwell expects to cut about 1,500,000 feet at his Brooke mill,and Maitland, Rixon & Company will cut between 5,000,000 and 6,000,000 feet.

The log cut in the Rainy River district during the past winter was unusually large, and while the early break-up of winter caused some apprehension, nearly all the lumbermen, by making an extra effort, were able to get their logs either to the river or railway. It is estimated that the cut in the Rainy Lake, Rainy River, and Lake-of-the-Woods district was about 100,000,000 feet.

HARDWOOD LUMBER PRICES.

The Wisconsin Hardwood Lumbermen's Association adopted a new price list on April 6th last, which is given in part below:

BIRCH—Log run, $19. First and second 1 in., $31; 1¼ and 1½ in., $33; 2 in., $34. No. 1 common, 1 in., $18; 1¼ and 1½ in., $20; 2 in.,$ 22. No. 2 common, 1 in., $10; 1¼ and 1½ in., $11; 2 in., $13. No. 3 common, $7.

BRITISH COLUMBIA LETTER.

(Correspondence of THE CANADA LUMBERMAN.)

VANCOUVER, B.C., April 10th, 1905.—British Columbia wil very likely receive contracts from the Br tish Admiralty next year for the supplying of a large amount of timber. Mr. W. J. Rogers, Timber Surveyor of the Admiralty, is in the city just now, and he states that the timber of this province is unequalled in the world for stage deals and oar stock. The B. C. Mills, Timber & Trading Company and the Pacific Coast Lumber Company are supplying $20,000 worth of selected spruce oar stock, which Mr. Rogers is now inspecting. Spruce, he says, is far ahead of ash, which used to be thought the best. Heretofore, considerable Baltic timber has been used, but owing to the enterprise of some of the manufacturers here, tests of B.C. wood have been made in the Davenport dockyard. "Timber from this province is better, and can be supplied cheaper than from the Baltic," Mr. Rogers told your correspondent, "and next year when the three-year contracts are awarded I expect to see many of them come out this way." Mr. Rogers will leave on Thursday for Quebec, where he will inspect a coup'e of ship loads of timber contracted by Dobell, Beckett & Co.

Three ships are ready for foreign ports, the Inveramsay, which loaded 1,262,008 feet at the Chemainus mills for the United Kingdom; the Belford, 1,665,235 feet, Hastings mill, for United Kingdom, which is still here owing to delay about her crew; and the bark Haddon Hall, 1,168,002 feet, Hastings mill, bound for Iquique.

Export trade on the whole is fair, and that there are prospects of it continuing good is shown by the announcement of Mr. L. W. David, who is manager of the company which is about to open the Ross-McLaren mills at New Westminster. He states that the principal business done there will be shipment to foreign ports, and vessels will come up the Fraser and load at the mills.

The large areas of fine timber on the west coast of Vancouver Island are attracting the attention of saw mill operators. The country there, owing to the absence of railroads, has not been devastated by fires, and the timber is in first-class condition. It was there that the first mill of the province was built. The Seattle Cedar Manufacturing Company have selected a site and are preparing plans for a large mill to be erected at Clayoquot. The product, it is stated, will go mostly to the American market, where cedar commands a good price.

The largest individual order reported recently was that received by the Bowman Lumber Company, which has taken over the interests of the Empire Lumber Company at Revelstoke and Comaplix. This company will ship a single order of 35 cars of lumber to the Northwest. There is a good demand from the Territories at present, both for lumber and shingles, and since the new arrangement entered into by the coast millmen, all the mills here are receiving a proportionate share of the business.

Sheriff Tuck, of Ymir, seized the lumber plant and product on Monday last of S. F. Mackay on Porcupine creek, near that place. He was cutting on the limits of the Active Mining Company. The seizure was on execution of judgments in connection with Mr. Mackay's saw mill enterprise at Poplar.

The opening of the new mill at Kamloops of the Kamloops Lumber Company was celebrated on the third instant by a public function.

Many mills have been and are being established in the interior to meet local demand. The latest is that of American people on the north fork of the Kettle river. They are negotiating for the purchase of fifteen square miles of fine limits, and will build to supply the demand of the towns and camps on the north fork.

John Fenton, who for 30 years was with Gilmour & Company, Ottawa, has resigned the timber inspectorship for the Dominion Government to accept the managership of the East Kootenay Lumber Company.

TIMBER LIMIT TRANSACTIONS.

George Neibergall, James Hunter and John Crawford are announced to have purchased the saw mill, timber limits, etc., of Robert Watt, of Wiarton, Ont. The mill is one of the best on the peninsula and cuts annually a large quantity of hardwood and other lumber.

R. & T. Ritchie, of Aylmer, Que., have purchased the limits at Mattawa, Ont., owned by the Hull Lumber Company, of Ottawa the consideration being $115,000. The limits consist principally of pine and spruce.

P. G. Keyes, Secretary Department of Interior, Ottawa, will receive tenders up to May 10th for a license to cut timber on Berth No. 1219, in the district of Alberta, N.W.T., comprising 50 square miles to be selected in not more than ten blocks within a prescribed area.

A special sale of timber licenses was held at the Crown Lands office, Fredericton, N. B., on April 12th. Of the 204 square miles advertised for sale, only 62½ miles were disposed of, and all went at the upset price. The total proceeds of the sale were $1,250. The following were the purchasers: William Richards Company, 10½ square miles on the Restigouche river; Sumner & Company, 21½ square miles on the Nepisiquit river; John O'Brien, 6 square miles on the North-west Miramichi river; Adams, Burns & Co., 24½ sq. miles on the Nepisiquit river.

J. S. FINDLAY,

OWEN SOUND, ONT.

THE GLASGOW MARKET.

Messrs. Calder, Henderson & Livingston furnish the following particulars of the Glasgow lumber market:

It is satisfactory to note that there has been a steady business during the quarter just ended. There was a good consumptive demand, and as advances in the price of teak, pitch pine, and spruce have been established, the feeling of uncertainty has now to a great extent disappeared. There has, however, been no extensive buying ahead, merchants still preferring to pursue a hand-to-mouth policy.

WANEY PINE—The stock on hand shows that a considerable consumption has taken place since 31st December last, but there is still plenty remaining for all requirements. Prices all around are weaker, in sympathy with quotations being made for the coming season's import. Prime shipbuilding wood of long average by 18 to 19 inches is quoted at from 3s 9d to 4s 2d. First class short girthy is selling at from 2s 8d to 3s, and second class from 1s 8d to 2s 6d, according to size and quality.

SQUARE PINE.—Has been little asked for. First class 35 to 40 feet average is quoted at from 2s 8d to 3s, good fair average at 2rd to 2s, but for this latter quality there is practically no demand.

RED PINE.—For this staple there are no enquiries. The stock is very low, but seems quite ample.

ELM.—Stocks show a material reduction as against this time last year. What is on hand is largely soft elm. Prime rock elm is very scarce, and quotations have sharply advanced. They are now at 3s 10d to 4s 3d for 40 to 45 feet average.

OAK.—The stocks are healthy. The demand has been slow, with the exception of prime wood of large size. Some parcels of such have been sold lately at from 3s to 3s 3d for first class 65 to 70 average. Second class is hard to move, and for such quotations are purely nominal.

ASH.—Has been in fair request. Stocks are low and prices firm at 20d to 22d for first class 14 to 15 inches average.

BIRCH.—The stock is practically nil, and what there is, is held by merchants. Prices are firm at about 2s for 16 inch average.

DEALS, BATTENS AND BOARDS.—There has been a fair demand during the quarter and an average amount has gone into consumption. The prices generally are steady, although some low figures have been accepted for odd parcels that were being cleared for stock-taking.

PINE.—FIRSTS.—The stock is low and prices are steady. Quotations are as follows: Broads, £34 to £37; 11 inches, £30 to £33; Undersizes, £25 10s to £27. Several parcels of sidings have come forward by liners from U. S. ports, and have been selling on the basis of from £26 to £27 10s for 11 to 12 inches average. SECONDS.—The demand is quiet. Stocks are healthy. Broad deals are quoted at from £22 to £24; 11 inches, £18 to £19; Undersizes, £13 10s to £15 10s. THIRDS—Compared with last year, the stock appears decidedly healthy, but considering the demand it is ample. Broad deals are asked for and are quoted at from £13 to £14 10s; 11 inches at from £11 15s to £12 10s; Undersizes, at from £9 10s to £10 5s. FOURTHS.—The stock is still too heavy and prices are low. Quotations are at from £8 5s to £9 for 11 inches; £7 11s 3d to £8 for undersizes.

RED PINE.—The stock shows a reduction, but there is not much demand. Prices are steady, and range from £7 10s to £9 for Undersizes, and from £9 to £11 for Regulars, according to quality.

SPRUCE.—A moderate business has been dnoe; 7 inch and 8 inch are in demand, bnt 9 inch and wider have been slow of sale. Quotations for 3rd quality range from £7 12s 6d for 7 inch to £8 15s for 9 inch.

N.B. AND N.S. BIRCH.—There has been a fair import of St. John timber, all of which has gone direct into consumption. Prices are firm at a basis of 18d for 14 inch average St. John. Planks are wanted. There is no stock on hand, and any coming forward should realize £8 5s to £8 15s for merchantable St. John.

N.B. PINE DEALS AND BATTENS.—There has been no import, but as the demand has been quiet, we still have ample stocks on hand. Quotations are at from £7 to £8 10s according to size.

N.B. SPRUCE.—The import has been very low, and as there has been a fair demand, stocks are now in a healthy condition. Prices are firmer, and quotations are at £7 5s to £8 10s for second quality average St. John.

CANADIAN LUMBER SHIPMENTS.

THE OTTAWA VALLEY.

Correspondence of the CANADA LUMBERMAN.)

OTTAWA, April 10, 1905.—Being midway between the seasons, conditions in lumber circles here at present are very quiet. In about two weeks sawing will be in full swing and the Chaudiere assume its customary activity. The lumber cut this year is expected to be about the same as last.

Advices received from Edgar Tripp, the Canadian Government Commercial Agent in Trinidad, by the Trade and Commerce Department to-day, indicate that Canadians have a promising market in Trinidad for shooks and boxes, the only handicap being a very high freight rate. Could a reduction of 25 per cent. in the present rate be procured Canadian manufacturers would soon control the market in this respect. It is estimated that this year the value of shooks imported into Trinidad will be $400,000.

Mr. J. R. Booth was last night granted by the Fire and Light Committee of the City Council a two year,sextension of time for the removal of his lumber from what is known as the Fraserfield yard, which is within the fire area prescribed by by-law two years ago after the great conflagation originating in Mr. Booth's lumber piles in the west end of this city. The Export Lumber Company was granted a like extension.

Mr. Booth has intimated that in about two years time he may close down one watch of his mill, running in day time alone. This is understood to be caused by the purchase of his railway by the Grand Trunk Railway and the consequent lack of facilities for handling his lumber.

The Export Lumber Company, one of the largest retail and wholesale lumber firms in the city, and which has been in process of liquidation since last fall, is expected to resume business about the first of August. It will be under a new management, however.

By the breaking of a boom two days ago some 6000 logs belonging to the E. B. Eddy Company were swept over the Chaudiere Falls and scattered down the river.

The planing mill of John Carter, Clinton, Ont., was almost totally destroyed by fire recently.

B., to Manchester, 40s, 20 per cent. boards and scantling; a steamer, 1,600 standards, Bay of Fundy to w. c. England, 35s, July.

CURRENT TRADE CONDITIONS.

ONTARIO.

General conditions in the lumber market are about all that could be desired, and prospects are very bright for a large summer trade. The demand is on the increase and before the new cut is in shipping condition dry stocks will be very low in nearly all grades of pine and hemlock. Considerable lumber to be sawed this season has been contracted for and prices in every instance have been favorable to the seller. The demand from the United States is an influential factor again this spring, and as there are no signs that the exports will be less than last year, the home market will be required to take care of a smaller quantity, inasmuch as the production must show a decrease on account of the lighter input of logs. Retail dealers report an active movement of building lumber, with a tendency to use the lower grades where they can by any means be made to meet the conditions. Quite large buying of birch has been in evidence of late, and if this should continue higher prices are likely to rule notwithstanding the somewhat plentiful supply. Elm is also in improved demand.

QUEBEC AND NEW BRUNSWICK.

The developments of the past week have not been favorable for lumbermen. The water in the rivers has fallen and there is a great danger that a large percentage of the log output will be hung up. There is very little snow in the woods and the drives are almost entirely dependent upon early rains. The result of such a condition has been to strengthen the lumber market and at the same time to prevent the closing of contracts. Manufacturers are refusing to accept orders to supply stock until they are more certain of their position. If the drives should be tied up a sharp advance in spruce prices may be expected. Enquiries for lumber for shipment to the Eastern States have been more numerous during the past week. The shingle market has also strengthened and Extras are now selling freely at $3.30 to $3.40 for Boston delivery.

UNITED STATES.

Lumber of all kinds is showing remarkable strength. The price committee of the Buffalo White Pine Association have recommended that all grades from No. 1 barn down be advanced, and action in that direction is likely to be taken at the next meeting of the Association. The dealers have been compelled to fall in line with the manufacturers, who are holding prices surprisingly firm. As compared with last fall prices have advanced from

$1 to $2.50, the latter applying to long piece stuff, which last fall sold in the Lake Superior district at $13.50 as compared with $16 this spring. The most urgent demand is for the coarse grades, but uppers are selling in moderate volume. There is a scarcity of dry box lumber at Buffalo and it is feared that there will be an extreme shortage before the new cut is ready. While these remarks apply to white pine, they also indicate the position of practically all other kinds of lumber. The supply of southern pine is scarcely equal to the demand, dry hemlock is well cleared up and spruce is selling at higher prices. The hardwoods are also going largely into consumption, with particular activity in plain oak, birch, elm and ash. There is an active demand for maple flooring. Basswood is doing better than earlier in the year but is still somewhat disappointing.

Shingles and lath are steady. Red cedar shingles are selling in some of the markets at a slight advance, but quotations generally are unchanged.

GREAT BRITAIN.

The British market continues steady, but improvement is slow. The statistical position of stocks should inspire confidence and induce importers to speculate, but up to the present time little disposition in that direction has been shown and in some instances importers seem to be of the opinion that they may be able to purchase to better advantage later in the season. Consumption is most active in Scotland, where house building and ship construction are calling for a considerable quantity of timber. Contracts have not been closed in as large volume as was expected earlier in the season. First quality Quebec pine deals are realizing £35 per standard at public sales. The spruce market is quite firm and considerable quantities have been sold to Ireland and the Continent. The outlook for spruce seems to be bright, the lower cost of this class of lumber as compared with pine appealing to many consumers.

STOCKS AND PRICES.

The steamer Lizzie Madden is loading a cargo of pine lumber at Johns Island, Ont., for Cleveland.

The contract for the supply of lumber for the city of Winnipeg, Man., has been awarded to D. E. Sprague.

The barge Winnipago reached Meaford, Ont., last week from Boyce City, Mich., with 750,000 feet of lumber for the Seaman-Kent Company.

H. Cargill & Son, of Cargill, Ont., will saw but a small quantity of pine this season, as the logs taken out during the past winter consisted chiefly of hardwoods.

A firm with a prospective cut of 175,000,000 feet at the head of Lake Superior have already sold about 110,000,000 feet, which is indicative of an active demand.

The Woodstock Lumber & Manufacturing Company, of Woodstock, Ont., are offering for sale 3,000,000 feet of hemlock in lengths from 10 to 24 feet, which they are prepared to cut to order in blocks of 50,000 feet or over.

THE TIMBER OUTPUT OF THE ST. FRANCIS DISTRICT.

The production of timber in the district of St. Francis, Ont., during the past winter was quite heavy. While the cut a year ago represented a larger amount of ties and mill timber, the figures for the present season show a large increase in everything else. In round numbers, the timber taken out represents about $625,000.

The following represents the various contracts as inspected by Crown Timber Agent Sleeman, and does not include timber taken out by the settlers, which would aggregate another $100,000 :—

LUMBER.

	Feet.
Rat Portage Lumber Co	26,000,000
D. E. Sprague	1,500,000
John Reid	700,000
Preston, Bell Co	700,000
Graham & Horn	1,500,000
Lockhart Co	700,000
Local mills	2,500,000
Total	34,200,000

TIES.

P. P. Elliott, Mine Centre	90,000
H. H. Wood	96,000
L. Hamel	12,000
Chas. Greer	50,000
Cut on homestead lands	75,000
Total	303,000

Tamarac piling, 9,000 pieces, or 270,000 feet lineal.

Cedar fence posts, 150,000 pieces.

Cedar telegraph poles, 20,000.

Culvert cedar, 300,000 feet board measure.

Cordwood, 10,000 cords.

In addition to the above, L. Christie, of Fort Frances, has cut 90,000 ties, while a large quantity of cedar and cordwood has been gotten out by the settlers.

THE BARBADOS MARKET.

From the last report of Messrs. S. P. Musson, Son & Company we quote as follows :

"No arrivals have taken place during the fortnight and our market for white pine is still well supplied. A cargo of shipping spruce would probably do well, but second quality is not in much demand. In the footnote of our last, we reported the sale of shipping spruce ex "Basutoland" at $22.30 instead of $21.30, which was the correct price. Shingles—The steamer "Dahome" brought down 800 bdls. of Cedar Laying shingles to our care, which being of extra good quality, we sold to a dealer who was bare of this description at $2.30 per M., and although there is some slight enquiry for these, further cargo arrivals would not realize this price. Long Cedar are not in heavy stock, but demand is very light at this season, and supplies are sufficient for present requirements."

"Since compiling above the schooner "Edyth" arrived from Lunenburg, with 25,000 feet spruce and 115,000 feet hemlock."

FIRES.

The saw mill of W. C. Harrison at Norwood, Ont., was destroy d by fire last week. The loss is $8,000 and there was no insurance.

BULMER, McLENNAN & COMPANY
MONTREAL, QUE.
Office and Yard, 571 DORCHESTER ST. - - P.O. Box 116

WILL TEST THE B. C. TIMBER LAW.

A dispatch from Nanaimo, B.C., says: A boom of logs owned by the Wood Lumber Company, of Bellingham, Wash., was seized today at Comox by Deputy Inspector Murray, and is held for payment of $2,000 export tax on logs to Puget Sound. The seizure follows the refusal of the Wood Company to pay the tax.

TIMBER LIMIT TRANSACTIONS.

Kaine & Reynolds, of Quebec, have disposed of their timber limits and mill property at Bergeronne, Saguenay, to Dumphy & Bird, of Canton, N. Y. It is understood that Mr. Kaine has retained an interest in the property.

It is announced that negotiations have been concluded by which A. & P. White, of Pembroke, Ont., have disposed of their mill at that place and timber limits on the Ottawa River to Ottawa parties, including E. J. Chamberlain, manager of the Canada Atlantic Railway. The price is understood to have been between $125,000 and $150,000.

THE WESTERN LUMBER SITUATION.

Mr. T. F. Patterson, of the Canadian Pacific Lumber Company, Port Moody, B. C., takes exception to the statement of Mr. Walter Scott M.P., that if a duty were placed on American lumber it would result in an advance in price by the Canadian dealers, and also a probable scarcity in the supply. Mr. Patterson says:

"Regarding the statement that immigrants now coming into the Northwest find it difficult to get lumber in sufficient quantities, I may say that the mills here are now running not much over half capacity. There are large stocks of lumber in the yards, and the great difficulty the mills experience here is to get orders at almost any price. To an outsider it would seem that a mill running ten hours per day is running full capacity; but such is not the case. Take, for instance, our company's mills at Port Moody. We are running ten hours per day, but only a part of the machinery. We are cutting from 60,000 to 70,000 feet per day, when the actual capacity of the mill is 150,000 feet. As we can only sell between 50,000 and 60,000 per day, we naturally deem it inadvisable to increase the cut until the markets warrants a change. This is the case with almost every mill in the province, and mills in British Columbia can take care of all the trade that can possibly come from the prairie region and still have time on their hands to spare. This can be done without increasing the prices, and Mr. Scott's argument that the settlers cannot get lumber in sufficient quantities is not founded on fact.

"It is not in the Territories where the invasion of American lumber takes place. Mr. Scott's territory has to a large extent to purchase from British Columbia. In the year ending December 31, 1904, about twenty million feet of American lumber was imported, while in Southern Manitoba and Winnipeg the imports amounted to over eighty million feet, and it was American cheap lumber at that. Some of it did not net the manufacturers the price of the logs at the mill. This gave Manitoba somewhat of an advantage over Territorial points, and Mr. Scott should be a strong advocate for a duty on lumber to prevent Manitoba from securing special privileges over the Territories in the purchase of sacrificed American lumber. If the dumping clause of the Tarriff Act is of benefit in preventing the sacrifice of other American goods in this couutry, there is no reason why the lumber industry should not share in the benefits. The North-west and Manitoba expect to have large manufacturing industries in the near future, and they doubtless will be as clamorous for protection of these on their infancy as they are now that no duty on lumber should be imposed. And they will have a right to expect just that very treatment. I cannot see any good reason that the Government can advance for not giving the only industry of great importance to the Dominion some measure of protection during the present session of Parliament. I trust that the new Minister of the Interior will be broad-minded enough to look at the Dominion as a whole, and not only at one particular section of it."

From the best figures obtainable at this time it appears that the cut of logs on the Penobscot and Kennebec rivers in Maine the past winter was 71,000,000 feet less than that of a year ago. The total cut of the two rivers figures up 241,000,000 feet. The reason for the decrease is to be found in the large stock of logs on hand last fall. All the big pulp and paper plants, as well as the saw mills on the two rivers, are bringing over good sized stocks of logs this spring. To this can be added the fact that owners of timber lands placed the stumpage at a figure which prevented most operators from taking any chances at all. To a large extent the stumpage was prohibitive, and only enough logs was cut to meet the demand of the present year. While on the west branch of the Penobscot the figures show that of the 75,000,000 feet cut, only about 14,000,000 feet was cut by the Great Northern Paper Company itself, about two-thirds of the cut on those waters, or 40,000,000 to 45,000,000 ft, will go to that company's mill at Millinocket.

COOPERAGE STOCK.

In a recent report on cooperage stock conditions, Messrs. Sutherland, Innes & Company, of Chatham, Ont., say:

Business in cooperage stock has been a little dull, but is looking up considerable during the last week or ten days. There are a great many more inquiries for cooperage stock than for some time, while orders are beginning to come in a good deal more freely, so that it looks as if trade is improving all over the country.

Stocks on hand are still comparatively heavy for this season of the year, more especially in lower grades of staves and mill run heading. No. 1 staves which are thoroughly dry for present use are somewhat scarce, although the supply is about equal to the demand. No. 1 heading is still plentiful, and coopers are able to buy at very reasonable prices. In mill run heading and No. 2 and mill run staves the supply is ample, in fact, these classes of stock are being offered at remarkably low prices, considerably less than the cost of production, so that evidently some of the manufacturers are anxious to clean up their stocks they have on hand before the new stock comes in.

Hoops are showing an upward tendency, and the best manufacturers are asking a good advance in prices over a month ago. There seems to be more demand for hoops than any other class of cooperage material at the present time, but the production is now being increased very greatly, so there is no doubt there will be plenty of hoops and at reasonable prices.

The outlook for cooperage stock is very bright at present. Reports indicate that the fall wheat has come through without any damage, and the spring seeding is under way in the Northwest, so that the wheat crop looks exceptionally favorable.

The Government reports indicate that the fruit trees have come through the winter without any damage, and unless something untoward occurs between now and the time for the fruit to set, we are likely to have a very good apple crop this season.

The stocks of logs and bolts at the mills are very much lighter than a year ago, so that the production this year is likely to be considerably curtailed, which may affect prices a little latter on in the season.

STREAM DRIVING PROSPECTS IN NEW BRUNSWICK.

FREDERICTON, N.B., April 21.—Lumbermen of the St. John River are feeling pretty blue over the poor prospects for getting their logs out of the woods. There have been no rains this spring, and the snow has gone off gradually, making no freshet of water for stream driving. Unless heavier rains come within a few days, many millions of logs will be hung up in the streams and the mills will be short of logs for the season's sawing. A dealer said last night, in discussing the situation, that at least twenty-four hours' heavy rain would be necessary to be effective, but even less than that would serve towards solving the difficulty. Logs are hung up at different points practically through the whole St. John river region, and stream driving can hardly commence until the appearance of heavy and continued rains.

Stream driving operations on the Nashwaak and tributaries commenced early last week. All the crews are at work, but as the water is rather low, not much progress is being made.

Fred B. Edgecombe stated to-day that the Edgecombe and Eaton concern had 300 stream drivers at the scene of their operations waiting for the water to rise to start logs into the streams. Edgecombe and Eaton have about 8,000,000 feet to come out, including everything.

THE EASTERN MARKET.

That the markets of the Eastern States are in a very healthy condition is emphasized by the fact that, at a recent meeting of the dealers in Boston, a committee was appointed to revise the price list governing spruce lumber and clapboards, hemlock and shingles, the feeling being that in many instances prices were too low. A new list on spruce has been put into effect, based on $23 for under 10 inches.

Commenting on the situation the Boston correspondent of the Lumberman's Review says:

The advance in the price of spruce lumber did not come as a result of a general organized movement among the shippers, but rather as a result of a developed demand far in excess of present or prospective supply. When this point was reached a few of the larger shippers advanced their prices, and this was immediately followed by a general advance by practically all shippers. This placed spruce on a basis of $20 and $22 instead of $19 and $21, which latter basis had been in order without a break for nearly five years. Under the old list the regular prices applied to all lengths up to 28 feet, with $1 per thousand added for each 2 feet or fraction thereof in excess of 28 feet, while the new applied to stock up to 24 feet, with $1 added for each additional 2 feet or fraction thereof.

Spruce clapboards are very firm and in light supply, with none of the new cut stock yet available for delivery. The prevailing market is on a basis of $50 for the 6-inch 6-foot Northern boards, while 4-foot Eastern boards can safely be quoted from $41 to $42.

Spruce lath are very firm at $3.40 to $3.50 for 1⅝-inch and $3.25 for 1½-inch to points taking the Boston rate of freight, while at least one shipper is holding on a basis of $3.45 for 1½-inch and $3.60 for 1⅝-inch. The demand is taking care of every available lath offered and all dealers are hard pressed to secure adequate supply.

The market for Eastern cedar shingles has advanced a step during the past month with "extras" very firm at $3.25 for winter sawn stock, and few dealers are willing to take orders for the delivery of spring sawn stock on a basis lower than $3.40 for extras, and I find a general feeling both among the shippers and receivers that the market will be on a strong $3.50 basis on or before June 1.

HARRIS & COMPANY,
Day Mills, Ont.

About 2,000,000 feet of logs at Cape Chin, Ont., were destroyed by fire last week, the losers being Robert Watt, Kastner & Company, J. P. Newman, George Neiberga! and Wiarton Lumber Company. About 30,000 posts owned by T. J. Austin, Detroit, were also burned.

CURRENT TRADE CONDITIONS.

ONTARIO.

The lumber market has a most healthy appearance. The spring demand is developing as largely as was expected, and the outlook is for a very active season. Prices continue firm, with no decided tendency either to recede or advance, but it may be said that present conditions favor the seller on account of the extensive building operations in Toronto and to a lesser degree throughout the province. There is certain to be a very heavy consumption of lumber this year and it would not be surprising if a shortage should develop in some classes. The mills are practically sold out of dry stock and considerable of the new cut has been contracted for. Mill culls and the lower grades continue to occupy the strongest position, but hemlock is also exhibiting an exceptionally good tone. The manufacturers are realizing higher prices for their stock than ever before, and dealers who earlier in the season entered into contracts based on the prices then ruling are finding difficulty in purchasing the lumber at a price which will give them a margin of profit.

Most of the drives have commenced, but low water in the northern parts of the province promises to result disastrously unless there should be heavy rains in the near future. There is very little snow in the woods and the rain-fall this spring has been exceptionally light. If any quantity of logs should be hung up, higher prices for white pine lumber may be expected.

Since writing the above, it is learned that rain has fallen north of Sudbury, and that the drives in that district are now moving satisfactorily.

QUEBEC AND NEW BRUNSWICK.

The lumber market in the Maritime Provinces is at a standstill owing to the uncertainty regarding the log drives. The outlook is very gloomy on the St. John, Miramichi, Tobique and Aroostook rivers, and unless there should be heavy rains in the near future, the logs are almost certain to be hung up. This will mean considerably higher prices for lumber. The present position of the market is very strong. There is a scarcity of deals on the St. John and it is doubtful if a couple of car loads could be got together. Considerable quantities are held on the north shore for shipment upon the opening of navigation. At the present time deals are worth $13.50 per thousand f.o.b. St. John, a dollar more than three months ago. There is a strong demand for American spruce deals, which have

advanced in price during the past fortnight.

The cedar shingle market is much improved. Offerings by the small mills are lighter and higher prices are established. Extras for Boston delivery are quoted at $3.40, and clears at $2.85 to $2.90, with the supply of all standard brands comparatively light.

MANITOBA AND BRITISH COLUMBIA.

The expected heavy ordering of lumber from the North-West and Manitoba markets has not materialized, and shipments up to date are below what was expected. The manufacturers are carrying heavy stocks and are prepared for a rush of orders should they come. The mills on the Coast and in the Mountain district of British Columbia are now so numerous that they can take care of nearly double the trade which is now offered. There is a large influx of settlers into the prairie region, but up to date their requirements of British Columbia lumber have been limited this year.

The shingle situation is much improved. For the past six months the market has been in a demoralized state. Owing to the severe competition among the different mills in the province, prices fell below cost and some of the mills went out of business or into the hands of the sheriff. Some weeks ago the manufacturers got together and agreed on a list which will give a fair profit, and it is thought that, after the severe lesson they have had, the list prices will be adhered to. Orders are coming in fairly well and the outlook for a good season's business is promising.

A number of new logging camps have been opened up, and the supply of logs for the season promises to be ample. Wages are very high, which makes the price of logs about $5.50 to $6.00 net at the camp, or delivered at the mill $7.50 to $8.00.

Owing to the cheaper grades of lumber from the American side cutting into the North-West market, only the better class of logs are being taken out, as it is almost impossible to find a profitable market for the lower grades of lumber.

UNITED STATES.

The position of the lumber market is entirely satistactory. Practically all classes of lumber are moving in large volume, while the southern pine business is almost booming. Reports in respect to white pine are much better than one year ago, stocks are not heavy, and prices are higher. The demand is making it compulsory upon dealers to accept the manufacturers' prices, with the result that advances have been made at some of the wholesale points. The great activity in building is consuming a vast quantity of lumber and the requirements of the railroads is also a very considerable factor. The supply of spruce is scarcely equal to the demand. Hardwoods are active, with birch in exceptionally good demand. Ash and elm are also moving in liberal volume, but basswood is lagging. There is a steady call for maple, but prices in the Saginaw Valley show an easier condition, as log run has been purchased as low as $14.50.

Lath continues to exhibit strength, No. 1 white pine selling in Chicago at $4 and No. 2 at $3.75. The shingle market is showing a better tone, due to increased consumption. White cedars have advanced 15 cents within the past two weeks.

GREAT BRITAIN.

Lumber prices in Great Britain have undergone no important change during the past week. The failure of a large Nottingham firm, of which several large importers are creditors, has caused an uneasy feeling in the trade, particularly when considered in conjunction with the recent embarrassment of a timber importing firm in Manchester. Apart from this feature, however, the market is in a healthy condition and deliveries from the docks are being made in large quantities. Pine prices are barely steady, but spruce shows an advancing tendency. At a recent auction sale in London 3x9 inch third quality Montreal spruce regulars brought £8 15s per standard, while 3x9 inch first, second and third quality, from Halifax, N.S., brought £8, and 3x7 inch £7 5s. The importing trade are now accepting the view that the export of spruce from Canada will be very light this year, and that this condition is likely to bring about higher prices.

STOCKS AND PRICES.

The city of St. John, N.B., will purchase 3,500 yards of paving blocks at 50 cents per yard.

The W. C. Edwards Company will supply the lumber required this year by the Ottawa Improvement Commission.

J. T. Scanlan has secured the contract for supply of white pine and spruce lumber required by the Road Department of the city of Montreal.

The Hanbury Manufacturing Company have purchased the stock of lumber carried at Brandon, Man., by the Rat Portage Lumber Company.

The Alex. Gibson Railway & Manufacturing Company have about 2,000,000 feet of spruce deals of this season's cut loaded on scows at the mouth of the Nashwaak river, N.B.

About 280,000 feet of lumber cut by Crain Bros. was sold last week at Carleton, N.B., at auction by virtue of a bill of sale given to George McKean, of St. John. It was purchased by C. E. Gallagher, of Bath, for $1,100.

The first log raft of the season came down the St. John river and reached Springfield, N.B., last week. It consisted of ten joints of spruce and was brought in by Gordon Grant, of Southampton. A run of bank logs is expected this week.

The Alma Lumber & Shipbuilding Company will saw about 3,000,000 feet of lumber at Alma, N.B. Linton Tingley will cut about 500,000 feet of deals. The prospective cut of the mill of C. T. White, Point Wolfe, N.B., is 3,000,000 feet.

The Fernie Lumber Company, of Fernie, B.C., have sold their entire cut for the season to Christie & Company, wholesale dealers, Winnipeg. The transaction also includes the stock of lumber now on hand, which will bring the total up to at least 4,000,000 feet.

NEW LUMBER ASSOCIATION IN MONTREAL.

The newly formed lumber branch of the Montreal Board of Trade held its first meeting in the Board of Trade committee room on May 1st, when by-laws were adopted, officers were elected, and a number of matters of importance to the lumber trade were considered.

The name decided upon for the association is The Montreal Lumber Association of the Montreal Board of Trade.

The association starts out with splendid prospects of proving of great advantage to the lumber trade. There

W. C. CRAWFORD
Tilbury Ont.
. . Manufacturer of . .
Handles—Axe, Fork, Pick, Etc.
Also Hard and Soft Wood Heading and Red and White Oak, Maple and Elm Lumber.

A SPLENDID ROUTE.
The Wisconsin Central Railway is justly termed the "Sportman's Line" because it reaches into and through the very heart of the choicest hunting grounds in America.
The very best wild fowl shooting of the entire North is reached ONLY by this line. Hundreds of beautiful lakes abounding in wild rice and celery attracts myriads of ducks and geese and afford the finest kind of cover and the choicest shooting to be found the country over.
The Wisconsin Central Railway caters especially to the sporting public and during the various seasons for hunting and fishing furnishes daily information to its patrons as to local conditions anywhere along its lines upon application to the nearest ticket agent. It also arranges its train service with special reference to the convenience and comfort of sportsmen, and its employes are constantly on the alert to make travel over their lines pleasant and comfortable.
This line offers the best route between Chicago, St. Paul, Milwaukee, Minneapolis or to Lake Superior points via Ashland, Wisconsin.

are already 30 members enrolled, comprising almost all of the more important firms connected with the lumber business, either in manufacturing or handling lumber.

The officers elected will hold office until the annual meeting, which will be held in December. These officers are as follows :—

President—J. T. Marchand, of J. T. Marchand & Company.

Vice-president—E. M. Nicholson, manager of the McArthur Export Company.

Treasurer—Stanley Barker, manager Robert Cox & Co.

Other members of the executive committee—W. J. Brennan, of W. & J. Sharples ; W. T. McLaurin, of McLaurin Bros.; J. H. Redfern, of J. K. Ward & Co., and Wm. Williamson, president Laurentian Lumber Company.

The following were present at the meeting :—A. F. B. Austin, W. J. Brennan, F. W. Cotter, Wm. Duncan, Geo. Esplin, W. K. Grafftey, J. T. Marchand, W. T. McLaurin, E. M. Nicholson, Martin Power, Geo. A. Scott, Wm. Williamson.

BRITISH COLUMBIA LETTER.

(Correspondence of THE CANADA LUMBERMAN.)

VANCOUVER, B.C., April 24th, 1905.—Conditions in the lumber industry in British Columbia are more satisfactory this spring than they have been for a considerable time. Logging is active, and from $5 to $7 is being offered at the camp. Loggers are beginning to realize that this is the right way to sell logs, instead of hawking them around to mills, with a prospect of considerable deterioration in the process. That price is considered good, and for cedar it is higher. The demand for lumber is improving, and many of the mills are working full time. Prices are unchanged, and at present are lower from $1 to $2 per thousand than what they were previous to the ruinous depression of last year. In short, all round the business is good, and a continuation of it will do something toward setting some of the mills more firmly on their feet than they have been for quite a time. In the interior small concerns are still suffering, many of them being on the verge of bankruptcy.

The establishment of Mr. John Hanbury's large planing mill at Elko will assist the smaller mills. These have been unable to maintain sellers in the Northwest market, owing to limited financial resources, and sometimes have found the disposal of their product rather slow. It is Mr. Hanbury's intention to handle the cut of the small mills. This will afford them a steady and reliable market and will enable them to save expense for machinery to dress the lumber, besides insurance. This idea was suggested some time ago, and is now being carried into execution.

Mr. Walter Scott, M.P. for West Assiniboia, was in Vancouver last week, but only for a day. He made the same old statement in regard to the duty on lumber, that if it were granted the prices would be increased accordingly. Although this has been denied by the deputation that interviewed Sir Wilfrid Laurier and the members of the Government, Mr. Scott still quotes it, and has reiterated it in the interior. Prominent lumber manufacturers endeavored to see him while in the city to put him right on this question, but he registered from another town in the Territories, and remained secluded while here.

Mr. J. B. Miller, president of the Ontario Lumbermen's Association, was in the city last week. He was returning from a trip to California, and was accompanied by his wife and mother.

On Vancouver Island the lumber business is looking up. The Chemainus mills have started their night shift, a resurrection of the prosperity of old times. The Ladysmith Lumber Company is to erect another mill with a capacity of 50,000 feet per day. On the west coast there are signs of activity, the timber there being of good quality.

It looks as if the test case regarding the export duty on logs will at last come before the courts. Some of the big companies have been wishing the Government to take this matter up for some time, and have exported contrary to the Act, in the hope that there would be a prosecution, when the points of difference could be settled by the courts. It has been long contended that the amendments to the Land Act in respect to prohibiting the export of timber from certain provincial lands were invalid. In the present instance a boom of the E. K. Wood Lumber Company, of Bellingham, was seized by Timber Ranger John Murray, the logs having been taken off deeded lands, no tax having been paid.

Mr. E. K. Forster, of Cranbrook, and Mr. J. McKinley, of Winnipeg, have joined Mr. W. Wardrope in his sawmill enterprise at Sparwood, and have taken a large financial interest. The former will have charge of the mill and the latter of the bush work.

The mill of the Moyie Lumber and Milling Company has been taken over by H. Cameron and A. P. Stephenson, who are offering it for sale. Failing to receive satisfactory offers they will operate it themselves.

J. S. FINDLAY,

OWEN SOUND, ONT.

NEW BRUNSWICK LETTER.

(Correspondence of the CANADA LUMBERMAN.)

ST. JOHN, N.B., April 28th, 1905.—The saw-mills in this vicinity have, with one or two exceptions, begun operations for the season during the past ten days. The logs now being sawn were in every case held in stock here during the winter. Few logs are being offered for sale as yet, it is rather early considering the late opening of the small rivers and brooks in the lower counties. Rafting operations have not yet been started at Fredericton and it will be some weeks yet before the local mills will receive any important quantity of the thirty millions of feet which lay in the river at that place and vicinity during the winter. These logs and most of those which were cut between here and Grand Falls during last winter can be depended upon to come along in due time, but beyond that the outlook is decidedly discouraging and is causing the local manufacturers considerable uneasiness. It is felt that at least a week of heavy rains is needed at the head-waters of the St. John before the river will be in a condition for driving purposes. When it is considered that the local mills depend almost entirely upon the sections beyond Grand Falls for their logs, it can be readily seen how vital the consequence of a general hang-up would be. Such an event would mean, taking into consideration the amount of logs available between here and Grand Falls, that the total output of sawn lumber for this season would be at least sixty per cent. below the average.

A feature of the markets during the past month has been the increasing demand for and the advance in prices of American spruce deals. While there is no important quantity available at this port at this date, there will be during the next three months some considerable quantities manufactured, although the total cut in this line for the season will not be up to the average. For delivery during the next three months no lower quotation on American deals (f.o.b. schr. St. John) than the following could be obtained: 10's and 12's, $17.50 to $18.50; 9 inch, $16.00 to $16.50; narrows, $13.50 to $14.00.

Spruce laths have shown little variation during the past few weeks and are quoted f.o.b. St. John, $2.50 for dutiable and $2.75 for non-dutiable. Stocks are extremely light and it will be June 15th before any quantity of importance is ready to go forward.

Cedar shingles are steady at prices mentioned a month ago, viz., (non-dutiable, f.o.b. St. John): Extras, $2.95; Clears, $2.45; 2nd Clears, $1.90; No. 1's, $0.90.

The lower grades are somewhat slow in the United States, but the demand for the higher grades in that direction is brisk and growing and, combined with the indications for a heavy local consumption of the cheaper grades, promises a good year in this line.

Freight rates on deals to New York City are quoted at $3 per M, but there is a probability that before the end of May they may be 25 cents lower.

F.O.B. cars Dayton, or vessel at Thessalon. Apply to

HARRIS & COMPANY,
Day Mills, Ont.

D. Fraser & Sons, of Edmonton, N. W. T., have recently suffered heavily by fire. Several camps up the river, together with a quantity of timber, have been destroyed. It is said that upwards of 10,000 logs, which were left over from last season, were also burned.

CURRENT TRADE CONDITIONS.

ONTARIO.

The volume of business during the first week of May has been satisfactory. In Toronto dealers are handling a large quantity of building lumber and at smaller provincial points consumption is above the average. As most of the retail dealers have stocked up for the spring trade, it is probable that the next few weeks will witness a slight falling off in orders. This is not likely to weaken the market, however, for stocks are not heavy and the cut this season is certain to be considerably lighter than last year. Many of the mills have resumed operations and, with favorable drying weather, the new stock will be available to fill orders in about a month. For the new cut manufacturers are asking $17 for 2 × 6 and 8 inch common and $18 for 10 and 12 inch, while 10 and 12 inch mill culls are held at $14 and mill cull sidings at $13, all f.o.b. mill. Contrary to expectations, a few manufacturers are said to be shading the price of the upper grades of pine to the extent of $1 to $2, which may be taken as an indication that the British trade has not developed altogether satisfactorily. There is, however, an improved demand for Norway pine, which is selling at an advance of about $2 as compared with one year ago. Hemlock is firm and ranges from $12.50 to $14.50 at the mill, the latter price for 10 and 12 inch in 18 foot lengths and over. Shingles are unchanged, while lath are, if anything, a little easier on account of the new cut coming on to the market.

The hardwood demand is a little quieter but is likely to become more active as the regular season for hardwood finish is approached. Elm and birch are leaders in point of demand, with the former exhibiting the most strength owing to the comparatively lighter supply. Birch has been taken out in fairly large quantities.

QUEBEC AND NEW BRUNSWICK.

The log drives of the Eastern Provinces are still surrounded by uncertainty, as the recent rains have not been sufficient to insure the logs being carried into safe waters. The consequence is that any one having a quantity of lumber is not anxious to sell; in fact, orders at the market price are being turned down. The strong demand for lumber for shipment to the Eastern States has further strengthened the position of holders, and the present outlook is that higher prices will rule for spruce stocks.

Of the Eastern lumber products, the strongest article is lath. The mills are finding a ready sale at advanced prices,

largely for export. A cargo of 1⅝ inch was recently sold in Boston at $3.50, and smaller lots are bringing $3.60. Sales of 1½ inch are being made at $3.25 New Brunswick cedar shingles are also getting into a stronger position and all standard brands of Extras are bringing $3.40 on Boston rate of freight. This is an advance of 25 cents as compared with the low price touched about midwinter.

UNITED STATES.

A review of reports from the leading markets of the United States leads to the conclusion that, in point of volume, the lumber trade has lost some ground during the past week. The Chicago labor trouble has been a disturbing influence, but the chief reason for the slight falling off in orders is doubtless the customary disposition of buyers to expect some change in the market during the month of May, due in large measure to the starting up of the mills. The spring rush being over dealers can afford to await developments before placing orders for additional stock. It may be stated emphatically there are no signs of the market weakening; on the other hand, conditions are most favorable and the tendency of prices is to advance. The White Pine Association of Buffalo and Tonawanda have advanced all grades from No. 2 barn down, and the Mississippi Valley and Wisconsin Valley Association are expected to take action this week towards establishing of higher prices for several grades. Stocks generally are badly broken. Mill culls are moving freely at the advanced quotations recently mentioned. Hemlock is being bought quite heavily on account of the scarcity of pine. In the Pittsburg district, for instance, the demand has been so great, on account of the large number of cheap dwellings under construction, that the mills have been compelled to operate day and night to meet the requirements.

While hardwoods generally are exhibiting a stronger tone, with elm and birch leading, we can report no improvement in basswood, which continues very dull. It is probable that basswood prices may recede a little further, when consumption will be stimulated and a recovery follow. Shingles are selling more actively and in lath there is a healthy movement with a better supply.

GREAT BRITAIN.

The lumber trade of Great Britain is, considering the season of the year, of a quiet character, and it must be admitted that the improved outlook which was in evidence in the early spring has not been fully maintained. Nevertheless, there are some favorable conditions. The activity in the Lancashire cotton industry is assuming remarkable proportions and a large quantity of lumber is being consumed in the building of new mills and workmen's dwellings. Reports received invariably speak of the strength of spruce lumber, which seems to be gaining ground almost daily. Buyers are becoming convinced that the price of this class of lumber is subject to exceptional conditions, and that, taking the apparent shortage in the import into consideration, the buyer can obtain no possible advantage in waiting any longer. Current prices for ordinary spruce stocks, with about 50 per cent. 3×9 inch and upwards, is from £7 12s 6d to £7 15s per standard c.i.f. London or Liverpool, which is equal to about $19 per thousand feet board measure. There is less activity in white pine owing partly to its higher cost. There is a heavy stock of inferior oak timber held at Liverpool, and consequently prices are easy. Sales have been made as low as 18 pence per cubic foot, but the best quality brings two shillings.

STOCKS AND PRICES.

John McInnes & Son have secured the contract for the supply of lumber required by the city of Halifax, N. S.

The Rainy River Lumber Company, Rainy River, Ont., expect to cut about 60,000,000 feet of lumber this season.

In the Duluth district recent sales of pine lumber have been made at $18 for No. 3 and better; $13.50 for No. 4, and $9 to $10 for No. 5 boards.

The Pigeon River Lumber Company, of Port Arthur, Ont., will operate extensively this season in Minnesota, in addition to their operations on the Canadian side.

The Moulthrop Lumber Company, of Johns Island, Ont., have sold a block of lumber to Booth & Boyd, of Bay City, Mich. The company will manufacture 25,000,000 feet this season.

The British Columbia General Contract Company, of Vancouver, B. C., have been awarded the contract for all the timber work and piling in connection with the main and secondary canal for the irrigation undertaken by the Canadian Pacific Railway Company near Calgary, N. W. T.

The Gibson saw-mill at Marysville, N. B., has cut over 4,000,000 feet of deals since the season commenced. This company last week made their first deal shipment of the season, the tug Joseph taking 18 scows in tow for St. John. The Gibson Company are also shipping large quantities of lath and shingles.

The Minudie Coal Company of River Hebert, N. S., are asking for tenders up to Thursday, 18th inst., for the supply of 15,500 railroad ties, to be delivered before July 15th. The ties are to be cut from live, sound timber, of spruce, hemlock or tamarac, and to be 8 feet long, 6 inches thick, 7 to 12 inch face.

The American Lumberman, discussing pine lumber prices at Duluth, says: One sale this week was of about 3,000,000 ft. of No. 3 and better at $18, which is the market for that grade. Prices are stiff and sellers are not offering any concessions. The prices for the various standard grades of this market run about as follows, changed slightly by individual conditions determining the quality of single lots: No. 5 boards, which used to be mill culls, at from $9 to $10 and are going off well; No. 4 boards $13.50, though a good lot of dry No. 4 was taken recently at $14, and more of the same stock could to-day be placed at as good a price; No. 3 is worth $15.75 to $16 and a large lot is on the market for which the

A SPLENDID ROUTE.
The Wisconsin Central Railway is justly termed the "Sportman's Line" because it reaches into and through the very heart of the choicest hunting grounds in America.
The very best wild fowl shooting of the entire North is reached ONLY by this line. Hundreds of beautiful lakes abounding in wild rice and celery attracts myriads of ducks and geese and afford the finest kind of cover and the choicest shooting to be found the country over.
The Wisconsin Central Railway caters especially to the sporting public and during the various seasons for hunting and fishing furnishes daily information to its patrons as to local conditions anywhere along its lines upon application to the nearest ticket agent. It also arranges its train service with special reference to the convenience and comfort of sportsmen, and its employes are constantly on the alert to make travel over their lines pleasant and comfortable.
This line offers the best route between Chicago, St. Paul, Milwaukee, Minneapolis or to Lake Superior points via Ashland, Wisconsin.

owner refused an offer of the lower amount and is holding out for $16 ; No. 3 and better, rather poorer than common run of that stock, is worth $18 and from that up to $20 and even more, according to the percentage of better in the piles. A recent large sale of this grade at $18 was for no more simply because there was an unusually large proportion of No. 3 in the stock, so that it ran rather light to sweetenings.

THE EASTERN LOG DRIVES.

FREDERICTON, May 3.—John E. Moore has succeeded in getting all of his logs, amounting to three million and a half, out of Shinn Brook, a tributary of the South Branch of the Oromocto. Mr. Moore has also about 600,000 feet on the Oromocto which it is expected will be completed this week. The season's operations in this quarter have been very successful, the three millions and a half including a large quantity held up last year.

The river here has risen nearly two feet in the past few days, and the lumbermen have become somewhat more encouraged. The Scott Lumber Company's drive on the Keswick, amounting to about a million and a quarter, was got out last evening.

The Gibson Company's drive of 7,000,000 feet on the Bartholomew reached the booms last evening. The company's Arnold Brook drive of 5,000,000 feet is all in safe water. The main Nashwaak drives are coming along satisfactorily.

THREE RIVERS, QUE., May 2, 1905.—It is estimated that there were five million logs made on the St. Maurice river during the past season. Those who have just come down from the lumber regions report that most of the snow has disappeared, although the ice is yet solid. From their experience, they say that, unless there is lots of rain, the drives will be very much hampered, if not prevented, by the want of water. They state that the ground not being frozen, the melted snow did not run off, but was absorbed by the earth. It is said that the waters of the St. Maurice were never as low as they are just now.

THE LOG DRIVING OUTLOOK IN ONTARIO.

(Correspondence of the CANADA LUMBERMAN.)

Whitney, Ont., May 5th, 1905.—The general outlook for driving this year is not very promising. The snow went in such a way as to leave very little water and small creeks as a rule are pretty much all run out already, and those having to depend on this class of stream to get their logs out are liable to get stranded. On the western end of the Madawaska the chances are not so bad, as there are numerous small lakes, the supply of water in which has been well preserved by dams and will give a good head all along the main river when let out as required. Compared with last year the water can readily be said to be scarce, as where dams last year would fill up two and even three times after the first flow, this year it will be necessary to have logs well in under the one head, as there is so little water in the woods that a second head cannot be counted on.

MIDLAND, Ont., May 5th, 1905.—On the Pickerel, French, Vermillion and South rivers the water is lower than last season, but is still sufficient. We have had considerable rain during the past week and think this will enable the firms to drive logs that were somewhat doubtful a few weeks ago. The snow in the woods and the ice on the lakes are all gone, but there is considerable ice yet among the islands on the Georgian Bay, especially at Moose Point. Most of the lumber firms build enough reserve dams so as to catch all the water possible, and where they do this thoroughly there is but little danger of the logs being hung up unless there should be a continued dry spell.

BLIND RIVER, Ont., May 6, 1905.—The weather in this locality has been very dry all Spring and water is very low; snow is practically all gone, although there may be a little in the woods in places. Logs are coming very slowly and we are badly in need of heavy rains.

THE LOG OUTPUT OF MAINE.

A summary of the past winter's logging operations in Maine indicates a total cut of about 700,000,000 feet, as follows :

Penobscot river—West branch, 77,800,000 feet; East branch, 69,000,000; Mattawamkeag, 25,000,000; Piscataquis, 25,000,000; Passadumkeg, 9,250,000; total, 206,050,000.

Kennebec river—Moose river, 39,500,000; Moosehead lake, 36,500,000; East branch and main river, 31,300,000; Dead river, 19,500,000; total, 126,800,000.

Androscoggin river—Operations in both Maine and New Hampshire aggregate 250,000,000, chiefly for pulp, and 50 per cent. transported by rail.

Saco river — About 20,000,000 feet, chiefly second growth pine.

Machias river—About 15,500,000 feet.

St. Croix river—25,000,000 feet.

Union river—13,000,000 feet.

Narragugaus river—7,525,000 feet.

Aroostook county — Allegash and St. John river above Fort Kent, 50,000,000; Fish river and lakes, 25,000,000; Aroostook river, 40,000,000; total, 115,000,000.

This is about 50,000,000 to 75,000,000 short of the maximum cut in recent years in Maine, but it is in excess of estimates made last fall. On account of the large stocks of logs carried over from last season, high rates of stumpage and increase in the price of supplies, it was predicted that the cut would fall off 25 per cent. from that of 1903-4, making a cut of about 600,000,000 feet; but, while the cut was reduced in some sections, in others it was increased because of exceptionally favorable weather conditions.

LUMBER PRICES IN WINNIPEG.

There were a number of tenderers for the lumber required this year by the city of Winnipeg, the quantity to be supplied being between two and three million feet board measure. The contract has been awarded to the Sprague Lumber Company at the following prices per thousand feet:

	Pine.	B.C. Fir.
No. 1 dimension	$20.05	$24.30
3" x 6" to 3" x 10"	19 45	23.20

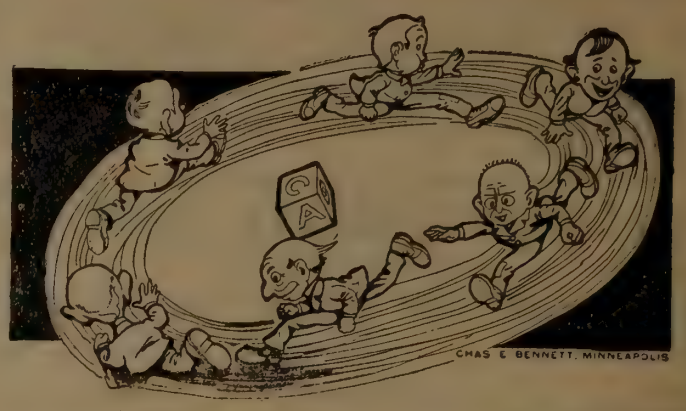
Shingles, No. 1 cedar, per M.		2.80

As previously announced, Messrs. Hunter, Crawford & Neibergall have purchased the lumber property of Robert Watt, Wiarton, Ont. They will continue the business in the same progressive manner as the late owner, and will always be in a position to supply lumber and square timber, shingles, ties, posts, etc.



Chasing Themselves Round the Block

That's what the dealers were doing last winter in order to get our **SPRUCE LUMBER** and they got it too. They got all we had and asked for more, but WE COULDN'T SELL OUR STOCK TWICE so had to refuse orders.

EVERY DAY now our mill is turning out 150,000 FEET OF THE BEST SPRUCE LUMBER ever made. We are ready for your orders and you can send them along.

BRITISH COLUMBIA TIMBER LAWS.

Some important changes have been made in the British Columbia timber laws, and some confusion seems to exist as to the exact interpretation of the present regulations. This has led to the publication of a statement in the British Columbia press that the law prohibiting the export of timber has been repealed, which is not the case.

The old lease system has been done away with, and new timber lands can only be held from year to year. Nothing has been done towards removing the embargo prohibiting the export of logs from Crown lands. An effort was made by the Loggers' Association to have this done, but the Government could not see their way clear to take such action. It was argued in favor of such a step that, if it were removed, much of the rough cedar which cannot be logged owing to the want of a market in this country, could be sold profitably on the other side of the line, where they manufacture a rougher grade of shingles than in British Columbia.

A combination of wealthy lumber concerns, including the E. K. Wood Lumber Company, Cobb & Collins, the Merrill Ring Company, and probably James Dunsmuir, of Victoria, will fight the British Columbia export tax on logs shipped into American waters.

Mr. F. J. Wood stated that his company is determined to fight the case to a finish, and has received assurance that he will receive assistance from Cobb & Collins and the Merrill Ring Company. He has been corresponding with Mr. Dunsmuir, and as that capitalist is opposed to the tax, he expects he will take an active part in the fight, which promises to be one of the most vigorous legal battles in which the timber interests have ever engaged in the Northwest.

If the British Columbia Government wins it means that Americans who own timber in that province and are exporting to the States will confine operations there in future to the logging of lands they have and will acquire no more. Mr. Wood declares his company will retire as best it can, and will pull up stakes.

If you have any stock you want to buy or sell try the "Wanted and For Sale" department.

CURRENT TRADE CONDITIONS.

ONTARIO.

Lumber, whether viewed from the standpoint of demand or price, has lost no ground. Most dealers have about all the trade they can conveniently handle, for it often requires considerable searching around to locate suitable dry stock. General building material is active and box lumber is in good demand. The Ottawa Valley manufacturers are, we are informed, still holding out for the prices agreed upon earlier in the season, although as yet the British shippers have purchased in smaller volume than usual. This does not appear to be causing the manufacturers any anxiety, probably for the reason that the United States market is prepared to receive quite heavy shipments.

All the hardwoods, with the possible exception of basswood, are in good shape. Birch, rock elm and soft elm are the best sellers.

Rains have fallen in the Georgian Bay district and the logs in most of the streams are moving satisfactorily. The production of pine lumber this season, however, will be 25 per cent. less than one year ago owing to the lighter input of logs.

QUEBEC AND NEW BRUNSWICK.

Retail dealers in Montreal are quite busy on account of the large volume of building. Price fluctuations during the past fortnight have been very narrow, but there are no indications of weakness. The recent rains have improved the outlook for log driving on the St. Maurice river, on which there are 6,000,000 logs to come out.

Export trade is slow and the shippers have not contracted for nearly as much stock as usual owing to the high prices asked for white pine. The upper grades of pine are holding their own, but fourth quality is difficult to sell owing to the greater variety of substitutes. Birch is showing considerable strength and is moving quite freely for export.

Log driving operations in the Eastern Provinces are now under way, the recent rains having caused a rise of water in the rivers. It will be some weeks, however, before the drives will all be in safe waters. A quantity of bank logs were sold at Springhill last week. Hemlock are now worth $4.50 to $5 and spruce from $8 to $9.

MANITOBA AND BRITISH COLUMBIA.

The demand for building lumber in Winnipeg is very active. The number of permits for new buildings issued up to May 8th of this year was 730, representing a value of $3,010,800, while for the corresponding period last year 520 permits were granted for buildings costing $2,403,350. Reports from the various manufacturers in British Columbia indicate that prices are fairly firm, but the demand is not large enough to make it advisable to advance prices. Most of the shingle mills are running, but the shipments that are being made are mostly to fill orders received before the appointment of sales agents, and represent practically no profit. The price at the mills is $1.70. It is estimated that there are about 120,000,000 shingles to be consumed before Canadian orders, under the new conditions, can be expected.

UNITED STATES.

The Price List Committee of the Wisconsin Valley and Mississippi Valley Lumbermen's Associations last week conferred with the Northwestern Hemlock Manufacturers' Association on the subject of prices, with the result that advances were recommended on several items, ranging from 50 cents to $1 a thousand

on common lumber to $5 on finish and A select. A general advance of 50 cents a thousand on all hemlock was decided upon and an advance of $1 on 3 inch plank and 2 × 8, 10, 12 and 14 foot lumber. Hemlock lath prices were increased 25 cents. The advances on pine were as follows: All No. 1 boards and strips, $1; No. 2 boards and strips, 50 cents; 4 inch and 13 inches and wider, No. 3, $1; 6, 8, 10 and 12 ft. No. 3, 50 cents; mixed widths, No. 4 and 5 boards, 50 cents to $1; all piece stuff, No. 3 planks and timber, 50 cents; pine lath, 25 cents. These prices were considered justified by the extent of demand and condition of supply. Dealers who wish to replenish their yards are finding that they are obliged to meet the higher range of values which has been established during the past two months. Coarse pine lumber is quite active and there is a fair trade in the higher grades. The spruce mills are crowded with orders and premiums are being paid for prompt shipment. The hardwood trade generally is in good shape. There are reports of a lighter demand for maple and basswood, but birch, elm and ash are quite strong, with the latter selling at an advance in some markets. Cedar shingles are now selling freely in the Boston market at $3.40 for extras. Lath are again higher and selling at $3.60 for 1⅝ inch and $3.40 for 1½ inch.

GREAT BRITAIN.

The demand for pine lumber in Great Britain is still somewhat light, but prices keep steady owing to the fact that stocks are not large. A summary of the stock on the Surrey Commercial Docks, London, on April 1st, shows a decrease of 6,671 pieces in the supply of white pine deals as compared with one year ago. Nevertheless, in view of the lessened consumption, it is improbable that prices will be influenced by the lighter stock, inasmuch as new shipments are due to arrive within a few days. The spruce market, in contrast to that of pine, retains its buoyant tone. At Liverpool the consumption for the month of April was about upon a parity with the import, while the stock is only one-half that of last year. The same is true of Manchester. The holders of spruce are in a very happy position, and in view of the expected shortage in shipments, should realize higher prices before many weeks. The price of 3x7 and 8 inch has further improved during the past fortnight and stocks of these dimensions at some of the importing centres have become almost depleted. There is a good demand for birch logs and planks and the stock is not heavy.

STOCKS AND PRICES.

Messrs. Burgess, of Grand Falls, N.B., have secured 3,000,000 feet of logs for this season's sawing.

The O'Neil Lumber Company, of St. Martin's, N. B., have completed the driving of their logs.

John McInnes & Son have secured the contract for the supply of lumber required by the city of Halifax, N. S.

The Rainy River Lumber Company, Rainy River, Ont., expect to cut about 60,000,000 feet of lumber this season.

The Newville Lumber Company, of Parrsboro, N. S., have succeeded in getting in their drive of 7,000,000 feet of logs.

The cut of logs on the Tobique river, in New Brunswick, last winter, was 18,000,000 feet, or about half the cut of the previous season.

The Minudie Coal Company, of River Hebert, N. S., are asking for tenders up to Thursday, 18th inst., for the supply of 15,500 railroad ties, to be delivered before July 15th. The ties are to be cut from live, sound timber, of spruce, hemlock, or tamarac, and to be 8 feet long, 6 inches thick, 7 to 12 inch face.

The Gibson saw mill at Marysville, N. B., has cut over 4,000,000 feet of deals since the season commenced. This company last week made their first deal shipment of the season, the tug Joseph taking 18 scows in tow for St. John. The Gibson Company are also shipping large quantities of lath and shingles.

The following tenders were accepted for the supply of lumber for the corporation of Edmonton, N.W.T.: John Walters, spruce lumber, $18.50 per thousand, less 15 per cent.; S. D. Eccles, Spruce Grove, 8,000 feet of native tamarac, $19; balance of spruce required, apportioned among D. R. Fraser & Company, W. H. Clark & Company and the Northern Lumber & Coal Company; British Columbia tamarac, W. H. Clark & Company and Northern Lumber & Coal Company.

The following is a comparative statement of lumber, etc., shipped from St. John, N. B., to Great Britain during the winters of 1903-4 and 1904-5:

	1903-4	1904-5

BRITISH COLUMBIA LETTER.

(Correspondence of THE CANADA LUMBERMAN.)

VANCOUVER, B.C., May 8, 1905.—If business in the lumber industry were always as good as at present, there would be fewer complaints from those engaged in the manufacture of lumber and shingles While it has been better, just now it is very good. Some of the mills are running double shifts, the Chemainus and that of the Columbia River Lumber Company at Golden, and the demand in some lines is nearly equal to the supply. Prices are maintained. In the shingle branch, the recent agreement arrived at whereby the Export Lumber & Shingle Company and the Union Lumber Company were to have charge of the sales and orders has had a good effect. The past year or so had been disastrous with shingle manufacturers, but conditions are improving. At the meeting of the B.C. Lumber and Shingle Manufacturers' Association, held last Thursday, conditions were reported to be on the mend.

Logging is particularly healthy, with good demand and fairly high prices. Delivered, good cedar logs go as high as $10, the prices ruling from $6 to $10, and for fir from $5 to $8.50. Loggers are beginning to sell at the camps wherever possible, as they find that better with less risk. Camps are starting up all along the

A SPLENDID ROUTE.
The Wisconsin Central Railway is justly termed the "Sportman's Line" because it reaches into and through the very heart of the choicest hunting grounds in America.
The very best wild fowl shooting of the entire North is reached ONLY by this line. Hundreds of beautiful lakes abounding in wild rice and celery attracts myriads of ducks and geese and afford the finest kind of cover and the choicest shooting to be found the country over.
The Wisconsin Central Railway caters especially to the sporting public and during the various seasons for hunting and fishing furnishes daily information to its patrons as to local conditions anywhere along its lines upon application to the nearest ticket agent. It also arranges its train service with special reference to the convenience and comfort of sportsmen, and its employes are constantly on the alert to make travel over their lines pleasant and comfortable.
This line offers the best route between Chicago, St. Paul, Milwaukee, Minneapolis or to Lake Superior points via Ashland, Wisconsin.

coast, but it will be a month or two yet ere the supply will be large enough to bring these prices down, and they are now firm. Few logs are being exported, except by American limit owners, as the local mills take nearly all that are being cut.

Interior loggers, in fact those engaged in that part of the industry through all the west, will be handicapped in getting the cut to the mills owing to the very light snowfall of the past winter. There is little water in the streams, less than for twenty years past, and large numbers of logs will likely be held up on the bars of the streams which are only high in the spring freshet time.

Messrs. Christie & Company, wholesale dealers, of Winnipeg, have purchased the stock in hand and the season's cut of the Fernie Lumber Company, which will amount in all to about four million feet. The price is not made public, but it is understood to be a good one. The stock of the Moyie Lumber and Milling Company has been sold to Mr. J. C. Graham, of Winnipeg. This was about 1,800,000 feet. Messrs. H. Cameron and A. P. Stephenson have taken over the interests of this mill, and if they cannot make a satisfactory sale, will operate it themselves.

A. Boulais, until recently foreman of the Cascade mill of the Yale-Columbia Lumber Company, has bought Gardiner's mill at Danville, and has secured a contract already for half a million feet for a Winnipeg firm.

The Elk Lumber and Manufacturing Company are shipping considerable of their cut to Winnipeg, where it will be sold from their own offices. This plan is being adopted by all the large owners in the eastern part of the province.

H. L. Jenkins, of Minneapolis, who is interested in a large mill at Blaine, has with Mr. J. C. Busch, of the latter place, bought about 6,000 acres of timber on Burrard inlet about eight miles from Vancouver. It is on crown granted land and may be exported on payment of fifty cents per thousand.

A settlement has been made by the E. K. Wood Company, of Bellingham, for the boom of logs recently seized by the government. It has often been stated that this company would combine with others, James Dunsmuir and the Merrill interests being mentioned, to test the validity of the law prohibiting the export of logs, and for that reason the payment was not made. The other people failed in their co-operation, however, so the settlement was effected.

The Columbia River Lumber Company had a man fined $25 a couple of weeks ago for having set a fire in their limits. Timber owners are to make an endeavor to prevent, if possible, the wholesale destruction of timber by fire which takes place every summer, and which last year was greater than ever.

CANADIAN LUMBER SHIPMENTS.

J. S. FINDLAY,

OWEN SOUND ONT.

THE GLASGOW MARKET.

Messrs. Edmiston & Mitchells' monthly timber circular gives the following particulars of the Glasgow market :

Business during the month has been characterized by an entire absence of activity, but while this is no doubt largely owing to the extreme dulness in house-building and other wood-consuming industries (shipbuilding excepted), it must not be overlooked that there are other predisposing influences to account for this: for example, the scarcity of attractive stocks at this period, and the fact that most buyers are inclined to wait the new season's import from Quebec. The exceedingly moderate imports which have been the rule for the past month or two are accountable for the high point at which values have been maintained, as there is nothing in the local demand to account for it, and the detemining influence on future prices will be the extent of the import during the next few months. Granted that this is moderate, prices will keep firm, but in the event of heavy arrivals, general opinion favors the likelihood of a fall, in view of the prevailing dulness of trade.

WHITE PINE.—There has been no import during the month, and the movement from stock has been comparatively trifling. With the approach of the opening of the Quebec season, shippers are inclined to ease prices a little, with a view to reduce stocks before the advent of the new arrivals.

OAK.—A few sales of a minor character have transpired during the month, but apart from this there has been little demand.

ELM.—The stock is now very low and consists of soft and second class wood. There have been numerous enquiries in the market for rock elm, and there is every prospect of the new season's wood meeting with a good demand.

QUEBEC BIRCH.—There have been two shipments via Portland, about 16/17-inch average, which brought from 1s. 10d. to 2s. per cubic foot "ex quay."

NEW BRUNSWICK BIRCH.—About 400 logs came to hand from St. John during the month, and were all disposed of from the ship's side at from 17d. to 18d. for 14 to 14½ inch average. Planks have been in fair demand, and recent arrivals have been disposed of at from £7 15s. to £8 per standard c.i.f. The sizes chiefly in demand are 2½ and 3 inch.

QUEBEC ASH.—There has been no import so far this year, and stocks are now reduced to a very low point. It may be added, at the same time, that there is only an occasional enquiry for this at one time popular wood.

DEALS, ETC.—There has been little business done during the month from yarded stocks, but the few arrivals of pine and spruce which have come to hand were, for the most part, disposed of on "ex quay" basis. However, business generally has been to the quieter side, and there have been fewer enquiries in the market.

TIMBER OPERATIONS IN BRITISH COLUMBIA.

Messrs. H. L. Jenkins and J. C. Busch are reported to have bought from the estate of the late S. M. Robins 2,300 acres of timber lands situated near Campbell River, Discovery Passage, Vancouver Island, B.C. The timber on this land is largely cedar of excellent quality. It is also exportable, and logging operations will be commenced on the tract in the near future. The price paid for this property is said to have been $15 per acre.

Between 75,000,000 and 100,000,000 feet of timber, according to reports furnished by three separate cruising parties, is being purchased on the North Arm of Burrard Inlet, B.C., by American capitalists, who intend to export the logs to Puget Sound this summer. The deal is now under way, and it is reported that it will probably be concluded this week.

The land on which the timber is situated lies on the west side of the North Arm to the northwest of Deep Cove, not far from Roche Point, and is within the municipality of North Vancouver. Despite the fact that the most of the timber lies at a high altitude in a district which is very rugged, it can be placed in the water without great difficulty. The major portion of the timber is fir of excellent quality, though the trees are not of great diameter, comparatively speaking.

Messrs. H. L. Jenkins and J. C. Busch, of the H. L. Jenkins Lumber Company of Blaine, Washington, are behind the purchase of the timber land, which consists of numerous quarter-sections lying on the North Arm watershed. It is reported that they are negotiating for some land lying on the Seymour Creek watershed. The latter would have to be logged into the creek and floated down to tide water. Acting in conjunction with Messrs. Jenkins and Busch is the logging firm of Pierce & Peremp, who have recently been cutting a large amount of timber on the Nicomekl River for export to Blaine. Messrs. Pierce & Peremp will log the timber on the North Arm.

FREIGHT RATES ON EXPORT LUMBER.

The Lumber Trade Association of the Montreal Board of Trade last week had an interview with representatives of the railways regarding the new freight rates on export lumber. The railways this spring decided to base their freight rate on weight instead of on measurement, and in so doing increased the rate on export stock to practically the equivalent of the rate charged for local consumption. With the cheaper kinds of lumber the increased charge is a matter of some consequence. The interview will probably result in the readjustment of the rates on a more satisfactory basis.

For prices and description apply to
LONDON LUMBER CO.
London, Ont.

Major Woolridge's saw and planing mill at Palmerston, Ont., was burned last week. The loss is about $10,000.

The planing mill of Scholey Bros., 193 Ontario street, Toronto, was damaged by fire recently to the extent of $5,000.

CURRENT TRADE CONDITIONS.

ONTARIO.

Basing our opinion on reports from all sections of the province, we must continue to take an optimistic view of the lumber market. The activity in building in Toronto promises to continue throughout the season, for there is no falling off in the number of permits granted. A fair retail demand may therefore be regarded as a certainty. There is similar activity in Hamilton, where building is being carried on to the limit of the supply of labor and materials. Most of last year's stock of lumber has been shipped from the mills and orders for the new cut are plentiful. If there is a slow item in the white pine list, it is two inch common. This is due in large measure, we believe, to the now greater use of hemlock and other cheaper woods for building purposes. But even this item is destined to improve in the near future, as on account of the higher range of prices which has been established for southern yellow pine, less of that class of lumber is coming into Canada. Of hemlock we hear very favorable reports, dry stock being practically exhausted and customers being willing to accept lumber green from the saw. Mills that have been running for six weeks have very little stock for sale, and if the accumulation is not much greater during the summer months, higher prices for hemlock may be expected before another sawing season is reached. Shingles are a little more active and in some quarters an advance from their present comparatively low price is predicted.

QUEBEC AND NEW BRUNSWICK.

The total value of building permits issued in Montreal to date this year is $1,875,507, against $1,101,329 for the corresponding period of 1904. As the result of increased building operations, the local demand for lumber is exceptionally brisk and values are quite firm. The conditions throughout the province are also favorable and no stocks are being forced upon the market at a sacrifice.

The situation in New Brunswick and Nova Scotia has improved so far as the drives are concerned, and it now appears that most of the logs are likely to reach the mills. Notwithstanding this fact, the disposition of the trade is to look for higher prices. Clapboards are very firm and well sold ahead. Eastern 6-foot extras are quoted at a range of $40 to $42 for Boston delivery. Prices of cedar shingles are now fairly established at $3.40 for extras, $2.90 for clears and $2.25 to $2.40 for second clears on Boston rate of freight. There is still a scarcity of clears.

MANITOBA AND BRITISH COLUMBIA.

There is an improved demand for lumber throughout the Northwest, and as a result the mills at the source of supply are quite busy. The cheaper grades are most in demand at present, the heaviest call being for dimension timber. The better grades will be more inquired for as the buildings get nearer to completion. The new list put into effect on May 1st by the Mountain Lumber Manufacturers' Association of British Columbia quotes the following prices on cedar for delivery at points in the Territories :

No. 1 clear finish, $45 ; clear squares, 3x3 and 4x4, $47 ; clear squares, 5x5 and 6x6, $49 ; clear squares, 7x7 and 8x8, $57 ; clear squares, 10x10, $62 ; siding and ceiling, No. 1, $40 ; siding and ceiling, No. 2, $30; beveled siding, ½x6, No. 1, $25 ; beveled siding, ½x6, No. 2, $20 ; casing and base, No. 1, $45 ; casing and base, No. 2, $35 ; lath, $4.25.

For No. 1 clear pine and tamarac the price is $36 ; No. 1 clear fir and spruce, $32, and No. 2 clear, all kinds, $30. Common boards and dimension range from $13.50 to $20 ; 8 and 10 inch shiplap, $15 to $21 ; No. 1 flooring and siding, $24 to $28 ; No. 2, $19 to $24, and No. 3, $16 to $22. We understand that a temporary discount of about $1 per thousand off the above prices is being given.

One hundred timber-cutting licenses were issued in British Columbia during the month of April, and during the first four months of this year 28 vessels laden with lumber sailed from Vancouver, Victoria and New Westminster.

UNITED STATES.

There is a very healthy tone to the lumber market of the United States, with southern pine showing the greatest activity and strength. Since the beginning of the year yellow pine values have advanced considerably, but this has caused no curtailment in the demand, and at a meeting of the Price List Committee last week it was decided to further advance the figures on dimension 50 cents a thousand, and some items of No. 2 dimensions $1. All flooring except No. 1 common was advanced 50 cents ; partition, bevel and drop siding, 50 cents ; finish, moulding, casing and base $1, and B and better pickets $2. The greatest advance in proportion to the selling price was made on yellow pine lath, which was increased 50 cents. The statistics presented showed that the mills are carrying light stocks and that many of them are heavily sold in advance. White pine conditions are favorable, with unusual activity at Buffalo and Tonawanda. A shortage of box lumber is reported from Buffalo, but further west the supply is more plentiful. In the Saginaw Valley there is a good demand for fine common and for all kinds of building material.

Hardwoods continue to show firmness in the face of the slight falling off in demand in the Chicago districts, due to local labor disturbances. There is a more plentiful supply of elm, but plain oak is as scarce as ever and the demand for ash is as great as the supply. Maple flooring sells very readily.

GREAT BRITAIN.

The feeling in Great Britain is a little more hopeful but contracts are still being placed with the utmost conservatism. It is a long time since as small a quantity of pine and spruce lumber has been arranged for at this season of the year, and present indications point to a considerable shortage in the fall unless importers should enter the market much more liberally in the near future. The latest transactions in spruce deals to Liverpool on c. i. f. terms, with the usual 60 per cent. of 3 x 7 and 8 inch, balance wider, were upon the old basis of £7 12s 6d per standard of 1980 feet. The consumption of pine this spring has been somewhat disappointing, probably owing to its high cost, but when the light stocks and probable shipments are considered, there seems little likelihood of prices declining from their present basis.

STOCKS AND PRICES.

The Parry Sound Lumber Company and the Peter Estate, both of Parry Sound, Ont., have received a drive of logs, the first of the season.

F. Gelinas, Secretary Department of Public Works, Ottawa, is asking for tenders up to Thursday, June 29th, for the supply of British Columbia fir delivered f.o.b. cars at Vancouver or New Westminster not later than the 15th of July of this year, and consigned to J. C. Tache, Resident Engineer, Chicoutimi, Que.

The Timber and Mines Branch of the Department of the Interior will receive tenders until noon on Wednesday, June 14, for a license to cut timber on the following berths : No. 1220, situate in the district of Athabaska and comprising 50 square miles, to be selected in the vicinity of the Little Smoky, Sturgeon and Pas-Ka-Mon rivers ; No. 1221, 1222 and 1223, comprising 50, 50 and 35 square miles respectively, to be selected in the same district ; No. 1224, situate in the districts of Alberta and Athabaska, comprising 50 square miles commencing at confluence of Goose and Little Smoky rivers ; No 1225 and 1226, comprising 50 and 41 square miles respectively, to be selected in same district as No. 1224.

The following rafts and lots have been entered at the Supervisor of Cullers office, Quebec, this season :—Burton & Bro., Garden River, Ont., waney pine and elm ; Munro & Coxford, Jocko Lake, Ont., waney and square pine ; N. Flood, Louise Embankment, waney birch ; Thomas Mackie, N.O. Railway, Ont., waney and square pine ; W. E. Simpson, Chabot's Wharf, Levis, waney birch and ash ; Fergusson & McFadden, Valleyfield, waney and square pine ; Wilson Bros., Hadlow Cove, sundry woods ; F. G. Wilson, New Liverpool Cove, elm, etc. ; Mason, Gordon & Co., Jocko Lake, Ont., waney pine ; J. R. Booth, Valleyfield, waney pine ; The Calvin Co., Ltd., sundry coves, elm, pine, ash, etc.

That lumber is being shipped in large quantities from the Georgian Bay district to Bay City and Saginaw, Mich., is shown by the following report of receipts at these points during the week ending May 13th : The steamer Ogemaw brought 462,625 feet of lumber from Thessalon, Ont. ; the schooner Katie Brainerd 579,171 from Cutler, and the C. F. Fillmore 561,492 feet from Cutler, all for E. B. Foss & Co. The steamer Langell Boys arrived with 429,688 for A. C. White from Cutler. The schooner Abram Smith brought 484,889 feet from Cutler for Thomas Jackson & Co. and the J. B. Comstock brought from the same port and for the same firm 447,000 ft. The Maine brought 178,973 feet of lumber and 176,000

A SPLENDID ROUTE.
The Wisconsin Central Railway is justly termed the "Sportman's Line" because it reaches into and through the very heart of the choicest hunting grounds in America.
The very best wild fowl shooting of the entire North is reached ONLY by this line. Hundreds of beautiful lakes abounding in wild rice and celery attracts myriads of ducks and geese and afford the finest kind of cover and the choicest shooting to be found the country over.
The Wisconsin Central Railway caters especially to the sporting public and during the various seasons for hunting and fishing furnishes daily information to its patrons as to local conditions anywhere along its lines upon application to the nearest ticket agent. It also arranges its train service with special reference to the convenience and comfort of sportsmen, and its employes are constantly on the alert to make travel over their lines pleasant and comfortable.
This line offers the best route between Chicago, St. Paul, Milwaukee, Minneapolis or to Lake Superior points via Ashland, Wisconsin.

BARBADOES LUMBER CONDITIONS.

According to Messrs. S. P. Musson, Son & Company's report of May 6th, no arrival of lumber took place during the fortnight in either white pine or spruce, and while stocks of former are still ample, latter is getting scarce, and a cargo of this should do fairly well if it should arrive in time for present crop requirements. Of shingles they say: "We have to report the arrival per steamer "Orinoco" from Halifax, of 97,000 feet Cedar Laying to our care, for which we obtained $2.12 per M. and 1,800,000 ex schooner "Evolution" from same port, have been lotted by consignees with some difficulty at $2.05. Our market for these is now amply supplied, and the next arrivals will probably have to be sold at lower figures. Long Gaspe are in light stock, and although there is not much enquiry for these, we expect the demand will increase with the advent of the rainy season, and first shipment if not large, will bring fair prices."

The portable saw mill of McLaughlin Bros., of Mill Cove, N. B., was burned last week.

J. S. FINDLAY,

OWEN SOUND ONT.

NEW BRUNSWICK LETTER.

(Correspondence of THE CANADA LUMBERMAN.)

ST. JOHN, N.B., May 16th, 1905.—The lumber trade in all its branches is very brisk just now in this vicinity. The mills are all sawing at full capacity and half a dozen tramp steamers are being loaded with deals exclusively for the United Kingdom. These cargoes are made up chiefly of deals from points outside the city, there having been no quantity of importance offering by any of the local manufacturers since the cleaning up of the 1904 stock, which was practically all disposed of and shipped a month ago, and the mills not having been running for a sufficient length of time as yet to produce any quantity large enough for immediate shipment.

This scarcity of "English" stock, together with the advices being received from the U.K. of prices that are at least holding their own and an increasing demand, is very encouraging to the local dealers, and the result is at once apparent in a lack of anxiety to sell and a corresponding firmness in local prices for summer and fall deliveries. Whether the prices quoted are in excess of what the situation warrants is of course a question that only future developments can answer, but on all sides there seems to be a confidence that the expectations of those who are making these quotations will be fully realized.

At this date a specification containing say 50 per cent. 7's and 8's, 40 per cent. 9's, and 10 per cent. wides, for delivery during the next three months, can not be bought at this date f.o.b. steamer St. John less than from $12.75 to $13.25 per M. s. ft., ⅔ price for fourths and ends.

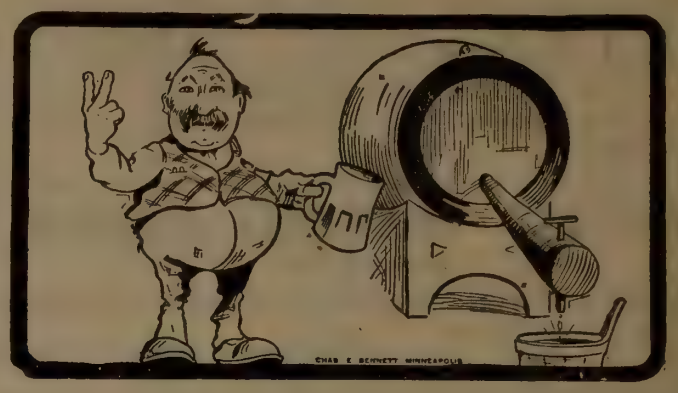
Freight rates to the West Coast are quoted as 35s. per standard, with little prospect of an immediate change.

The conditions for stream driving on the New Brunswick rivers have improved somewhat since last writing, owing chiefly to a considerable fall of rain. On the Miramichi and Restigouche the much greater portion of the drives are already in safe water. On the Upper St. John, while the rains have improved the situation considerably, conditions are not such but that a great deal of anxiety exists as to the ultimate outcome. In this direction rain is needed badly and immediately, and unless it comes the hang-up it is feared will be very heavy. The river is again at a standstill and must begin to fall off again very soon unless the rain is forthcoming. The bank logs and those in the larger streams are comparatively safe, but those in the small branches of the up-river estuaries (and they total up to an immense quantity) are by no means to be depended upon. Of course, at this date it is impossible to give any exact figures as to the quantity involved nor will it be posisble to do so for several weeks yet.

THE ONTARIO LOG DRIVES.

A correspondent writes the CANADA LUMBERMAN as follows :

"The recent rains have furnished all of the lumbermen, as far as the writer is aware, with ample water to get their logs down, and it is my opinion that there will be very few logs hung up, if any, as within the last week the Vermillion and Spanish Rivers have risen from 3 to 4 feet, which makes ample water for these streams."



WE'LL TREAT YOU RIGHT

That's what you want, of course —

And that is why we are expecting an order from you for some of that fine stock of SPRUCE LUMBER which you have heard so much about.

It is good stuff, and we will give you good service and fill your order promptly.

The Red Deer Lumber Company

THE PRODUCTION OF TIES.

It is estimated that over 1,000,000 ties were cut in the Rat Portage district during the past winter, the price realized by the contractors being about 25 cents per tie. D. L. Mather, who is one of the largest contractors, expects to deliver this summer his full cut of 435,000 ties, of which 380,000 are for himself and 55,000 for Murphy Bros. The Rat Portage Lumber Company have cut about 300,000, and Joseph Derry took out 60,000 at Blindfold Lake for the C. P. R. The Mackey Syndicate were also cutting on the lake during the winter and report a total of 120,000 ties. J. W. Short had a very good winter. He expects to deliver at Norman and Keewatin 125,000 ties—tamarac and jackpine. This cut was made on the Lake of the Woods.

PURCHASED B.C LUMBER.

Mr. W. H. Cushing, president of the Cushing Bros. Company, of Calgary, visited British Columbia recently in the interests of his firm and purchased some large quantities of lumber. He placed a large order for No. 1 and 2 cedar with the Red Cedar Lumber Company, of Vancouver. Speaking of the prospect in lumber in the Northwest, Mr. Cushing stated that the demand, while fairly good, was not nearly equal at present to the supply from British Columbia. In many parts of the Northwest there is sufficient lumber of certain kinds, mostly spruce, to meet the local demand for several years to come. This is especially true around Prince Albert. The season so far, in some parts of the Northwest, has been somewhat dry, causing a feeling that there is going to be a drought this summer, and this has a tendency to discourage the plentiful consumption of lumber, as the settlers are afraid to spend their money under the circumstances.

As previously announced, Messrs. Hunter, Crawford & Neibergall have purchased the lumber property of Robert Watt, Wiarton, Ont. They will continue the business in the same progressive manner as the late owner, and will always be in a position to supply lumber and square timber, lath, shingles, ties, posts, etc.

CONDITIONS OF SALE.

No limit will be adjudged at less than the minimum price fixed by the department.

The limits will be adjudged to the highest bidder on payment of the purchase price, in cash or by cheque accepted by a duly incorporated bank. Failing payment, they will be immediately re-offered for sale.

The annual ground rent of three dollars per mile, with fire tax, is also payable immediately.

Those timber limits, when adjudged, will be subject to the provisions of all timber regulations now in force or which may be enacted hereafter.

Plans of limits offered for sale are opened for inspection in the Department of Lands, Mines and Fisheries, in this city, and at the office of the Crown lands and timber agents in the different agencies in which said limits are situated, up to the day of sale.

N.B.—No account for publication of this notice will be recognized if such publication has not been expressly authorized by the department.

ADELARD TURGEON,
Minister of Lands, Mines and Fisheries.

Cockburn & Son's saw mill at Sturgeon Falls, Ont., was burned recently, the loss being partially covered by insurance.

The saw mill of Price Bros. & Company at Amqui, Que., was destroyed by fire on May 25, at a loss of approximately $30,000.

A saw mill near Admaston, Ont., owned by William Brisco, of Killaloe, Ont., was destroyed by fire a few days ago.

CURRENT TRADE CONDITIONS.

ONTARIO.

The close of the month of May finds the lumber business in a very satisfactory condition. While the British demand is still backward, this is more than offset by the large local consumption and the heavy shipments to the United States. Encouraging reports come to hand from the Ottawa Valley, and price lists received from the Georgian Bay district show that all grades, and particularly uppers and selects, are firmer than they have been for months. For 4-inch uppers as much as $90 per thousand is being asked by some manufacturers. The hemlock situation is so strong that manufacturers are not disposed to sell in large blocks, as the number of inquiries which are coming into the mills leads them to believe that higher prices will rule. Most of the mills are realizing from $12 to $13 for 2-inch hemlock, 10 to 16 feet in length, and $15 for 18 feet.

Toronto dealers have about all the orders they can conveniently handle and report an increase in the demand for finishing stock. Maple flooring is quite active, but notwithstanding the duty a considerable quantity is being imported from the United States. There is no change in shingles or lath.

QUEBEC AND NEW BRUNSWICK.

Over 700 building permits have been issued already this year by the Building Inspector of Montreal, this being 206 more than for the corresponding period of 1004. There is consequently a large local consumption of lumber. The country mills are also doing a fair trade and a considerable quantity of clapboards and other lumber is being shipped to the Eastern States. The drives throughout the province are backward and still in need of rain, and if any quantity of logs should be hung up it would probably result in an advance in the prices of lumber. Most of the drives in New Brunswick are making fair progress, but it is still feared that some of them may become stranded.

UNITED STATES.

The strike of teamsters in Chicago has interfered with the delivery of lumber in that city, but the lumber market generally has shown some expansion during the past week. There is an exceptionally active demand in some districts for white pine. Especially is this true of coarse pine and good common product. Although nearly all the mills are in operation, there has been very little accumulation of box lumber, and the lake receipts at Buffalo and Tonawanda have not relieved the scarcity in the lower grades generally. The call for building lumber is very large and is not confined to the cities to the same extent as earlier in the season. Spruce continues strong. Frames are selling in the Boston market at $20 for 9 inch and under, 24 feet and under, and $22 for 10 inch and over. Hemlock producers are said to be behind with orders, so great is the demand for lumber which is comparatively low in price. Hardwoods are moving, if anything, a little slower, as most of the large factories have now acquired a considerable stock to meet the requirements of the summer season. Basswood especially is dull, with prices promising none too well. Brown ash is more than ordinarily active and elm and birch are holding their own. The red cedar shingle market is rather unsteady and an overstock is predicted in some quarters. The manufacturers have shipped a large amount of transit stock, which has seemed to be more than the dealers require. A move for a shut-down is on foot.

GREAT BRITAIN.

There are no very strong indications that the cloud of depression which has hung over the timber trade of Great Britain for the past year is passing away. The great naval victory of the Japanese may bring about an early termination of the war, with its consequent improved commercial conditions, but on this point opinions are by no means unanimous. There is no denying the fact that the buying of lumber is being conducted with great conversatism. The market for deals is even quieter than it has been, but boards are showing a little more life and scantlings and battens are in better demand. The pine market is in an unsatisfactory position, there being a large discrepancy between the prices offered by importers and those which the shippers are asking, and until they come much

A SPLENDID ROUTE.
The Wisconsin Central Railway is justly termed the "Sportman's Line" because it reaches into and through the very heart of the choicest hunting grounds in America.
The very best wild fowl shooting of the entire North is reached ONLY by this line. Hundreds of beautiful lakes abounding in wild rice and celery attracts myriads of ducks and geese and afford the finest kind of cover and the choicest shooting to be found the country over.
The Wisconsin Central Railway caters especially to the sporting public and during the various seasons for hunting and fishing furnishes daily information to its patrons as to local conditions anywhere along its lines upon application to the nearest ticket agent. It also arranges its train service with special reference to the convenience and comfort of sportsmen, and its employes are constantly on the alert to make travel over their lines pleasant and comfortable.
This line offers the best route between Chicago, St. Paul, Milwaukee, Minneapolis or to Lake Superior points via Ashland, Wisconsin.

closer together few transactions need be expected. Baltic whitewood and Canadian spruce, which are used largely for the same purposes, are firm at the recent advance. The latest prices for New Brunswick and Nova Scotia spruce deals of the usual specifications are from £7 10s to £17 15s per standard c.i.f. London or Liverpool. Birch prices are said to be a shade easier, caused by the receipt of some fairly large shipments.

THE LUMBER OUTLOOK.

Williamson & Crombie, Kingsbury, Que.: "For the past two or three months spruce in the Boston market has been in good demand and prices firm. Ordinary ⅞ spruce boards, 12 ft., dressed one side, five inches and up, find ready sale on an $18 basis, delivered at points taking a Boston rate of freight, which is equal to $12.50 here at the mill, fully $1 per thousand in advance of last season's prices. No. 1 hemlock boards, 12 ft., dressed one side, are also advancing in the Boston market and we have offers of $16.50 delivered. This is quite an advance over prices of former years. For the past four years our home market, that is, the Eastern Townships, has been consuming our hemlock on a $10 per thousand basis f. o. b., which is more than the Boston market would warrant. From present indications we look for brisk trade this season and prices are likely to hold up. Spruce clapboards, while not in too great demand, we find no difficulty in marketing at $40 Extras, $38 Clears and $36 Second Clears, delivered Boston points. While looking for no advance this season in clapboards, we do not think there will be much falling off in present prices."

Snider Lumber Company, Gravenhurst, Ont.: "As our cut is mostly all hemlock we can only give you our opinion on this class of lumber. Our cut of hemlock this season will be 4,000,000 feet, as against 6,000,000 feet last season. Prices for 2 in. hemlock have remained firm at $12.50 for lengths 10 to 16 ft., and we have realized $13 for some of the best sizes; $15 for 18 ft.; $16 for 20 ft., and $17 for 22 ft., f. o. b. here. Enquiries are numerous and we have had offers for our entire cut, but do not feel inclined to sell in large quantities at present, as hemlock is used more extensively every year and this season promises to be a record-breaker. Consequently, we expect prices to advance, and they should do so in order to give hemlock manufacturers anything like a fair margin, as hemlock logs are getting more and more expensive to take out."

M. Brennen & Sons Manufacturing Company, Hamilton, Ont.: "Building in Hamilton at present is very active and judging from the permits issued, which far exceed any previous year, and the work being tendered for, we look for a very big year's business in the retail trade here. Our stocks at our saw mills of last year's cut are now all shipped out, with the exception of some 2 in. common and good pine, which have been the only slow sellers with us recently. Our stock of logs this season is not over seventy-five per cent. of last year. We think these conditions are somewhat general, and that prices should be maintained stronger than last year with perhaps some advance in good lumber and shingles from their present comparatively low prices."

An Ottawa Valley firm: "Speaking from our individual standpoint we can say trade is good. Almost every item we will make this season is sold, and not only that, but shipments from our yards are considerably larger than for the same period a year ago, and the prospects for the whole year look to us particularly bright. We are not sawing stock for the English trade. Speaking generally, we would say that, apart from English business, trade was never better. The English trade is peculiarly sick. Nothing similar to this depression has been exprrienced for an exceptionally long time. The apathy shown by buyers is not confined to any particular line, but is more emphasized as to dealings in red pine. Dealers on this side of the water cannot afford to meet the ideas of English buyers and we do not think that, in the present state of business on this side of the water, they will find it necessary to concede them anything. England when she buys wants only the cream (as it were) off the product of our mills, and in the face high prices paid for stumpage and ever increasing charges and expenses for lumbering, our lumbermen will not sell their cream for the price of milk. We think it is an undoubted fact that the timber not only in Canada but in the United States is held to-day by men who not only know its value but are well able to hold it for a profit. The time was, not long ago, when there were many small and weak holders of timber— that time is past and the weak men are weeded out. Timber on this continent is to-day held in large blocks by strong men."

BRITISH COLUMBIA SHINGLES.

Owing probably to the recent decision of the B. C. shingle manufacturer to sell their whole output through two companies, the shingle business has been somewhat duller than usual at this time of the year. Many of the retail dealers stocked up pretty fully during the time of keen competition and low prices, and they are now slowly unloading. Another reason is that most of the dealers have held back during the past month or two, apparently waiting to see if the arrangement among the shingle manufacturers will hold good very long. Lately, however, as the manufacturers are firm in their intention to stand together, and there is every reason to believe they will continue to do so, there are signs that the dealers are beginning to accept the new conditions, as orders have begun to come in.

As is well known, the Union Lumber Company and the Export Lumber & Shingle Company are the firms through whom all, or practically all, the B. C. shingles are now sold.

The future effect of this arrangement and the consequent firmness in the prices, it is calculated, will greatly strengthen the shingle situation in British Columbia. At present only about 50 per cent. of the shingles manufactured here are consumed in Canada, practically all the remainder being sold across the line, even in the face of a duty of 35 cents per thousand. The above is a proof of the superiority of the B. C. shingle.

BRITISH COLUMBIA LETTER.

(Correspondence of THE CANADA LUMBERMAN.)

VANCOUVER, B.C., May 22, 1905.—Improvement in the lumber industry is still maintained, with good demand. Trade is principally with the Territories, and the increase of price on the American side has had the effect in lessening importations. If the statement of the opponents of a duty on lumber were correct, namely, that the price would be increased if protection were given, it might obtain in the present instance. Though the quantity of lumber brought in from the Sound just now is considerably less than during the last year or so, and mills in British Columbia have a good business, there is no inclination to raise the figure. Conditions at present are satisfactory.

Logging continues very active. Camps all along the coast are working to capacity, and find a ready market. Prices are still high, though it is expected that a falling off will take place in the near future, when large orders are filled, and the scarcity lessened.

Loggers are protesting against the concession to the Western Canada Pulp and Paper Company, news of the flotation of which has just arrived. This company has 163,000 acres in the district tributary to Powell river and lake, and the claim is that a large percentage of this is fir and cedar, woods not adaptable for pulp purposes. It has been announced by the company that work is to be started immediately in the construction of the works at the falls on Powell river, just above high water mark.

The fine timber on Vancouver island is attracting the attention of capitalists, and the latest who are arranging for limits is a syndicate of Americans who are contemplating the erection of a cedar mill on Quatsino, which will have a capacity of 200,000 feet per day. The plan as outlined so far is to ship the lumber and shingles around to Boston in sailing vessels, it being contended that the good price of red cedar shingles there would be more than sufficient to offset the duty. This enterprise, like others already announced, is doubtless being started in anticipation of the completion of the Panama canal, when the matter of transportation from the west coast of America to the eastern will be a comparatively small matter.

Millmen hardly agree with the statement of one of the evening papers here, that the placing of a poor quality of lumber on the market by the E. K. Wood Company will have the effect of bringing the price down to $7 or $8. The cutting of prices last fall showed to manufacturers what a ruinous practice it was, and they realized it all the more, since that was not the first. It is hardly probable that the cut will take place, and it is believed that the story is a false prophecy.

Mr. John Hanbury's project to erect a planing mill at Elko should be completed this month, and the plant in operation. Mr. Hanbury is well known in connection with the industry in the west, and he feels sure that his enterprise will be successful. There is every reason why it should be. It will also be welcomed by the small mill owners in the Kootenay, who will thus have a steady and convenient market for their output.

CONDITIONS OF SALE.

No limit will be adjudged at less than the minimum price fixed by the department.

The limits will be adjudged to the highest bidder on payment of the purchase price, in cash or by cheque accepted by a duly incorporated bank. Failing payment, they will be immediately re-offered for sale.

The annual ground rent of three dollars per mile, with fire tax, is also payable immediately.

Those timber limits, when adjudged, will be subject to the provisions of all timber regulations now in force or which may be enacted hereafter.

Plans of limits offered for sale are opened for inspection in the Department of Lands, Mines and Fisheries, in this city, and at the office of the Crown lands and timber agents in the different agencies in which said limits are situated, up to the day of sale.

N.B.—No account for publication of this notice will be recognized if such publication has not been expressly authorized by the department.

ADELARD TURGEON,
Minister of Lands, Mines and Fisheries.

HAVE YOU ANY STOCK WHICH YOU wish to sell? If so, make the fact known to probable buyers by placing an advertisement in the Wanted and For Sale Department of this journal. Address, CANADA LUMBERMAN, Toronto.

he saw mills of the Oyamel Lumber Company at Roberval, Que., of which B. A. Scott is manager, were burned last week. The lumber yards were saved.

CURRENT TRADE CONDITIONS.

ONTARIO.

A superabundance of rain has been the only adverse co dition affecting the movement of lumber during the past week, and as this is regarded as but a temporary influence, the firm tone of the market has not been impaired. The demand for finishing lumber is on the increase and promises to be quite large later in the season when the many buildings now under construction are nearing completion. The factory demand is not all that it might be, but this too will probably improve later when it is ascertained that the accumulation of the new cut will be light and that prices are not likely to decline. The manufacturers are now showing every confidence in a continuation of the present basis of white pine and hardwood values, while higher prices for hemlock have been suggested. It does not seem probable, however, that hemlock is likely to go much higher in the near future, as competition from the Michigan product is a factor which must be reckoned with in Western Ontario, for during the past week a cargo has been unloaded at Toronto for distribution to local yards. Apparently, hemlock can be purchased at the Michigan mills below $12.

QUEBEC AND NEW BRUNSWICK.

There is a fair demand for nearly all sizes and grades of spruce lumber for local consumption and for shipment to the Eastern States, but uncertainty still characterizes the British business. The log drives on some of the streams are in safe waters, but on others a considerable quantity of logs has already been hung up. The recent difficulties at Van Buren in connection with the drives on the St. John river is a further source of uncertainty, but it is hoped that some arrangement will be reached by which the New Brunswick drives can be floated past the obstructions this year, as undoubtedly the dispute will be settled before next season. These conditions, however, have exerted a strengthening influence upon lumber prices, which are even firmer than they have been at any previous time this year. South American specifications have not been in as much demand of late, but it is believed that the conditions causing this setback will be temporary.

New Brunswick cedar shingles are moving in average volume, but there have been no indications of higher prices in the immediate future. Extras are quoted at $3.35 to $3.40 for Boston delivery.

MANITOBA AND BRITISH COLUMBIA.

The past week has witnessed no great change in the condition of the lumber market of Western Canada. Prices are firm and perhaps a little higher than at this time last year, with a tendency to advance, though somewhat slowly. Dimension timber is moving fairly well, but there is not the usual call for the more expensive grades as yet. The prospects for a good crop in the Northwest are excellent and it is confidently expected that the demand for lumber during June and July will be sufficient to keep the mills busy. Fir and cedar are in good demand. Logs are fairly plentiful, and prices have a downward tendency. Good logs are worth $7.50 per thousand feet at the mill, while rough logs bring from $4.50 to $5.00.

Inquiries have come from Japan for prices on some large building lumber, and with the prospect of an early termination of the war it is felt that considerable business will result.

UNITED STATES.

Shipments of lumber during the past week have been very heavy. Twenty-eight vessels arrived at Tonawanda, with a total of over 20,000,000 feet, which is 3,000,000 feet more than were recorded during the preceding and second largest week of the season. These receipts have been appreciated by the trade, as the demand is quite active and promises to provide a market for most of the lumber in sight. The eastern trade has been very satisfactory this season on account of the large volume of building operations. Figures on the lower grades, such as box and mill culls, have stiffened a little, but otherwise there is no change. The demand for hemlock is quieter in the Chicago district on account of labor difficulties, but as this promises to be one of the greatest building years in the history of that city, there is every prospect of an improved demand during the summer and fall

A SPLENDID ROUTE.
The Wisconsin Central Railway is justly termed the "Sportman's Line" because it reaches into and through the very heart of the choicest hunting grounds in America.
The very best wild fowl shooting of the entire North is reached ONLY by this line. Hundreds of beautiful lakes abounding in wild rice and celery attracts myriads of ducks and geese and afford the finest kind of cover and the choicest shooting to be found the country over.
The Wisconsin Central Railway caters especially to the sporting public and during the various seasons for hunting and fishing furnishes daily information to its patrons as to local conditions anywhere along its lines upon application to the nearest ticket agent. It also arranges its train service with special reference to the convenience and comfort of sportsmen, and its employes are constantly on the alert to make travel over their lines pleasant and comfortable.
This line offers the best route between Chicago, St. Paul, Milwaukee, Minneapolis or to Lake Superior points via Ashland, Wisconsin.

months. The hardwoods are selling freely with no particular change in values to report. Plain oak, white ash and birch are among the best sellers. Maple flooring has gained some ground during the past month, and is now selling at prices which should give the manufacturer a fair margin of profit. Spruce is very strong, with wide cargoes offering for New York delivery on a basis of $23, and 2-inch stock at $20 to $21. An increased scarcity of lath is reported. New York has recently bought very heavily at from $3.50 to $3.75, the latter figure being about the highest price ever paid in that market. Dealers at other points have refused to meet the competition and have therefore been unable to obtain an ample supply. There has been a slight decline from the high water mark, current values being about $3.50 for 1⅝ inch and $3.35 for 1½ inch.

GREAT BRITAIN.

British importers are still refusing to contract for stock at the prices asked by shippers, and this notwithstanding that stocks are getting very low. There has been some disappointment that conditions have not continued to improve and some are now disposed to take the view that the best that can be hoped for is an improvement upon the unsatisfactory trade of last year. The deal market is quite uncertain, but there continues to be a fair demand for battens. The fact that dealers are willing to purchase from one another from the stock on hand rather than place contracts for later delivery is an evidence of the lack of confidence which exists. First and second quality pine has been changing hands in this way quite freely. The prizes realized at recent auction sales have also been satisfactory. So far as Canadian pine and spruce are concerned, the supply for the British market promises to be considerably lighter than usual, and it seems reasonable to expect that the present asking prices will be obtained later in the year if not almost immediately.

STOCKS AND PRICES.

The contract for 1,000,000 feet of timber to be used in the proposed Ogilvie elevator at Fort William, Ont., has been awarded to the Pigeon River Lumber Company.

D. G. Keyes, Secretary of the Department of the Interior, Ottawa, will receive tenders up to June 21st next for a license to cut tinber on Berth No. 1229 containing 36 square miles and Berth No. 1230, both in the province of Manitoba.

Tugs of the Reid Wrecking Company, of Sarnia, arrived at Sandwich, Ont., on May 30th with the first raft of the season, for the Saginaw Lumber and Salt Company. There were 1,500,000 feet in the raft. The second part of the raft with an equal amount in the River St. Clair was expected down during the week. The tug Reid is now in Lake Huron with a raft containing 4,000,000 feet from Spanish River, for the Sarnia mill of the Cleveland Sarnia Sawmill Company.

THE NEW BRUNSWICK LOG DRIVES.

FREDERICTON, N.B., June 2, 1905.—The water in the rivers is low and some of the drives are already hung up. "There will be 50,000,000 feet of logs on the Upper St. John waters which will not be brought out this spring," said a prominent lumberman." Of the 105,750,000 feet which it is estimated was to come out this year, a considerable proportion will have to wait over for another season unless there is a wonderful rise of water at an early day.

Reports received are to the effect that about 12,000,000 feet will be hung up on the Northwest Miramichi. The lumber that is tied up includes some for Ritchie, Hutchinson and Sinclair. The driving on the Southwest Branch has been most successful. Mr. Welsh's drive has already got as far as Boiestown, while T. Lynch's 10,000,000 has reached the islands about five miles below that place.

A number of men who were on Robert Aitken's drive on the Machias and Allegash streams, have returned. The drives are all in, and the Cunliffe drives, with which they amalgamated, all came out safely. Randolph & Baker have word to the effect that their drive on Chimenticook, with the exception of about 1,000 pieces, has been brought out safely. Joseph Hallett has got his drive out of Grand River. This drive consisted of about 2,000,000 feet of spruce for himself and about the same amount of cedar for the Van Buren Lumber Company.

John Kilburn, whose drives for W. H. Murray on the St. John headwaters had to be abandoned recently, has boomed the logs a short distance below English Bay, where they can easily be got out another season. Mr. Kilburn says that in his forty-four years' experience he never saw the conditions for driving so unfavorable as he found them this year.

Hilyard Bros.' drive on the Restigouche is safely out, but a number of small drives on the brooks owned by the different jobbers are hung up. The Richard concern have got out their main drive.

SALE OF QUEBEC TIMBER LIMITS.

A sale of timber limits is announced to take place at the Crown Lands Department, Quebec, on Thursday, June 22nd, 1905. Three thousand five hundred square miles of timber lands will be offered at upset prices to be fixed by the department. The limits to be sold are situated in the Upper Ottawa, the St. Maurice, St. Charles, Lake St. John East, Saguenay, Rimouski East, Metapedia, Granville, Gaspe East, Gaspe West and Gaspe Centre districts.

NEW BRUNSWICK LETTER.

Correspondence of the CANADA LUMBERMAN.)

ST. JOHN, N.B., May 31st, 1905.—The demand for lumber of all kinds continues in a way that is very gratifying to all those who have or will have some to sell. So far as the selling is concerned all indications point to a remarkably satisfactory season. Apparently the only misgiving on the part of the manufacturers of this section is in regard to the log drives. Until a few days ago it was felt that, while large quantities would hang up, yet most of the mills would have enough available to make almost an average sawing season. Now, with the difficulty which has arisen at Van Buren, the outlook is full of uncertainty.

In the American market trade continues remarkably strong, especially for deals. Values are well maintained in this latter line; local quotations having a tendency toward higher figures.

Stocks of American deals are light; 2,000,000 s. ft. would easily cover the whole. Judging from the purchases of American logs made at earlier dates for delivery during 1905, the cut of American lumber of all kinds will be lighter this year than usual at this port.

A feature of the American market just now is the slackness in demand for spruce 3 × 9; this in spite of the fact that a tremendous business is being done in other lines.

American spruce deals are quoted at this date, f.o.b. St. John, as follows: 3 × 10 and 12, $17.50 to $18.50; 3 × 9, $16; 3 × 7 and 8, $13.50 to $14.

The demand for cedar shingles in the United States is not so snappy as it usually is at this time of the year, although it is very uniform and the volume of sales fairly large. Prices are at least being maintained and in some cases the figures mentioned last month have been improved upon, but speaking generally it cannot be said there has been an advance in price.

Quotations now being made on cedar shingles (non-dutiable) f.o.b. St. John are as follows: Extra, $2.95; clear, $2.45; 2nd clear, $1.90; No. 1, 95 cents.

Spruce lath are in good demand at the following figures, f.o.b. St. John, for immediate delivery: Non-dutiable, $2.55; dutiable, $2.30.

Shipments to the Eastern States in all lines have been very light, which condition is due to a remarkable scarcity of tonnage, which is also the case in all ports along the coast. During the last fortnight great difficulty has been experienced in obtaining a vessel of any kind.

The few charters that have been made were at the following figures: Long lumber to Boston, $2.50 per M s. ft.; to the Sound, $2.75; to New York City, $3.

TIMBER LIMIT TRANSACTIONS.

D. B. Wood and T. L. Wood, of Brantford, Ont., have purchased a controlling interest in a timber limit comprising 10,000 acres in the vicinity of Parry Sound, Ont. The timber consists chiefly of birch, spruce, cedar and hemlock.

F. H. Hales, of Enderby, B. C., has purchased the property of the Cedar Valley Improvement Company from the Union Bank at Lethbridge, into whose hands it fell when the company became bankrupt a year ago. The deal includes the mill and timber rights of the company.

CONDITIONS OF SALE.

No limit will be adjudged at less than the minimum price fixed by the department.

The limits will be adjudged to the highest bidder on payment of the purchase price, in cash or by cheque accepted by a duly incorporated bank. Failing payment, they will be immediately re-offered for sale.

The annual ground rent of three dollars per mile, with fire tax, is also payable immediately.

Those timber limits, when adjudged, will be subject to the provisions of all timber regulations now in force or which may be enacted hereafter.

Plans of limits offered for sale are opened for inspection in the Department of Lands, Mines and Fisheries, in this city, and at the office of the Crown lands and timber agents in the different agencies in which said limits are situated, up to the day of sale.

N.B.—No account for publication of this notice will be recognized if such publication has not been expressly authorized by the department.

ADELARD TURGEON,
Minister of Lands, Mines and Fisheries.

A committee has been appointed to report as to the disposition of the assets of James Kennedy, lumber merchant, St. John, N. B. The assets are placed at $27,000 and include two portable saw mills, 500,000 feet of logs, which are hung up in the woods, and some real estate. The liabilities are about $14,000

CURRENT TRADE CONDITIONS.

ONTARIO.

Reports of the lumber market are not so uniformly favorable as last week. Many dealers, and a few manufacturers, designate the demand as a little quiet, although at the same time admitting that the spring trade has been very satisfactory. The volume of business booked by Toronto dealers during the month of May was, so far as can be learned, greater than for the corresponding month in 1904, and we believe the statement will apply to other provincial points. Asked how his business compared with one year ago, a prominent dealer replied that it was greater for both April and May, with many orders still on the books to be filled as soon as possible. Manufacturers' prices are firm, in fact too firm to suit the dealers, who claim that the margin between the wholesale buyer's price and that which can be obtained from the retailer or consumer is too small. This is one of the reasons why the wholesalers are not altogether satisfied with the present condition of trade. In a word, they consider that the manufacturers should make a larger reduction on blocks of stock. In white pine the better end is less active, but there is quite a heavy movement of box and mill culls. Some sizes of common are also showing more weakness than earlier in the year. The hemlock situation has not changed, there being a good demand around $12 at the mill, while some manufacturers are asking $12.50 and $13. The standard sizes of pine lath are firm at $3 for No. 1 at the mill, but heavier offerings of 32 inch pine and hemlock have caused a slight break. The former is now offered at $1.

QUEBEC AND NEW BRUNSWICK.

It is now estimated that 30,000,000 feet of logs will be hung up on Miramichi river in New Brunswick. This, with the smaller quantity which is almost certain to be hung up on the St. John river, has further stiffened the spruce lumber market, but the demand is not as great as might be expected. The deadlock between shippers and British importers still exists, but manufacturers are hopeful that they will be able to dispose of their output at satisfactory prices. Shipments to the United States have shown some falling off during the past ten days. Cedar shingle prices are not as firm as two weeks ago, and very few manufacturers are asking more than $3.35 for Extras for Boston delivery.

MANITOBA AND BRITISH COLUMBIA.

Lumber is moving quite actively in Winnipeg, as the building season is now in full swing and promises to be better than last year. The extensive building operations in that city are shown in a very striking manner by the following comparison of permits for the first five months of the past three years :

Year.	Permits.	Cost.
1903	421	$2,142,650
1904	779	3,637,350
1905	1180	4,799,450

It will be seen that the permits taken out this year are more than double in value those for 1903 and over $1,000,000 greater than last year. While corresponding activity does not prevail at all western points, still building generally in the west is satisfactory and a large quantity of lumber is going into consumption. From British Columbia comes the report of more satisfactory conditions in the domestic trade but some disappointment with the export branch.

UNITED STATES.

Lumber trade conditions in the United States continue satisfactory. Prices in the Lake Superior district are exceptionally strong and the placing of the new cut on the market has been without effect in the direction of bringing about lower quotations. A quantity of No. 3 and better pine was recently sold at Duluth at $19, which is an advance of $3 over what the stock would have brought one year ago. All the large manufacturers have disposed of the bulk of their season's cut, and one mill has sold its output for the coming three years, receiving therefor, we understand, the top notch price of the season. The eastern trade is also in good shape, visits of dealers to Buffalo and Tonawanda for the purpose of buying stock being an evidence of this condition. The demand is much more active than one year ago. Cleveland is receiving a considerable quantity of Canadian lumber and reports a large consumption. At a recent meeting of wholesale dealers in that city the price of southern pine, norway and hemlock was advanced, but shingles were reduced 25 cents. There is an average movement in shingles, but white pine values are showing the effect of the competition of red cedars. Lath continues strong and scarce. In Boston spruce lath is held at $3.50 for 1⅝ in. and $3.25 to $3.30 for 1½ inch.

GREAT BRITAIN.

There has been a slight improvement in the British market but it has been confined almost exclusively to spruce. In white pine there has been little change, prices of the better qualities being well maintained, with the lower grades weaker and very dull. Importers seem more disposed to operate in spruce on account of its lower cost and consequent smaller risk. A re-

A SPLENDID ROUTE.
The Wisconsin Central Railway is justly termed the "Sportman's Line" because it reaches into and through the very heart of the choicest hunting grounds in America.
The very best wild fowl shooting of the entire North is reached ONLY by this line. Hundreds of beautiful lakes abounding in wild rice and celery attracts myriads of ducks and geese and afford the finest kind of cover and the choicest shooting to be found the country over.
The Wisconsin Central Railway caters especially to the sporting public and during the various seasons for hunting and fishing furnishes daily information to its patrons as to local conditions anywhere along its lines upon application to the nearest ticket agent. It also arranges its train service with special reference to the convenience and comfort of sportsmen, and its employes are constantly on the alert to make travel over their lines pleasant and comfortable.
This line offers the best route between Chicago, St. Paul, Milwaukee, Minneapolis or to Lake Superior points via Ashland, Wisconsin.

port just to hand states that signs are not wanting of an early improvement in spruce values and that there is a feeling that the time has arrived when importers should contract for their supplies. Prices still rule at £9 for 3x9 in. second quality, £8 10s for thirds, and £7 15s for fourths, but it is probable that shippers may withdraw these quotations at any time. Intending buyers who are waiting for a drop in values are, therefore, likely to be disappointed. Prices of birch timber have been well maintained, but planks are a little easier. Waney pine is also dragging on account of a light demand. The Liverpool price ranges from 2s 8d to 3s 9d per cubic foot.

BRITISH COLUMBIA LETTER.

(Correspondence of THE CANADA LUMBERMAN.)

VANCOUVER, B.C., June 5th, 1905.—With fairly prosperous conditions in the lumber industry as far as the home market is concerned, the export trade is the branch which is at present most unsatisfactory. This has prevailed for some time, and until there is more of an improvement, very few vessels will load at the Chemainus mills. This is one of the big export mills of the coast, but only one or two ships have been tied up there for loads. The British ship Cedarbank has completed a cargo of 407,000 feet for the west coast of South America, and the British ship Adderley is about ready for departure, her destination being Sydney, N.S.W. In Vancouver, the British ship Senator will get away from the Hastings mill with 1,434,768 feet for East London, South Africa, this week. The American barque Prussia completes her cargo of 870,000 feet for Yokohama to-day. The British ship Springbank is daily expected to arrive from San Francisco to load for the United Kingdom.

There is little change in prices, either for logs or lumber, during the past couple of weeks. Demand for lumber at the mills keeps up the good figure for logs in the camp. With the better prices for lumber in the States, and the fact that nearly all the over-production was dumped into Canada last year, to the serious detriment of the industry here, the amount of lumber coming over from Washington is not quite so large as last year. It is sufficient, however, to make the difference between fair times and good, and did it not come in would mean greater prosperity for British Colnmbia, where the manufacture of lumber is the chief industry. The shipments of the Victoria Lumber and Manufacturing Company from its mills at Chemainus to the Northwest and Manitoba for May will total upward of 3,000,000 feet. This firm, however, has a large contract with the C.P.R.

The intention of the C.P.R. to erect buildings on land sold to immigrants from the Old Country will have a beneficial effect on the lumber trade from this province. The railway company complains that empty cars are hauled east, and besides it will be less prone to buy the dumped lumber from Washington state which might be offered cheaper in Canada. The company will receive instalment payments from the purchasers of the land and buildings.

The shutting down of the saw mill of the Ontario-Slocan Lumber Company is an indication that conditions are not as satisfactory as they might be. Owing to the prolonged depression, operations have ceased in its establishment in Slocan City. Some of the principal shareholders of this company live in Ontario.

Applications to cut timber were about the same for May as April. In the latter month they numbered an even hundred, and in May 93.

Mr. John Murray, timber ranger, returned from a trip to the middle interior a week ago, and reports business there fairly good. The Kamloops Lumber Company, of which Mr. George McCormick is president, has about 6,000,000 feet of logs hung up, owing to low water. Little rain usually falls in that district in the summer, so that it is hardly probable that the timber will be released this season, unless heavy rains come.

An arrival Friday from the Kootenay and Crow's Nest district reports the lumber industry doing well there just now. Depression was severely felt through that part, but the momentary demand for lumber from the Territories is helping things.

THE GLASGOW MARKET.

Messrs. Edmiston & Mitchells furnish the following particulars of the Glasgow market:

WHITE PINE.—Business during the month has been extremely quiet and enquiries are few. The stock is moving off slowly and is still ample.

OAK.—There have been a few more enquiries during the mo th, and one or two good lines of large wood have been placed at fair prices. First-class Quebec wood, large average, is scarce, but the stock of

LUMBER AND LATH

CARTER POWELL LAND & LUMBER CO., LIMITED

604 Temple Building, Toronto

To MILLMEN— Cash buyers all kinds HARDWOODS

Cable address "Quartered Toronto." Codes, A.B.C., 5th and Lumberman's

second-class and southern wood is heavy.

ELM.—The demand has somewhat fallen off, pending new arrivals. The stock of all kinds is low and prices are very firm.

QUEBEC BIRCH.—The import for May consists of 610 logs by liners from Montreal, most of which have been disposed of "ex quay." Prices are rather easier than they were owing to the pressure to effect "ex quay" sales, and unless imports during the next few weeks are of more moderate dimensions, it will be difficult to maintain present values.

N.B. BIRCH. — The import for the month consists of about 500 loads of logs and 175 standards of planks, all of which were disposed of "ex quay" on a basis of 17½d. to 18½d. for 14 to 15½ inch average, while planks have brought £7 10s. to £7 17s. 6d., c.i.f. Buyers are now better supplied with birch and show less eagerness to augment their stock, apparently anticipating easier prices as the season goes on.

ASH.—The import has been quite trifling and there is very little enquiry, though a small shipment of prime 15-inch wood might find a ready enough market,

the stock of logs being at an unusually low point.

DEALS, ETC.—The first arrivals of new goods from Montreal are now to hand—chiefly pine deals on contract. Stocks are low, but the demand is so quiet sales are difficult to effect. Values are unaltered, viz.:—Broad first pine deals, £33 to £35; 11-inch, £30 to £32; ends and non-dimensions, £23 to £25. Second pine deals.—11-inch and up, £17 to £19; ends and non-dimensions, £13 to £14 10s. Third pine deals.—11-inch and up, £11 to £14; ends and non-dimensions, £9 10s. to £10 10s. Red pine deals.—9 and 11-inch, £9 to £10; narrows, £7 to £8 10s. First pine sidings and strips.—9 to 10-nch, £23 to £24; 11 to 12-inch, £25 to £26; 13 to 14-inch, £27 to £28.

QUEBEC SPRUCE DEALS.—9-inch and up, £8 5s. to £8 15s.; 7 and 8 inch, £7 5s. to £7 15s.

N.B. SPRUCE.—9-inch and up, £8 to £8 10s.; 7 and 8 inch, £7 to £7 10s.

NELSON LUMBER PRICES.

The following prices on lumber were put into effect by the local yards at Nelson, B. C., last month:

Common Boards and Dimension	$14
(Kiln Dried) Shiplap	17
Shiplap	15
Flooring and Ceiling, No. 1	26
" " " No. 2	22
Siding, No. 1	24
" No. 2	20
Cedar Ceiling, No. 1	35
Kiln Dried, 1" thick to 12" wide, No. 1	30
" " " " No. 2	25
" " " " No. 3	20

Common Boards: S. 1 S., mixed lengths, 10 to 18 feet, and mixed widths, 4 to 12 inches.

10 and 12 inch stock boards, when specially ordered, $1.00 per M. extra.

1 by 4 inch strips, when specially ordered, $1.00 per M. less.

Ordinary dimension includes sizes from 2x4x12 up to 2x12x16. 50 cents per M. extra for every two feet over 16. $1.00 per M. extra for every 2 inches over 12 inches in width. 2x4 and 2x6 10 feet same price as 20 feet.

$1.00 per M. extra where lengths are specified for boards, shiplap and matched stuff.

Short lumber up to 8 feet $2 less per M than standard lengths.

The Carter-Powell Land & Lumber Company, Limited, has recently been organized in Toronto and has taken over the business of C. S. Powell & Company, lumber exporters. Mr. R. E. Carter is president of the new company, Mr. C. S. Powell, managing-director, and Mr. G. Verney, secretary-treasurer. It is the intention to operate in both domestic and export trade and to make a specialty of basswood keyboards and hardwood flooring. The head office will be in the Temple Building, Toronto, and they will have agencies in New Orleans, Liverpool, London, Bristol, Paris, Bremen and Belfast.

THE ONTARIO LUMBER COMPANY, LIMITED, Toronto, Ont.

CURRENT TRADE CONDITIONS.

ONTARIO.

The lumber trade have become so accustomed to prosperous conditions that any material falling off in the demand is likely to be considered more unfavorable than it really is. For the past few years it has not been a difficult matter to sell lumber in Ontario. With the exception of a few periods of short duration, the demand might be said to have been almost equal to the supply. This perhaps explains the disposition to magnify, perhaps unconsciously, the indications of a quieter trade which have been in evidence during the past fortnight. There is no denying the fact that there is a healthy general demand and that the consumption is quite liberal. The lighter importation of southern pine has no doubt had some effect upon the consumption of the home product, and particularly hemlock. Weather conditions are an important influence and have not been altogether favorable, excessive rains having retarded the growth of agricultural products. Nevertheless, it is encouraging to learn that the country retail demand for lumber is very satisfactory. The hardwoods, however, are rather dull, although not lower in price. Elm and maple do not show as much life as earlier in the season, and it is still difficult to sell basswood unless there is an inducement in the price. The outlook seems to be for a steady and firm market for most kinds of lumber during the summer months, while the course of prices in the fall will depend upon so many uncertainties that no forecast can yet be made.

UNITED STATES.

The most favorable reports continue to reach us regarding the demand for white pine lumber in the United States. The greatest activity pertains to the lower grades, the high grades coming next, with the middle grades moving more moderately. Shipments are very active, as shown by the receipt at Tonawanda of upwards of 60,000,000 feet up to June 1st. This is the largest amount for the same period since the early nineties. The wholesale trade at Buffalo and Tonawanda has been stimulated by the unusual demand from eastern cities, where building operations this season are on a large scale. Official reports to Construction News from twenty-nine of the principal cities of the United States show that for the month of May permits were taken out for the construction of 12,062 buildings, aggregating in cost $46,861,012, against 10,152 buildings, at an estimated cost of $41,630,696, for the corresponding month a year ago. It is probable that there will be a lull in building operations during the next two or three months, but nevertheless there is certain to be a large consumption of lumber.

About the only change in the hardwood situation is a quieter market for maple, which has been reflected in slightly easier prices. Thick maple is off more than anything else. Oak and ash continue active and firm, followed by birch.

Spruce is fairly firm but some dealers anticipate an easier market this month owing to cargo arrivals at Boston and New York. It is understood that several cargoes have been received for sale and no doubt an effort will be made to break the price.

GREAT BRITAIN.

So far as can be judged from various reports, there is no improvement in the British lumber market. The import so far this season has been very light and stocks are therefore at a low point. Notwithstanding this fact, however, few transactions have taken place between shippers and importers, and it is feared that the season will again be unsatisfactory. There is a demand for first and second quality pine deals in 11 × 3 inch, which are quite scarce, but even this condition does not seem to be sufficient to induce importers to place contracts. Even the spruce market has not maintained its strong position, and we are advised that the easier tone which has prevailed during the past fortnight has induced a feeling of nervousness on the part of buyers. In some quarters it is predicted that prices will go lower, but in view of the light shipments from Canada it is difficult to understand how this can be brought

about. The negotiations now under way looking to the early cessation of hostilities between Japan and Russia should have a stimulating effect on the lumber trade, as the termination of the war would doubtless cause Swedish shippers to adhere firmly to their asking prices for deals.

STOCKS AND PRICES.

McLachlan Bros., of Arnprior, Ont., expect to cut about 90,000,000 feet of lumber this season, which will be a larger output than last year.

L. O. David, City Clerk of Montreal, will receive tenders up to the 27th inst. for the supply of lumber required by the Waterworks Department.

According to the reports received by the Commissioner of Crown Lands, the cut of pine logs in Ontario last winter was considerably smaller than for the previous season. Most of the logs cut will reach the mills, as recent rains have facilitated log driving.

E. Hutchinson, of Douglastown, N. B., is authority for the statement that 15,000,000 feet of logs are hung up on the Miramichi branches, owned by the following firms: J. B. Snowball Company, 2,500,000 feet; Edward Sinclair Company, 2,000,000; D. & J. Ritchie, 2,000,000 feet on Big Sevogle rive and 4,000,000 feet on Little Southwest; Timothy Lynch & Company and George Burchill & Sons, about 250,000 feet each.

LUMBER CONDITIONS IN THE EAST

Reviewing the lumber conditions in the East, the American Lumberman says:

It is generally thought now that in Nova Scotia and New Brunswick the year's production will show a decrease of at least 50 per cent. As an instance, at one large mill on the Chaleur bay the output will be only 25,000,000 to 30,000,000 feet where usually 60,000,000 to 70,000,000 feet was secured. This decrease is due to the shortage in the log supply. Severe weather during the winter obliged many loggers in Maine and the provinces to suspend operations and in this manner curtailed their input. Low water during the early spring months also has proven a hindrance and caused large parts of many drives to be hung up and thus rendered unavailable this year.

A communication from Portland, Me., shows that conditions in that section have improved very much during the last sixty days. One of the most convincing evidence of an increased demand and a somewhat limited supply is shown by prices, which have been advanced very materially. Probably this phase is shown most clearly by quotations issued late in May, which were as follows:

Stock boards, 10 and 12 inch	$22.00
Stock boards under 10-inch	20.00
Random widths, 10 and 12 inch	21.50
Piece stuff 2x3 and 3x4, inclusive	18.00
Other random lengths 9 inches and under	19.00
Random lengths, 2x9	20.00
Random lengths, 2x10 to 2x12	21.00
Random lengths, 1x6 and up, sis	19.00
Merchanable, 5 inches and up	17.00
Spruce, sis	16.00
Furring	18 00
Lath, 1⅝-inch	3.45
Lath, 1½-inch	3.35

All the mills in the Portland district are sawing on orders and have more business booked than they can handle conveniently. Local trade in that section never was better and this summary may be extended to include practically the entire New England and North Atlantic coast district. May business is said to have surpassed in volume the records of many years. Weather conditions have been very satisfactory and another factor contributing to the general improvement is the utter absence of labor disturbances, which applies not only to Maine but generally to the east, where no serious tieups have resulted this year from strikes or other upheavals.

With respect to the export trade a somewhat contradictory condition is shown. Prices on white pine as at present quoted are:

Selects and better	$72.00
South American shippers	35.00
South American seconds	29.00
West India shippers	26.00

While the demand from foreign sources this year is not up to expectations, shipments of white pine from England during the first few months have been unusually large and prices have been maintained in a general way. In the spruce department, however, there has been a decline from last year's price level but an advance over the values prevailing during the fall and winter. Present spruce quotations are:

Twelve-inch	$26 to $27
Rails and scantling	17 to 18

A considerable demand for spruce at this range of prices is in evidence, but the movement to South American countries, especially to the River Plate, is light at this time. A number of good orders have been taken, however, to be filled in the future, and several charters have been made for July, August and September. The schedule of rates is low but an advance soon is generally expected. The basis on which charters are made at present is $7.50 to $8 and at this price some charters have been made for August loading.

BARBADOS LUMBER MARKET.

Messrs. S. P. Musson, Son & Company, under date of June 3rd, give the following particulars of the Barbados market:

The arrivals during the fortnight consist of Schooner W. S. Fielding, from Port Medway, with 117,000 ft. of white pine, 83,000 ft. spruce and 3,700 ft. hemlock, sold at $24.30 for shipping and $18.10 for second quality white pine; $22.10 for shipping and $17.10 for second quality spruce; $17.80 and $14 for hemlock. Schooner Caledonian, from Liverpool, with 145,000 ft. white pine, 36,000 ft. spruce, 20,000 ft. hemlock, and 40,000 ft. Norway pine, sold at $24.25 for shipping and $18.65 for second quality white pine; $22.65 for shipping and $18.65 for second quality spruce. Hemlock and Norway pine not yet sold. Schooner Frances A. Rice, from Weymouth, N. S., to ourselves, with 54,000 ft. spruce and 13,000 ft. white pine, sold at $22.40 for shipping and $17.40 second quality spruce; $24.30 for shipping and $18.30 for second quality white pine. The market is heavily stocked with white pine and if arrivals keep up we expect to see lower prices. Spruce is not in over supply but as crop requirements are virtually at an end the demand in the near future will be light. We have no further arrivals in shingles to report. Laying Cedar are in ample supply, but Long Gaspe are in light stock and first receipts will bring fair prices. The season for wood hoops and shooks is over and there will be some of both left in the dealers' hands.

THE SITUATION AT LIVERPOOL.

The following review of the Liverpool lumber market is furnished by Messrs. Farnworth & Jardine:

The arrivals from British North America during the past month have been 14,953 tons register, against 13,849 tons register during the corresponding month last year, and the aggregate tonnage to this date from all places during the years 1903, 1904, and 1905 has been 126,475, 131,783, and 150,604 tons respectively. The timber business of the past month has been quiet and rather disappointing. Imports have come forward freely, but the consumption, with the assistance of auction sales, has been fair; stocks, with few ex-

A SPLENDID ROUTE.
The Wisconsin Central Railway is justly termed the "Sportman's Line" because it reaches into and through the very heart of the choicest hunting grounds in America.
The very best wild fowl shooting of the entire North is reached ONLY by this line. Hundreds of beautiful lakes abounding in wild rice and celery attracts myriads of ducks and geese and afford the finest kind of cover and the choicest shooting to be found the country over.
The Wisconsin Central Railway caters especially to the sporting public and during the various seasons for hunting and fishing furnishes daily information to its patrons as to local conditions anywhere along its lines upon application to the nearest ticket agent. It also arranges its train service with special reference to the convenience and comfort of sportsmen, and its employes are constantly on the alert to make travel over their lines pleasant and comfortable.
This line offers the best route between Chicago, St. Paul, Milwaukee, Minneapolis or to Lake Superior points via Ashland, Wisconsin.

ceptions, are adequate, and values for some of the leading articles have shown weakness.

CANADIAN WOODS.—Pine Timber.—Of waney there has been a small import of about 1,000 cubic feet; the demand is quiet, the deliveries have been disappointing and stocks are large, but values are steady. Square Pine.—The deliveries show a little improvement, but the stock is ample; prices are firm. Red Pine.—A parcel of about 3,000 feet has been imported coastwise. Oak Logs.—No import; there has been little enquiry, and the stock, though small, appears sufficient for present requirements. Elm.—There is a fair demand for first-class rock elm, and the stock is light; values rule high. Pine Deals.—New season's goods are now coming forward, chiefly on merchants' account; the deliveries have been fair, but the stock is too large; values are fairly well maintained. Red pine deals are dull of sale; stocks are ample.

NEW BRUNSWICK AND NOVA SCOTIA SPRUCE AND PINE DEALS.—The import to the Mersey during the past month has been very similar in quantity to the corresponding month of last year, viz:—4,840, against 4,310 in 1904. The deliveries have more than kept pace, stocks are moderate and values are fairly steady. Pine Deals.—There is a very limited enquiry, and a parcel recently imported has been stored on shippers' account.

BIRCH.—Of logs there has been a moderate import, chiefly from Quebec; the deliveries have been fairly satisfactory, and stocks are not too heavy, values are fairly steady. Planks have arrived much more freely, and although the deliveries have been large the stock is increasing, and values are a shade easier.

The following table shows the stock on hand June 1st for two years:

		1904.	1905.

SPRUCE IN GREAT BRITIAN.

Commenting upon the position of spruce lumber, the Timber Trade Journal, of London, England, compares the conditions existing at the present time with those of one year ago, when the market was much depressed. The comparison is in favor of this year's conditions, as the following will show:

"The statistical situation is undoubtedly better than it was last year. At the two big centres of the spruce trade—Manchester and Liverpool—the stock is only about one-half what it was last year, while the consumption has been practically equal. The cotton trade is moreover in a flourishing condition. The stocks round the west coast are undoubtedly light. Furthermore, information at our disposal discloses the fact that the number of logs likely to be hung up on the St. John River and on the rivers feeding Miramichi—and the same is no doubt true of the other districts—if not so great as originally reported, is still sufficient to exercise a very marked influence upon the situation. Spruce we are bound to have, and a falling off in the supplies will inevitably re-act upon prices on this side. At the same time, from now to the end of August, during which time the mills have to work at high pressure to make the most of their season, and when the goods have to be got out of the way somehow, is always a more or less trying time to spruce shippers and their agents. Freights, in the absence of cargoes, are very low at the moment; and, taking all things into consideration, we hardly think we have got quite to the bottom of the hill just yet. At the same time, we are not a long way off, and there will be, if we are not mistaken, shrewd speculators this year who will pick up cargoes to store, on which we believe some good profits will later on be realized."

J. S. FINDLAY,

OWEN SOUND ONT.

NEW BRUNSWICK LETTER.

(Correspondence of the CANADA LUMBERMAN.)

ST. JOHN, N.B., June 15th, 1905.—The lumber industry has been marked by no radical change in these parts since last writing. Shipments both to the U.K. and to the New England States have been light, remarkably so in the latter direction. This last condition is due to the extreme scarcity of vessels of the type which carries lumber. This scarcity is due to the fact that, owing to the light profits which have been the portion of the small lumber freighter during the past two or three years, many owners have put their vessels into other lines and others have sold out entirely. Many manufacturers at this port are waiting for tonnage in this line and freight rates have accordingly advanced from $2.25 to Boston and $3 to New York City, long lumber, to $2.50 and $3.25.

The feeling in regard to spruce deals for export to the U.K. is not of so optimistic a nature as was the case a month ago. Reports from reliable sources indicate that the briskness of demand which characterized the opening up of business in the U.K. early in the spring has not been sustained and that the consumption during the last few weeks has been rather disappointing. Inquiries are proportionately less in volume and the operations of buyers are marked by extreme caution.

These conditions have naturally had an unfavorable effect upon local prices. A specification containing say 50% 7's and 8's, 35% 9's and 15% 11's and up, which could not have been bought at this port a month ago for less than from $12.75 to $13 per M s. ft., 2/3 price for fourths and ends, f.o.b. steamer St. John, could be purchased to-day for from $12.25 to $12.50.

One feature of the situation in this direction which is very encouraging to the local dealers and which certainly points to the improbability of any further decline in prices, is the lightness of stocks of Canadian wood products in the chief distributing centres of the U.K. This knowledge, added to the fact that local holdings are also encouragingly light (2,000,000 s. ft. would easily cover all available), prevents any feeling of pessimism that would result in anxiety to sell.

On the whole, while the outlook is not so bright for "English" deals as was the case a month ago, the ideas of all those who have anything in this line to sell, indicate their confidence that the more favorable conditions of the earlier date will in the near future rule again, rather than that the lack of stimulus will be more pronounced.

CANADIAN LUMBER SHIPMENTS.

From Montreal: Steamer Victorian, for Liverpool, 1,901 pcs. deals, by W. & J. Sharples; 3,468 pcs. deals and ends, by Watson & Todd. The Weekly Lumberman — Published every Wednesday, contains reliable and up-to-date reports of market conditions and tendencies in the principal manufacturing districts and leading domestic and foreign wholesale markets. A weekly medium of information and communication between Canadian timber and lumber manufacturers and exporters and the purchasers of timber products at home and abroad.

The Monthly Lumberman— A 44-page journal, discussing fully and impartially subjects pertinent to the lumber and wood-working industries.

WANTED AND FOR SALE

Advertisements will be inserted in this department at the rate of 15 cents per line each insertion. When four or more consecutive insertions are ordered a discount of 25 per cent. will be allowed. This notice shows the width of the line and is set in Nonpareil type; 12 lines make one inch. Advertisements must be received not later than 4 o'clock p. m. on Tuesday to insure insertion in the current week's issue

FOR SALE — LARGE QUANTITY OF 3" Common Spruce. Barge or car lots. Apply Box 111, CANADA LUMBERMAN, Toronto, Ont.

ENGINE—12"x18", SHAFTING, HANGERS, Pulleys, Jointer, Double Surfacer and Resaw; a snap. C. R. PETERKIN, 150 Bay Street, Toronto.

WANTED—1", 1 1/4", 2" COMMON BEECH, Birch and Hard Maple 5/4 Beech C & B. 1", 6/4" 2" Wormy Chestnut. All dry. R. E. KINSMAN, Hamilton, Ont.

FOR SALE.

SMALL STEAM SAW MILL WITH DOUBLE Edger and Cut-off Saw; capacity, eight to ten thousand feet per day. Also a timber license of sixteen square miles; mill built in center of the limit; any quantity of timber; reason for selling, going out of the business; price three thousand dollars. Address Box 75, Powassan.

FOR SALE

1" and 1½" 1904 winter cut, mill run, trimmed Hard Maple.
1" 1904 winter cut, mill run, rough edged, Hard Maple.
1" 1905 winter cut, trimmed, all pure White Hard Maple
1", 1½" and 2" 1905 winter cut, mill run, trimmed Hard Maple.

Write for lists and prices. The W. R. THOMPSON Co., Teeswater, Ont.

FOR SALE

OVER FOUR MILLION FEET OF STANDING timber and land composed of chestnut, whitewood, oak, ash, maple, basswood, elm, beech, with 10 M capacity mill; 2 railways running through property; good market for cordwood, tile wood, stove wood, hubs, spokes and everything in the product of a sawmill—including planing and matching machine, shingle machine, and moulding machine; containing 350 acres; will be sold either in whole or part. Railway spur on property; the best lot of timber in these parts. Original forest. J. C. SCHLEIHAUF, Owner, Bismarck Station, West Lorne P.O., Ont.

WANTED—ALL PULP MILLS AND PULP WOOD Companies to look up page 7 monthly issue, which is bound to interest you.

FOR SALE---WHITE PINE

1 CAR 1x13 AND UP, NO. 1, 2 AND 3 COMMON, 80% 13" and up, 1 car Basswood, all bone dry. JOHN M. SHAW, Forest, Ont.

TIMBER LIMIT FOR SALE

SPLENDID CEDAR AND HARDWOOD Timber Limit, up-to-date mill with gunshot feed, trimmers and other full equipment; sufficient timber to run 10 years; mill now in full operation, located on Georgian Bay; good shipping facilities output practically sold for several years. Box 230, CANADA LUMBERMAN Toronto.

FOR SALE

IN CONSEQUENCE OF DEATH OF BOTH proprietors, necessitating a settlement of the joint estates—a Modern Saw Mill on the Georgian Bay (south shore) in first-class order. Equipped with all up-to-date appliances—running two Band Saws and capable of turning out 70,000 a day. The whole mill was reconstructed in 1902 by the Waterous Engine Co. of Brantford, and the second Band Mill replaced the Circular Saw last year. Boiler House, Boiming Ground, Piling Yard and Shipping Siding in the best condition. The mill is now running and has a stock of logs in Georgian Bay and adjacent waters of 6,500,000 on the way down. The limits owned by the estates are most valuable and easily worked. Apply for full particulars to TANNER BROS., Waubaushene, Ont.

POSITION WANTED—BY W. PINE LUMBER Inspector, as Buyer or Inspector. Address Box 233, CANADA LUMBERMAN.

WANTED—TO HEAR FROM SOME FIRM requiring Maple Squares, or Table Legs. Address EDGAR A. WOODMAN, ROSSVILLE, York Co., N. B.

WANTED — TEN THOUSAND CORDS Hard and Soft Wood; also same quantity of Slabs. SIMCOE WOOD AND LUMBER Co., 52 Yonge Street Arcade, Toronto.

FOR SALE—LOCOMOTIVE BOILER, 60 H. P., new, built by Erie Boiler Works, complete with stack and mountings. Apply to THE JOHN MCDOUGALL CALEDONIAN IRON WORKS Co., LIMITED, Montreal.

CEDAR FOR SALE — 10,000 PCS. ROUND Cedar 8-16 and 25 feet long, at the Spanish boom. Also cedar, pine and spruce lumber for sale here at Larchwood. JAMES MCCREARY, Larchwood, Ont.

FOR SALE CHEAP—ONE GOOD DOUBLE Cylinder Set 7 24 in. Cards and Picker, also one run "Roller Process" Grist Mill Machinery Outfit complete. Address EDGAR A. WOODMAN, ROSSVILLE, York Co., N. B.

WANTED AT MIDLAND.

AN EXPERIENCED SHIPPER WHO UNderstands the English export grades. Apply, THE TURNER LUMBER Co., LIMITED, Midland, Ont.

HAVE YOU ANY STOCK WHICH YOU wish to sell? If so, make the fact known to probable buyers by placing an advertisement in the Wanted and For Sale Department of this journal. Address, CANADA LUMBERMAN, Toronto.

Full Second Hand Outfit for Circular Mill. THE ONTARIO LUMBER COMPANY, LIMITED, Toronto, Ont.

CURRENT TRADE CONDITIONS.

ONTARIO.

The very satisfactory local demand for lumber may be attributed largely to extensive building operations in all parts of the province. In Toronto, the amount of money expended on new buildings this year is double that of last year in the same period, and the permits now being issued indicate that this activity will continue until well up to the end of the year. Building lumber is therefore in good demand. As much cannot be said of the factory trade, which has become somewhat quiet during the past fortnight. This has affected hardwoods more than pine. The latter is moving quite freely, and particularly the intermediate and lower grades, which are very firm in price. There is some weakness in good lumber, partly on account of the competition of western pine and partly owing to the failure of the British market to improve.

In hardwood transactions the buyer has the advantage. Stocks are accumulating at the mills in greater quantity than was anticipated earlier in the year, and a buyer who will take more than a few thousand feet can often secure a concession of some consideration. Basswood and soft elm have shown more weakness than the other hardwoods, while the strongest lumber is perhaps birch, but ash is also firm. The tendency of hardwoods should be to improve, as conditions are favorable and prices have not been carried too high.

QUEBEC AND NEW BRUNSWICK.

At time of writing building operations in Montreal seem likely to be interfered with by a strike of carpenters. This will, of course, affect the demand for lumber for local consumption. In other respects eastern market conditions are fairly satisfactory. The quantity of waney white pine, elm, birch and maple timber exported from Quebec this season has been larger than for the corresponding period in 1904, while square white pine, oak and ash show a decrease. The splendid demand for stock for shipment to the Eastern States has counteracted in some measure the restricted shipments to Great Britain. Spruce clapboards are selling on a basis of $40 for Extras and $38 for Clears for Boston delivery. The cedar shingle market has slumped to the extent of ten cents per thousand. Offerings are now being made at $3.35 for Extras and $2.90 for Clears, on Boston freight rate, with the latter showing the greater strength and also being in the lightest supply. The future course of prices seems somewhat uncertain.

MANITOBA AND BRITISH COLUMBIA.

Lumber buyers in the Northwest are closely watching the developments in connection with the forthcoming harvest. Conditions up to the present time have been favorable and a crop of as much as 90,000,000 bushels of wheat has been predicted. It is improbable that this forecast will be fulfilled, although the yield promises to be somewhat in excess of that of last year. There is already a disposition to place orders for lumber on the strength of the confidence which will be established by an abundant harvest, and the next few weeks is likely to witness increased activity in lumber circles. The British Columbia mills have plenty of stock to supply the demand and would welcome the receipt of orders which would reduce the supply in their yards, which for the past year has been greater than they desired. The shingle demand is not brisk and steps may be taken to close the mills for a period of at least three months during next winter. This would

seem to be a very wise step, particularly as the prevailing price of logs does not permit the manufacture of shingles for sale at a low price.

UNITED STATES.

There is not the slightest complaint in respect to the movement of white pine lumber. Probably more of the season's cut has been sold than was ever before the case at so early a time in the year. Many of the eastern dealers have all the orders they can handle, and in view of the high prices asked at the mills it is probable that a considerable shortage may develop later in the year. Although the demand in the east is remarkably good, it appears that western dealers are paying more for lumber than the eastern buyer, with the result that wholesalers find it difficult to keep their stocks replenished. The coarser grades still have the call, but at one or two points the demand for box boards is said to be a little off. Eastern spruce is very firm and is sold right up to the capacity of the mills to produce, the basis of values being $23 for wide cargoes, New York delivery. There has been an increase in the supply of random, which has brought about slightly lower prices. Studding and furring are worth $18 at Boston, and 2x5 in., 6 and 7 in., $17.50.

There is still some complaint regarding the hardwood trade. The factory consumption is slow but is expected to pick up after midsummer. Oak continues to be the best seller, followed by birch. The agricultural machinery factories are taking rock elm, but soft elm is quiet.

GREAT BRITAIN.

The position of the British lumber market is practically unchanged, but it is perhaps safe to say that a greater number of buyers are disposed to take a sanguine view of the outlook. General trade is improving and the activity in the textile and other industries will sooner or later infuse more life into the lumber business. Shippers are endeavoring to effect sales without modifying their prices, while buyers seem satisfied that prices will not advance. The latter argue, therefore, that nothing can be lost under such circumstances in procrastination. Spruce prices are a little weaker at Cardiff, Liverpool and one or two other points, while the higher grades of pine are firm but inactive. The next month or six weeks is likely to be a very quiet time unless the consumption should become more active, in which case importers might feel warranted in showing a greater desire to acquire stocks.

STOCKS AND PRICES.

The Hedley Lumber Company's drive of saw logs is out of the Tulameen river. The mill of this company is located at Hedley, B. C.

T. A. Burrows, of Grand View, Man., was very successful with his drives this spring. With the "hung up" residue of the previous season's drive, there are upwards of 9,000,000 feet of logs in the booms available for this year's sawing.

A report from Minneapolis, Minn., states that an advance in list prices on white pine piece stuff is favored by many manufacturers and the question will be taken up by the Price List Committee of the Mississippi Valley Lumbermen's Association at a meeting probably to be held in July.

Recent sales of white pine lumber at Duluth show that the tendency of prices is to harden. Four inch No. 1 has been sold at $21.50, 12 inch No. 1 at $27.50, and 12-inch No. 2 at $21.50. These prices are about $3 more than were realized one year ago, when 12 inch No. 1 sold at $23 to $24 and 12 inch No. 2 at $17.50 to $18.

A raft containing about 4,000,000 feet of logs, which the Reid Wrecking Compan's tugs were taking from the Georgian Bay to Sarnia, broke at the foot of Lake Huron on June 22nd. Only a small portion of the logs could be boomed again, and the remainder will have to be picked up along the river when they drift. The raft was the property of the Sarnia Bay Lumber, Timber & Salt Company.

The following cargoes of lumber have recently been received at Bay City and Saginaw: The schooner G. K. Jackson arrived from Johns Island with 527,453 ft. of pine lumber for the Booth & Boyd Lumber Company. The schooner T. G. Lester arrived from Algoma Mills with 347,107 feet of lumber for A. C. White. The schooner Kittie Brainerd arrived from Thessalon with 584,000 feet of lumber consigned to E. B. Foss & Co. The steamer Maine arrived from Cutler with 731,374 pine pickets and 23,741 feet of lumber consigned to the Quaker Shade Roller Company. The schooner J. L. Ketchum arrived from Little Current with 505,029 feet of lumber consigned to Bradley, Miller & Co. and F. G. Eddy & Co. The steamer Ogemaw and schooner C. J. Fillmore, which are engaged in the lumber trade between Bay City and Georgian Bay ports, on the last trip loaded lumber at Thessalon for Cleveland. The steamer Portage arrived from Duluth with 1,050,000 feet of lumber consigned to Handy Bros. The steamer Langell Boys arrived from Midland with 415,205 feet of lumber for Mershon, Schuette, Parker & Co.

Following is a comparative statement of timber, etc., measured and culled at the Supervisor of Cullers' office, Quebec, up to June 6th:

	1903	1904	1905
Waney White Pine..	297,720	567,040	600,880
Wh te Pine.....	30,320	45,840	35,110
Red Pine.....	40		160

Ash.....	32,720	12,240	4,080
Butternut.....			80
Birch and Maple....	112,680	97,520	178,240

Lumber operations in the Kootenay Valley, B. C., have been active during the past six months. The rise and progress of the lumber industry was one of the leading features of the year 1904 and for the current year the industry promises to make a much better showing. The Crow's Nest Lumber Company established logging camps at Sheep and Wolf creeks, also at Skookum Chuck, and have cut nearly 8,000,000 feet of logs. In addition to the above they have purchased from ranchers about 2,000,000 feet. Over 8,000,000 feet of logs were recently in the Kootenay river on their way to the saw mills of the Crow's Nest Lumber Company at Wardner. Bernard Lundin reports that over 400,000 feet was cut in his camp at Skookum Chuck, and is now in the Kootenay river. They were purchased by the Crow's Nest Lumber Company.

BRITISH COLUMBIA LETTER.

(Correspondence of THE CANADA LUMBERMAN.)

VANCOUVER, B.C., June 19th, 1905.—A new feature of the export trade of the timber business may be developed as a result of the visit to Vancouver of Mr. H. R. Robertson, of Portland, Oregon. Mr. Robertson arrived in the city this morning and came to personally enquire into conditions. There is a movement on foot to organize a company, with a board of local directors, to engage in the export of logs, piling and spars. Mr. Robertson's company has long made a very successful business of sending ocean going rafts from the Columbia river to San Francisco, and has several patents for construction which will be utilized. Millmen are op-

A SPLENDID ROUTE.
The Wisconsin Central Railway is justly termed the "Sportman's Line" because it reaches into and through the very heart of the choicest hunting grounds in America.
The very best wild fowl shooting of the entire North is reached ONLY by this line. Hundreds of beautiful lakes abounding in wild rice and celery attracts myriads of ducks and geese and afford the finest kind of cover and the choicest shooting to be found the country over.
The Wisconsin Central Railway caters especially to the sporting public and during the various seasons for hunting and fishing furnishes daily information to its patrons as to local conditions anywhere along its lines upon application to the nearest ticket agent. It also arranges its train service with special reference to the convenience and comfort of sportsmen, and its employes are constantly on the alert to make travel over their lines pleasant and comfortable.
This line offers the best route between Chicago, St. Paul, Milwaukee, Minneapolis or to Lake Superior points via Ashland, Wisconsin.

posed to shipment in this way on general principles, as the rafts are much cheaper and the lumber trade is interfered with. On he other hand, Mr. Robertson contends that as a plant costing about $25,000 has to be installed, and as the cost of putting together is $1 per thousand in labor, some consideration should be given his company. It takes about three months to construct a raft of ten million.

The shingle business is slack, and en this early there is talk of closing down for two or three months next winter. This has not yet been discussed by the manufacturers, though it will be proposed at one of the meetings shortly. Prices are a hering to the schedule recently issued.

Trade is still fairly good in lumber, with no break in the figures which the millmen agreed some time ago to stand by. Stocks are being added to slowly.

The logging industry still holds good, with prices ruling about the same, $5 to $8 for good fir, and cedar ranging to $10 according to quality. Americans, many of whom have been in Vancouver of late, strongly desire the removal of the export duty on unmanufactured timber, but it is not likely that they will be ever able to bring enough pressure to bear to accomplish this end. There might be a possibility of this coming were a duty to be imposed by the Dominion Government on lumber entering Canada from the States. As it is now, the export duty is of assistance to millmen in British Columbia, for without it excellent timber could be obtained cheaply here, taken across the line where labor conditions are more favorable than in this province, and the product shipped back in competition with western manufacturers on their own ground. When there is a protection against the lumber, the duty on logs may be removed.

When the Duke of Sutherland was in the city recently he paid a special visit to the Royal City Saw and Planing Mills to inspect the ready-made houses manufactured by the B.C. Mills, Timber and Trading Company. He expressed himself as delighted with the idea, and asked many questions regarding their construction.

Mr. John Butler, of Woodstock, who is in the province, may engage in the shipment of ties to Japan, where there is a large market.

The Government is offering for sale by tender the timber of the concession granted to an American pulp company at Quatsino, and on which it was found the greater portion by far of the timber was cedar and fir.

An increase of $150,000 over the estimated revenue from lumber indicates that there is considerable doing in timber. Large limits are being taken up by lumbermen in anticipation of future activity, principally when the Grand Trunk Pacific is being constructed and when the Panama canal is completed. Americans, particularly, recognize the fact that British Columbia will in a few years be the principal source of the lumber supply, and they are largely interesting themselves. Development of the interior of the province has created a good local demand for lumber, and much timber is also being taken up there.

SALE OF QUEBEC TIMBER LIMITS.

The annual sale of Quebec timber limits took place in the Parliament Buildings, Quebec, on June 22nd, and was the most successful yet held. Six thousand square miles were put up for sale but only 2,361 miles were disposed of, the total sum obtained being $377,529.58 exclusive of ground rents and fire taxes, which would bring the amount up to $396,000. The average sum obtained per mile was $160, which is the highest ever obtained for spruce limits.

Hon. Mr. Turgeon, Commissioner of Crown Lands, presided, and the sale was conducted by Mr. E. E. Tache, Assistant Commissioner, while Mr. Ls. Deschenes acted as the auctioneer.

Following is the result :

Lot 28, North-West branch River du Lievre, 30 miles on the Upper Ottawa, at $130 per square mile, to A. B. Hunt ; total, $3,900.

Lots 67, 68, 69, 70 and 71, on the River Croche, 260 miles, at $305 per square mile, to the Sherbrooke Lumber Company; total, $79,300.

Lot 73, Lake a la Carpe, 22 miles, at $18 per mile, to the Belgo-Canadian Pulp & Paper Company ; total, $396.

Lot 81, on River Ste Anne de Beaupre, 28 miles, at $105 per square mile, $2,940 ; lot 82, 27 miles, at $165 per square mile, $3,455 ; lot 83, 37 miles, at $300 per square mile, $11,100, all to John Breakey.

Lots 84, 85, 86, 87 and 88, River au Salmon, Lake St. John West, 296 miles at $130 per square mile, to W. H. Cleveland; total, $38,480.

Lots 102, 103, 104 and 105, River Manicouagan, at the Saguenay, 200 miles, at $130 per mile, to Lefebvre & Mahon ; total, $26,000.

J. S. FINDLAY - OWEN SOUND, ONT.

1¾ miles, to Mr. Lovering, for $235.

1,004 miles in the St. Maurice Agency, at $105 per mile, to John Breakey, total, $105,420; also 450½ miles in Gaspe Centre Agency, at $250 per mile, to John Breakey; total, $115,675.

On a number of lots the upset price was $200, and several offers were made of $250 a mile, but Hon. Mr. Turgeon in the interest of the province withdrew these lots, preferring to hold out for increased prices at the next sale.

B. C. TIMBER LIMITS FOR SALE.

The Commissioner of Lands and Works, Victoria, B. C., is calling for tenders up to Wednesday, July 12th, for licenses to cut timber on a limit situated at Quatsino, on Vancouver Island, and known as, 1st, Lot 177, Rupert district, containing 6,452 acres, license fee, $1,411; 2nd, Lot 178, Rupert district, containing 5,034 acres, license fee, $1,102; 3rd, Lot 179, Rupert district, containing 1,364 acres, license fee, $298. The competitor offering the highest cash bonus will be entitled to special licenses covering the limits, renewable annually for a term of twenty-one years. Each tender must be accompanied by a certified cheque to cover the amount of the first year's fees and the amount of bonus tendered, and also a certified cheque for, in respect to Lot 177 $4,250, in respect to Lot 187 $2,865, in respect to Lot 179 $1,156, being the cost of cruising and surveying the limits.

The limits contain no less than 340,780,000 feet of merchantable timber, made up as follows:

On Lot 178: Fir, 38,765,000; cedar, 90,745,000; hemlock, 40,540,000; balsam, 24,565,000, and spruce, 4,300,000.

On Lot 178: Fir, 7,725,000; cedar, 48,920,000; hemlock, 18,100,000; balsam, 21,000,000, and spruce, 7,040,000.

On Lot 179: Fir, 4,300,000; cedar, 20,960,000; hemlock, 7,560,000; balsam, 6,075,000, and spruce, 175,000.

The total timber is: Fir, 50,790,000; cedar, 160,635,000; hemlock, 66,200,000; balsam, 51,640,000, and spruce, 11,515,000.

TIMBER LIMIT TRANSACTIONS.

James Dobson, of Stoney Creek, N. B., recently purchased from Mrs. Bliss Steeves, of Hillsboro, N. B., 75 acres of timber land for $8,000, or at the rate of over $100 per acre.

Youdall & Company, of Vancouver, B. C., recently put through a sale of cedar and fir limits to a Seattle firm comprising 26,000 acres.

A. H. Sawyer, of Calais, Maine, has sold his timber limits and mill in the vicinity of Hartland, N. B., to F. A. Sayre, of St. John, N. B., and has retired from business. The timber lands comprise 16,000 acres held in fee simple and 100 square miles leased from the New Brunswick Government. The output of the mill will hereafter be shipped from St. John.

CURRENT TRADE CONDITIONS.

ONTARIO.

The lumber market is showing some indications of midsummer quietness but without any impairment of its strong tone. The manufacturers appear to have the utmost confidence in the stability of conditions and are showing no disposition to cut prices. A large percentage of this season's production of white pine lumber has already been contracted for, and this, notwithstanding that one or two of the largest wholesale dealers have contracted for considerably less stock than during the corresponding months last year. A visit to some of the largest manufacturing points on the Georgian Bay shows that there is not a great deal of white pine which has not already passed out of first hands. During the past week we have been told of increased inquiries for stock for export to Great Britain, and if the next few weeks should witness an improvement in this direction the lumber trade would be greatly encouraged. Shipping is not active, the present time being between seasons; the old stock is nearly all shipped out and much of the new stock is not yet in shipping condition. Many manufacturers are watching the hemlock market very closely, but we have not learned of any disposition to sacrifice stock, the general opinion being that hemlock is still too cheap.

Birch and basswood represent the two extreme conditions of the hardwood trade. The former is very strong and active, while the latter is almost correspondingly weak and quiet. Considering the slump in basswood prices which has taken place during the past few months, some recovery would seem to be in order.

QUEBEC AND NEW BRUNSWICK.

As the result of the strike of carpenters in Montreal, the movement of lumber in that city has slackened, and if it should continue for any length of time, the effect upon the local lumber market will be quite unfavorable. An early settlement is looked for, however, when building operations will be resumed with increased activity and the lumber demand revive accordingly. Prices of most kinds of lumber are firm. Perhaps the feature of the market is the demand for birch both for home consumption and export. The returns show that 197,600 cubic feet of birch and maple timber was received at Quebec up to June 30th of this year, as compared with 111,960 cubic feet for the corresponding period of 1904. Elm also shows a much larger production, the figures for this year being 399,000 cubic feet, as compared with 131,000 cubic feet in 1904 and 216,000 cubic feet in 1903. The quantity of waney white pine received at Quebec is about 100,000 cubic feet less than last year.

Reports from the Upper St. John River indicate more favorable log driving conditions during the last ten days. Considerable rain has fallen and the river has risen materially, The probabilities now are that the estimates as to the total volume of the hang-up of logs will have to be modified somewhat in order to be correct. The opinion prevalent among those well versed in these matters is that the figures will aggregate from 25,000,000 to 30,000,000 feet, which amount is participated in by perhaps a score of operators.

While a hang-up of these dimensions is bound to cause a scarcity of logs in several cases, most of those interested have enough in safe water to supply their mills for the greater part of the manufacturing season. Again, it is possible that much of the quantity mentioned might come forward later, although such an event would require remarkably heavy rains.

UNITED STATES.

The lumber trade of the United States continues to reflect most satisfactory conditions. Although the demand is not as heavy as in the spring season, still there is no accumulation of stock, and orders are being refused on account of inability to supply seasoned material. Much of the lumber in the yards is still too green for shipment. The shipments of white pine lumber from Minneapolis for the first three weeks in June were greater than in any other year since 1901, which is an indication that manufacturers have marketed a large quantity of stock this year. The demand for white pine for building operations is enormous and if it should keep up

until well into the fall some items of pine are almost certain to advance in price. Hemlock is in fair supply but is going rapidly into consumption, dimension having the greatest call. Notwithstanding that hardwoods do not exhibit as much strength as pine, nothing but an optimistic view can be taken of the future of that market. Considering the cost of production, prices are relatively low and manufacturers will hold their stock rather than sell below present prices. The strongest items are plain-sawed white and red oak, birch and ash. There is also a fair enquiry for elm. The hardwood flooring people are enjoying a good trade and many of them find the capacity of their factory taxed to the utmost. Red cedar shingles are practically unchanged, but in some markets are showing signs of a little more strength.

GREAT BRITIAN.

British importers of lumber still seem to lack confidence, and although the quantity contracted for is exceptionally small, very little business is being done. The London consumption shows a marked falling off as compared with one year ago, and the publication of the figures has caused buyers to be even more cautious. Recent sales of White Sea lumber have been made on a basis of £8 for third quality deals, which represents a considerable drop from the prices which were asked earlier in the year. It is a question if importers have not become too pessimistic, as they are likely to discover a considerable shortage in the supply towards the approach of winter. It may then be too late to acquire stocks, whereas those who purchase at prevailing prices and carry the lumber for a short time are likely to profit thereby. When the present war is finally terminated, the lumber trade will doubtless improve. Pine deals have been selling slowly, as few shippers have made any concession in price. Red pine deals are not finding favor and are difficult to dispose of. Spruce deals have been offering freely and have declined slightly in price, recent sales having been made at £7 5s per standard c.i.f. Liverpool. There is a better demand for hemlock deals, and birch logs are in fair demand. Heavy consignments of American oak planks have been received at London, with the result that prices have weakened.

STOCKS AND PRICES.

Mill run norway at Ashland, Wis., is bringing from $15.50 to $16.50 and No. 3 and better inch about $19.

The H. M. Loud's Sons Company, of Au Sadle, Mich., have sold 2,000,000 feet of hemlock timber to come to Ontario for heavy work.

John M. Chisholm, of Winnipeg, has been awarded the contract for lumber and building supplies for Stoney Mountain Penetentiary for the next fiscal year.

Montgomery Bros. & Company, of Buffalo, have found box lumber so scarce lately that they brought a canal boat load from Tonawanda and have kiln dried some of it to keep their mill running.

The work at the booms at Fredericton, N. B., has been completed. The total rafting operations for the season, unless there is a raise of water sufficient to bring out some more logs, at the Mitchell, Douglas and Sugar Island booms this year will be about 48,000,000 feet.

The Scott Lumber Company, of Fredericton, N. B., have received word that the corporation drive on the St. Francis river is out. The logs, however, will be hung up on the Maine St. John. Charles Miller has some 8,000,000 feet in the drive, the Scott Company 2,000,000 feet and Edgecombe & Eaton about 15,000,000 feet.

Following is a comparative statement of timber, etc., measured and culled at Quebec up to July 4th, as reported by the Supervisor of Cullers :

	1903	1904	1905
Waney White Pine..	611,480	987,880	883,640
White Pine.....	80,600	69,920	61,410
Red Pine.....	40	3,000	920
Oak	380,640	121,760	9,680
Elm.....	216,000	131,400	399,200
Ash.....	34,160	12,240	8,720
Butternut.....			120
Birch and Maple....	132,840	111,960	197,600

The schooner Carisande, with fence posts and shingles for Port Stanley, Ont., ran on the docks in the Detroit river and was taken into the dry dock at Detroit as the result. The steamer Shamrock, with a cargo of lath from Midland, Ont., to Toledo, Ohio, became waterlogged on Lake Huron and was abandoned by her crew. She was picked up later by another steamer and towed into Alpena.

Concerning basswood a Wisconsin manufacturer says : " My experience is that the demand shows some improvement. Lately we have been getting as much as $33 for firsts and seconds, $23 for No. 1 common and $16 for No. 2 common. This is about $1.50 over the list. I find that cull, or No. 2 common basswood, is a ready seller at $16. To-day I sold 1,500,000 feet of straight mill cull at $15 Chicago delivery, which is 50 cents above the list. I understand that some sales of basswood are being made in Chicago at $2 less than the prices I have quoted, but I think that if those having basswood will carefully look into the market they will find that there is no necessity for selling at less prices than the above. Our company has been buying basswood right along and we are confident that it will be much higher in price this fall. We are not urging it on the market at present, believing it good stock to hold.

From Messrs. S. P. Musson, Son & Company's review of the Barbados market we extract the following :

We have no arrivals to report during the fortnight, but understand that a couple of cargoes of white pine are expected, which will meet with a very flat market, as dealers are well supplied with this description, and will expect to make further purchases at reduced prices. Spruce is not in heavy stock, but as the crop is virtually over, the demand for this is light, and next arrivals would probably not realize late values. Receipts of shingles have been nil, but we shall no doubt soon receive shipments of Long Cedar from Gaspe, and as stocks of these are very small, first arrivals should sell well. Cedar laying on the other hand are in full supply, and a cargo of these which is near at hand will meet with a rather dull market.

FIRES.

A woodworking factory at Sackville, N. B., owned by A. B. & S. Copp, was destroyed by fire last week.

A SPLENDID ROUTE.
The Wisconsin Central Railway is justly termed the "Sportman's Line" because it reaches into and through the very heart of the choicest hunting grounds in America.
The very best wild fowl shooting of the entire North is reached ONLY by this line. Hundreds of beautiful lakes abounding in wild rice and celery attracts myriads of ducks and geese and afford the finest kind of cover and the choicest shooting to be found the country over.
The Wisconsin Central Railway caters especially to the sporting public and during the various seasons for hunting and fishing furnishes daily information to its patrons as to local conditions anywhere along its lines upon application to the nearest ticket agent. It also arranges its train service with special reference to the convenience and comfort of sportsmen, and its employes are constantly on the alert to make travel over their lines pleasant and comfortable.
This line offers the best route between Chicago, St. Paul, Milwaukee, Minneapolis or to Lake Superior points via Ashland, Wisconsin.

REDUCED RATES ON SHINGLES.

The Great Northern Railway has decided to meet the through rate quoted by the Canadian Pacific Railway on shingles from the Pacific Coast to the East. Following is a comparison of the old and new rates from Seattle and Puget Sound points:

	Old.	New.
Oshawa, Ont.	$.80½	$.78½
St. Catharines, Ont.	.75	.72½
Peterboro, Ont.	.82½	.80
Sarnia, Ont.	.72½	.71
Montreal, Que.	.82	.80
St. Johns, Que.	.87	.82
Point Levis, Que.	.90	.82

British Columbia shingle manufacturers who have always held the market of Eastern Canada hitherto do not fear the effect of this new tariff on their business. They hold that having had this rate since 1903 they have been giving an advantage to the trade, and now that the Great Northern has merely met the rate it is not a menace to their business. It is also their claim that the shingle product of British Columbia is superior to that of Puget Sound mills, which will help them to hold their trade.

BUFFALO LUMBER RECEIPTS.

BUFFALO, June 20th, 1905.—The lake trade has been for the most part confined to pine for this port, and, though there will be a revival of the movement of lake hardwood, it will not be so great as it was expected to be some time ago, as there was an overstock of it in certain quarters. Scarcely anything arrived by lake in April, as the ice held the fleet back. Now, with a fair amount in there is something of a lull and freights are very dull. Following is the list to June 1:

	May, 1905	Season 1905	Season 1904
Lumber feet	20,356,000	20,906,000	5,654,000
Shingles number	28,977,000	30,047,000	725,000
Lath, pieces	336,500	336,500	3,075,000

It will be seen that shingles are prominent now, as lath was early last season. The shingle trade is demoralized by the sending out of a host of consignment lots from the Pacific coast, which were shipped on the supposition that the demand was good and they could all be sold on the way. The demand is good, but not good enough to absorb all that came this way, so quite a good part of the shipment had to be sacrificed. The movement has now steadied down somewhat, but prices are still low. Lath is very scarce and high. The big lake movement of it last spring did not last, so there is not now much chance of its amounting to much.

LUMBER CONDITIONS IN MICHIGAN.

Excessively wet weather during May and for the most of June has somewhat interfered with the lumber business at Bay City and Saginaw, making it difficult to handle lumber to advantage. In general, however, the volume of business is fairly good and prices for white pine are firmly held. In fact, coarse lumber used particularly in the manufacture of box shooks is held at such prices for pine that box manufacturers are using hemlock and basswood culls for shooks, and the same can be bought at considerably less prices than pine is held at. Mill culls of pine are worth $14 and $15, while basswood culls, which make good box shooks, have been bought at $8 and $10.

Pine dealers are getting in supplies, the receipts during May being much larger than they were for the same month last year. There came into the Saginaw river during May 18,829,056 feet of pine lumber, of which 12,744,066 feet went to dealers in Bay City and 6,085,000 feet to Saginaw dealers. Indications now are that the receipts of lumber here this season by lake will be fully as large as last year. Handy Brothers bought 15,000,000 feet at Duluth, which is now coming along, the firm having chartered a steamer that brings down over a million feet at a trip. The bulk of the lumber coming here comes from the Georgian Bay district. Mershon, Schuette, Parker & Company have received a few cargoes and more is coming along.

The hardwood business is fairly good and manufacturers and dealers state that it is not difficult to sell lumber. Maple has not been quite so firm, but it is moving well, and when converted into flooring brings $3 a thousand more than it did last year. The flooring firms all report a fair business and all are busy. Basswood, elm and ash are doing very well and are firmly held.

There is a good demand for hemlock and it sells rapidly. There has been very little accumulation of hemlock owing to the demands of the trade, and some firms are selling stock green from the saw.—New York Lumber Trades Journal.

Many persons are always in the market for lumber, and the manufacturer or dealer who advertises what stock he has for sale is certain to get more business than his too conservative competitor. If you wish to get the best results from advertising, place your announcements in the "Wanted and For Sale" Department of the CANADA LUMBERMAN Weekly Edition.

B.C. PINE IN ENGLAND.

This lumber, says the Timber News, of Liverpool, Eng., is now finding a wider market. A few consignments from time to time find their way to the London market, where it is sought after by a few importers, but Germany is now interesting herself in the wood—principally in the smaller sizes for "deckings," for which it is particularly suitable. The better qualities are bought for this purpose, and, when well manufactured, a nicer and more satisfactory wood cannot be found. Cargoes of timber and planks are sold periodically round the Coast. Large sailing ships are chartered to bring forward the stuff, which can be seen occasionally unloading in the Surrey Commercial Docks. The voyage from Vancouver generally takes five or six months, so there is plenty of time to sell before arrival.

GETTING AT THE BOTTOM OF IT

That's the thing to do —

Investigate a little and see if you are getting as good service, as good prices or as good stock as you ought to.

If you are not, then it is high time to let us hear from you—for we have the goods and are able to make a deal with you that will be satisfactory to all concerned.

WISCONSIN HARDWOODS.

Of Wisconsin hardwoods the American Lumberman says:

Hardwoods are dull. Rock elm is in demand by the agricultural machinery factories, but soft elm is very quiet indeed. Most of this is used by furniture manufacturers and they are not buying, as they have considerable stock on hand. Besides, soft elm is not as plentiful now as five or six years ago. For instance, one firm cutting 2,000,000 feet of hardwoods this year reports 126,000 feet of elm, or only about 6 per cent. the bulk of its stock being birch, basswood and maple. A few years ago soft elm was about one-quarter of the total, but it is getting scarcer and many factories are using birch to the exclusion of elm. Soft elm always will be a favorite wood for certain classes of trade, but it is not as popular as it was at one time.

Maple and birch are selling to some extent, the first to implement concerns and the second to planing mills. There is some demand for ash, oak and basswood also, but there is more lumber than buyers However, this seems to be a midsummer dullness only and trade will start up stronger than ever in the fall. Prices are firm and values steady.

BRITISH COLUMBIA NEWS.

B. F. Butler, of Sandpoint, and Robert Miller, of Rathdrum, have a tie contract on the Spokane and International Ry. It will require about 400,000 ties for the main lines, from the International line to Spokane. The contract amounts to over $100,000.

A deal was recently concluded by which New Wesminster parties purchased the sawmill at Chilliwack from the estate of Jacob Zink. The new owners are George Blakely and Peter Grant, of the T. J. Trapp & Co., and J. Rennie and Harry Pollard, late assistant millwright and sawyer at the Brunette sawmills. Mr. Blakely states that the mill will be put in operation at once. At the figure given for it there is an excellent opportunity to make a good thing. Mr. Grant, with Messrs. Rennie and Pollard, will remove to Chilliwack.

Mayor Coburn, of Ladysmith, recently visited the cedar limits owned by the Ladysmith Lumber Company on Howe Sound.

A. P. Stevenson, who leased the mill of the Moyie Lumber Company at Moyie, B.C., and has purchased the logs in the boom, has commenced operations. There are upwards of two million feet of logs to be cut and it will take about two months to complete the work. The capacity of the mill is about 50,000 feet per day. The lumber will be loaded and sent to the Hanbury planing mill at Elko just as it comes from the saw. Provided more logs can be procured the mill will be kept running until the end of the year. There are several parties already figuring on such a contract. The resumption of operations at this mill means much to Moyie.

The Canadian Timber & Sawmills, Ltd., have taken a step which will tend to their mill at Trout Lake operating at an early date. The mill was closed down in August last when it was generally conceded it was paying for itself, and a deadlock has remained ever since. The principal creditor of the company was E. L. Kinman, and the matter has been in litigation ever since the shutdown. It is now stated that Mr. Kinman has accepted an offer of settlement made by the company and that the mill will resume operations.

The formation is announced of a lumber company to be known as the Chilliwack Lumber Company, consisting wholly of New Westminster men. It is capitalized at $10,000, and will, it is understood, take over the mills at Vedder Crossing, which will be reopened shortly. The board of the company is as follows: D. B. Hall, president; J. H. Ashwell, vice-president; S. A. Cawley, secretary-treasurer; James Bailey, H. Gervan and S. Meller. Mr. Fraser, late of the Royal City Mills, will act as superintendent.

A deal of considerable importance was concluded last month. The Jenkins Lumber Company, of Blaine, has purchased on the North Arm of the Inlet timber limits containing about 130,000,000 feet. Messrs. Peers and Clement are now opening a camp there, and will carry on the work of logging the claim. The same company has limits comprising about 15,000,000 feet of timber at Howe Sound. A. J. Faber, of Vancouver, has opened another camp for the same firm farther up the coast.

A dispatch from Wilmer, B.C., dated June 17th, says: The Columbia River Lumber Company last week purchased a whole block of land in Athalmer, fronting on Main street and adjoining the river. It is given out that the company will erect a building 100 feet long to be used as a store and warehouse for their freight, from which the logging camps are to be supplied. It is now evident the company intend working a big force of men in this vicinity next season.

The Weekly Lumberman — Published every Wednesday, contains reliable and up-to-date reports of market conditions and tendencies in the principal manufacturing districts and leading domestic and foreign wholesale markets. A weekly medium of information and communication between Canadian timber and lumber manufacturers and exporters and the purchasers of timber products at home and abroad.

The Monthly Lumberman— A 44-page journal, discussing fully and impartially subjects pertinent to the lumber and wood-working industries.

WANTED AND FOR SALE

Advertisements will be inserted in this department at the rate of 15 cents per line each insertion. When four or more consecutive insertions are ordered a discount of 25 per cent. will be allowed. This notice shows the width of the line and is set in Nonpareil type; 12 lines make one inch. Advertisements must be received not later than 4 o'clock p. m. on Tuesday to insure insertion in the current week's issue

FOR SALE — LARGE QUANTITY OF 3" Common Spruce. Barge or car lots. Apply BOX 111, CANADA LUMBERMAN, Toronto, Ont.

ENGINE—12"x18", SHAFTING, HANGERS, Pulleys, Jointer, Double Surfacer and Resaw; a snap. C. R. PETERKIN, 150 Bay Street, Toronto.

WANTED—1", 5/4", 2" COMMON BEECH, Birch and Hard Maple. 5/4 Beech C & B. 1", 6/4" 2" Wormy Chestnut. All dry. R. E. KINSMAN, Hamilton, Ont.

FOR SALE.

SMALL STEAM SAW MILL WITH DOUBLE Edger and Cut-off Saw; capacity, eight to ten thousand feet per day. Also a timber license of sixteen square miles; mill built in center of the l mit; any quantity of timber; reason for selling, going out of the business; price three thousand dollars. Address Box 75, Powassan.

FOR SALE

OVER FOUR MILLION FEET OF STANDING timber and land composed of chestnut, whitewood, oak, ash, maple, basswood, elm, beech, with 10 M capacity mill; 2 railways running through property; good market for cordwood, tile wood, stove wood, hubs, spokes and everything in the product of a sawmill—including planing and matching machine, shingle machine, and moulding machine; containing 350 acres; will be sold either in whole or part. Railway spur on property; the best lot of timber in these parts. Original forest. J. C. SCHLEIHAUF, Owner, Bismarck Station, West Lorne P. O., Ont.

POSITION WANTED—BY W. PINE LUMBER Inspector, as Buyer or Inspector. Address Box 233, CANADA LUMBERMAN.

WANTED—TO HEAR FROM SOME FIRM requiring Maple Squares, or Table Legs. Address EDGAR A. WOODMAN, ROSSVILLE, York Co., N. B.

WANTED — TEN THOUSAND CORDS Hard and Soft Wood; also same quantity of Slabs. SIMCOE WOOD AND LUMBER CO., 52 Yonge Street Arcade, Toronto.

FOR SALE—A 30 FOOT WATEROUS GUNshot steam feed, 9" cylinder, in good condition, used only a few months. For particulars apply to MADISON WILLIAMS, Port Perry, Ont.

CEDAR FOR SALE — 10,000 PCS. ROUND Cedar 8-16 and 25 feet long, at the Spanish boom. Also cedar, pine and spruce lumber for sale here at Larchwood. JAMES McCREARY, Larchwood, Ont.

FOR SALE CHEAP—ONE GOOD DOUBLE Cylinder Set of 24 in. Cards and Picker, also one run "Roller Process" Grist Mill Machinery Outfit complete. Address EDGAR A. WOODMAN, ROSSVILLE, York Co., N. B.

WANTED AT MIDLAND.

AN EXPERIENCED SHIPPER WHO UNderstands the English export grades. Apply, THE TURNER LUMBER CO., LIMITED, Midland, Ont.

LUMBERMEN—YOUNG MAN WITH GOOD business and mechanical training from stump to lumber pile wants position. Will take junior place if ability ensures steady work and promotion. Address Box 220, c/o CANADA LUMBERMAN.

FOR SALE---WHITE PINE

1 CAR 1x12 AND UP, NO. 1, 2 AND 3 COMMON, 80% 13" and up, 1 car Basswood, all bone dry. JOHN M. SHAW, Forest, Ont.

HAVE YOU ANY STOCK WHICH YOU wish to sell? If so, make the fact known to probable buyers by placing an advertisement in the Wanted and For Sale Department of this journal. Address, CANADA LUMBERMAN, Toronto.

FOR SALE

A SAWYER—ONE WHO CAN CUT ALL kinds of lumber for small Circular Saw-Mill cutting from 10 to 15 thousand ft. per day. Will have about three months cutting. Write at once, stating salary, to CURRY & THRASHER, Deux Rivieres, Ont.

FOR SALE

50,000 ft. 1" Basswood Culls.
40,000 ft. 1" Ash Culls.
Immediate shipment, exceptionally good culls.
One car each 1, 2 & 3" common Quebec red birch.
Apply Box 111, CANADA LUMBERMAN, Toronto.

CURRENT TRADE CONDITIONS.

ONTARIO.

Changes in lumber conditions are not usually important at this season of the year, and the present time is no exception. A steady trade is reported from all parts of the province, with building material representing the bulk of the demand. The greatest activity pertains to hemlock and the lower grades of pine. Box lumber is showing strength and mill culls are firmer than some other grades. Speculative buying is not much in evidence, as prices are not likely to advance very much from current quotations. Nevertheless, if the harvest should turn out satisfactorily as now seems probable, general conditions will be unusually good and the foundation will be laid for a healthy fall demand which may bring with it higher prices.

The high price and scarcity of pine has of late turned attention to hemlock, and now tamarac and balsam promise to come into increased consumption. The price in Western Ontario is $15 to $16 for mill run. Spruce is in fair demand, with a slightly weaker tendency than earlier in the season. Of the hardwoods nothing new can be said. They are lagging a little but will doubtless pick up very shortly, under the lead of birch. Lath is unchanged. No. 1 spruce is quoted at $2.30, the same as No. 2 pine. A considerable trade is being done in cedar posts, which are quoted around 13 cents.

QUEBEC AND NEW BRUNSWICK.

The difficulty of securing vessels to carry lumber from New Brunswick ports to the United States is responsible for much less activity than would otherwise prevail, for the demand is good and there is plenty of lumber available for shipment. Spruce boards are generally firm in price, while deals for the British market have no more than held their own. The quantity of the latter which will be manufactured this year will likely be considerably less than the average. A very favorable feature was the sale of unmarked logs which took place recently at Fredericton. The prices obtained for spruce, pine and hemlock were much in advance of those realized one year ago, which is an indication that manufacturers have confidence in the market. Spruce logs brought $14.30 as compared with $11.10 in 1904 and $13 in 1903. Pine logs brought $12.15 as against $7 in 1904 and $11.25 in 1903. The price obtained for hemlock was $4.80, an advance of $1 on last year's figure. The low price of cedar shingles was doubtless responsible for the poor demand for cedar, which brought only $6.90, the same as one year ago. There does not appear to be any signs of an early development in New Brunswick cedar shingles, which are, if anything, a little weaker than a week ago. Extras are now quoted at $3.25 to $3.30 for Boston delivery.

UNITED STATES.

The volume of the lumber business is remarkably good for this season of the year. The healthy condition of the building industry, which shows a material expansion as compared with one year ago, has done a great deal towards keeping up the lumber demand, and at the present time there are no indications of any falling off in building operations. The mills have not been able to accumulate any stock, and as a brisk fall trade is anticipated, conditions would seem to point to firmness of prices throughout the year. There may be temporary recessions in certain kinds of lumber due to local conditions, but the general lumber market is almost certain to be characterized by moderate strength. At Minneapolis sawing has been restricted by high water, but at most producing points the mills are operating to their full capacity. The eastern markets are in good shape. At Buffalo No. 2 hemlock and shiplap have been advanced 50 cents a thousand, to take effect at once. Orders are so plentiful that it was felt that this advance was justified even at this midsummer season. Spruce continues very strong with respect to frames and even random is showing a better tone. Some Canadian stock is said to have been offered in New York a little below the market.

The hardwood trade is suffering from summer dullness. Maple is rather heavy

and can be bought at Michigan points at $14 and $15 for log run. Birch continues strong and active and basswood quotations are reported to be showing some firmness. Firsts and seconds are bringing $40 at Tonawanda in mixed car lots.

GREAT BRITAIN.

It is still difficult to dispose of lumber in Great Britain beyond that required for immediate consumption, and this is not very great on account of the dullness in the house building and furniture trades. Buyers are holding off and are seemingly prepared to pay higher prices later rather than enter the market under present conditions. The small stocks held at the importing centres would, ordinarily, cause some speculative buying, based on the healthy statistical position and the consequent probability of an advance in prices, but nothing of this kind is in evidence at the present time. Deals are in very little demand, as has been the case all season, but scantlings and small boards are moving quite freely and are showing exceptional strength. While lumber prices generally have receded a little during the past few weeks, 2x5 inch scantling has hardened to the extent of 5s per standard. The market for spruce is a shade easier. In Manchester there is a very fair demand for this class of lumber and a scarcity of the best quality. This is one of the most satisfactory markets for spruce lumber and the consumption is steadily increasing. The Timber Trades Journal, of London, England, refers to spruce as follows: As we predicted a fortnight ago would take place, lower prices have been accepted for two or three cargoes close to their port of call. Some buyers profess to a belief that a further drop will take place, and consequently are still holding off. This, however, is largely mere conjecture; and, in our opinion, buyers would be wise to carefully consider the cheap cargoes now being brought to their notice. One feature of the spruce market at the present time is the great disparity which exists in quotations for cargoes of about equal quality and specification, especially in shipments from St. John. There is, in fact, a difference of opinion as to the value between various shippers from this port of fully 12s 6d per standard but this is partially explained by the fact that the cheaper cargoes are invariably fairly prompt, while the dearer quotations are for shipments of later date.

THE GLASGOW MARKET.

Under date of June 30th Messrs. Edmiston & Mitchells review the Glasgow lumber market as follows:

In issuing our June report we append a comparative statement of imports, deliveries and stocks, as at 30th June, for the preceding three years. In Quebec goods, as will be observed, there is a considerable reduction in the stock of logs and deals as compared with this time last year, and in the case of lower port pine and spruce the difference is very much more noticeable. Of other items showing diminished stocks may be mentioned hewn pitch pine, Californian redwood, teak logs, and oak planks, while only in the cases of Oregon and Kauri pine is there an increase of any importance.

As regards the six months' consumption, the principal items showing a marked increase are waney boardwood, lower port pine and spruce, sawn pitch pine, Californian redwood, and teak logs and planks, while a decrease is observable in elm logs, Quebec pine and spruce, hewn pitch pine, greenheart and American hardwoods. Taking the import as a whole, it is considerably less up to 30th June than last year's over same period.

The favorable position of the market is largely owing to the activity in shipbuilding, as there is nothing in the housebuilding trade to account for an increased consumption, nor has general trade in the city and neighborhood been at all brisk. Values have, on the whole, been well maintained, and granting a continuation of moderate imports, it seems reasonable to anticipate that there will be no great change in this respect, but at the same time it is evident that immoderate shipments would undoubtedly seriously affect a market which in no sense can be described as active. During the past week or two there has been some little evidence already of prices being eased somewhat to avoid storage expenses, noticeably so in the case of pine and spruce and American hardwoods.

WHITE PINE.-The import consists of 300 to 400 loads per liners via Montreal, the bulk of which has gone to the ponds. The stock of waney is 4,000 loads, being 1,000 loads less than at this date last year, and square pine is reduced about 500 loads. Business still continues quiet, and while there have been one or two fair sales during the month prospects are anything but bright.

OAK.—There has been no import during the month, and stocks of Quebec oak are considerably reduced, being about 1,100 loads, as against 2,300 loads last year. The stock of States oak is still heavy, and the consumption has fallen off considerably. Prices are easier.

ELM.—The stock consists of only 241 loads, being a striking contrast to the three previous years, when it averaged 2/3,000 loads at this date. The demand is good and new arrivals will command fair prices.

QUEBEC BIRCH.—The import so far this year is about seven times that of last year and more than double the quantity imported in 1903. During the first few months of the year prices were very firm, but as shipment succeeded shipment they gradually weakened and are now considerably easier than they were even a month ago. Buyers are now pretty well supplied and are disinclined to increase their stock unless they can do so at their own prices. A nice shipment of birch planks came to hand this month and was disposed of "ex quay." Lower Port Birch.—Occasional sales are reported of retail lots, and prices are easier than they were.

QUEBEC ASH. — The import, though small, has been quite sufficient to supply the moderate demand. One or two small parcels came to hand during the month, and were disposed of "ex quay" at about 2s. per foot.

DEALS, ETC.—The import during the month has been on a moderate scale, though more than sufficient for the market's requirements, a good portion having had to be stored. Stocks, however, are low, and prices keep fairly firm. Values are unaltered, viz.:—

Broad First Pine Deals.—£33 to £35; 11-inch, £30 to £32; ends and non-dimensions, £23 to £25.

Second Pine Deals.—11-inch and up, £17 to £19; ends and non-dimensions, £13 to £14 10s.

Third Pine Deals.—11-inch and up, £11 to £14; ends and non-dimensions, £9 10s. to £10 10s.

Red Pine Deals.—9 and 11 inch, £9 to £10; narrows, £7 to £8 10s.

First Pine Sidings and Strips.—9 to 10 inch, £23 to £24; 11 to 12 inch, £25 to £26; 13 to 14 inch, £27 to £28.

Spruce Deals.—9-inch and up, £8 5s. to £8 15s.; 7 and 8 inch, £7 5s. to £7 15s.

Lower Port Pine and Spruce.—9-inch and up, £8 to £8 10s.; 7 and 8 inch, £7 to £7 10s.

A SPLENDID ROUTE.
The Wisconsin Central Railway is justly termed the "Sportman's Line" because it reaches into and through the very heart of the choicest hunting grounds in America.
The very best wild fowl shooting of the entire North is reached ONLY by this line. Hundreds of beautiful lakes abounding in wild rice and celery attracts myriads of ducks and geese and afford the finest kind of cover and the choicest shooting to be found the country over.
The Wisconsin Central Railway caters especially to the sporting public and during the various seasons for hunting and fishing furnishes daily information to its patrons as to local conditions anywhere along its lines upon application to the nearest ticket agent. It also arranges its train service with special reference to the convenience and comfort of sportsmen, and its employes are constantly on the alert to make travel over their lines pleasant and comfortable.
This line offers the best route between Chicago, St. Paul, Milwaukee, Minneapolis or to Lake Superior points via Ashland, Wisconsin.

(Correspondence of the CANADA LUMBERMAN.)

Ottawa, Ont., July 10, 1905.—The market at the present moment is in a very fair condition, many inquiries coming in for all lines of stock. On account of the low condition of the water, it is possible some of the logs may be hung up; this will in itself have a tendency to strengthen the prices. Although the contracts this season are not so numerous or large as last, the prices in nearly all cases have been maintained. For a while, during the earlier part of this season, the indications pointed to a very unsatisfactory year—this has now all passed off and the demand is in a healthy conditition.

The chief factors in hardwoods have been birch and black ash, with the result that these stocks at the present moment are very low with prices on the upward tendency. Birch, mill run, is bringing $23 and brown ash $21 at the mill. Spruce, which is a very great factor in the Ottawa market, is getting considerable attention from the Eastern States, and many of the mills are unable to keep up with the demand. The following prices have been obtained f.o.b. cars or barge: 1"x4 to 6" spruce, $13; 1"x7, 8, 9 and 10" stocks, $15, and 1¼x9" $15.50. There are less spruce deals being manufactured this season on account of the condition of the English market, and as the prices obtained from the American and local markets are in many instances better, it will have a tendency for the future of making deal prices higher, or the manufacturers, owing to having a ready market elsewhere for their stocks, will decline to manufacture deals. The major portion of the white pine is being cut into sidings and stocks this season; the manufacturers not having sufficient inducement to put the better end of their logs into deals. The white pine in this market is generally put up into less grades than in the western markets: with a few exceptions, it is graded good sidings, No. 2 cuts, shipping cull sidings and strips, some of the mills putting up a percentage of mill run stocks.

The demand for shingles and lath is very brisk at the present moment, American buyers purchasing largely. Prices have been well maintained.

UNMARKED LOGS BRING GOOD PRICES.

The Fredericton Boom Company's annual sale of unmarked logs took place last week at the office of A. F. Randolph & Sons, Fredericton, N.B., and was very successful. Among those present were W. H. Murray, Charles Miller, Henry Hilyard, Fred D. Miles, Fred Sayre, E. L. Jewett, St. John; Fred Pond, T. D. Babbitt, Arthur Sewell, Gibson; W. P. Hanebury, St. Marys; P. Glasier, M.P.P., Lincoln; John A. Morrison, T. Lynch, John Kilburn, Edward Moore, A. E. Hanson, John A. Morrison, Jacob Hazelton, A. H. F. Randolph and others, Fredericton.

A. H. F. Randolph, who had charge of the sale, stated that the logs to be sold would include all the unmarked lumber to come through the booms this season, and would be subject to the freighter's charges. He read a statement showing the amount already rafted to be as follows:

Pine—194 pieces, containing 12,590 feet.

Hemlock—459 pieces, containing 46,390 feet.

Cedar—2246 pieces, containing 74,150 feet.

Spruce, no mark—8,353 pieces, containing 133,420 feet of merchantable, 254,099 of battens and 53,970 of condemned; also 1,336 pieces of mixed mark, containing 16,728 feet of merchantable, 46,992 of battons and 5,096 of condemned, a grand total of 500,305 feet.

The bidding was lively from the start, and the several kinds of lumber brought high prices.

The spruce was purchased by Charles Miller for $14.30 per thousand. He also bid in the hemlock for $4.80: John A. Morrison bought the cedar for $6.90 and the pine was knocked down to George A. Perley for $12.15.

The following statement showing prices obtained during the two previous years will be interesting:

	1903	1904
Spruce	$13.00	$11.10
Pine	11.25	7.00
Cedar	18.25	6.90
Hemlock	4.50	3.75

Three hundred thousand feet of cedar belonging to the Estey estate, 171,520 feet of which has already been rafted, was sold to W. H. Murray at $8.05.

F. B. Edgecombe offered for sale three million feet of the McConnell logs, but withdrew them after they had been bid up to $12.10 per thousand.

NAME WANTED.

The publishers of THE CANADA LUMBERMAN received on July 4th a letter from Pusey, Ont., containing an advertisement offering for sale some hardwood timber and enclosing a remittance, but the sender inadvertently neglected to sign his name. In the meantime the advertisement is being withheld.

J. S. FINDLAY - OWEN SOUND, ONT

NEW BRUNSWICK LETTER.

(Correspondence of THE CANADA LUMBERMAN.)

ST. JOHN, N.B., July 6, 1905.—Since my letter of June 15th, lumber business in this direction has been marked by no particular activity, although trade has been fairly brisk. Shipments to the United States have been very light owing to the continued remarkable absence of available shipping. As a natural consequence stocks of all wood goods manufactured for this market are increasing rapidly and the owners thereof find themselves in an awkward and unprofitable dilemma, with quantities of the goods on the wharves, the United States markets in a satisfactory condition in almost all lines and with no means of shipping.

"American" deals are somewhat plentiful at this port for this season of the year; 2,500,000 ft. would cover the amount fully. Prices in this line are well maintained and show every indication of firmness. For delivery during the next three months, no quotation on "American" inch spruce deals could be obtained at this date lower than: 10's and 12's, $17.50 to $18; 9's, $16; Narrows, $13.50 to $13.75 f.o.b. St. John.

Spruce lath also are, owing to the scarcity of tonnage mentioned above, rather more plentiful than the prices and conditions of the market would seem to indicate. At this date there are from 4,500,000 to 5,000,000 upon the different wharves ready to be shipped.

The increase in freight rates to U.S. has had the usual effect upon local prices in this line and quotations are being made on lath at $2.35 for non-dutiable and $2.10 for dutiable, f.o.b. schooner St. John.

The demand for New Brunswick cedar shingles in the United States is steady and prices are very uniform. Shipments from this port have been very light during the last two months. Stocks are consequently somewhat heavy and would total up to 4,500,000 of all grades. Local prices for non-dutiable are quoted at this date, f.o.b. schr. St. John, as follows: Extras $2.85; clears $2.35; 2nd clears $1.85; No. 1's .90.

The demand for one inch merchantable spruce boards, while not remarkably brisk, are steady and the indications are that prices will at least hold their own for some time to come. Like all other lines which are marketed in the United States, boards are plentiful; 2,500,000 would probably be very near the available stock. Local prices are, for non-dutiable, f.o.b. schr. St. John $12.50, and for dutiable $10.50.

The lowest freight rates obtainable on long lumber to New York are $3.75 and to Boston $3.00, with 10 probability of a decrease in the immediate future.

LUMBERMEN & SAWMILL MEN

Auction Sale of Valuable

Timber Berths, Sawmill, Logs and Lumber Business
ON THE GEORGIAN BAY

The executor and trustee of the estates of the late George M Tanner and Wm. H. Tanner, of Sturgeon Bay, Waubaushene, and known as Tanner Bros., Lumbermen. have given instructions to the undersigned to sell by public auction at the rotunda of the Board of Trade, Toronto, ON THURSDAY, AUGUST 31ST, 1905, at 3 o'clock p m, on the terms and conditions which will be announced at the time of sale, the timber berths logs, mill, plant, camp outfit, buildings, horses, etc, etc., in one lot for a lump sum. The property of the estates of the late firm of Tanner Bros, as undermentioned, namely:—

Timber berth No. 119, north shore of Lake Huron, well timbered with pine, pulpwood, etc.

*Two-thirds interest in timber berth, Township of McKinnon, well timbered with pine, hemlock, spruce, etc. *The other third of this township can be purchased privately on reasonable terms.

Timber berth No. 61—(This berth has been nearly cut out)

Logs—Six and a half million feet, B.M., of excellent pine logs to be delivered at the mill by the vendors.

Sawmill at Sturgeon Bay—Capacity, about 60 M. feet per day, with latest equipment, complete for lumber and lath. (Nearly new.) Engines, boilers, buildings, boarding house, two good residences for owners, workmen's houses, barns, horses, workshops, plant, tools, booms, chains, camp outfit, and 50 acres of freehold land.

Booming ground, extensive and safe in all weathers.

Piling ground, ample for nine million feet of lumber, with excellent shipping facilities of water or G T R. siding at mill

Terms of sale: The whole of the above properties will be offered as one lot or parcel, and subject to one bid by the vendors. Payments—Cash for the logs at $18 per 1,000 feet, B.M, plus cost of sawing up to the time of transfer, and credit allowed for all product cut. Cash for camp outfit and supplies, and for the balance, one-third in cash at the time of sale, one-third in one year, and one-third in two years, with interest at 5 per cent. Ordinary cutting conditions. For maps and further particulars apply to the estate of Tanner Bros, Waubaushene, Ontario, or to PETER RYAN, Toronto.

FOR SALE—A 30 FOOT WATEROUS GUNshot steam feed, 9" cylinder, in good condition, used only a few months. For particulars apply to MADISON WILLIAMS, Port Perry, Ont.

WANTED AT MIDLAND.

AN EXPERIENCED SHIPPER WHO UNderstands the English export grades. Apply, THE TURNER LUMBER CO., LIMITED, Midland, Ont.

LUMBERMEN—YOUNG MAN WITH GOOD business and mechanical training from stump to lumber pile wants position. Will take junior place if ability ensures steady work and promotion. Address Box 220, c/o CANADA LUMBERMAN.

1" 1905 winter cut, trimmed, all pure White Hard Maple.
1", 1½" and 2" 1905 winter cut, mill run, trimmed Hard Maple.
Write for lists and prices. The W. R. THOMPSON Co., Teeswater, Ont.

CURRENT TRADE CONDITIONS.

ONTARIO.

The past week has shown a continuation of the good business which has been in evidence all season and which has as its foundation the extensive building operations throughout practically the entire province. The extent of house building in Toronto is little less than remarkable, and one has but to visit the outlying residential districts to immediately come to the conclusion that, notwithstanding the growing use of brick and concrete and such like materials, a vast quantity of lumber is still consumed by the building trade. This demand has kept the retail market firm, even at this midsummer period, while manufacturers have all along shown the utmost confidence in the range of prices which has ruled and which has not varied to any extent for some months. Probably good sidings are the slowest grade in white pine, but in no grade are heavy stocks held and there is consequently very little pressure to sell. Mill culls have been

sold as high as $13, and box at $16 at the mill, prices which show, better than anything else, the strong undertone of the pine trade. It is understood that a considerable number of logs have been hung up in the northern rivers, which will curtail what under the most favorable circumstances would have been but a light production of lumber. As previously reported, hardwoods are a little quiet, but fall orders are expected to increase the activity in the very near future. There has been no change in conditions to affect prices, which are steady, with the manufacturers talking in favor of an advance, claiming that logs cost too much to sell lumber at present prices.

QUEBEC AND NEW BRUNSWICK.

The condition of the export trade from Quebec and New Brunswick is very far from being satisfactory, owing to the lack of demand in Great Britain. The shipments that have already gone forward have been more than sufficient and have had a weakening effect on prices. The only safe policy for Canadian shippers to pursue is to restrict shipments to the greatest possible extent, thus allowing the British market to recover. It is fortunate for shippers that production this year was curtailed to a considerable extent so that they will not have to carry over as heavy stocks as if the production had been normal. There is no doubt that shippers who are able to hold their stock for perhaps some length of time will ultimately receive much more satisfactory values than are obtainable at present. It is to be hoped that the majority of shippers will view the matter in this light and find themselves in a position to hold on to their stocks.

MANITOBA AND BRITISH COLUMBIA.

The mills in the Rainy River district as well as the mountain hills in British Columbia are experiencing an active demand for their product throughout the North-West. Building activity in Winnipeg and in the principal towns of Manitoba and the Territories continues, and if the present prospect of an abundant harvest should be realized, a steady demand for all kinds of lumber may certainly be looked for and may be expected to continue throughout the coming year. Rumors are abroad that an understanding has been reached by nearly all the lumber manufacturers in the mountain district under which the product of their mills will be disposed of through a selling agency, as is now done by the shingle manufacturers on the Coast. The truth of this rumor has not been verified. Whether or not such an arrangement has been made it seems quite certain that with a good harvest will come a steady demand for lumber at fair prices.

UNITED STATES.

The United States market appears on the whole to be in a satisfactory condition for this season of the year. The returns show an increased importation of Canadian timber products, the total receipts for the month of May being 88,868,000 feet as compared with 52,626,000 feet in the corresponding month of 1904. For the eleven months ending with May the total receipts were in excess of 1904, but considerably under those of the corresponding period of 1903. Prices this year are firmer, averaging for May $15.59 as against $14.55 for May, 1904, and $25.11 for the eleven months ending with May, 1904. The demand for spruce for building purposes is reported to be broadening, and timber of this class grown in West Virginia is finding its way to the New York and Pennsylvania markets. The heavy rainfall has retarded somewhat the trade in hardwoods, especially in red and white oak, east of the Rocky Mountains. The stocks at the furniture factories are reported to be light and a better fall trade is anticipated. The receipts of lumber at Tonawanda during the present month have been light as compared with June. Shipments from this point over the Erie canal during the first week in July showed a decrease of over a million feet compared with the previous week. An addition of 50c. a thousand has been made to the price of hemlock at Buffalo, and the trade in this material is in a very satisfactory condition. The shingle trade at eastern points is fair. A report comes from Seattle that the secretary of the Washington Shingle Manufacturers' Association will shortly outline a plan for controlling the timber market and regulating prices.

GREAT BRITAIN.

There is very little encouragement to be got from a study of the conditions prevailing in the British timber market at the present time. From nearly all the leading ports comes the statement that the demand is very inactive and shipments are in excess of the requirements of the market. Buying from hand to mouth seems to be the rule at present and there is not much foundation on which to build the hope for a more satisfactory condition in the near future. Better prices are being paid by continental buyers than are being offered by buyers in Great Britain and if the continental demand should continue and develop it would be reasonable to expect that prices in Great Britain would advance to somewhere near continental figures. There is said to be quite a lively demand in Holland and Germany for whitewood and also in a lesser degree on the part of English firms especially in Bristol Channel ports. The demand for redwood has also improved somewhat though not sufficiently to affect prices.

THE BRITISH MARKET.

Messrs. Farnworth and Jardine's Circular dated the 1st inst., contains the following :—

The arrivals from British North America during the past month have been 32,583 tons register, against 29,442 tons register during the corresponding month last year, and the aggregate tonnage to this date from all places during the years 1903, 1904, and 1905 has been 192,343,189,408, and 213,418 tons respectively.

The business of the past month has not been of a satisfactory charactor. Imports on the whole have been large, and the deliveries fair, but some of the leading articles, notably spruce deals, showed a marked decline in value. The stocks generally are ample.

CANADIAN WOODS.—Pine Timber.—Of waney, the new season's import is now arriving on fairly moderate lines, but the demand is very quiet, the deliveries small, and stocks are large ; there is little change in value to report. SQUARE PINE—About 9,000 c.ft. imported ; the demand is limited, and the stock, though light, appears sufficient for present requirements; values are unchanged. OAK LOGS.—A few parcels on contract have just arrived, amounting to about 18,000 c.ft. ; the demand is exceedingly quiet, and stocks are adequate. ELM,—About 600 loads have just arrived from Quebec direct by steamer entirely on merchants account, of which a considerable quantity will no doubt go direct into consumption. The stock is now ample, and values rule high. PINE DEALS. —The arrivals show a reduction as compared with the two previous years, and there has been a fair consumption ; but the demand is inactive, and stocks are still large. Red pine deals are dull of sale.

NEW BRUNSWICK AND NOVA SCOTIA SPRUCE AND PINE DEALS.—The arrivals to the Mersey during the past month have been 19,370 stds. against 16,800 stds. during the corresponding month in 1904. The deliveries have been rather disappointing and stocks are increasing, though still about 5,500 stds. less than

A SPLENDID ROUTE.
The Wisconsin Central Railway is justly termed the "Sportman's Line" because it reaches into and through the very heart of the choicest hunting grounds in America.
The very best wild fowl shooting of the entire North is reached ONLY by this line. Hundreds of beautiful lakes abounding in wild rice and celery attracts myriads of ducks and geese and afford the finest kind of cover and the choicest shooting to be found the country over.
The Wisconsin Central Railway caters especially to the sporting public and during the various seasons for hunting and fishing furnishes daily information to its patrons as to local conditions anywhere along its lines upon application to the nearest ticket agent. It also arranges its train service with special reference to the convenience and comfort of sportsmen, and its employes are constantly on the alert to make travel over their lines pleasant and comfortable.
This line offers the best route between Chicago, St. Paul, Milwaukee, Minneapolis or to Lake Superior points via Ashland, Wisconsin.

same time last year; values have declined, but with the reported heavy shortage of logs in New Brunswick and Nova Scotia, and the probability of the shipping season closing earlier than usual, it is confidently hoped that there will be an improvement in values later in the season. PINE DEALS.—There is no improvement in the demand and the stock is ample.

BIRCH.—Of logs the arrivals have been moderate, chiefly from Quebec; there has been a fair consumption, and the stock is not large; values are steady. Planks have also been imported moderately, and have gone freely into consumption, but the stock is now sufficient, and prices a little easier.

PITCH PINE.—The arrivals during the past month have been 8 vessels, 6,949 tons, against 7 vessels, 8,202 tons during the same period last year. Hewn has come forward too freely, and the consumption has nothing like kept pace with the import, leaving a stock which is too heavy. SAWN.—There has been a fair consumption and a moderate import, leaving stocks somewhat lighter. Parcels are still coming forward on consignment, which keeps prices depressed. Deals and boards have come forward too freely during the past month, and stocks are more than ample for the requirements of the trade.

BRITISH COLUMBIAN AND OREGON PINE.—There have been no arrivals; the deliveries have been fair, but stocks are large; prices are steady.

BALTIC AND EUROPEAN WOODS.—The arrivals during the past month have been 37 vessels, 23,274 tons register, against 30 vessels, 18,936 tons register during the same month last year. FIR TIMBER.—There have been no arrivals; the demand is limited, stocks are light, and values steady. Red deals have again arrived too freely, there has been a fair consumption, but stocks have increased, values are steady. Flooring Boards (Whitewood).—The import has been on a moderate scale, the deliveries have kept pace, and values are a little firmer; stocks are about an average. Galatz, &c. (Whitewood)—The import consists of about 780 standards to Manchester; the demand is quiet, stocks are sufficient.

BRITISH COLUMBIA LETTER.

Correspondence of THE CANADA LUMBERMAN.)

VANCOUVER, B.C., July 10th, 1905.—Conditions in the lumber manufacturing part of the industry are good, in shingles, poor, and in logging getting gradually worse. Logging has been in good shape right up to two weeks ago, but the demand resulted in a large number of operators going into the woods, and now logs are going a-begging for buyers. It's the old story of good demand causing a glut in the market. In the spring there were few logs to be had, prices were very firm, and mills established camps and independent loggers started in. Up to, say, about two weeks ago the market was still good, and prices were better than across the line. Now quotations have dropped to from $5 to $7 per thousand feet, and buyers are few. It will be the usual result of many of the independent loggers, who have no money until they dispose of their booms, going "broke" again, for there will be no material betterment of conditions in the logging branch of the industry before next spring. Across the line prices rule from $5 to $9, and since they are better there, more logs will be exported during the remainder of the summer.

There is practically no demand for the cedar log. Shingles are cut from bolts. There has been talk already of shingle manufacturers shutting down next winter, but no definite action has been taken. It was acknowledged, though, by a prominent manufacturer, who was spoken to about the matter, that a better move could not be made, as conditions were very discouraging.

The Vancouver Board of Trade took action the other night to once more bring to the attention of the Government the fact that British Columbia wants a duty on lumber. At the recent session of the Legislature, a tax was imposed on commercial travellers doing business in the Province, and there is talk of it being disallowed, or the Legislature here being asked to withdraw it. The Board of Trade passed a resolution that if the Government was asked it should refuse until such times as the Federal Parliament gave some consideration to the imposition of a duty on imported lumber. British Columbia shares very little in inter-provincial trade—she does all the buying and very little of the selling—and while merchants and business men do not regard the commercial tax a wise one, they think it will serve a good purpose.

The action of the manufacturers of lumber in the interior in establishing selling agencies in the North-West is the first definite indication of the evolution gradually setting in. One feature which will bring this along more rapidly is the migrating to British Columbia of such large lumbermen as S. H. Bowman, who took over the interests of the Empire Lumber Company, and Mr. S.A. Munday, who has built a large mill just west of Revelstoke. These men have been accustomed in the districts in the States in which they were operating to also conduct their own yards in the consuming districts, doing away with the retailer. A few of the Crow's Nest mills started along this line in a small way early this season, and another year will see a definite policy adopted by the manufacturers.

The fact that the revenue from timber sources during the last fiscal year has exceeded by $150,000 the Government's estimate does not indicate that great prosperity attends the lumber industry. True, it is fairly good this year, but large tracts of timber are being taken up by local men and Americans who anticipate an appreciable increase in values during the next few years. From Howe Sound to the Skeena River cruisers have been busy all spring and summer, and vast quantities of limits have been applied for. That there will be a large increase in the value of timber during the next five or six years no one for a moment doubts, and those who are getting in on the ground floor now, so to speak, are men who have been in the business in the east and recognize repeating conditions.

J. S. FINDLAY - OWEN SOUND, ONT

MANITOBA TRADE CONDITIONS.

Lumber dealers in Winnipeg report that the United States market being so much better this season, there is not so much occasion for dumping into Canada as last year. The home markets of the Western States use about nine-tenths of the lumber produced, so when the home prices are better, as is the case this year, the manufacturers let the other tenth lie rather than compete with present conditions on this side of the line.

The Sprague Lumber Company commenced running their big mills the first week of this month for the summer. This firm have a large force of men now working on day shift, and in the course of a couple of weeks will also put on night shifts, keeping their mills running almost continually. They have lately received a large raft of logs by river and are receiving large shipments of pine and cedar by rail.

Messrs. J. D. McArthur & Company state that their mills at Lac du Bonnet, Manitoba, are running full capacity, and they are handling a very large trade at present. They state that the market is much better.

The Rainy River Lumber Company report that their mills at Rainy River, Ontario, are sawing about half a million feet per day, and that they are shipping from fifteen to eighteen cars per day. They are running their mills day and night in order to keep up with the trade.

The Rat Portage Lumber Company inform us that their mills at Kenora are running day and night.

B. C. shingles are meeting with a good demand of $2.50 for No. 1 car lots in Winnipeg.

D. B. McDonell, dealer in timber limits, Winnipeg, Man., says: "With the immense immigration to Canada and the advent of the Grand Trunk Pacific Railway, a market of unlimited possibilities is opening up, but the material to supply the demand is fast becoming scarce. The far seeing are realizing that the present limits and prices will soon be a thing of the past and consequently present purchasers have a good asset in the future. This is borne out by the fact that in 1881 the average price per square mile of limits put up by the Ontario Government was $532 as against $4,462 in 1904, or an increase of $3,930 per square mile, but in spite of this and the increased price in lumber, we find the sales for Manitoba and the North-West have increased by leaps and bounds, and in place of 50 million feet in 1897, the fiscal year ending June 30th, 1904, showed sales amounting to between 11 and 12 hundred million feet, 332 million of which was consumed in Manitoba. Mr. McDonell is interested in British Columbia and North-West timber limits.

TIMBER LIMIT TRANSACTIONS.

From a reliable source comes the report that the Hull Lumber Company have sold a limit, consisting of about 162 sq. miles on the Kippewa river, to the Colonial Lumber Company, of Pembroke, and that they also sold a small block of 25 sq. miles to Frank Martaugh; rumored price being $200,000 and $25,000.

A saw mill at Young's Point, Ont., owned by E. Young and A. Dunn was burned recently.

GETTING AT THE BOTTOM OF IT

That's the thing to do --

Investigate a little and see if you are getting as good service, as good prices or as good stock as you ought to.

If you are not, then it is high time to let us hear from you—for we have the goods and are able to make a deal with you that will be satisfactory to all concerned.

BARBADOES MARKET.

Messrs. Clairmonte, Man & Co., in their report of July, 1st say:

There have been two arrivals with white pine during the fortnight; the demand for spruce continues fairly good, but for white pine it has fallen off. Last sale of white pine on the spot was at $23.50 per M for merchantable and $15.50 for second quality. Spruce last sale $22.40 per M for merchantable, and 17.40 for second quality. Pitch pine is enquired for—there has been no arrival for some time now.

SHINGLES.—Gaspe Long Cedar—Last sales at $5.50 per M for long cedar laying, last sales $1.90 at $2.26 per M as to quality. Spruce laying, no late sale. Cypress, 'sawn saps,' no recent sale, much wanted; split 'hearts,' none here—enquired for. June 19th: Schr. "E. A. Post," from Shelburne, N. S., with 60,000 feet white pine, sold at $23.50; 125,000 feet second quality do. $16.50 per M. 23rd: S.S. "Orinoco," from St. John, N. B., 100,000 cedar laying shingles $1.90, 50,000 $2.10; 10,000 extra do. $2.26. 28th: Schr. "Edyth," from Bridgewater, N. S., with 142,000 feet white pine, sold at $23.50; 58,000 second quality do. $15.50.

WOOD-HOOPS.—English, the London steamers bring regular supplies during the season—we quote in lots ex. store at $20.50 per 1200 pieces. French—lotting at $20.50 per M for 13 and 14 feet and $18.50 for shorter lengths;—Newfld. Coiled, none here.

STAVES & SHOOKS.—Dealers have supplied themselves for the crop season.

LUMBER PROPERTY FOR SALE.

The Mill Property belonging to Estate of Tanner Bros., Waubaushene, Ont., lately advertized, have been placed in the hands of Mr. Peter Ryan, Toronto, for sale, to whom persons interested are referred.

LUMBERMEN & SAWMILL MEN

Auction Sale of Valuable

Timber Berths, Sawmill, Logs and Lumber Business

ON THE GEORGIAN BAY

The executor and trustee of the estates of the late George M Tanner and Wm. H. Tanner, of Sturgeon Bay, Waubaushene, and known as Tanner Bros., Lumbermen, have given instructions to the undersigned to sell by public auction at the rotunda of the Board of Trade, Toronto, ON THURSDAY, AUGUST 31ST, 1905, at 3 o'clock p m, on the terms and conditions which will be announced at the time of sale, the timber berths logs, mill, plant, camp outfit, buildings, horses, etc, etc, in one lot for a lump sum. The property of the estates of the late firm of Tanner Bros, as undermentioned, namely:—

Timber berth No. 119, north shore of Lake Huron, well timbered with pine, pulpwood, etc.

*Two-thirds interest in timber berth, Township of McKinnon, well timbered with pine, hemlock, spruce, etc. *The other third of this township can be purchased privately on reasonable terms.

Timber berth No. 61—(This berth has been nearly cut out)

Logs—Six and a half million feet, B.M., of excellent pine logs to be delivered at the mill by the vendors.

Sawmill at Sturgeon Bay—Capacity, about 60 M. feet per day, with latest equipment, complete for lumber and lath. (Nearly new.) Engines, boilers, buildings, boarding house, two good residences for owners, workmen's houses, barns, horses, workshops, plant, tools, booms, chains, camp outfit, and 50 acres of freehold land.

Booming ground, extensive and safe in all weathers.

Piling ground, ample for nine million feet of lumber, with excellent shipping facilities of water or G T R. siding at mill.

Terms of sale: The whole of the above properties will be offered as one lot or parcel, and subject to one bid by the vendors. Payments—Cash for the logs at $18 per 1,000 feet, B.M, plus cost of sawing up to the time of transfer, and credit allowed for all product cut. Cash for camp outfit and supplies, and for the balance, one-third in cash at the time of sale, one-third in one year, and one-third in two years, with interest at 5 per cent. Ordinary cutting conditions. For maps and further particulars apply to the estate of Tanner Bros, Waubaushene, Ontario, or to PETER RYAN, Toronto.

WANTED — ONE TO TWO MILLION strictly No. one White Pine Lath, bright stock and well manufactured, could use some nice twos. Address THE WOOD LUMBER CO., Lorain, Ohio.

LUMBERMEN—YOUNG MAN WITH GOOD business and mechanical training from stump to lumber pile wants position. Will take junior place if ability ensures steady work and promotion. Address Box 220, c/o CANADA LUMBERMAN.

FOR SALE---WHITE PINE

1 CAR 1x12 AND UP, NO. 1, 2 AND 3 COMMON, 80% 13" and up, 1 car Basswood, all bone dry. JOHN M. SHAW, Forest, Ont.

FOR SALE—THREE LANCASHIRE BOILERS 250 H. P. each. Good for working pressure of one hundred lbs. each. Apply to ALFRED HAWKESWORTH SONS & CO., LTD., 551 St. James Street, Montreal.

HAVE YOU ANY STOCK WHICH YOU wish to sell? If so, make the fact known to probable buyers by placing an advertisement in the Wanted and For Sale Department of this journal. Address, CANADA LUMBERMAN, Toronto.

FOR SALE

75 M 4/4 SOFT ELM DRY; 75 M 4/4 Bass Dry; 100 M 4/4 Maple Dry; 20 M 8/4 Maple Dry; 20 M 8/4 Birch Dry; 20 M 4/4 Birch Dry; 10 M 4/4 Soft Maple Dry. Prices and terms on application. A. P. EBERT, Wiarton, Ont.

1", 1½" and 2" 1905 winter cut, mill run, trimmed Hard Maple.
Write for lists and prices. The W. R. THOMPSON Co., Teeswater, Ont.

CURRENT TRADE CONDITIONS.

ONTARIO.

The usual midsummer dullness characterizes the trade at the present time. The volume of business being done is however, fully up to the average at this season, and spring prices are being well maintained. The general tone of the market is firm, and while there is little ground to expect that prices will advance, there is every indication that the present standard will bs maintained. The advances which have just gone into effect in the western states, indicate how strong is the demand across the line where much of our lumber is marketed. This condition should strengthen the home market. The plentiful supply of rain in southern and middle Ontario has made possible the securing of practically the entire cut of logs within this territory, but worth of the divide

very little rain has fallen, and much timber may be hung up. All the drives are not yet in, so that the situation in this regard cannot at present be definitely stated, What with a record building season and abundant crops, the outlook for a brisk fall trade is most encouraging.

QUEBEC AND NEW BRUNSWICK.

Shipments of deals from New Brunswick to Great Britain have been on a larger scale than last year, which in view of the weakness of the British market, would seem not to have been the course best calculated to secure best results to shippers. During the week ended July 15 the export of deals etc. from St. John alone to ports in the United Kingdom aggregated 7,418,000 feet. Quebec shippers have curtailed their shipments considerably. Had they not done so the market might have been in even worse condition. A leading lumber operator states that the price of deals in England to-day is about one pound per standard less than it was a year ago, but expressed the hope that as the market is not greatly overstocked, and the supply on this side smaller than usual, better prices may be realized in the fall. Fortunately the United States, South American and South African markets are said to be in a healthy condition.

MANITOBA AND BRITISH COLUMBIA.

The rumor said to have come from the United States Capital is again current that it is the purpose of the Government at Washington to remove the import duty on Canadian lumber. The fact that many lumbermen from the United States have recently invested in limits in British Columbia gives color to the report, which if true, would certainly result in benefit to the timber industry of the province. The selling pool formed by about thirty of the Mountain Mills seems to have been arranged and a manager capable of successfully conducting the same is now being looked for. It is said to be the intention of the manufacturers to establish and sell through agencies of their own and cut out the retailer. B. C. Shingles are reported to be selling freely in Eastern Canada. Prices remained unchanged. The demand for lumber continues good and prices are well maintained.

UNITED STATES.

The most notable event affecting the United States market during the past week has been the advance in prices decided upon by the price list committee of the Mississippi Valley Lumbermen's Association and by the Southern Lumber Manufacturers' Association at its semi-annual meeting. The committee of the former association recommended an advance of $1 per thousand for dimension, plank and timbers, an advance of 50 cents per thousand on No. 1 and 2 boards, and 12 inch No. 3 boards and products, also on 6 inch No. 2 and No. 3 fencing, an advance of $1 per thousand on No. 1 fencing and Norway inch finish ; an advance of $2 on Norway inch finish selected lengths, and thick ship common. The Southern Association recommended an advance of $1 per thousand on heart face edge grained and A and B flat grain flooring, also on finishing; an advance of $1.50 on timbers ; $2 on drop siding; 50 cents on common boards, selects and common flooring and shiplap. Crop conditions and the unusual activity in building enterprise were the chief factors in the decision of these associations to advance prices. The increasing value of stumpage was also referred to as affecting the decision. The returns of building operations for the principal cities of the United States show an increase of 50 per cent. over the same period of last year. This in itself is sufficient to keep the market firm. The demand for hardwood is less strong than for pine but is expected to improve.

GREAT BRITAIN.

General trade conditions in Great Britain are reported to be improving, due in some measure to large orders recently placed with British manufacturers for goods for the Japanese market. The hope is expressed that this general improvement in trade may affect favorably the condition of the timber market and that in the autumn prices are likely to advance at least to a moderate extent. So far curtailment of shipments has not sufficed to strengthen prices. That Canadian shipments have been largely curtailed is shown by the following figures showing the shipments from the St. Lawrence this year as compared with 1904 : Pine deals, 79,000 pieces against 402,000 pieces in 1904; spruce deals 302,000 against 400,000 in 1904; New Brunswick, pine deals none against 54,000 pcs. in 1904. The shipments of spruce deals from New Brunswick has, however, increased this year to 342,000 pcs. against 257,000 pieces last year. Shipments of birch planks from New Brunswick have also increased to 115,000 pieces against 62,000 pieces in 1904. British importers are complaining that some of the stock shipped from New Brunswick this year was imperfectly manufactured. The heavy dock charges especially in London, are bringing about a change in the method of buying, many of the purchases being now made ex-ship and only light stocks being carried in the yards. Deals are selling at £7 10s. to £7 15s. for best quality but there are few large contracts being placed. 2x4½ inch and 2x5 inch redwood scantlings are in demand. Battens and boards 7 inches wide are selling at £7; 6 inches wide, from £6 5s. to £6 10s.; 5 inch and 4½ inch, £6 to £6 5s.

EXPORT OF SHINGLES.

A movement is on foot to organize a company to handle the exportation of British Columbia shingles to the United States similar to the two companies now handling the Canadian consumption. The present prices are altogether too low and the object of the company is to maintain a better and more reasonable price. From the present prices low as they are, must be deducted a duty of 30 cents per M. Possibly one or both of the companies now handling the Canadian end will also take over the American trade.

A SPLENDID ROUTE.
The Wisconsin Central Railway is justly termed the "Sportman's Line" because it reaches into and through the very heart of the choicest hunting grounds in America.
The very best wild fowl shooting of the entire North is reached ONLY by this line. Hundreds of beautiful lakes abounding in wild rice and celery attracts myriads of ducks and geese and afford the finest kind of cover and the choicest shooting to be found the country over.
The Wisconsin Central Railway caters especially to the sporting public and during the various seasons for hunting and fishing furnishes daily information to its patrons as to local conditions anywhere along its lines upon application to the nearest ticket agent. It also arranges its train service with special reference to the convenience and comfort of sportsmen, and its employes are constantly on the alert to make travel over their lines pleasant and comfortable.
This line offers the best route between Chicago, St. Paul, Milwaukee, Minneapolis or to Lake Superior points via Ashland, Wisconsin.

NEW BRUNSWICK LETTER.

(Correspondence of THE CANADA LUMBERMAN.)

ST. JOHN, N. B. JULY 15th, 1905.—The condition of the lumber markets of the United Kingdom is, just now, the most vital feature of the situation as far as local lumbermen are concerned. The outlook in this direction has not shown an improvement in any way since last writing and the depression mentioned at that time is still predominant and if anything rather more pronounced. The demand is light and trade all round (in spite of the briskness and optimism of the early spring) seems to have fallen away until it is a matter of doubt if the total volume of sales for this season will even equal that of last year. As is usual with a falling market, sales of any important quantitjes are rare and extreme caution marks the operations of buyers. Shipments during the past month were somewhat below the average for this season of the year. The harbour at this port is somewhat bare at present and it is probable that the condition of the market will result in a further curtailment of the volume of shipments during the balance of the summer. Stocks of deals for export to the United Kingdom, while not extensive (3,500,000 square feet would cover the quantity) are increasing and unless the situation improves, it is altogether probable that local manufacturers will suffer considerable inconvenience from this source before many weeks havepassed.

Local prices on English deals have naturally reached a much lower level. To day, with no apparent eagerness on the part of buyers, English deals can be purchased f. o. b. steamer at this port, for $11.75 to $12.25 per thousand feet, in specifications containing 50 per cent 7's and 8's, 35 per cent 9's and 15 per cent 11's and up, 2/3 price for fourths and ends.

Freight rates to the United Kingdom have been somewhat higher during the past month. At present writing 37s. 6d. has been offered.

A feature during the last fortnight has been a decided stiffening in the price of spruce lath. While it is rumoured that something like 50 per cent. per thousand advance over the prices of the last month has been paid, it would not be safe to say that prices in this line generally have advanced more that from 15 per cent. to 25 per cent. per thousand all round. Non-dutiable are quoted to-day at $2.50 and dutiable at $2.25 f. o. b. St. John.

THE BARBADOES MARKET.

Messrs. S. P. Musson Son & Co.'s, trade Circular dated the 15th inst., contains the following regarding wood products:

Waney pine and spruce—Arrivals during the fortnight consist of Schr. "H. H. Kitchener" from Shelburne N.S., to selves with 135 m. ft. White pine, which we placed at $23.97 for shipping, and $16.03 for second quality; and Btne. "Maggie Belle" from Mahone Bay with 120 m. ft. spruce, which being placed on offer was sold at $21.25 for shipping, and $16.29 for second quality, but on delivery proving rather thin was rejected and resold at $18 round. The "Lady Napier" from Bridgewater, bound to Grenada, landed a deck load of 30 m. ft. second quality white pine, which so'd at $14.05, and 10m. ft. hemlock, which sold at $16.05. Market for white pine is heavily stocked, and values cannot improve unless receipts are very light for some time. Spruce is not in heavy stock, and although there is not much demand at this season a small cargo would still do fairly well. P. pine—No arrivals have taken place, stocks are small and a cargo of merchantable would sell readily. Shingles—In a foot-note to our last we mentioned the arrival of the "Leah A. Whidden" with a cargo of laying shingles to selves, and the "Bravo" from Paspebiac, with Long Gaspe, and have now to report sales ex former at $2 per m., and sales ex latter at $4.67 @ $4.30 as to quality. Since these the Schr. "Druise" from Paspebiac has arrived with 728 m. long cedars of which some were sold at $4.45, and a small lot of extra quality at $5.25; a large lot however was stored, offers not being up to consignees's ideas. Market is now well supplied with long cedar, and laying cedar are in over-stock, so that we expect to see lower values for next arrivals. Shooks—The S.S. "Manoa" from New York brought down 1,000 bdls. 'first trip' for a dealer for next season's requirements. Wood hoops—Season over.

Lewis A. Wright, of Salisbury; Geo. W. Fowler, John E. Slipp, Geo. W. Pearson and S. A. McLeod, of Sussex, N. B.; and Jas. E. Price, of Norton, have been incorporated as the L. A. Wright Lumber Company, Ltd., with capital stock of $75,000.

At Ish-pie-axe, B. C., there is a sawmill operated entirely by full-blood Indians. It is a water-power mill, and the white missionaries up there say that they used to pay the Hudson Bay Company $75 a thousand for lumber they are now buying from the Indians for $14.

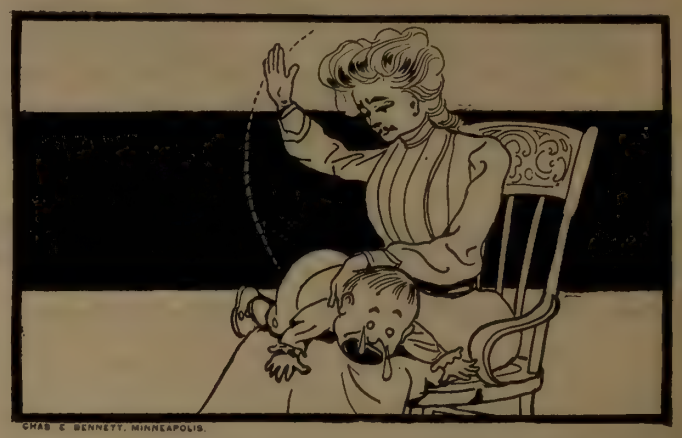
WIRE HOOPS.

A few years ago, with the advent of wire hoops, there was, naturally, much discussion as to the ultimate effect of wire hoops on the market for wood hoops. The consumption of wire hoops has increased enormously in the last three years and many manufacturers who once condemned the wire hoop as being impractical are now using them and obtaining excellent results.

The increased use of this commodity does not seem to have had any adverse effect on the wood hoop market, and evidently has had its beneficial effects on the cooperage markets as a whole, because it has been possible to produce a barrel entirely satisfactory to the trade, which cost less than an all-wood-hoop barrel, thereby enabling manufacturers to continue using wooden packages in many cases where they might have been driven to something else.—Packages.



GETTING AT THE BOTTOM OF IT

That's the thing to do --

Investigate a little and see if you are getting as good service, as good prices or as good stock as you ought to.

If you are not, then it is high time to let us hear from you—for we have the goods and are able to make a deal with you that will be satisfactory to all concerned.

Send us your inquiries for Southern Yellow Pine.

SHIPPING MATTERS.

Transcontinental lines having terminals in the Pacific Northwest have decided not to accept lumber for shipment over what is known as the rail and lake routes unless tied in bundles, and no lumber shipments will be accepted for Detroit by way of the lakes. Until this order went into effect, loose lumber was accepted for shipment to all lake ports. However this trade is becoming so extensive that the lake steamship companies refuse to accept the lumber from the railroads except in bundles.

There is reported to be somewhat improved demand for tonnage from the St. Lawrence ports as well as a distinct advance in rates, with moderate inquiry for September loading. The following fixtures have taken place: "Indianapolis," Bathurst to W.B., 37s. 6d., July/August; "Lewisport," Miramichi to W.B.E.I., 40s. 6d., August; "Aarstein," Miramichi to W.B.E.I., 41s. 3d., July/August; "Therese," St. John, N.B., to W.B., July p.t.; "Nostra Madre," St. Margaret's Bay to Bristol Channel, 38s., (sailer); "Dora," Quebec to Limerick, 37s. 6d., July; "Bertha," St. Lawrence to Adelaide, Melbourne or Sydney, 55s., (sailer); "Lima," Miramichi to Bordeaux, 48s., (sailer).

TRADE WITH MEXICO.

The Canadian and Mexican governments, desiring to encourage trade between their respective countries, have subsidized certain of the steamers owned by Messrs. Elder Dempster & Co., of Liverpool and Montreal, to make a monthly trip, commencing on the 20th inst., between Montreal, Charlottetown, Halifax, Nassau, Havana, Progreso, Vera Cruz, Tampico and Coatzacoalcos. On the return trip no freight but only passengers will be carried from Cuba to Canada, the Mexican government not being disposed to contribute money towards building up a trade between Cuba and Canada. The service will commence with ten-knot steamers of moderate carrying capacity. The establishment of the Canadian-Mexican line is due in no small degree to the visit paid to Mexico last year by Sir William Mulock, Postmaster-General of Canada, resulting in the formation in Mexico City of the Canadian Commercial Club. It is expected that among the passengers on the first trip will be the representatives of Canadian firms, empowered to open up agencies.

Lumber to the value of $6,000,000 was imported into Egypt last year. Canadian exporters should look into this trade.

The National Association of Box Manufacturers of the United States will meet in Annual Convention at Niagara Falls on August 16th, 17th and 18th.

Christie & Co., wholesale lumber dealers of Winnipeg, have purchased all the stock on hand and the season's cut of the Fernie Lumber Company, amounting in all to nearly 4,000,000 feet. The price is not made public, but it is understood that it was a good one.

The Dominion Parliament has closed its budget debate and there is no duty fixed for American lumber. Mr. Gallagher, the Kootenay member, urged the government to place a duty on lumber. This was refused. A commission was promised to consider the question.

Messrs. H. L. Jenkins and J. C. Busch, Washington lumbermen, have purchased between 75,000,000 and 100,000,000 feet of timber on Burrard Inlet, about eight miles from Vancouver. It is the intention to export the timber, which is excellent fir, to their mill at Blaine. They have also secured timber on Vancouver Island, which is mostly cedar. There were 2,300 acres in the latter purchase and $15 an acre is said to have been paid.

An Eastern lumber dealer goes to some trouble and much expense, perhaps, in introducing redwood and other Coast woods. He has put in a stock and finds what has been told him to be true. He introduces it to his trade. They like it. He discards some of his old standby stuff in the yard to place the Pacific Coast product before his clientele. Then what happens? Orders are too large and pressing upon the Coast. Eastern orders are shelved and held if possible and convenient to the mills receiving them. The Eastern handler cannot fill the orders his energy has created. He falls back upon the timber he is certain to receive and the Pacific Coast woods receive a black eye.—Wood and Iron.

Canada has a month-old law that requires the payment of a three-hundred-dollar license fee for salesmen representing foreign manufacturers in the Dominion. It looks as though the lumber manufacturers the other side of the line, as well as wholesalers of all kinds of commodities, were back of the proposition. It certainly is not to the advantage of the people of the Dominion to offer that kind of encouragement to competition from outside, though it is in line with the apparently growing opposition to the policy of opening the markets of Canada to the United States while we maintain a tariff on everything that comes from Canada, and refuse to make concessions by means of reciprocity treaty.—Mississippi Valley Lumberman.

LUMBERMEN & SAWMILL MEN

Auction Sale of Valuable

Timber Berths, Sawmill, Logs and Lumber Business

ON THE GEORGIAN BAY

The executor and trustee of the estates of the late George M Tanner and Wm. H. Tanner, of Sturgeon Bay, Waubaushene, and known as Tanner Bros., Lumbermen, have given instructions to the undersigned to sell by public auction at the rotunda of the Board of Trade, Toronto, ON THURSDAY, AUGUST 31ST, 1905, at 3 o'clock p m, on the terms and conditions which will be announced at the time of sale, the timber berths logs, mill, plant, camp outfit, buildings, horses, etc, etc., in one lot for a lump sum. The property of the estates of the late firm of Tanner Bros, as undermentioned, namely:—

Timber berth No. 119, north shore of Lake Huron, well timbered with pine, pulpwood, etc.

*Two-thirds interest in timber berth, Township of McKinnon, well timbered with pine, hemlock, spruce, etc. *The other third of this township can be purchased privately on reasonable terms.

Timber berth No. 61—(This berth has been nearly cut out)

Logs—Six and a half million feet, B.M., of excellent pine logs to be delivered at the mill by the vendors.

Sawmill at Sturgeon Bay—Capacity, about 60 M. feet per day, with latest equipment, complete for lumber and lath. (Nearly new.) Engines, boilers, buildings, boarding house, two good residences for owners, workmen's houses, barns, horses, workshops, plant, tools, booms, chains, camp outfit, and 50 acres of freehold land.

Booming ground, extensive and safe in all weathers.

Piling ground, ample for nine million feet of lumber, with excellent shipping facilities of water or G T R. siding at mill.

Terms of sale: The whole of the above properties will be offered as one lot or parcel, and subject to one bid by the vendors. Payments—Cash for the logs at $18 per 1,000 feet, B.M., plus cost of sawing up to the time of transfer, and credit allowed for all product cut. Cash for camp outfit and supplies, and for the balance, one-third in cash at the time of sale, one-third in one year, and one-third in two years, with interest at 5 per cent. Ordinary cutting conditions. For maps and further particulars apply to the estate of Tanner Bros, Waubaushene, Ontario, or to PETER RYAN, Toronto.

WANTED—POSITION

AS STENOGRAPHER AND OFFICE WORKer. Several years experience in wholesale lumber office. Address Box 305, care of CANADA LUMBERMAN.

FOR SALE — 550 ACRES OF STANDING timber in North Hastings, comprising soft elm, ash, basswood, hard maple, cedar, hemlock, etc. Estimated to cut about two million feet, board measure. Will sell cheap for cash. Easy to log and a railway close by. Apply Box 111, CANADA LUMBERMAN.

WANTED TO PURCHASE

HEMLOCK OR SPRUCE 10 × 10 × 12 FT. and 30 ft., British Columbia fir 10 × 10 × 12 ft. and 30 ft. Several carloads of each dimension. Address, giving full particulars regarding quality and price, Box 304, CANADA LUMBERMAN, Toronto.

FOR SALE

100 M 4/4 birch
20 M 10/4 and 12/4 birch } Com. and better.
10 M 4/4 black ash
15 M 4/4 elm
25 M 4/4 pine
8 M 6/4 " } Mill run.
40 M 4/4 basswood

THE MAGANETAWAN HARDWOOD LUMBER Co., Alimic Harbour, Ont.

CURRENT TRADE CONDITIONS.

ONTARIO.

It might be expected that at this season of the year the reports concerning the lumber market would indicate a quiet trade, and to some extent this is the case, but it is also very noticeable that the conditions, apart from immediate demand, are considered very satisfactory. The large domestic consumption of pine and hemlock is keeping up remarkably well, assisted, of course, by the extensive building operations. "Business has never been better," was the reply of a manufacturer to a question as to lumber conditions. Considering the smaller production of lumber on the Georgian Bay this season, stocks at the close of the sawing season are not likely to be very large. The Ottawa valley mills will have plenty of logs for a full season, but no great accumulation of lumber is looked for, and at the present time there is no indication of prices weakening to any extent.

There is quite a strong market for lath, which are looked upon as good property. Prices have broken very little since the spring, and the prevailing price for No. 1 pine at the mill is about $3.

QUEBEC AND NEW BRUNSWICK.

In Montreal the demand for lumber continues to be curtailed by the strike of carpenters. It was expected that this would be terminated last week, but the master builders have refused to accept the offer of another conference with the men. Nevertheless, considerable building is in progress and there is quite an active movement of lumber. There is not much activity in lumber circles in the Maritime Provinces and it is now quite certain that

the volume of business with Great Britain will be much below the average. Nova Scotia manufacturers are doing a good trade with South America and the West Indies and prices are firm. The quantity of lumber at the mills is fully 30 per cent. less than at the same time in 1904. Sales of deals are being made at $13 for a specification of 60 per cent. 7's and 8's and 40 per cent. 9's and 11's. There has been no recovery in the New Brunswick cedar shingle market and the majority of sales are now being made around $3.30 for Extras on Boston rate of freight.

UNITED STATES.

The lumber demand is perhaps more uneven than at any previous times this year. The situation in respect to southern pine and white pine continues strong and the demand is practically equal to the supply. At Ashland, Wis., 85 per cent. of the season's cut of white pine has been sold and it is estimated that at the end of the season no surplus stock of any account will be left at the producing points. Certain sizes of low grades are reported to be almost out of the market at Buffalo and Tonawanda. Hardwoods represent the opposite condition, the demand being quiet and the supply of stock more plentiful notwithstanding that many of the mills have, owing to wet weather, been producing much less than the usual quantity. Plain oak is receiving the greatest call. Basswood and maple are weak, while birch is strong. Log run maple has been selling in the Saginaw Valley at a considerable reduction from the high point reached earlier in the year.

There is quite an active market for spruce and most of the mills have plenty of orders. It is not improbable that prices will be marked up a little in the near future. The hemlock market also gives indications of strength. Short lengths are quoted in the Saginaw Valley at $13, 16 foot at $14, and 18 foot at $15.50. Boards are worth $14.

Lath are showing increased strength. The price list committee of the Mississippi Valley Lumbermen's Association have decided on an advance of 25 cents a thousand in all grades. This was agreed to by correspondence after the meeting on July 13, it being shown that stocks on hand are extremely light. The tone of the shingle market is also more hopeful and it is believed that any change in prices will be in the direction of an advance. The action of the red cedar mills in curtailing production has had a beneficial effect.

GREAT BRITAIN.

The deadlock between shippers and importers still exists. The former are holding to their prices, while the latter are endeavoring to bring about a general reduction of about five shillings per standard, at which price it is believed many importers are prepared to operate. If they should not be successful in further breaking the market within the next week or two, it is probable they will come to the conclusion that prices have about reached bottom and will then place contracts for stock for autumn delivery. As the quantity of lumber contracted for is very small, any indication of an advance in prices might cause considerable anxiety among merchants who have allowed their stocks to become almost exhausted in the hope of buying to better advantage later in the season. Deal sizes are still in very little demand except in the better qualities. There has been no particular change in the pine situation, the high prices asked being against business. The reports concerning spruce are by no means uniform, but it is thought that a good foundation is being laid for an advance in the fall. It is reported that one or two small cargoes have changed hands at £7 5s c.i.f. Liverpool, with a specification of about 60 per cent. of narrows and short average. The lowest sale of the season was a large cargo at £7 c.i.f.

STOCKS AND PRICES.

It is reported that 300,000 logs are hung up in the Spanish river.

Louis H. St. Laurent, of Sutton, Que., is making heavy shipments of hardwood timber to Glasgow, Scotland.

The cut of deals by the Bay Shore Lumber Company, Salmon River, N. B., this season will be about 3,000,000 feet.

Rafting operations on the South-west Mirimachi river, in New Brunswick, have been finished. The quantity of logs is not more than half of last season's total, which was 60,000,000 feet.

Mershon, Schuette, Parker & Company, of Saginaw, Mich., have acquired about 15,000,000 feet of lumber in the Georgian Bay district which will be shipped to their Saginaw and Bay City yards.

A statement compiled by the Wisconsin Valley Lumbermen's Association shows that shipments for six months of this year aggregated 224,847,000 feet, as against 231,663,000 feet during the first six months of 1904.

The Department of Indian Affairs, Ottawa, will receive tenders up to Friday, September 1st, for the spruce timber of 9 inches and over in diameter at the stump on the Patcheena Indian Reserve in British Columbia. Information may be obtained upon application to the Indian Superintendent at Victoria, B.C.

E. B. Lloyd, Crown Timber Agent at New Liskeard, Ont., reports that the cut of logs in that district last winter was smaller than the previous year and that great difficulty was experienced in getting them out owing to low water. In addition to the saw logs taken out, 396,601 ties were manufactured, valued at $64,611.30.

The Upper Ottawa Improvement Company will bring 3,000,000 logs down the river this summer, which is a larger number than has been brought down for some years. The reason for this is that the quantity will include 400,000 logs which were cut in the winter of 1903-4 and have since been held in the booms at Des Joachims.

The following cargoes of lumber recently reached the Saginaw river: 477,092 feet from Thessalon, Ont., consigned to E. B. Foss & Company; 196,644 feet from Cutler, Ont., consigned to F. G. Eddy & Company; 502,175 feet from Little Cur-

A SPLENDID ROUTE.
The Wisconsin Central Railway is justly termed the "Sportman's Line" because it reaches into and through the very heart of the choicest hunting grounds in America.
The very best wild fowl shooting of the entire North is reached ONLY by this line. Hundreds of beautiful lakes abounding in wild rice and celery attracts myriads of ducks and geese and afford the finest kind of cover and the choicest shooting to be found the country over.
The Wisconsin Central Railway caters especially to the sporting public and during the various seasons for hunting and fishing furnishes daily information to its patrons as to local condition s anywhere along its lines upon application to the nearest ticket agent. It also arranges its train service with special reference to the convenience and comfort of sportsmen, and its employes are constantly on the alert to make travel over their lines pleasant and comfortable.
This line offers the best route between Chicago, St. Paul, Milwaukee, Minneapolis or to Lake Superior points via Ashland, Wisconsin.

BRITISH COLUMBIA LETTER.

(Correspondence of the CANADA LUMBERMAN.)

VANCOUVER, B.C., July 25.—After a summer of fairly good business, the trade in connection with the lumber industry is beginning to subside. It may be that because of harvesting operations, the farmers in the Northwest are not requiring material for building, but just at present there is quite a lull. Some of the mills are taking advantage of it and are shut down for overhauling, something which seldom occurs as early in the season as this. This applies particularly to the mills on the coast. Some are still going full time of ten hours, while others are adding to stock.

Up-country, conditions seem to be somewhat better. The mills of the Kamloops Lumber Company are going even overtime, and the Mundy Lumber Company, which will start operating this week or next, proposes to run night and day. And yet in parts of the Kootenay the fear of the sheriff has not altogether been dispelled. On the whole, conditions are not nearly as bad as last year at this time, with the exception, perhaps, of the shingle branch of the industry. Prices, too, have been maintained, while during the late summer and fall of 1904 cutting of prices was going on. What has been sold has brought a fair figure.

There is no appreciable betterment in the logging industry. As stated two weeks ago, the extensive operations of large numbers of camps are resulting in over-production. With the brisk business of the spring still continuing there would be none too much demand for logs, but with the falling off in trade many booms will go hunting for buyers.

There is not a great deal of talk on the coast concerning the pool of the Mountain lumber manufacturers which was effected at Calgary a short time ago. That did not come as a surprise to those who have been watching conditions in the rapidly developing Territories, and before a very great length of time has elapsed the western manufacturers will have their own yards in the consuming districts. This will be hastened by the advent into British Columbia of American lumbermen, who have successfully carried on business by such methods for a number of years.

The talk emanating from American sources of the probability of the United States Government withdrawing the duty on lumber entering that country is regarded by prominent lumbermen here as merely a blind. If the duty is withdrawn, it will be with the idea of stopping if possible the imposition of a similar duty by Canada, and a repetition of the tactics of 1896 are looked for. Even with the duty off, the American lumbermen would still have the best of the bargain, as all the raw material used by Canadian manufacturers is very heavily taxed, and the cost of production is, accordingly, much higher in comparison.

LOG QUOTATIONS ADVANCE.

The Lumber Review states that fir logs have advanced from fifty cents to one dollar per thousand. One year ago at this time there was a surplus of 155,000,000 ft. in the watersofwestern Washington, but at this time there is not 20,000,000 above the regular demand. Logs have never been known to be so scarce on Puget Sound at this time of the year. There are but very few small loggers operating and the larger concerns represented in the Washington Logging and Brokerage Company are working with a decreased force. The advance in fir logs became operative on July 1. No. two went from $4.50 to $5, merchantable from $6.50 to $7, flooring from $8 to $8.50, and long dimension material jumped up $1.

NEW BRUNS LUMBER SHIPMENTS.

The shipment of deals from St. John, N. B., this year has exceeded that of last year to the same date by about 17,000,000 feet. Shipments to June 30 and for the corresponding period last year were:

	1905	1904
Spruce deals, etc. sup ft.	82,000,000	65,000,000
Birch planks, sup. ft. . .	4,500,000	2,700,000
Birch timber, tons	3,200	2,000

Deal shipments from points at the head of the Bay of Fundy have been 25 per cent. less than last year and from Halifax 40 per cent. less. It is estimated that the total Nova Scotia spruce shipments this year will not be more than 60 per cent. of those of last year.

BRITISH COLUMBIA TIMBER IN DEMAND.

American capitalists close to the management of the Grand Trunk Pacific Railway are reported to be seeking to acquire extensive timber lands on Moresby Island, the southerly island of the Queen Charlotte group, in British Columbia. Within the next thirty days application will be made to the Chief Commissioner of Lands and Works for permission to cut the timber on 107 square miles of land on Moresby Island. For each square mile so taken up the Government fee will be $140 per annum.

The identity of the capitalists behind the applicants for this land is unknown beyond the fact that they are Americans. It is supposed in some quarters that the McGoldrick interests of Ohio may be the background applicants, but this is only surmise, and is largely based on the fact that the Ohio people have recently acquired hundreds of square miles of timber lands from the coast right through to Pine River Pass along the route tributary to the Grand Trunk Pacific line.

An extensive acreage of timber limits on Stuart and Fraser Lakes has been taken up by a number of Vancouverites. These lakes are not far from Fort George, and presuming that the Grand Trunk Pacific enters the province through the Pine River Pass, it will have to swing along toward the sea coast by the Nechaco, Endaco and Bulkley Rivers, and so the timber bordering on Stuart and Fraser Lakes and through all the country in that vicinity will be tributary to the new line.

The Vancouverites who are paving the way to the ownership of the timber lands along the proposed transcontinental route are Messrs. Robert Kelly, F. C. Wade, K.C., G. I. Wilson and J. Y. Rochester.

BRITISH LUMBER PRICE S.

The following prices were realized for Canadian deals, etc., at an auction sale held by Foy, Morgan & Company, London, England, on July 19th:

PINE—Ex. Kildona, from Montreal—14-16 ft. 3 x 11 in. first quality red, £15 per standard of 1,980 ft.; 12-16 ft. 3 x 11, £15 10s; 14-17 ft. 3 x 10, £14 15s; 14-17 ft. 3 x 9, £15; 14-16 ft. 3 x 9, £14 15s; 12-16 ft. 3 x 9, £14 15s; 14-16 ft. 3 x 11 in. second quality red, £10 5s; 12-16 ft. 3 x 11, £10 10s; 14-16 ft. 3 x 10, £9 10s; 14-16 ft. 3 x 9, £9 15s and £10; 13-17 ft. 3 x 9, £9 15s. THE HARDWOOD DEMAND.

Contrary to anticipation, says the Hardwood Record of Chicago, the general hardwood lumber demand from one end of the country to the other has exhibited a marked improvement during the last two weeks—an improved condition in inquiry and actual ordering forward of stock that comes fully a month earlier than was expected even by the optimistic.

In the South weather conditions still remain unfavorable for the getting out of oak and many other varieties of hardwoods, and it is practically certain that oak values, especially in plain wood, will outstrip the highest prices paid early in the spring.

In Michigan and Wisconsin black ash has become so scarce as to be almost out of the market.

Maple, while in less aggregate supply than a year ago, is moving rather slowly. The flooring makers have consumed the big end of the inch, but there seems to be a little overstock of thick lumber.

The good end of basswood is moving very well indeed, and there is a special call for winter sawed, end piled, strictly white. The coarse end of the wood is dragging.

Rock elm is very scarce and ranging high in value, and in many instances completely out of stock.

Good birch, especially that showing a fair proportion of red, is in strong demand generally in Michigan, while some of the Wisconsin dealers report it dragging.

Grey elm, an exceptionally good wood, for some strange reason is not meeting the expectation of producers in volume of demand. Some dealers claim that the price was boosted too high early in the year and that many consumers have substituted gum and other woods in its place.

The good end of poplar is still doing first rate, while the common and coarse end is dragging more or less.

There seems to be an increased demand for quarter sawed oak, and apparently there has been less of this sawing produced than last year, which would augur a prospect for increased values. Plain oak, however, still has the call in the market, and buyers generally are recognizing that buying plain wood at any reasonable price constitutes a good purchase.

CURRENT TRADE CONDITIONS.

ONTARIO.

The lumber demand is confined almost exclusively to immediate requirements, but in pine especially this represents a large volume of business. Building material has been and is in excellent demand, and dealers are finding difficulty in securing sufficient dry stock. Much of the new cut is not yet in shipping condition. A Western Ontario manufacturer who takes a very optimistic view of the outlook, reports a heavy business in special bills which are shipped direct from the saw, such as bridge and car timbers, white pine decking and light and heavy construction timbers. United States buyers have not taken quite as much lumber as last year, but this has been offset by the increased home consumption.

The hardwood trade does not show a great deal of activity, but manufacturers appear to have confidence in the situation and are not cutting prices. They are waiting for the fall demand, which they expect will be good as a result of abundant crops and the consequent increase in the purchasing power of the country. Hardwood prices are by no means high, and the margin of profit to manufacturers is small. For this reason the coming season's production of logs is likely to be curtailed.

QUEBEC AND NEW BRUNSWICK.

Considering that labor troubles have interfered with building operations in Montreal, the showing made by the building permits, which are in excess of last year, is very encouraging. The

season promises to continue active, with a good demand for lumber. British shipments from Montreal during July were light. The Quebec timber market is quiet, with nominal price fluctuations. Oak is a little lower, while ash is quite firm at 26 to 28 cents for 10 inch average and 30 to 32 cents for 16 inch.

Maritime Province spruce is going principally to the United States, where conditions are good. A Halifax shipper takes exception to the statement in a recent issue that the South American market is in a healthy condition. He claims that shipments have been much lighter than last year, and that there is now very little activity, whereas at this time last year buying for fall shipment was much in evidence. Nevertheless, spruce lumber at present prices should be good property.

UNITED STATES.

The healthy condition of the white pine trade has been further strengthened by the almost certainty of an abundant crop of winter and spring wheat and the probability of a record yield of corn. Another year of continued prosperity in all lines of business is believed to be assured, and this has brightened the outlook for lumber. All grades of white pine are moving actively for this season of the year, and prices are being well maintained. Our Buffalo list this week shows an advance of $1 per thousand on all grades of barn boards and inch No. 2 cutting up. Ten inch box is also slightly higher. Spruce lumber is showing increased strength. The wholesale price at Boston was last week advanced $2 a thousand feet on frames and from 50 cents to $2 on random. Although the mills are operating to their full capacity, stocks are not accumulating, and it is claimed that the recent advance in prices is warranted by the relation of supply to demand.

It is between seasons with the hardwoods and many of the larger manufacturing concerns are allowing their stocks to run down. When they again enter the market prices are not likely to be much changed, for there is an ample supply of stock of nearly all kinds. The exception to this is plain oak. Basswood is still moving unsatisfactorily, while the demand for birch continues fully up to the supply.

Lath is quite scarce and the demand continues strong. No. 1 white pine in carload lots is selling in Chicago at $4.25, No. 2 at $3.50 to $3.75, and No. 1 hemlock at $2.25.

FOREIGN.

Conservatism still characterizes the operations of British lumber merchants, with the result that most of the transactions taking place are infinitesimal. It is hoped that the beginning of peace negotiations will stimulate the demand and restore confidence, which has been lacking nearly all season, but this is by no means certain. It is some satisfaction, however, to learn that a few merchants are prepared to do business at present prices. One authority says that many of the most cautious importers, who had some time ago decided to postpone further operations to an indefinite period, and leave autumn cargoes alone, are now negotiating for further goods, and, we are glad to say, some good contracts have resulted. Sellers, on their part, are undoubtedly acting wisely in continuing to sell at the old figures while buyers are in the humor to be stranded in the upper waters of the St. John. Already several manufacturers in this city are reckoning their available raw material as sufficient for a few days only, and unless a rise of water occurs it is probable that the end of this month will find most of the important plants on the river shut down for an indefinite period.

Under ordinary circumstances, when the log drives have reached the main river they are considered in safe water, but the fact that there has been no important rainfall at the headwaters during the past two months and that the river is consequently phenomenally low, has entirely upset the calculations of those interested. Logs are coming into the booms at Fredericton very slowly and unless conditions improve materially during the next week rafting operations will be entirely suspended.

A feature of the trade is the increasing demand for spruce lath in the New York market and a consequent firmness with a tendency to advance in prices. Shipments from this port during the last month have been moderately heavy and stocks are consequently somewhat below the figures given last month; 2,000,000 would easily cover the available. At present writing spruce slab lath are quoted f.o.b. schooner St. John at $2.45 for non-dutiable and $2.20 for dutiable.

The cedar shingle market has since last writing developed a lack of stimulus which has had an unfavorable effect upon prices, although at just this season of the year this condition is expected and therefore in this case has caused no surprise whatever. Stocks in this line are moderately heavy owing to the scarcity of tonnage suitable for the shipment of this kind of goods, as mentioned in previous letters, although shipments during the past month have been somewhat larger than the output. At this date the total holdings in this line would aggregate 4,000,000.

Prices at this date on cedar shingles, f.o.b. schooner St. John, are quoted at: Extras, $2.70; clears, $2.20; 2nd clears, $1.75; No. 1's, 90 cents.

Merchantable inch spruce boards are brisk and stocks have been somewhat reduced during the past month; 1,250,000

A SPLENDID ROUTE.
The Wisconsin Central Railway is justly termed the "Sportman's Line" because it reaches into and through the very heart of the choicest hunting grounds in America.
The very best wild fowl shooting of the entire North is reached ONLY by this line. Hundreds of beautiful lakes abounding in wild rice and celery attracts myriads of ducks and geese and afford the finest kind of cover and the choicest shooting to be found the country over.
The Wisconsin Central Railway caters especially to the sporting public and during the various seasons for hunting and fishing furnishes daily information to its patrons as to local condition s anywhere along its lines upon application to the nearest ticket agent. It also arranges its train service with special reference to the convenience and comfort of sportsmen, and its employes are constantly on the alert to make travel over their lines pleasant and comfortable.
This line offers the best route between Chicago, St. Paul, Milwaukee. Minneapolis or to Lake Superior points via Ashland, Wisconsin.

ft. would cover the available at this date. Prices quoted last month, namely, $10.50 per M ft. for dutiable and $12.50 for non-dutiable, f.o.b. St. John, will still apply.

While little is offering in the way of charters to the United States, the extreme scarcity in this line has been somewhat relieved but not sufficiently so as yet to affect rates, which are quoted to Boston (long lumber) at $3.00 and to New York at $3.75.

THE COOPERAGE STOCK SITUATION.

The Sutherland-Innes Company, Chatham, Ont., furnish the following report of cooperage stock conditions:

Business is beginning to look up again in the cooperage trade, although it is not yet what it should be for this season of the year. The reports from different apple-producing states are very conflicting, some of the reports giving as high as 75 per cent. crop, while others go down as low as 25 per cent. We believe, however, taking it all around, there will be a fairly good apple crop in the United States, and certainly if all the good apples are barreled, the demand for cooperage stock will be very heavy indeed. Prices of stock, however, are very unsatisfactory to the manufacturers, some of the smaller manufacturers having been compelled, on account of financial matters, to sell their stock at low figures to the dealers, and the dealers are offering the stock at prices which would make it impossible for the manufacturers to make a living or to duplicate the stock. A great deal of this stock, of course, is of a quality which is dear at almost any price, but still it affects the market, both to the detriment of the manufacturers who turn out good stock and to the regular consumers who buy good stock but have to compete against the traveling coopers who buy this cheap stock, and sell barrels at very low figures. This is more particularly the case in lower grades of stock; flour and sugar barrel stock are a good deal firmer than they were, and with the prospects of the best wheat harvest for years, it will undoubtedly consume a very large amount of stock. We look for much higher prices in the higher grades before the end of the season. There is no doubt that the prospects of such excellent crops all over the country will also boom business generally, and increase the consumption of cooperage material all along the line.

The outputs at the different mills have been very much curtailed this season, a great many of the mills already having cut out their stocks and closed down for the balance of the year, as they found it unremunerative to truck logs at the present prices of staves, hoops and heading.

The weather has been most unfavorable throughout the North and a good part of the South for the production of cooperage stock. In some parts rain has averaged from twenty to twenty-two days in the month, not continual rain, but more or less rain every day. This has had the effect to cause considerable of the stock to mildew and reduce the production of high-grade stock very considerably, of course increasing the production of low-grade stock.

The present indications are that business will continue to pick up and that the stocks on hand will be considerably depleted during August.

Tight barrel stock of all kinds has had quite a boom; the production has been very limited, indeed, on account of the unfavorable weather in the South, and the stocks of rough staves, especially pipe staves in the South, are lower than they have been for years. Unless the weather improves materially during the next two months, there will be a great dearth of staves in the South for export, and it is a question where prices will go to. In the meantime the producers who have any good pipe or hogshead staves for shipment to New Orleans or other Southern ports are obtaining record prices, but, on account of the difficulties of hauling to the railroad and the heavy expenses incurred, they are not making any more money than they would at average prices with good hauling.

White oak timber, of course, is getting more scarce all the time, and the production will be decreased year by year for natural causes, but with unfavorable weather the production has been artificially decreased, and consequently prices are higher than they have been at almost any previous time.

The demand for export is very heavy, and it is difficult for the producers to supply their regular customers at the present time.

TIMBER LIMIT TRANSACTIONS.

The Edward Hines Lumber Company, of Chicago, have purchased the entire plant of the White River Lumber Company at Mason, Wis., including everything pertaining to the latter's operations in the northern part of Wisconsin. The standing pine included is reported to be between 300,000,000 and 350,000,000 feet and the money involved is placed at $3,000,000.

This is but another step in the constant advance of the "Napoleon of the lumber trade", whose total additional investments, if reports are correct, approximate $10,000,000 in the past year, which together with his previous holdings make his individual lumber interests the largest in the country.

		30,721,528

Concerning the output of lumber, etc., manufactured at the saw-mills cutting timber procured from Dominion lands, Mr. Stephenson says :

As has been the practice in past years, I give the following particulars showing the total quantity of lumber disposed of during the year in this district (which covers the Province of Manitoba and Eastern Assiniboia), and also the source from whence it came :—

Sales from mills operated in western Ontario at points west of Port Arthur, viz, at Rat Portage, Keewatin, Savanne, Pigeon river, Rainy river and at a few other points	125,000,000 feet
Shipped from British Columbia	105,000,000 feet
From mills operated in Manitoba—	
On Dominion lands under license	28,866,143 "
On Dominion lands under pay permits	8,000,000 "
On Dominion lands under free permits	6,000,000 "
Lumber imported from United States	70,000,000 "
To'al	342,866,143 "
Estimated quantity sold during preceding year	274,779,853 "

In addition to the quantity of lumber named as coming from the United States this year, a considerable quantity of round timber was brought in for manufacture at our mills. Mr. D. E. Sprague imported upwards of 4,000,000 feet which came from Northern Minnesota and was brought down the Red river to Winnipeg.

The following figures as to the wholesale price at which lumber is selling at railway points in this agency were obtained from careful inquiry :—

Pine and fir—	
Dimension lumber	$18 to $25
Finishing in fir	30 to 40
Flooring, siding & ceiling	23 to 35
Ship-lap & common boards	15 to 21
Spruce—	
Dimension and boards	15 to 18
Lath(including pine & fir)	$2.75 to $3 75
Shingles (cedar)	$1.80 to $2.50

The selling price in Winnipeg is slightly lower in some particulars than the figures above.

WINNIPEG LUMBER NEWS.

Winnipeg has just added another strong lumber company to its list, this being the J. C. Graham Company, Limited, successors to the Case-Chandler Company. At the head of this firm is the well-known lumberman, John C. Graham, formerly head of the Prairie Lumber Company. Associated with him are Messrs. W. K. Chandler, T. R. Case and others, all of

Winnipeg. This company promises to be a very successful one, being managed by men of experience and ability. Their new head office is situated in the Union Bank Building, Winnipeg. Mr. Graham is at present in British Columbia on business.

Christie & Company, Limited, wholesale lumber dealers, have just opened out in their new quarters, 426 Union Bank, Winnipeg. Mr. John A. Christie is the manager of the company, and we predict for them a prosperous future.

Occupying Suite 413, Union Bank Chambers, Winnipeg, is the new M. G. Curran Lumber Company, who make a specialty of Pacific coast and hardwood products. Mr. Curran reports a good business in long and special fir timbers, rough strips and piece stuff.

Mr. Curran has just returned from a trip to Indiana, where he went concerning hardwood lumber.

Mr. Dutton, of the Red Deer and Elk River Lumber Companies reports a splendid business for his companies.

All the Winnipeg lumbermen say that the trade is good, but the supply is quite equal to the demand.

The red cedar shingle market in Winnipeg has been very good. The great building activity has been conducive to a sp'endid demand.

A few of the Winnipeg lumbermen will attend the big Hoo-Hoo Annual Concatenation at Portland, Oregon, on Sept. 9th. Mr. D. B. Sprague, the Central Canada Vicegerent, says he hopes to see quite a number go to the big event.

Immediately after the sale of the Tanner Brothers' Limits, Logs and Mill at the Board of Trade Room, Toronto, on AUGUST 31ST, NEXT, there will be offered for sale by auction Timber Berth, Township of Morin, 36 square miles, well timbered with Pine, Hemlock, Spruce, etc.

For estimates and other particulars apply to PETER RYAN, Toronto.

N. B.—The above license is held on the most favorable terms, dues, and ground rent, and includes the right to cut all the timber on the territory.

CURRENT TRADE CONDITIONS.

ONTARIO.

For the month of August a large quantity of pine and hemlock lumber is going into consumption; the late Summer activity is showing itself, and this is regarded as the forerunner of a very brisk Fall trade. Conditions could scarcely be more healthy. A few of the mills in the Georgian Bay district have been obliged to close down for want of logs, this being due to the late arrival of some of the drives. Good crops are helping the country demand, and the call for mixed car lots is indicative of light stocks carried by the retailers.

There is some betterment in the demand for the hardwoods, but this branch of the lumber industry is still backward, as it has been nearly all season. This inactivity has not brought about lower prices, for, considering the cost of logs and labor, prices are now too low in most instances. Orders are fairly numerous for birch and maple, but basswood and soft elm are dull. Some manufacturers are holding their lumber rather than sell at the prices now offered, as they believe that the market will be stronger in the Fall.

QUEBEC AND NEW BRUNSWICK.

The low water in the St. John river is still causing much anxiety, as a few of the mills have been compelled to cease operations. This condition has encouraged manufacturers to hold out for higher prices, and practically no stock is being offered below the regular market price. Another factor in the situation is the loss of five million feet of lumber in the mill fire at Fredericton last week. It is generally believed that the spruce market will improve and will gradually get into a stronger position.

No improvement has taken place in New Brunswick cedar shingles; in fact, sales of Extras for Boston delivery are now being made at $3.20. Lath, on the other hand, is very firm, with an advancing tendency.

MANITOBA AND BRITISH COLUMBIA.

Building permits have been issued in Winnipeg this year for 2,868 buildings, representing an expenditure of $8,295,000. This statement clearly shows the unprecedented activity in building operations in that city, and also gives some conception of the lumber demand. Dealers have been kept busy all season, and while prices are not all that might be desired, the slaughtering of the market which was characteristic of the business last year, has been absent. The country

demand has been of moderate proportions only, but the promise of a wheat harvest variously estimated between 80,000,000 to 100,000,000 bushels for Manitoba and the Territories, has created a feeling of confidence which will undoubtedly be reflected in large orders for lumber. The situation in British Columbia is very unsettled, the announcement having recently been made that the Coast mills have met the reduction of the Mountain mills and are quoting shiplap and other rough dimension lumber at from $17 to $18 for delivery at points in the Northwest. Dressed lumber, we understand, has been advanced $1 per thousand.

UNITED STATES.

The United States has just harvested a bountiful wheat crop, and present indications are for the largest yield of corn on record. The effect of such an abundant harvest upon the lumber trade cannot be otherwise than reassuring. Pessimism is entirely absent, and everyone is looking forward to another year of great prosperity. In the West there is a lull in the demand for northern pine, but this is explained by the fact that wholesale dealers were heavy buyers early in the Spring and that the bulk of the season's cut has passed out of first hands. The Eastern demand for white pine is exceptionally strong, and it is expected that the White Pine Association of Buffalo and Tonawanda will this week agree upon an advance. There is a good call for coarse lumber, box and fine common. The advance of $2.00 a thousand on spruce frames has checked the demand, but buyers have not been able to secure any concessions of consequence, and the market is generally firm. Random spruce is irregular, the range of prices being quite $2. Hemlock continues to show great strength. Pennsylvania stock for New York delivery was recently advanced $1 a thousand on 2 × 4 and 2½ × 4, 10, 18 and 20 foot lengths. No. 2 boards were advanced 50 cents.

Plain oak and birch lead the hardwoods, in which there has not yet been much revival. Some of the furniture factories in Michigan are buying a little more liberally, and the implement factories appear to be running short of certain grades, but the demand is not nearly so active as for pine and spruce. White cedar shingles are now held at $2.50 at Chicago, an advance of practically 25 cents in the last three months.

GREAT BRITAIN.

A careful review of the various reports received of the British lumber markets reveals few changes, but conditions would seem to be shaping towards improvement. The small stocks on hand cannot be ignored, and if consumption should revive it would not be long before an acute scarcity would develop. The stock of lumber in the public docks at London on July 31st of this year was only 14,707,000 pieces, compared with 17,004,000 pieces in 1904, 17,129,000 pieces in 1903 and as much as 20,439,000 pieces in 1902. The deliveries have been 19,921,000 pieces, almost 2,000,000 pieces less than last year, but sufficient to show that the consumption is still considerable. From the St. Lawrence there has been received this year 154,000 pieces of pine deals, while last year for the same period the import was 517,000 pieces. Birch planks have been imported too heavily and prices are a little weaker. This year's receipts of 223,000 pieces at London compares with 110,000 pieces last season. There has been a fair demand for elm, which continues to realize high prices.

STOCKS AND PRICES.

Randolph & Baker, of St. John, N. B., recently sold nearly all their logs to A. Cushing & Company.

Greer Bros., railway contractors, Port Arthur, Ont., have awarded a contract to Joseph Vigars to take out 8,000 ties.

Watson & Todd are now engaged in shipping the deals purchased this season from the W. C. Edwards Company, Rockland, Ont.

The steamer Yangtze sailed last week from Vancouver, B.C., carrying 100,000 feet of deck planking consigned to Copenhagan, Denmark, and 200,000 feet of rough material consigned partly to Japan and partly to Hong Kong.

The following vessels have been chartered to load lumber at the Hastings mill, Vancouver, B.C., in the near future: British barque Don, now loading lumber at the mill for the United Kingdom. German ship Najade, due to arrive from Yokohama and under charter to load for South America. Schooner W. H. Talbot, expected to arrive in port about August 20th, chartered to load lumber for Japan. German ship Carl, en route to Vancouver from Taku and due to arrive about August 15th to load for the United Kingdom. Chilean barque Royal Sovereign, due to arrive in port about September, under charter to load for Valparaiso. German barque Nil Desperandum, under charter to load lumber for Hamburg. She will not reach port till about the end of October.

THE GLASGOW MARKET.

Messrs. Edmiston & Mitchells, in their last Monthly Timber Circular, review the Glasgow market as follows:

The past month is proverbially a slack one in this district, owing to the local holidays held annually at that time, but this year has proved exceptionally dull, and may be attributed to the quietness of the housebuilding trade, together with the difficulty existing between the joiners and their employers, which still, unfortunately, remains unsettled. At the same time, it may be said that prices as a whole have been wonderfully well maintained, the only exception being in the case of birch, which has been imported rather more freely than the market could comfortably absorb. First quality pine deals and sidings have also been coming forward pretty freely, and have consequently been pressed for sale, with the result that values are hardly so firm as they were, but granted that the import for the remainder of the season remains on a similar scale to that up to date, prices will probably harden again. From the extreme caution displayed by buyers, it is evident that they fear prices will be easier later on in the season, but this opinion is doubtless based upon the expectation of a heavy import, and the next month or two will show whether or not this is likely to be realized.

American hardwoods continue to be imported pretty freely, and there is evidence

A SPLENDID ROUTE.
The Wisconsin Central Railway is justly termed the "Sportman's Line" because it reaches into and through the very heart of the choicest hunting grounds in America.
The very best wild fowl shooting of the entire North is reached ONLY by this line. Hundreds of beautiful lakes abounding in wild rice and celery attracts myriads of ducks and geese and afford the finest kind of cover and the choicest shooting to be found the country over.
The Wisconsin Central Railway caters especially to the sporting public and during the various seasons for hunting and fishing furnishes daily information to its patrons as to local condition s anywhere along its lines upon application to the nearest ticket agent. It also arranges its train service with special reference to the convenience and comfort of sportsmen, and its employes are constantly on the alert to make travel over their lines pleasant and comfortable.
This line offers the best route between Chicago, St. Paul, Milwaukee. Minneapolis or to Lake Superior points via Ashland, Wisconsin.

of prices being shaded here and there to avoid storage expenses, particularly so in the case of oak lumber.

Shipbuilders in Scotland launched 16 vessels of 22,124 tons during the month of July, and the output for the seven months of this year amounts to 281,984 tons, being 47,000 tons more than for the same period last year. The new work placed during the past month aggregates roughly 20,000 tons.

Housebuilding is very quiet and is bound to continue so until the trouble with the joiners is settled.

WHITE PINE.—The import consists of 1,400 loads waney and 250 loads square pine, the greater part against contracts. There have been no transactions of any importance, and inquiries have been few owing to the holidays. Stocks are moderate, but sufficient for prospective requirements.

OAK.—The import for the month consists of about 550 loads Quebec timber, the bulk of which, we understand, has been taken over by one of our railway companies. General demand is quiet and stocks are ample.

ELM.—There has been an import of about 600 loads, chiefly first-class contract rock elm, the demand for which is fairly active, and prices are firm.

QUEBEC BIRCH.—The July imports amount to about 550 logs and 100 loads planks, compared with 500 logs for corresponding month last year. Buyers are now fairly well supplied, and prices are consequently weaker than they were. There were two or three shipments of Quebec planks to hand during the month, which were disposed of "ex quay" at round about £11 per standard, it is reported.

ASH.—The import has again been only trifling and values are unaltered. There are occasional inquiries in the market for small lots of 20 to 40 logs, but nothing like an active demand.

DEALS, &C.—Imports have been rather heavier during the month, and, on account of the holidays, sales "ex quay" have been rather more difficult to effect, consequently the bulk of the shipments have had to be stored. Stocks, though not large, are increasing, and prices are nominally unaltered. Current values are as under:

BROAD FIRST PINE DEALS—£33 to £35; 11-inch, £30 to £32; ends and non-dimensions, £23 to £25. SECOND PINE DEALS—11-inch and up, £17 to £19; ends and non-dimensions, £13 to £14 10s. THIRD PINE DEALS—11-inch and up, £11 to £14; ends and non-dimensions, £9 10s. to £10 10s. RED PINE DEALS—9 and 11 inch, £9 to £10; narrows, £7 to £8 10s. FIRST PINE SIDINGS AND STRIPS—9 to 10 inch, £23 to £24; 11 to 12 inch, £25 to £26; 13 to 14 inch, £27 to £28. SPRUCE DEALS—9-inch and up, £8 5s. to £8 15s; 7 and 8 inch, £7 5s. to £7 15s. LOWER PORT PINE AND SPRUCE—9-inch and up, £8 to £8 10s.; 7 and 8 inch, £7 to £7 10s.

SHINGLE MILLS WILL CLOSE.

A report from Seattle, Wash., dated July 31, says:

All the straight shingle-mills of Ballard have signed an agreement to close down between December 1, 1905, and March 1, 1906. By their action the owners seek to relieve the congested condition of the shingle market by cutting off a portion of the supply for three months during the winter, as the Everett shinglemen agreed some days ago to shut down during the period mentioned if the Ballard mills would sign the agreement.

The last signatures of the Ballard mills to the agreement were secured after the meeting held in that city Saturday by the shinglemen had adjourned.

The closing down of the straight shingle-mills between December 1, 1905, and March 1, 1906, is now practically assured, through the agreement signed by the Ballard mills. That means that the Everett mills will fall into line, because the promise was given that they would sign the agreement if Ballard did. This means the closing of 90 per cent. of the mills in the state. Their closing down will cut off during the three months in question about a fifth of the production of the year.

As yet the combination mills of the state have not been asked to sign the agreement.

The saw and shingle mill of J. H. Clark at Mitchell Square, Ont., was destroyed by fire last week.

Donald Fraser & Son, of Fredericton, N. B., suffered a severe loss on August 11th, in the destruction by fire of the Aberdeen saw mill. The mill was totally destroyed, together with nearly 16,000,000 feet of lumber. The loss is estimated at between $10,000 and $150,000, about one-third of which is covered by insurance.

B. C. LUMBER PRICES.

VANCOUVER, B. C., August 9. — The Mountain mills have been quoting such prices for rough and shiplap lumber in Manitoba and the Northwest markets that the Coast mills have been shut out.

Last week the Coast mills notified their agents in the Northwest of their intention to make a reduction that seems to have frustrated the plans of the Mountain mills. The announcement was that shiplap and other rough dimension lumber would be delivered at points in the Northwest at from $17 to $18 per thousand feet, a straight cut of from $2 to $3 per thousand. If the Mountain mills, on the other hand, make a further reduction to $16 per thousand, it is claimed that they will have to do business at a considerable loss. The Coast mills have made an offset by increasing the price of dressed lumber. The price has been put up $1 per thousand on the higher grades, the manufacture of which the Coast mills practically have a monopoly. As the matter stands at present the Coast mills have rather the better of the fight. By the plan adopted, the British Columbia Manufacturers' Association expects to put a stop to the policy of price-cutting of the Mountain mills.

A meeting of the cargo committee of the Pacific Coast Lumber Manufacturers' Association was held in Seattle, Wash., recently for the purpose of perfecting a reorganization of the inspection bureau of the association. The association plans to extend the bureau so as to include coastwise as well as foreign shipments. This will apply to all California, British Columbia and other coastwise cargoes, and may mean the addition of several inspectors to the corps already employed by the bureau. Among those who attended the meeting were E.J. Palmer, of Chemainus, and J. A. Humbird.

Premier Roblin, of Manitoba, who has been visiting Vancouver en route to the Portland fair, expressed the opinion that an import duty should be put on lumber coming into Canada from the United States. While this expression of opinion was not looked for from the premier of the prairie province, it will be all the more pleasing to the lumber interests of this Coast.

CANADIAN NATIONAL EXHIBITION.

The management of the coming Canadian National Exhibition announce that they have made arrangements for the greatest loan collection of art that has ever been exhibited in Canada, and probably in America. They have secured paintings and art treasures illustrative of a long period of years, from the wealthy corporations of the City of London, the great British Universities, including those of Oxford, Cambridge and Dublin, the Government of France, the South Kensington Museum, Right Honourable Lord Strathcona and Mount Royal, and His Honor the Lieutenant Governor of Ontario. This exhibit is expected to exceed in interest and attraction anything ever before presented to the people of Canada or the United States, not excepting the Jubilee presents themselves. The Exhibition opens on August 26th and will continue until September 11th.

LUMBER IN BARBADOS.

From S. P. Musson, Son & Company, Barbados: "The only arrival of lumber during the fortnight is the Schooner "Arthur H. Wright," from LaHave, N.S., with a cargo of 130,000 ft. spruce, sold to arrive some short time ago at $21.50 for merchantable, and $17 for second quality. Another small cargo of this would probably realize similar rates. White pine is still in heavy supply, which with a rather light demand keeps our market very dull. We have to note the arrival of the Schooner "Minnie T," to ourselves, with a mixed cargo of Long and Laying Cedar shingles from Bonaventure, P. Q. For the former we obtained $4.57, while the latter we sold at $1.85 for Extra No. 1, $2.90 for Clear Whites, and $3.10 for Second Clears. Supplies are now ample to meet requirements, and we hear of another cargo about due from Gaspe, for which lower prices will probably have to be accepted."

BRITISH TIMBER IMPORTS.

Following is a statement of the imports of hewn and sawn timber at the principal ports in the United Kingdom during six months ending June 30th, 1905, compared with the same period of 1904, extracted from the "Timber Trades Journal":

	To June 30, 1905 Loads.	To June 30, 1904 Loads.	Increase Loads.	Decrease Loads.
London	505,120	416,196	88,924	
Cardiff	440,473	518,371		77,898
Liverpool	253,813	370,927		117,114
Hull	162,318	225,117		62,799
Manchester	159,561	146,446	13,115	
Newport Mon	136,338	157,201		20,863
West Hartlepool	99,718	138,976		39,258
Grangemouth	78,546	56 382	22,164

in S. E British Columbia, estimated to contain 500 million feet, on a good river. Will be sold at a low price if disposed of quickly—one-third cash, balance on time. For details apply to Box 308 CANADA LUMBERMAN, Toronto.

CURRENT TRADE CONDITIONS.

ONTARIO.

The white pine market is holding its strength in a very satisfactory manner, although, with conditions so generally favorable, it would scarcely be expected to do otherwise. The demand for building material is urgent, as retail stocks have been much reduced by the steady call since the early Spring. Few of the mills have accumulated any dry stock, and as the Fall activity should soon be in evidence, there is a strong probability that the quantity of pine lumber carried into the winter at the mill yards will be below the average. American buyers have been more numerous of late, the abundant harvest across the line having inspired confidence in a continuation of business prosperity, and, consequently, in the present range of lumber values. The heaviest demand continues to be for the common grades.

Some of the lumbermen are already making preparations for woods operations, but no expansion in the log production is as yet indicated. Labor is none too plentiful, and wages may be a little higher than last year. We understand that sawyers and teamsters are being offered $28 to $30.

QUEBEC AND NEW BRUNSWICK.

Labor troubles are still affecting the building trade in Montreal, but taking this fact into consideration an unusually large quantity of lumber is going into consumption and prices are firm. Export shipments are light. New Brunswick and Nova Scotia spruce is feeling the effect of the buoyant market in the Eastern States, where prices have recently advanced about $2 per thousand. Canadian deals for shipment to that market are higher in consequence, 10's and 12's being quoted at St. John at $19.50. Clapboards are also a little firmer and for Boston delivery ruling quotations are $40 to $42 for extras. Lath are very firm and quoted on a basis of $3.65 for 1⅝ inch and $3.50 for 1½ inch for Boston delivery either in car or vessel lots. The demand for shingles is a little more active and stocks of clears are well sold up.

MANITOBA AND BRITISH COLUMBIA.

Harvesting operations are now in progress in some parts of the Northwest, the reports of which indicate a very heavy yield of wheat. There is in consequence a very confident feeling in respect to the business prospects, in which lumber of course shares. From British Columbia comes the report that steps are likely to be taken to prevent the wholesale cutting of prices which seemed likely to result through the action of a few of the manufacturers in lowering their quotations with the object of obtaining the lion's share of the trade. After more serious consideration, the futility of such action is recognized and it is probable that in the near future prices will be restored to a more reasonable basis. There is much activity in timber circles in British Columbia. During July 236 timber-cutting licenses were issued, from which the revenue was over $60,000, about $29,000 being for licenses and $31,000 for royalties.

UNITED STATES.

The position of the lumber manufacturers has been clearly demonstrated during the past week, and if their views are not entirely erroneous the trend of the market is distinctly upward. Prices in the Wisconsin Valley have been selling at 50 cents to $1.50 a thousand above the list price, which has now been revised to conform to the stronger condition of the market. The price list committee of the Northwestern Hemlock Manufacturers' Association, at a meeting held at Wausau, Wisconsin, on August 11th, decided upon the following advances on hemlock: That all items on the list be advanced 50 cents; that piece stuff and timbers in 22 and 24 foot lengths be advanced 50 cents additional; that No.

2 4-inch strips be advanced 50 cents additional. The price of hemlock lath was fixed at $3 for No. 1 and $2.50 for No. 2. Spruce is also quite as strong as pine and hemlock and within the past fortnight there has been an advance in boards and dimension material, which class of lumber is now quoted at $22 to $24. Spruce clapboards are also in a strong position. One year ago they ranged from $37 to $42, while the price to-day for the straights is $44. Spruce lath are selling quite liberally in Massachusetts and Maine, at $3.60.

We cannot report much improvement in the hardwoods. Birch is showing to good advantage and rock elm is moving in some volume, but soft elm, maple and basswood are very dull and prices inclined to be soft. An improvement in the demand is looked for in the near future and those who buy hardwoods at present prices are likely to realize good profits later in the year.

GREAT BRITAIN.

Last week we reported that the British lumber market showed signs of an early improvement. Later advices confirm this view to some extent, but there still exists a wide divergence of opinion and conservatism is still being urged by the majority of importers. The Timber Trades Journal, which at no time magnifies the favorable features of the situation, say of spruce: "Regarding this commodity, the feeling is that there is a better tone all round, with indications of enhanced prices. The firm attitude adopted by shippers some time ago is still held, and they still consider themselves justified in holding out for their figures, and have in some instances refused offers which a few weeks ago would have been readily accepted. On the other hand, importers have somewhat raised their ideas, and buyers in the Bristol Channel, who a few weeks ago talked under £7 c.i.f., have purchased at £7 2s. 6d. c.i.f. Since our last notes we hear a 1,400-standard St. John cargo has been sold in that neighborhood at over this figure; while in the Mersey district we hear that over £7 3s. 9d. has been done for a similar cargo; also small sailers of good stock have brought £7 7s. 6d. c.i.f. both in Lancashire and Bristol Channel markets.

STOCKS AND PRICES.

The E. K. Wood Lumber Company, of Bellingham, Wash., which has a contract for 14,000,000 feet of lumber for Panama, will, it is understood, get their supply of logs from the northern part of Vancouver Island in British Columbia.

The Dickson Company, of Peterboro, have succeeded in getting their entire cut of 15,000,000 feet of logs to their mills at Peterboro and Lakefield. The company have had two gangs of men on the limits in Anstruther and Anson townships all summer cutting hemlock and basswood, in order that the logs may be dry enough to float next spring.

The Moore & Whittington Lumber Company, of Victoria, B. C., have just completed arrangements to ship cedar in scow-load quantities to American firms. They have purchased a logging outfit and expect to have a camp in operation before the end of the month.

BRITISH COLUMBIA LETTER.

(Correspondence of the CANADA LUMBERMAN.)

VANCOUVER, B. C., August 15, 1905.—Prices have altered owing to the action of Coast lumbermen in endeavoring to assist those who would not cut prices in the interior. When the proposed selling pool of manufacturers in the interior of the province was talked of from fifteen to twenty per cent. of the millmen would not agreed, they preferring to sell on their own hook. They dropped the prices on the lower grades to a figure a little less than what the pool proposed, and the others were compelled to follow suit. The result is that the pool has not been effected, and hardly will be. Now the Coast lumber manufacturers are getting into the game, and have reduced prices on the lower grades from $19 and $20 per thousand, delivered in the Territories, to $17 and $18. To offset this loss, the prices on the better grades have been increased from $1 to $1.50. It is thought the manufacturers in the interior will be brought to time, as they cannot stand the cut, and are in fact losing money. The Coast people have rough lumber stock to get rid of, and the reduction will help. Money will not be tied up, and while monetary profit will not result, the industry will be moving.

The trade on the whole is good. In the interior it is even better than on the Coast, and some mills are cutting capacity. Others, while running full time, have even been able to dispose of stock, which is a good indication. As soon as a bountiful harvest is assured, the mill men look to large orders from the Territories. There has been some falling off during the summer, but it is expected that this will pick up.

All those engaged in logging do not agree as to the prospects and conditions of this branch of the industry. While some consider there are too many logs in the water owing to the many camps having been established early in the year, the more optimistic believe that these will soon be used up when the fall orders come in from the North-west. Prices are fair, fir logs going at from $5 to $5.50 and $6 at the camp, with the demand good. Rough cedar is not sought for, and mills will not give a price on it. Cedar is not cut to a very large extent on this side of the line, especially for export. However, mills are proposed for the west coast of Vancouver Island which will cut cedar exclusively, and the owners, who are Americans, consider they can very easily

McLennan Timber Land and Lumber Co., Limited

Selling Agency and Dealers in all kinds of Timber Lands.

Offices: Quebec, 131 St. Peter St. Ottawa, Room 9, Central Chambers.

CANADIAN LUMBER WANTED

A SPLENDID ROUTE.
The Wisconsin Central Railway is justly termed the "Sportman's Line" because it reaches into and through the very heart of the choicest hunting grounds in America.
The very best wild fowl shooting of the entire North is reached ONLY by this line. Hundreds of beautiful lakes abounding in wild rice and celery attracts myriads of ducks and geese and afford the finest kind of cover and the choicest shooting to be found the country over.
The Wisconsin Central Railway caters especially to the sporting public and during the various seasons for hunting and fishing furnishes daily information to its patrons as to local condition s anywhere along its lines upon application to the nearest ticket agent. It also arranges its train service with special reference to the convenience and comfort of sportsmen, and its employes are constantly on the alert to make travel over their lines pleasant and comfortable.
This line offers the best route between Chicago, St. Paul, Milwaukee. Minneapolis or to Lake Superior points via Ashland, Wisconsin.

dispose of their product in the United States even if a duty has to be paid.

At the meeting of Mountain mill representatives held here early in the present month, the proposed selling arrangement fell through for the reason that while all interested professed to be willing to enter into the deal, none would do so when it came to an actual show down on the signing of documents.

Since this meeting the Coast mills made their cut and the Mountain men have been brought to a realization that if they are to retain their business east of the Mountains, they must take steps to protect themselves and at the same time reach an understanding with the Coast lumber interests.

SPRUCE SCANTLINGS.

The Timber Trades Journal, London, Eng., says:

In one or two quarters this year some efforts have been made to effect a reduction in the allowance of £1 per standard off the cargo price customarily made for such scantlings, 6in. and under, as are usually included in spruce cargoes from St. John and other ports. The proportion of scantlings in these cargoes shows a tendency to increase almost in the same way that the wider widths are yearly diminishing. In the days when 15 or 20 per cent. of 11 in. was a not impossible specification for a St. John's cargo, scantlings were not held of much account. Nowadays, when the bulk of the cargo is 7 in. and 8 in., there are shippers who feel that a reduction of £1 per standard is too much for 6 in. and under. As in the wood trade generally, so in spruce, batten and scantling sizes are being sold for purposes for which deal widths were formerly obtained. 6 × 3 is saleable almost at the same money as 7 in. Against this must be set, however, the fact that shippers continue to send forward among the scantlings a number of impossible sizes, such as 4x2½, the effort apparently being to make the most of the wood without regard to the size produced. Under present circumstances, any effort to reduce the allowance of £1 per standard for scantlings would, we feel sure, be strongly resented by buyers. Whether for a better arranged specification buyers would not be inclined to take a slightly smaller reduction is another matter.

ADJUSTMENT OF LUMBER PRICES.

CALGARY, August 16, 1905.—Because of the recent cut of Coast mills in shiplap and rough dimension lumber for Northwest points, the British Columbia Mountain mills have decided to make a further endeavor to combine for the purpose of prstection. Their desire is to form a selling pool, with headquarters in Calgary, and to this end a meeting of the representatives of all the mountain mills has been called to take place here on October 2.

If arrangements should be satisfactorily arranged at this meeting, the management of the selling pool may be enabled to enter into a general price agreement with the Coast mills in respect to the Northwest market.

TIMBER LIMIT TRANSACTIONS.

Tabor & Cameron, of Tacoma, Wash., have purchased from the Bank of British North America 1,200 acres of timber land on Howe Sound, B. C., and adjoining the property of the Canada Lumber & Timber Company. The price is understood to have been in the neighborhood of $12,000 and it is reported that the purchasers will either log or manufacture the timber before long.

John Murray, Provincial Timber Ranger, Vancouver, B. C., reports that the Weyerhauser Lumber Company have a large number of cruisers in the northern part of British Columbia exploring the timber lands in anticipation of the early advent of the Grand Trunk Pacific Railway.

SPRUCE IS HIGHER.

Perhaps one of the most interesting items of the fortnight is in relation to spruce. The basic price of spruce was advanced $1 August 8 by the West Virginia manufacturers. This makes the price of 8 × 8 and under, New York delivery, $21.50; 9, 10 and 12-inch, $23. That is, on the usual basis of twenty-foot lengths and under.

New England is $1.25 above these prices and New Jersey the same. Perhaps a more striking feature is the change in the charge for lengths over twenty feet. This charge has been advanced to $1 for every two feet over twenty feet, whereas it used to be fifty cents. This was done because the long stuff did not pay the manufacturers at the price, and the former differential made it an inducement for the dealers to run their orders largely to long lengths.

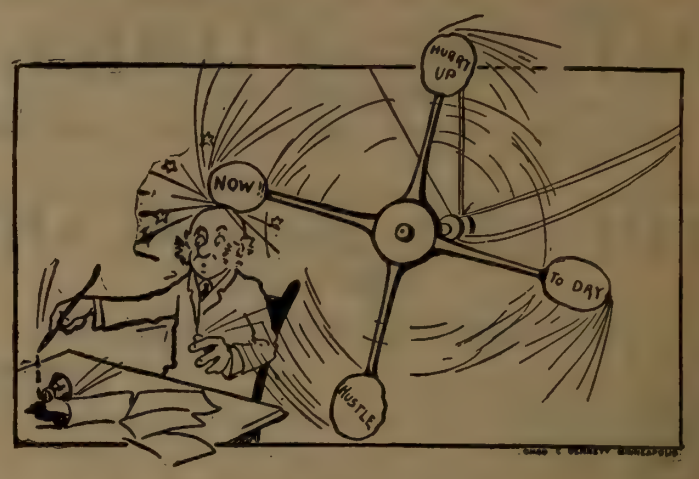
The Gain Robinson Lumber Company has been incorporated under the laws of the state of Massachusetts, with a capital stock of $30,000, to continue the wholesale lumber business which for the past fifteen years has been carried on at Springfield by Mr. Gain Robinson, who was accidently drowned in the Connecticut river on July 11th. The business will be under the active management of Mr. Carles Ruggles, who for the past fifteen years has represented this house as travelling salesman, and who has a thorough acquaintance with the New England trade, and Mr. Edward W. Hannay, who for the past six years has had charge of the office end of the business.



JUST A GENTLE REMINDER

NEW BRUNSWICK LETTER.

(Correspondence of THE CANADA LUMBERMAN.)

ST. JOHN, N.B., Aug. 19th, 1905.—The scarcity of water in the St. John river as referred to in last letter is daily becoming a more vital feature of the lumber manufacturing situation of this section. Millions of feet of logs are hung in the main St. John, mostly above Grand Falls, although the quantity below this point would total to a large figure. The water is lower than it has been for twenty-five years, the weather is remarkably dry, and, unless a rain comes in the immediate future, the mills at this port and all along the river will be compelled to cease operations. Nothing less than a rise of four or five feet in the up-river districts will serve to remedy the present condition of affairs.

The activity of the American deal markets is the most prominent feature of the lumber trade at this date. The demand has steadily increased until prices have reached a high level and the outlook is decidedly encouraging to all who have anything in this line to sell. Local stocks are light; 2,000,000 s. ft. would cover all available at this date. The probabilities are that, even should the logs reach St. John in sufficient quantity to keep the mills in cut, the total cut of "American" lumber in this section will be lighter than usual, as the total of "American" logs got out for New Brunswick mills last winter was much smaller than is ordinarily the case. In several cases American manufacturers confined their operations entirely to Provincial stock.

Shipments of "American" deals from this port have been light all through the season and no important quantity is now en route. Local prices in this line have stiffened considerably since last writing and for delivery during the next three months no quotation could be obtained, on a specification of say a twenty foot average length, less than: 10's and 12's, $19.50; 9's, $17; narrows, $14 (f.o.b. schr. St. John.)

Freight rates to New York on long lumber are quoted at $3.50 per M, with charters not plentiful and yet not so scarce as during June and July.

The depression in the English markets for Canadian wood goods continues and prospects are not at all encouraging to the seller. The volume of sales is very light and the lack of eagerness on the part of buyers is very marked. Shipments from this port have been very light during the last month for this season of the year and stocks have consequently increased somewhat since last writing; 4,500,000 would about cover the holdings in this line.

Prices quoted last month will still apply, viz.:—$11.75 to $12.25 on a specification containing say 50 per cent. 7's and 8's, 35 per cent. 9's and 15 per cent. 11's and up, 2/3 price for fourths and ends, f.o.b. steamer, St. John.

An incident which has attracted widespread attention in lumbering circles of New Brunswick and Maine, was the attempt to dynamite the dam on Chamberlain Lake. The object of this dam is, according to the ideas of the St. John River lumbermen, to divert a certain amount of water which would naturally flow into the St. John, into the Penobscot river. The dam in question is situated on the Allegash river, a branch of the St. John, and also connected with the Penobscot river. On Wednesday morning, August 2nd, a party of men (said to be in the employ of a firm of lumber manufacturers who have their mill on the Maine side of the St. John) arrived at this dam, disarmed the caretaker and opened the dam gates. They did not further molest the caretaker and he at once set out to obtain help. He returned alone, but having readily guessed his errand and anticipating interference, the men from the St. John blew up three of the gates and disappeared. A short time afterward a party of men reached the dam from Eagle Lake and repairs were immediately made. The men from Penobscot claim that the attempt was a failure and that the water was diverted for only forty-eight hours. The water in the St. John rose an inch or two, but almost immediately fell off again. The dam is now guarded by a force of forty armed men.

SHORTAGE OF SPRUCE LOGS.

"Lumber that is now being sawn, unless under contract, is being done at a loss," said Mr. W. H. Murray, of St. John, N.B., in an interview recently. "The millmen are, as a rule, short of logs. Randolph & Baker have been compelled to close down. Stetson & Cutler have, I think, enough to carry them through the season, but they are lucky, and better off than most of us. We will be able to run until probably the middle of September, but I am told that several other mills will close about the twenty-fifth of this month. It has not been a good season. Some of the millers were cutting on contracts on which they were able to make some money, but after their contracts were filled and they commenced cutting for stock it was at no profit to speak of. There are many logs hung up—I can't tell you off hand how many—but most of them will stay where they are till next year. Rain, if it is heavy enough, will bring down some, but generally the mill season will be very short."

TIMBER LIMIT FOR SALE

SPLENDID CEDAR AND HARDWOOD Timber Limit up-to-date mill with gunshot feed, trimmers and other full equipment; sufficient timber to run 10 years; mill now in full operation, located on Georgian Bay; good shipping facilities; output practically sold for several years. Box 230, CANADA LUMBERMAN, Toronto.

Sale of Burnt Timber

A quantity of pine timber on what is known as Berth B.1, containing 21 sqnare miles more or less, situated South of Woman River Station on the Canadian Pacific Railway 120 miles west of Sudbury, in the district of Algoma, having been damaged by fire, the undersigned hereby calls for tenders for the right to cut same.

Tenders will be received up to and including the 30th day of September next, and must state the rate per thousand feet board measure, including dues, which the tenderer is prepared to pay for the timber, or per thousand feet cubic for whatever proportion of it may be manufactured into waney or square timber, including dues. The timber to be cut during the present winter. Tenders to be accompanied by a marked cheque for $500.00 payable to the Honourable the Treasurer of Ontario. The timber to be sold subject to the Crown Timber Regulations except where varied by the conditions of this sale. The party awarded the right to cut will be required to give a bond with satisfactory sureties for the payment of the price and the due performance of all terms and conditions required by this Department.

The Department does not bind itself to accept the highest or any tender.

Tenders to be marked "Tenders for Burnt Timber," and addressed to the Honourable the Minister of Lands and Mines, Toronto.

F. COCHRANE.
Minister of Lands and Mines.

Department of Lands and Mines,
Woods and Forests Branch,
Toronto, 21st of August, 1905.

N.B.—No unauthorized publication of this Notice will be paid for.

WANTED—TWO MILLION SPRUCE LATH, f o b. New York, via boat or rail. P. V. LAND, 325 Lenox Ave., New York, N. Y.

FOR SALE—SAW AND STAVE MILL IN Western Ontario Can be seen in operation now. Must be sold at once, to close an estate. Box 306, CANADA LUMBERMAN, Toronto.

Lumber

We have about two million feet of this season's cut for sale—about 75 per cent. White Pine, balance Norway and Spruce. Address

ERRINGTON & ROSS,
Turbine, Ont.

CURRENT TRADE CONDITIONS.

ONTARIO.

The lumber trade enters upon the month of September with bright prospects. Business is good, and there is every indication of a steady increase in the demand during the next two months. Offerings of white pine are not large, for manufacturers realize that the situation is a strong one and that there is little probability of prices declining very much from the present basis. Building operations continue to cousume large quantities of lumber, thus keeping the retailers constantly in the market in order that their stocks may not become too badly broken. From August 16 to August 25 the building permits issued in Toronto represented an expenditure of upwards of $280,000. Many of the structures which were started in the early spring are now nearing completion, which is reflected in an increased call for finishing material. So far this does not seem to have greatly benefitted the hardwoods, which, while steady in price, are not moving as briskly as pine and hemlock. There is, however, a very hopeful feeling even among the hardwood manufacturers, and more activity is likely to be seen before many weeks. Maple and birch flooring is in good demand and prices are firmer than earlier in the year, due, in part at least, to the higher prices prevailing in the United States.

MANITOBA AND BRITISH COLUMBIA.

Two factors closely affecting the prosperity of the Northwest have, during the past week, made very satisfactory advancement towards becoming a reality. One of these is the safe garnering of the largest yield of wheat which this rich country has yet produced, estimates ranging as high as one hundred million bushels;

the other is the awarding of the contract for the construction of nearly three hundred miles of the Grand Trunk Pacific Railway from Portage la Prairie westward. What a production of one hundred million bushels of wheat means to the Northwest is not easily overestimated—a monetary value of perhaps $70,000,000. The expenditure for the section of the Grand Trunk Pacific mentioned above will probably be $4,000,000, and it is gratifying to learn that the contractors are to commence work immediately. This undertaking will have an important influence on commercial activity in Canada, and especially in the West. The lumber trade will be greatly benefitted, for large quantities of timber will be used in construction. The present demand for lumber is active, dealers are busy and most of the mills are operating to their full capacity. Keen interest is shown in the meeting of British Columbia manufacturers to be held shortly for the purpose of adjusting lumber prices and endeavoring to agree upon a basis which will give the producer a fair profit.

UNITED STATES.

Salesmen who are on the road are not finding it difficult to sell lumber; the demand is quite strong and prices firm. Offers below the market are very seldom made, for the buyer knows about as well as anyone that conditions are of the most healthy character and that there is no reason why the seller should make any concession of importance. The wheat crop has been harvested and the weather has been most favorable for the growing of corn. In addition to this feature, the iron and steel industry is enjoying a period of great prosperity. A heavy consumption of lumber during the balance of the year is indicated and prices are very likely to seek a higher level. The northern pine production in the lake region from Duluth to Saginaw has been practically disposed of and is now in the hands of dealers. The scarcity of the lower grades has turned attention to the better qualities, which are already reported to be getting scarce at Buffalo and Tonawanda. Hemlock lumber is doing better than in any previous season, large quantities of dimension and coarse inch going into consumption for building purposes. In Pennsylvania the demand is so strong that another advance of one dollar is contemplated. Spruce continues to advance in price. Ordinary frames are being sold at $23.50 on Boston rate of freight, and 10 inch random at $26. The tendency is distinctly upward. The demand for pulp wood is an influential factor in the spruce market and large areas of standing timber have been acquired by the pulp manufacturers.

The two best sellers among the hardwoods are oak and birch. The latter is steadily coming into prominence for interior finish and is now being used to some extent instead of oak. Basswood continues to show weakness. Lath still exhibits remarkable strength. Wisconsin Valley manufacturers are now quoting No. 1 white pine at $4.25.

GREAT BRITAIN.

Recent views expressed by British importers are of a more optimistic character and in general business there has been a slight improvement. The textile industries are gradually getting into better shape and this will sooner or later benefit the lumber trade. Reports are current of contracts closed with leading importers and it seems to be generally believed that shippers have given a very slight concession. A dealer who recently returned from Canada speaks very hopefully of the spruce market, which he expects to recover materially before the end of the year. A few sales of 3×9 third and fourth qualities have been made at £8 10s. and £8 per standard respectively c.i.f. London. The stock of spruce in Liverpool is not very large and is not likely to be greatly increased during the balance of the season. At Cardiff, Hull and other ports stocks are below the average, which will give the seller a decided advantage when the market becomes more active. There is a good demand for battens and small boards. A Hull correspondent states that Quebec pine has advanced 10s. per standard, second quality now being quoted at £21.

A saw mill at Waterford, Ont., owned by Richard Robinson, was burned a few days ago.

STOCKS AND PRICES.

Wm. Cowan & Co.'s saw mills, Prince Albert, N.W.T., closed down last week, having exhausted their supply of logs.

Donald Fraser & Sons, of Fredericton, N.B., whose Aberdeen mill was burned recently, have arranged to have their logs sawn at the Warner mills, St. John.

Pine piece stuff in Chicago is up $1, joists 50 cents to $1.50, timber $1 to $2, common boards $1, stock boards 50 cents to $1. Good lumber is up $2 to $5, and on 1½ to 3-inch uppers $8 more is asked.

The Pigeon River Lumber Company, Port Arthur, Ont., recently shipped a cargo comprising 700,000 feet of lumber to Saginaw, Mich. This is the first cargo that has been shipped from Port Arthur to an American port for several years.

Messrs. Clairmonte, Man & Company, Barbados, say of the lumber market: There have been two arrivals with lumber during the fortnight. The demand for both white pine and spruce has fallen off. Last sale of white pine on the spot was at $22.60 per M for merchantable and $16.00 for second quality. Last sale of spruce on the spot was $21.00 per M for merchantable, and $15.00 for second quality.

The following is the probable cut this season of several of the large Georgian Bay firms: Loveland & Stone, Cutler, 30,000,000 feet; Moulthrop Lumber Company, Johns Island, 20,000,000 feet; Eddy Bros. & Company, Blind River, 20,000,000 feet; S. O. Fisher, Blind River, 15,000,000 feet; McArthur Bros. Company, Little Current, 25,000,000; T. G. Burtis, Thessalon, 20,000,000 feet; Holland & Graves, Byng Inlet, 38,000,000 feet.

CANADIAN LUMBER SHIPMENTS.

From Halifax, N. S.: Barque Federal, for Port Talbot, G. B., 244,386 ft. birch deals, value $4,112; 374,405 ft. spruce deals, value $7,045, by W. M. McKay, agent.

A SPLENDID ROUTE.
The Wisconsin Central Railway is justly termed the "Sportman's Line" because it reaches into and through the very heart of the choicest hunting grounds in America.
The very best wild fowl shooting of the entire North is reached ONLY by this line. Hundreds of beautiful lakes abounding in wild rice and celery attracts myriads of ducks and geese and afford the finest kind of cover and the choicest shooting to be found the country over.
The Wisconsin Central Railway caters especially to the sporting public and during the various seasons for hunting and fishing furnishes daily information to its patrons as to local conditions anywhere along its lines upon application to the nearest ticket agent. It also arranges its train service with special reference to the convenience and comfort of sportsmen, and its employes are constantly on the alert to make travel over their lines pleasant and comfortable.
This line offers the best route between Chicago, St. Paul, Milwaukee, Minneapolis or to Lake Superior points via Ashland, Wisconsin.

TIMBER LIMIT TRANSACTIONS.

It is announced that the Bayless Pulp and Paper Company, of Binghampton, N.Y., has concluded a deal whereby it comes in possession of three hundred square miles of spruce timber on the River St. Anne, province of Quebec. The purchase was made of the Seminary of Quebec, an old Catholic institution, and the amount paid was one million dollars. The Seminary of Quebec received its charter from the King of France and it was later confirmed by the English. The deal has been progressing for some time, and it is announced that the syndicate will establish mammoth paper and pulp mills in the vicinity, and use the timber in making wood pulp.

James C. Wright sold at auction at Hopewell Hill, N.B., on August 18th, his 800 acres of timber land—with saw mill—and the standing timber on a fifty-acre lot adjoining, the buyer being Warren Downey, of Cape Station, who secured the property for $16,050. The property is situated at Memel, four miles from Hopewell Hill. The general impression is that it sold well.

On some date on or between September 15th and 20th the transfer of 166,000 acres of timber land, mills, etc., from the William Richards Company, of Chatham, N.B., to the International Paper Company, of New York, will be made. So far as can be learned the price to be paid will be between $600,000 and $750,000. The property which the Americans are purchasing gives them control of all of the Richards Company's business on the Miramichi, and they will therefore retain their mill property at Campbellton. The property to change hands includes 166,000 acres of timber land on the Taxis river, the Richards Company's mills at Boiestown and Chatham, and lumbering equipment.

The Wolverine Land & Lumber Company, of Menominee, Mich., are said to be negotiating for the Eddy-Glynn tract of timber land on the Whitefish and Spanish rivers, containing about 100,000,000 feet of pine. Cruisers recently went over the territory on their behalf.

Several Duluth lumbermen, including John McAlpine, Henry Turrish, W. H. Cook, William O'Brien and the Lammers Bros., of Stillwater, are said to have recently disposed of some 260,000,000 feet of pine timber, situated north of Pelican Lake, to the Weyerhausser interests. The price is understood to have been about $7 per thousand.

DEMAND FOR BOX SHOOKS.

Mr. G. Eustace Burke, Canadian commercial agent in Jamaica, writes to the Trade and Commerce Department urging lumbermen in Canada to try to catch the orders for orange and pineapple box shooks, which are needed in great quantities in the southern island. The orange season will shortly be in full swing and the demand will be very active. So far the United States shippers have been able to place their goods almost exclusively.

McNutt's saw mill at Tay Creek, N.B., was destroyed by fire recently, the loss being about $4,000.

The box factory of the London Box Manufacturing & Lumber Company, London, Ont., was destroyed by fire last week, the loss being about $35,000. F.G. Rumball is heavily interested.

A dispatch from Quebec states that the saw mills and lumber yard of Price Bros. & Company at Metabetchouan, Que., was burned on the 26th inst. The loss, about $40,000, is said to be fully covered by insurance.

The saw mill of the Newville Lumber Company, Newville, N. S., with over a million feet of lumber, was destroyed by fire on August 26th. The loss will be in the vicinity of $59,000, about half of which is covered by insurance.
